vi.

I.—PUBLIC SCHOOLS.

1.—School Population—Attendance.

School Population.

The school population of the province, as ascertained through the assessors, is as follows:

Year,	School age.	School population.	Pupils registered, under 5.	Pupils registered, 5 to 21.	Pupils registered, over 21.	Total number of pupils registered.	Average attendance.	Percentage of average attendance to total number attending school.

From the statistics given it will be seen that the number of pupils in the 4th and 5th Ferms has been steadily increasing. There is also a very gratifying increase in the number studying History, Geography and Composition. The provision in the regula tions of 1885, whereby Canadian history was made compulsory for entrance to the High Schools, has led no doubt to a better knowledge of these great events which affect the destiny of the Dominion, which cannot fail, on account of their importance, to be stimulating to the patriotism of all pupils attending the schools of the Province.

Temperance and Hygiene.

It is also worthy of notice that the number of pupils receiving instruction in Temperance and Hygiene has increased from 33,926 in 1882, to 202,434 in 1896. Having regard to the great importance of the knowledge of physiology and the injurious effects of alcoholic stimulants on the human system, provision was made by statute in 1886 for placing this subject on the course of study for Public Schools. Instruction was also provided under departmental regulation for teachers-in-training at County Model Schools and Normal Schools, to be followed by an examination as an essential pre-requisite to their final recognition as duly qualified teachers. In 1893, this subject was made compulsory for entrance to High Schools and Collegiate Institutes, so that no pupil who pursues his studies as far as the 5th Form can fail to be reasonably well acquainted with the conditions on which his health and physical vigor depend, as well as with the dangerous tendency of stimulants and narcotics to produce weakness and disease.

Kindergartens.

The system of Kindergarten instruction, first introduced into Ontario in 1882, and subsequently made part of the School System of the province, by the Public Schools Act of 1885, has met with encouraging success. A report of the pupils receiving instruction in this way was first made in 1892. This report showed that in the short space of ten years, 66 Kindergartens were established, with 160 teachers, attended by 6.375 children under 6 years of age. In 1896 the number of Kindergartens had increased to 97, with 202 teachers, attended by 10,174 pupils under 6 years of age.

Night Schools

The whole number of Night Schools aided in 1896 was 21, the number of teachers 41, and the number in attendance 1,349. This number does not include the attendance upon the classes established by Mechanics' Institutes and Art Schools.

Classification.

From a study of the classification of High Schools and Collegiate Institutes, two or three very striking changes in the tendency of higher education may be worthy of notice. For instance, in 1867, only 1,283 pupils or 23 per cent. of the whole number studied commercial subjects such as Bookkeeping; in 1896 this subject was taken by 13,068 pupils or 53 per cent. of the whole attendance. In 1867, 5,171 pupil or 90 per cent. of the whole attendance studied Latin; in 1896 the number of pupils in Latin was 15,526, about 63 per cent. of the number in attendance. In 1867, 15 per cent. studied Greek; in 1896 only 6 per cent. were engaged in studying this subject. In 1867, 38 per cent. of pupils studied French and none studied German; in 1896 these numbers had increased to 55 per cent. and 18 per cent. respectively. There also has been a large increase in the number studying Drawing; the total in 1867 being 676, and in 1896 13,468. Vocal Music is taught in 5 schools.

Diffusion of High School Education.

When the High School System of the Province was first inaugurated, its primary object was to prepare pupils for the learned professions and especially for the University. While in that respect our High Schools amply fulfil their original purpose, in later years the course of education which they provide has been considered a desirable qualification for various other pursuits in life. Many young men in preparing for mercantile life or for agriculture take advantage of the High School, perhaps not so much because of the direct training which it gives for their intended calling as for the superior culture which it provides. In 1872, 486 High School pupils, when they finished their High School education, entered mercantile life. In 1896 the number had increased to 1,325. Similarly, 300 High School pupils left the High School for agricultural pursuits, and in 1896, 1,139 pupils pursued a similar course. In all, the High Schools gave to mercantile life and to agriculture in 1896 2,464 pupils of well-recognized educational standing, and to the Universities and learned professions the same year, 959. The whole number who left the High School for mercantile life since 1872 was 21,235, and for agriculture, 16,737.

VI.—TECHNICAL EDUCATION.—PUBLIC AND FREE LIBRARIES, ARF SCHOOLS AND SCIENTIFIC INSTITUTIONS, ETC

The Act of April, 1895, changing the name of Mechanics' Institutes to Public Libraries and empowering the Directors of Mechanics' Institutes, in cities, towns and incorporated villages, to transfer Libraries and Reading Rooms to Municipal Councis, has been very successful.

I directed the Superintendent, when inspecting Libraries, to encourage the establishment of Free Libraries throughout the Province to show that the liberal grants from the Legislature for Libraries are from the people's money, and that the people should have the advantages derived from it, that it is as much my duty to provide education for young people after they leave school, as it is to provide education for them as pupils in our schools; also, to refer to the prosperity of manufacturers in Europe and the United States where Free Libraries have been established and young people can obtain books relating to their various occupations free of charge; that my efforts in this direction have been successful is shown by the annexed tabular statement.

In 1883 we had only 12 Free Libraries and now we have 78 Free Libraries, and several other Public Libraries will be Free after the 1st of January, 1898.

The following abstracts show the progress that has been made in disseminating literature by means of Public Libraries throughout our Province during the past fourteen years.

In 1883, 93 Mechanics' Institutes and Free Libraries reported; in 1897, 323 Libraries reported; 37 Libraries have not yet sent in their reports, and 8 new Libraries have been incorporated since 1st May, 1897. Total 368.

In 1883, 251,920 volumes were issued; in 1897, 2,157,965 volumes were issued, and the assets have increased from \$255,190 to \$844,692.37.

During the past fourteen years (1883 to 1897) the total number of volumes issued in Mechanics' Institutes and Free Libraries was 13,938,893, and the amount expended during that period for library purposes was \$1,728,658. During the past fourteen years we have also made great progress in Art Education, 170 gold, silver and bronze medals have been awarded, together with 2,630 Full Teachers' and 54,265 Proficiency Certificates in the various branches of Art Education.

Abstract showing the Progress of Mechanics' Institutes and Free Libraries from 1883 to 1897 inclusive.

IX.—GOVERNMENT GRANTS TO EDUCATION.

The gross amount expended by the Education Department for all educational purposes since 1867 was \$15,114,503. Of this sum \$7,372,804 were divided among the public, separate and other schools, to meet the annual expenditure for teachers' salaries and other purposes; \$2,722,435 were spent for the training and examination of teachers of Public Schools, at Normal Schools, County Model Schools and Teachers' Institutes and for the inspection of schools; \$2,492,564 were paid directly for the support of High Schools, and \$220,277 indirectly for the benefit of High Schools in the way of inspection and the training of High School teachers; \$1,246,611 were paid to superannuated teachers, and \$1,059,812 were paid in aid of technical education. Owing to the liberality of the Legislature, there has been a steady increase in the grant made for education during the last 25 years.

XII.—ARBOR DAY.

The efforts made by the Department to secure the planting of shade trees and the cultivation of flowers in the school grounds, were heartily supported by teachers and trustees. Arbor day has now become one of the most interesting and profitable holidays of the year. Since 1885, 254,122 trees have been planted, 15,337 of these in 1896.

I have the honor to be,

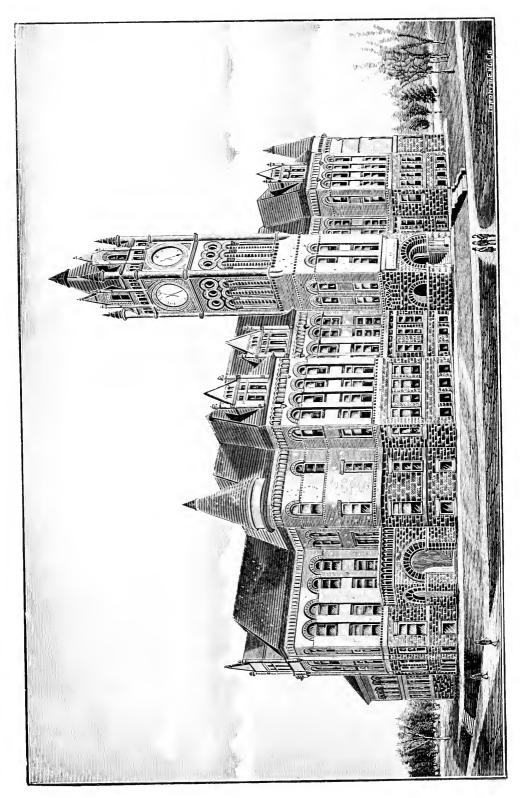

Your Honor's obedient servant

EDUCATION DEPARTMENT,

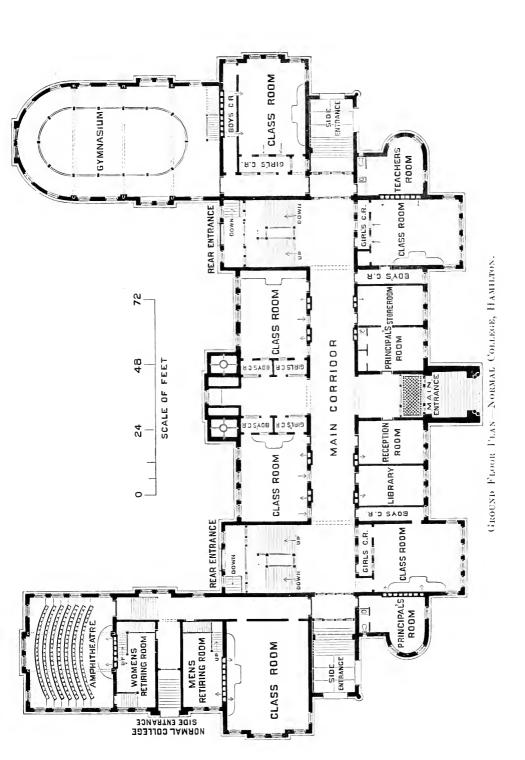

GEO. W. ROSS,

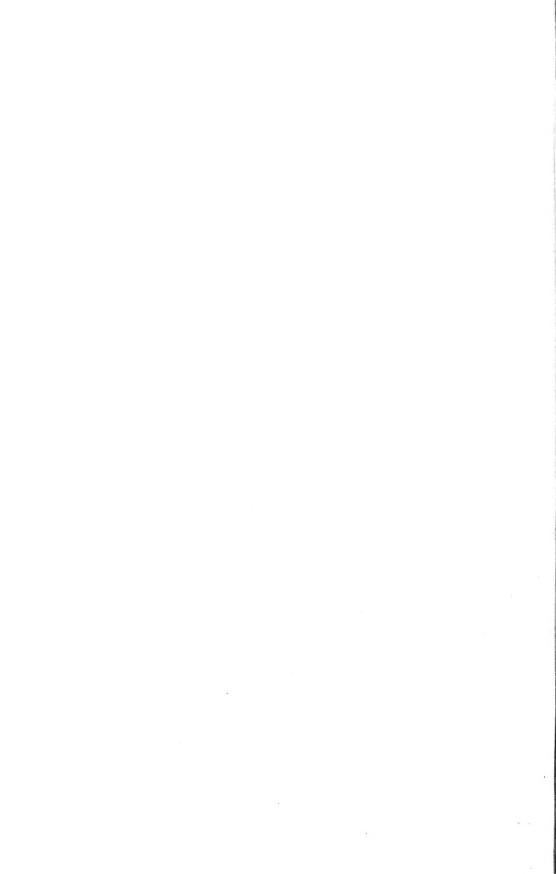

TORONTO, December, 1897.

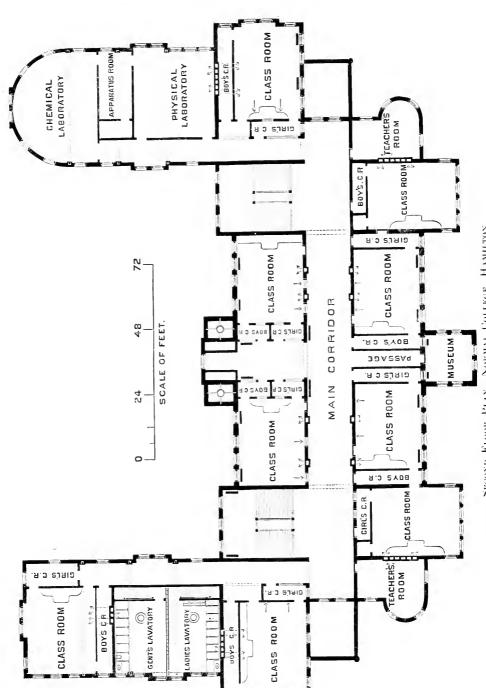

Minister of Education.

APPENDIX B.—PROCEEDINGS FOR THE YEAR 1897.

1. ORDERS IN COUNCIL.

- 1. Wm. Pakenham, B. A., Appointed Registrar of the Educational Council and Chairman of the Boards of Examiners (13th January, 1897).
- 2. DAVID BOYLE APPOINTED CURATOR OF THE ARCHÆOLOGICAL MUSEUM OF THE EDUCATION DEPARTMENT (27th May, 1897).
- 3. Leave of Absence Granted John Grainger (9th July, 1897).
- 4. AGREEMENT WITH COPP, CLARK CO. (Ltd.) AND WILLIAM BRIGGS FOR THE PUBLICA TION OF THE HISTORY OF CANADA (21st July, 1897).
- 5. Appointment of John F. Sullivan to the Ottawa Model School Staff (8th September, 1897).
- BY-LAW, MUNICIPAL CORPORATION OF THE VILLAGE OF RICHMOND HILL RESPECTING APPROPRIATION OF CERTAIN MONEYS FOR THE ERECTION OF A HIGH SCHOOL BUILD-ING (3rd November, 1897).
- 7. Leave of Absence Granted to Dr. J. G. Hodgins (10th November, 1897).

II. MINUTES OF DEPARTMENT.

- REGULATION RESPECTING EXTENSION OF THIRD CLASS OR DISTRICT CERTIFICATES OF TEN YEARS' EXPERIENCE, APPROVED (28th January, 1897).
- W. R. LIDDY GRANTED INTERIM NORMAL COLLEGE CERTIFICATE, APPROVED (15th April, 1897.
- 3. RE JAMES STEWART'S FOURTH FORM STANDING, APPROVED (27th April, 1897),
- 4. Leave of Absence Granted Eugene G. Quesnel, Approved (12th May, 1897).
- 5. Roman Catholic Separate Model School Established in City of Ottawa, Approved (20th May, 1897).
- 6. List of Text books for the Use of Public Schools, High Schools and Training Schools, Approved (17th August, 1897).
- 7. Respecting Circular No. 50 to Inspectors and High School Principals, Approved (17th August, 1897).
- 8. Wm. Gamble Awarded Second Class Certificate, Approved (2nd November, 1897).
- 9. Ed. W. Jennings Permitted to Take Certain Subjects to Receive Fourth Form Standing, Approved (2nd November, 1897).

III. CIRCULARS FROM THE MINISTER.

Instructions to High School Inspectors with Respect to the Grading of High Schools.

School accommodation shall be considered as divided into four grades, according to the character and extent of the premises, school buildings and their equipment. Where, in Schools already erected, any part of the accommodations is used jointly by the High and Public Schools, the grading shall be one degree lower than if the Schools were separate. In determining the grades, the officers of the Education Department shall have regard to the following considerations:—

- (1) School Premises and Water Supply.—The school premises shall be not less than one acre in extent, easily accessible, not exposed to disturbing noises, and exclusively devoted to High School purposes. The grounds shall be properly levelled and drained and ornamented with trees, shrubs and flower beds; they shall be enclosed with a suitable fence, shall have separate entrances, recreation grounds, and walks for the sexes. The recreation grounds for the sexes shall be separated by a close board fence, wall or hedge. Provision shall be made for keeping the premises and grounds in good order. There shall be a well in the school premises properly protected against pollution, where there is no other source of water supply. Grades I and II shall be given only when the water supply is inside the building.
- (2) Closets.—The closets for the sexes shall be under separate roofs several feet apart, and properly screened from observation. Each closet shall contain four compartments, each provided with a door, for the first fifty pupils in attendance, and one for each additional fifty pupils. The boys' closet shall be built of glazed brick or similar material; or of wood, painted a dark color and sanded. Urinals, of slate or similar material, divided into compartments and properly situated, shall be provided for the boys, and separate and locked closets for the teachers. The closets and urinals shall be cleansed and disinfected at suitable intervals. Covered walks shall be laid from the door of the school building to the closets. A close, high board fence or wall shall be provided between the boys' and girls' side, from the closets to the school building, and the entrances to the closets shall be properly screened. In the case of Union Schools, the closets for High School pupils shall be separate from the closets for Public School pupils. Where the closets are inside the building the above conditions shall apply mutatis mutandis.
- (3) School Building,—The grading of the school building shall depend upon the site and the architectural appearance. In every school building there shall be separate entrances for the sexes with covered porches, and separate means of egress at the rear to the recreation grounds and closets. The High School building shall be separate from the Public School building, and at least thirty feet distant from the public highway.
- (4) Class-Rooms.—The class-rooms shall be conveniently arranged, well proportioned and oblong in shape. The ceiling shall be white, the walls a French gray or a light stone color, and the floors in good order. A superficial area of 12 square feet and a cubic air space of 250 feet shall be allowed for each pupil. In three-master schools or over, at least one separate class-room shall be provided for science teaching; in two-master schools one of the ordinary class-rooms may be used for this purpose, and in the larger schools the laboratories for Chemistry and Physics shall be separate. There shall be a hall or a class-room in which all the pupils can assemble. A movable fan-light shall be placed over each class-room door.
- (5) Teachers' Private Rooms.—There shall be at least one room for the private use of the teaching staff, of suitable size and comfortably furnished. Where the teaching staff is large, there shall be two or more private rooms, one of which shall be assigned for the accommodation of the female teachers.

- (6) Halls, Waiting Rooms, and Cap Rooms.—The halls shall be of suitable size, well lighted, and shall be so placed as to admit of separate entrances for the sexes to the waiting rooms, cap-rooms and class-rooms. The waiting-rooms and cap rooms for the sexes shall be conveniently situated with respect to the class-rooms and furnished with seats, lavatories, water taps or tanks and drinking cups, and all necessary appliances for hanging caps and cloaks. In buildings of two or more stories there shall be separate stairways for the sexes, easy of access and well guarded.
- (7) Desks and Blackboards.—There shall be a single desk for each pupil in attendance, The desks shall be of suitable size with movable seats and adjustable lids. There shall be a desk and chair in each class room for the use of the teacher, and at least two chairs for visitors. The laboratory shall be supplied with suitable tables for experimental work in both Physics and Chemistry. In the larger school special provision shall be made for teaching Biology and Physics. Single desks shall be graded I and double desks II, if there is suitable provision in each case for practical work in Science; otherwise, the grading shall be one degree lower. The blackboards shall be of sufficient extent and of good quality (slate preferred), properly placed in regard to light and distance from the floor, and furnished with troughs to hold chalk adust. There shall be a suitable supply of erasers for teachers and pupils.
- (8) Lighting, Heating and Ventilation.—The class-rooms shall be lighted from the left of the pupils, the lower edges of the windows being on a level with the heads of the pupils. The windows of every school building shall be adjusted by weights and pulleys. The windows shall admit of an adequate diffusion of light throughout the whole class-room. Grade I is given only when the lighting is from the left. The temperature of the class-room, halls, waiting rooms, cap-rooms and teachers' private rooms shall be not less than sixty seven degrees. Where stoves are used they shall be so placed and protected as to prevent discomfort to any pupil. Due regard shall be paid to the moisture as well as the temperature of the atmosphere, and provision shall be made for a complete change of air at least three times every hour. Grades I and II shall be given only in the case of schools heated with hot air, steam pipes or hot water pipes. The Gymnasium shall be heated and ventilated.
- (9) Gymnasium.—The sizes best adapted for a Gymnasium, having regard to the number of pupils, are 80x40, 70x35, 60x30. The windows in the sides of the building should be at least twelve feet from the ground; each window should be about three feet high by six feet long. They should be sufficiently numerous to furnish adequate light and easily adjustable for the purposes of ventilation. One end of the Gymnasium should be a dead wall without windows; the other end of the Gymnasium should contain the doors for entrance and either one large window or several small ones. The floor of the Gymnasium should be planked and a suitable supply of mattre-ses provided. The trapeze and flying rings should be in the central portion of the building and should be suspended from a point at least sixteen feet from the ground. The side rings should be suspended from a point thirteen to sixteen feet from the ground. The stationary gymnastic apparatus, and the stove-where one is used for heating-should be placed at the end of the building containing the doors and windows. A locker and racks and stands should be provided for the movable appliances when not used by the class. Private rooms should be provided where the pupils may make any desirable change in their dress.

The Grant on the grading of the school premises shall be distributed according to the following scheme:—

HIGH SCHOOLS AND UNIVERSITY MATRICULATION EXAMINATIONS.

Instructions to Presiding Examiners, 1897.

The Presiding Examiners are requested to peruse carefully the following instructions and see that they are fully carried out:—

- 1. Each Inspector, or such other person as may be appointed by the Minister, shall himself, in person, receive from the Department, or the Inspector, the examination papers, and shall thereupon be responsible for the safe keeping of the parcel containing the same, unopened, until the morning of the first day of the examination.
- 2. On the receipt of the bag containing the question papers the Presiding Examiner will see that the seal is intact. The bag can be opened by breaking the wire close to the seal.
- 3. The Presiding Examiner will satisfy himself that all necessary arrangements are made by the School Board in due time for the examination. If the trustees have not placed a clock in each room used for examination purposes the Presiding Examiner shall have power to hire the use of one for each room during the time required for the examination, and charge the same as part of the expenses of the examination.
- 4. The Presiding Examiner shall, if there is sufficient accommodation and if a sufficient number of papers has been received, admit candidates that through some oversight did not send their applications to the Inspector. The names of such candidates are to be added to the list. Their applications, when filled up, should be sent by the Presiding Examiner to the Inspector, and the required part of the fee with one dollar additional as provided, should be sent to the Education Department. The balance of the fees should be sent to the Board that bears the expense of the examination.
- 5. The Presiding Examiner shall exercise necessary vigilance at all times during the time candidates are engaged, and he shall not give his attention to any work other than that which pertains to his duties as Presiding Examiner. He shall take all necessary care to render it impossible for the instructions to candidates to be violated without his knowledge.
- 6. It is imperative that the regulations should be enforced by the Presiding Examiner and strictly observed by the candidates. In particular, the examination papers should be distributed, and the answer papers collected *punctually* at the time indicated in the time table.
- 7. Places shall be allotted to the candidates so that they may be at least five feet apart. All diagrams or maps having reference to the subjects of examination shall be removed from the room, and books, papers, etc., removed from the desks; all arrangements shall be completed, and the necessary stationery distributed at least filteen minutes before the time appointed for the commencement of the first subject of the examination, and at least five minutes before each other subject is begun.
- 8. No person except the Examiners and any necessary attendants shall be present with the candidates in any room at the examination; and, at least one Examiner shall be present during the whole time of the examination in each room occupied by the candidates.
- 9. The Presiding Examiner shall, as indicated on the time table, read to the candidates their duties, shall draw attention to any feature of them that may require special care during the examination, and shall be explicit in giving instructions to the candidates as to the manner in which the slips are to be attached to the envelopes. The instructions (5), (6) and (7) for candidates are also instructions to Presiding Examiners.
- 10. Punctually at the time appointed for the commencement of each examination, the Presiding Examiner shall, in the examination room and in the presence of the candidates and other examiners (if any), break the seal of the envelope containing the examination papers, and give them to the other examiners and the candidates. The papers of

only the subject or subjects required shall be opened at one time. Until the examination in the subject is over no examination papers, other than those which the candidates receive, shall be taken out of the room.

- 11. Punctually at the expiration of the time allowed, the Examiner shall direct the candidates to stop writing, and cause them to hand in their answer papers *immediately*, duly fastened in the envelopes.
- 12. The Examiner shall keep upon his desk the certified list of the candidates, and as each paper in any subject is handed in, he shall check the same by entering the figure "1" opposite the name of the candidate, on the form provided. After the papers are handed in the Examiner shall not allow the envelopes to be opened, and he shall be responsible for their safe-keeping until transmitted to the Education Department, or placed in the hands of the Presiding Examiner.
 - 13.—(a) Rulers are not to be used by candidates for Drawing.
- (b) At the examination in Reading for Form I. each candidate shall read from the High School Reader one passage of not less than thirty lines, selected by the Examiners, and another from any book chosen by himself,
- (c) At the examinations in Botany of the First and Third Forms, the Presiding Examiner shall himself provide the specimens to be submitted to the candidates, in accordance with sealed instruments from the Education Department. Two plants will be submitted to the candidates each examination, one for classification and one for description. In the classification of the former, candidates will be allowed to use their floras (High School Botany, Part II). The plant for description shall not be one of those fully described in (H. S. Botanical Note Books, Parts I. and II.,) and in the examination of Form I. it shall belong to one of the prescribed orders.
- (d) At the examination in Biology for Form IV., and for Honor Matriculation, the material for examination will be sent from the Education Department, and will consist of two plants, a microscopic section, and an animal. The plant designated "A" is to be identified by means of the flora. Twenty minutes shall be allowed for this operation. The text-books shall then be taken from the canadates, and the paper with the plant designated "B," the animal and the microscopic section distributed. Each candidate is to be allowed the use of a compound microscope for twenty minutes during the second period.
- (e) At the examination in Practical Chemistry for Form IV., the material for determination shall be sent from the Education Department, and shall consist of one pure simple salt. In the qualitative analysis of this salt the candidates shall not be allowed the use of text-books, analytical tables, notes, or charts. Places shall be allotted to the candidates so that each one shall be at least ten feet away from any other candidate. Each candidate shall have exclusive use of one set of reagents, apparatus and lamp while at work. If the number of candidates should exceed the accommodation of the laboratory, the candidates shall be examined in sections, and the greatest care shall be taken that those who have examined the salt shall hold no communication with those who have not yet done so.
- (f) In Stenography, the candidates shall occupy o room separated from the candidates at the other examinations. The Presiding Examiner shall read the six hundred words to be dictated at a speed of fifty words per minute, and shall allow the candidate the balance of the hour for transcription. The matter is separated by vertical lines into groups of thirty words each. The extracts must not be read through to the candidates before the dictation commences. The Examiner should practise beforehand, reading at the required speed, that his dictation may be uniform. The candidate must enclose both his shorthand notes and the transcription.

REPORTS, ETC.

14. The Presiding Examiner shall report to the Education Department at the close of the examination any particulars in which the instructions, etc., were not observed, and he

shall mention any facts regarding the examination that he deems expedient to have brought before the Board of Examiners. The Presiding Examiner and his Assistants shall sign a declaration stating that in all other respects the instructions and regulations were fully complied with.

- 15. The Presiding Examiner shall indicate in his report to the Department the candidates who were placed in the several rooms respectively, and shall also send a diagram of the rooms on the form provided, showing the position occupied by each candidate and the Presiding Examiner during the examination.
- 16. The Presiding Examiner shall not arrange the answer papers according to subjects, but shall arrange them so that all the answers of each candidate for each Form shall be sent together and in the order that their names appear on the list of candidates for the examination. To facilitate this, elastic bands have been supplied, one for each candidate's set of answers.
- 17. The prompt return to the Education Department of the answers at the close of the respective examinations is essential, and may be greatly facilitated if the answers are sorted at the close of each day's examination. All reports should be sent by post on the respective days that the answers are forwarded and in no case should they be enclosed in the bag containing the answers.
- 18.—(a) The answers of the candidates taking the Form I. examination shall be returned at the close of that examination in the bag marked with blue.
- (b) The answers of the candidates taking Form II. examination shall be returned at the close of that examination in the bag marked with red, those for the Commercial Diploma being placed in a separate parcel.
- (c) The answers of the candidates for Forms III. and IV. examinations shall be returned at the close of those examinations in the bag marked with green.
- (d) The answers of candidates for scholarships shall, for Forms III. and IV., be made up in a separate parcel before putting them in the bag mentioned for transmission to the Department.
- (e) Each bag shall be so folded and tied that the words "The property of the Education Department" will be outwards. The shipping tag should be securely attached to the strap on each bag.
 - (1) All express charges must be prepaid, and no Commercial value should be given.
- (g) All surplus examination papers may be given at the close of the examination to the Principal of the school.

REMUNERATION OF PRESIDING EXAMINERS.

- (1) The Treasurer of the High School Board, on the certificate of the Public School Inspector, shall pay all the expenses of the examination, including the sum of four dollars a day and actual travelling expenses, for the Presiding Examiners.
- (2) If an examination is held at a Public School, the Treasurer of the Public School Board shall, upon the order of the Inspector, pay all the expenses of the examination.

INSTRUCTIONS FOR CANDIDATES.

- 1. Each candidate shall satisfy the Presiding Examiner as to his personal identity before the commencement of the second day's examination, and any person detected in attempting to personate a candidate shall be reported to the Department.
- 2. Candidates shall be in their allotted places before the hour appointed for the commencement of the examination. If a candidate be not present till after the appointed time, he shall not be allowed any additional time. No candidate shall be permitted, on any pretence whatever, to enter the room after the expiration of an hour from the commencement of the examination.

- 3. No candidate shall leave the room within one hour after the distribution of the examination papers in any subject; and if he then leave he shall not be permitted to return during the examination on such subject.
- 4. Every candidate shall conduct himself in strict accordance with the regulations. Should he give or receive any aid or extraneous assistance of any kind, in answering the examination questions, or should he leave his answers exposed so that any candidate may copy from him he will forfeit any certificate he may have obtained. He shall also be debarred for two years from writing at any examination conducted by the Education Department.
- 5. Candidates are reminded that should any candidate be detected in talking or whispering, or making signs to another candidate, or in copying from another, or allowing another to copy from him, or in having in his possession, when in the room, any book, notes, or anything from which he migh derive assistance in the examination, it shall be the duty of the Examiner if he obtain clear evidence of the fact at the time of its occurrence, to cause such candidate at once to leave the room; and such candidate shall not be permitted to enter during the remaining part of the examination, and his name shall be struck off the list. If, however, the evidence be not clear at the time, or be obtained after the close of the examination, the Examiner shall report the case to the Department.
- 6. Candidates are also reminded that the Presiding Examiner is not allowed to make any explanation or other statement regarding the probable meaning of any question or to give any advice as to what questions should be undertaken by the candidates or how any question should be answered.
- 7. Should any error appear to have been made in any question paper no attention shall be drawn to it during the time by either the Presiding Examiner or any of the candidates. Candidates may, however, at the end of the examination period submit the matter to the Presiding Examiner who, if he considers it necessary, will report on the matter to the Education Department at the close of the examination.
- S. Every candidate shall write the subject of examination very distinctly at the top of each page of his answer papers, in the middle. If a candidate writes his name or initials, or any distinguishing sign or mark on his answer papers or uses any other paper or ink than those provided by which his identity might be disclosed his exam nation will be cancelled.
- 9. Candidates, in preparing their answers, shall write on one side only of each sheet and shall mark the sheets in each subject in the order of the questions, as 1st, 2nd, 3rd, etc.; and on the last sheet shall write distinctly the total number or sheets enclosed in the envelope, fold them once across, place them in the envelope provided by the Department, write on the cutside of the envelope the subject of examination only, and on the slip provided, his name in full (surname preceding), and then securely fasten the slip to the envelope, as instructed by the Presiding Examiner.

EXTRACTS FROM INSTRUCTIONS TO APPLICANTS AND INSPECTORS.

First Form examination, \$2. Second Form examination, Part 1, \$2; Parts I. and II., \$5; Third Form examination, \$5. Fourth Form examination, Parts I. and II., each \$3; taken together, \$5. Commercial Diploma examination \$4, (part \$2). For candidates for examination in the additional subjects, for the purpose of completing a course for pass Matriculation into any University or Learned Profession, the fee shall be \$2. If the fees for a candidate amount to more than \$5, only \$5 will be required.

Attention is directed to the scale of fees to be paid by condidates. When the fee is \$5, \$4, \$3 or \$2, the amount to be sent to the Department is \$3, \$2, \$2 or \$1 respectively. The balance of fees received is to be forwarded to the High School Board or other body that bears the the expense of the examination.

Applications will not be received by the Inspector after the date mentioned, and candidates are reminded that they should in no case forward their applications to the Education Department. If the candidate should, through an oversight, neglect to have

his application duly sent to the Inspector, he may present himself at the examination, when the Presiding Examiner is at liberty to admit him, provided there is the necessary accommodation, and that a sufficient number of examination papers has been forwarded. An additional fee of \$1 will be exacted by the Presiding Examiner from a candidate who presents himself in this way.

INSTRUCTIONS OF THE EDUCATIONAL COUNCIL APPROVED BY THE MINISTER OF EDUCATION AND THE COMMITTEE OF THE SENATE OF THE UNIVERSITY OF TORONTO.

DUTIES OF EXAMINERS.

- 1. Each Examiner shall be required to discharge all duties pertaining to his office, and no duty which an Examiner is appointed to perform shall be delegated to another Examiner without the approval of the Educational Council. He shall designate all examination papers according to the Course of Study for which they are prescribed.
- 2. The Examiners in the case of the combined examinations of the Elucation Department and the University shall be present at the beginning of the reading of the answer papers. Each Examiner shall discuss with the Associate Examiners in his section the character of the answers intended by the questions, and especially the value of incomplete or imperfect answers, so as to insure, as far as possible, uniform marking. In cases of differences of opinion on any point the decision of the Examiner shall be final.
- 3. In the case of the combined examination aforesaid the Examiners shall make such reports as will enable the Council to settle the results of the examinations in accordance with the regulations of the Education Department and of the Senate of the University respectively.
- 4. The Examiners, or such of their number as may be appointed for that purpose by the Council, shall settle all doubtful and special cases, and upon recommending that a cendidate in such cases be allowed his standing, shall so certify in the book of marks. They shall read appeals, determining and entering the results in the manner herein prescribed.
- 5. The Examiners shall report to the Council the pseudonyms of all Associate Examiners whose work appears to have been performed with marked carelessness or incapacity, or who have shown any substantial disregard of the Instructions of the Council.

DUTIES OF EXAMINERS.

- 6. The Registrar of the Council shall preside at all meetings of the Boards of Examiners. All cases of dispute at meetings of the Boards shall be settled by a majority of the Examiners.
- 7. During the reading of the answer papers the Registrar shall see that the instructions to Associate Examiners hereinafter mentioned are observed. He shall assign a pseudonym to each Associate Examiner and shall have power, in case of necessity, to transfer Associate Examiners from one section to another.
- 8. He shall exercise a general supervision over sorting, numbering and otherwise preparing the envelopes containing the answers, so that the answers shall be conveniently read by the Examiners and Associate Examiners; and, after the reading, he shall superintend the entering of the marks in the books by the clerks of the Department and the preparation of the books so that they may clearly indicate the subjects in which candidates have passed or failed.
- 9. He shall be present at the meeting of the Boards of any committee thereof called for the purpose of determining results, and shall furnish all necessary information.

10. He shall take the necessary steps in order that appeals may be read as speedily as possible in accordance with the Instructions of the Council.

DUTIES OF ASSOCIATE EXAMINERS.

- 11. The Associate Examiners shall be classified into sections according to the subjects of examination, and a chairman shall be appointed in each section by the council. The chairman shall have a general oversight of the work done in his section, and shall see that the regulations are carried out and that the marking is uniform. In the case of an emergency, as in the absence of a chairman of a section, the Registrar shall appoint a chairman protempore.
- 12. When, in the course of reading the answers, a section finds that the values assigned to the questions are unsatisfactory or that the Examiner has not followed the course of study prescribed by the Education Department or by the curriculum of the University of Toronto, it shall report through its chairman to the Registrar, who shall, in turn report to the Examiners of the department concerned, and shall obtain their decision on the point at issue.
- 13. No Associate Examiner shall have in hand more than ten papers at one time, nor shall he have more than one envelope open upon his table at one time, except in cases of suspected copying, in which case he shall return each sheet to its proper envelope. The papers shall be returned in the numerical order in which they are received. In cases of suspected copying, the Associate Examiner shall note on the face of the envelope "copying" see No....., question......
- 14. In the case of the papers in English grammar, literature and composition, one mark shall be deducted for each misspelt word and one mark for each instance of bad English. At all the examinations in arithmetic, either arithmetical or algebraical solutions shall be accepted.
- 15. In reading the answer papers each Associate Examiner shall mark distinctly in the left hand margin, the value assigned by him to each answer or partial answer, shall sum the total on each page at the foot of the margin and enter this total at the top of the next page; he shall place the result on the face of the envelope, indicating in the case of the papers in English grammar, literature and composition and deductions for misspelt words and incorrect English thereon, thus, e.g. grammar, 80—2 sp.; —4 f.s.—74. He shall also sign his pseudonym on the envelope of each paper examined.
- 16. Associate Examiners shall be in their respective places so that the reading may commence promptly at the time specified, viz., 9 a.m. and 2 p.m., and no Associate Examiner shall stop work before the hours of closing, viz., 12 noon and 5 p.m., without reporting to the Chairman of the section.
- 17. Associate Examiners shall refrain from all unnecessary conversation or other causes of disturbance and shall devote themselves strictly to the work of the examination; they shall not at any time enter the rooms of other sections unless when it is necessary to do so in entering or leaving their own rooms; they shall keep a record of the papers read each day and shall report the result of their work to the Chairman of their respective sections.
- 18. The work is confidential throughout. Should the identity of an examination centre or of any particular candidate be discovered by an Associate Examiner he shall report the fact without delay to the Registrar of the Council, or, in his absence to the Olerk of Committees who shall change the Associate Examiner, or make such other arrangement as he may deem expedient.
- 19. The instructions herein contained so far as they relate to the combined examinations of the Education Department and matriculation into the University shall be subject to amendment from time to time with the approval of the Education Department and the Senate of the University.

TEACHERS' READING COURSE.

Inspectors are requested to distribute this circular among the teachers in their inspectorate, and to do what they can to further the purpose for which the Reading Course has been established.

It is confidently hoped that teachers will read the books prescribed and take an active interest in everything which tends to develop a healthy, progressive spirit in professional work.

It will greatly assist in the reading of the books if teachers will form small reading circles for this purpose, and meet once a fortnight to discuss what they have read during the time.

Those who keep in touch with the spirit of progress are sure to grow and advance in their profession. Those who do not go forward will go backward.

The books prescribed for 1897 are the following:

Psychology applied to Teaching, Baldwin	rice	\$1	50
Education from a National Standpoint, Fouillèe	6.6	1	50
How Canada is Governed, Bourinot	"		00

Candidates for admission to the Normal Schools in August, 1897, and in January, 1898, will be examined on the same books.

REGULATIONS.

The Minister of Education may prescribe a Course of Reading for the teachers of Public Schools. The Course shall extend over three years and certificates for reading more than three books in one year shall not be granted by the Inspector. For the purposes of the Course the year shall correspond with the calendar year. A teacher may enter on the Course by taking any of the books prescribed for the year. The list of books for each year will be announced by the Education Department.

Any teacher who desires a certificate of having taken the Public School Teachers Reading Course shall make a synopsis of not less than ten or more than fifteen pages of each book read, and shall transmit the same to the Inspector of his district on or before the 30th cf June in each year. Such synopsis shall be accompanied by a fee of twenty-five cents and a declaration that the books prescribed for the year were read and that the synopsis submitted was prepared without assistance by the person signing the same.

The Management Committee of each Teachers' Institute shall appoint two persons, who, with the Inspector, shall form a Committee for determining whether the synopsis made by the teacher desiring a certificate indicates that the books have been read intelligently. The inspector shall issue a certificate for each book so read, on the form prescribed by the Minister of Education to every teacher whose synopsis has been found satisfactory. If a teacher is unable to read all the books prescribed for the year, or if his synopsis of any book has been rejected, he may substitute the books of the next year for those omitted or rejected.

Any teacher who submits to the Education Department certificates showing that he has satisfactorily read nine of the books prescribed, shall be entitled to receive from the Minister of Education a Diploma certifying to the completion of one full reading course covering three years. Additional diplomas shall be awarded to teachers who complete additional courses of three years.

TORONTO, January, 1897.

MEMORANDUM FOR PRINCIPALS OF SCHOOLS.

As it is represented that the granting of medals and prizes on the basis of the relative standing of candidates at the Departmental Examination is the means of withdrawing pupils from the High Schools which they should properly attend, the Department will not, hereafter, furnish the standing of High School pupils for the purpose of such awards.

Toronto, January, 1897.

TEACHERS' INSTITUTES.

Memorandum.

The attention of County Inspectors is called to the provisions of the Public Schools Act (81) and the Regulations (91 and 92) regarding Teachers' Institutes. There is no authority for holding more than one meeting in the year, which is to be held on a Friday and Saturday. The inspector is required to see that no additional time is taken from the legal teaching days, unless requested by a resolution of the County Council. As the school term of the last half-year is generally broken by Labor Day, Thanksgiving Day, and not unfrequently by Agricultural Fairs, it is recommended that the Institute should be held, if possible, during the first half-year.

TORONTO, January, 1897.

REGULATIONS OF THE EDUCATION DEPARTMENT WITH RESPECT TO THE STUDY OF DOMESTIC SCIENCE IN PUBLIC SCHOOLS.

APPROVED JANUARY 29TH, 1897.

- 1. The Board of Trustees in every city, town and incorporated village, may establish classes in domestic science for the purpose of giving instruction in cooking and sewing, subject to such regulations as may be issued by the Minister of Education from time to time. The instruction in cooking should be limited to pupils in the 4th and 5th Forms.
- 2. The equipment for classes in cooking should consist of an ordinary cooking stove, such as would be required in a family of ten persons. The table or tables for practice should be provided with at least ten small circular gas burners, or other suitable appliances, for the use of pupils. Other appliances should be similar to those found in a well equipped kitchen, such as a hot water tank, sink, cupboard for pots and dishes, groceries, vegetables, etc.
- 3. The class work should consist of demonstration lessons and actual practice in cooking under the direction of the teacher. The course should be completed in one year, but might be extended in the case of pupils whose progress was not satisfactory for a longer term. Each class should not exceed twenty-five pupils and should receive instruction for at least a full half day each week.
- 4. The course in domestic science should consist in the making and care of fires; the economical use of fuel; the polishing of stoves; dish washing and care of the kitchen and sinks; the use of disenfectants; the selection of food material as to quality, value and cost; how to purchase vegetables, meat and fish; the storage of vegetables, meat, bread and fruit. A course of demonstration and practice lessons in plain household cookery, including the cooking of fruit, vegetables, cereals, meat and fish. Easy lessons in the chemistry of food, their nutritive properties and digestibility. In the fifth form, the course of instruction might include lessons in canning fruit, making cake, pies, puddings;

lessons in invalid cooking, and the setting of tables. Such examinations might be held during the course, as the teacher in charge might consider expedient. The course in sewing shall consist of plain sewing, hemming, cutting and making of simple garments, knitting, darning, etc.

Course for Teachers.

- 5. After the First of January, 1898, no person shall enter upon the course of instruction for teachers who is not at least seventeen years of age, and who is not the holder of a Junior Leaving High School Certificate. The term shall consist of five days per week for at least thirt, five weeks. The course shall include (1) The Chemistry of Foods and Cooking; (2) Household Science; (3) Home Nursing and Hygiene; (4) Laundry Work; (5) Sewing, Drawing and Designing.
- 6. The Chemistry of Foods and Cooking should include the study of ferments, food adulterations and their tests, as well as their analysis in order to ascertain their digestability and nutritive properties. In other respects the course shall be the same as that prescribed for the fourth and fifth forms of Public Schools, but of a more advanced character.
- 7. Household Science should include (1) The House—its position, construction, aspect, drainage, ventilation; (2) Lighting-gas, oil, candles; management and cleaning of lamps; what to do in case of catching fire; (3) Heating and Ventilation-Open and closed fires, management and cleaning of stoves; necessity of fresh air; avoidance of draughts. Practical demonstration-model stove and brushes, brass, copper and steel cleaning; (4) Drainage and Dustbins-Construction and cleansing of drain pipes: back yard; destruction of refuse; cleaning sinks and grease taps, preparation and use of lime wash; (5) Water-Cleaning cisterns, taps, water bottles; use of filters; burst pipes and how to prevent; furred kettles. Practical demonstration-cleaning water-bottles and teapots, fur-preventers; (6) Furniture—Choice of, polishing, brushing; washing paint; hints on choosing and cleaning wall papers, carpets, mats, curtains, ornaments and pictures; (7) Arrangement of Bedroom-Bed and bedding, airing bed clothes; blinds; weekly and daily cleaning; precautions against insects; (8) Every morning's work—Occasional work, including cleaning windows, mirrors, table knives, spoons and forks, washing dinner and tea things. Practical demonstrations—cleaning spoons, forks, tumblers, etc.; (9) Fcod-Marketing; storing and cooking food; cleansing cooking utensils. Practical demonstration-jars, etc.; samples of rice, lentils, etc.
- 8. Home Nursing and Hygiene should include the study of the laws of health; emergencies and accidents; the preparation of food for invalids; sick room ventilation.
- 9. Laundry Work should include washing of flannels, table linen, body linen, cuffs and collars, colored prints, muslins, handkerchiefs; scalding; rinsing, bluing bed linen and towels; sprinkling, stretching and folding; plain ironing without the use of starch; starch making; starching and ironing shirts, collars and cuffs; recipes for making hot and cold starch; the use of alkalies, borax, washing crystals, acids, etc.
- 10. Sewing should include hemming, cutting, fitting and making of simple garments, study of texiles and fabrics, educational sewing, knitting, darning, millinery.
- 11. In July of each year an examination shall be held by examiners appointed by the Educational Council. Every candidate shall be required to give three demonstration lessons at this examination—one in Artisan Cooking, one in Invalid Cooking and one in Detecting the Adulteration of Food. Each demonstration lesson will be valued at 20 marks. A paper covering the course will also be submitted to be valued at 100. One-third of the marks obtainable for the demonstration lesson and one-third of the marks assigned to the written paper shall be required for pass.

ANNUAL DEPARTMENTAL EXAMINATIONS.

- 1. These examinations are specially designed for candidates for a teacher's certificate, or as a preliminary qualification for some other professional course of study. It is therefore desirable that those who are pursuing their studies for any other purpose should be allowed the fullest discretion with respect to these examinations.
- 2. Under Regulation 38 of the Education Department, the Principal of the High School has ample authority to make "such promotions from one Form to another as he may deem expedient." It is not intended that High School pupils should be required to take any Departmental Examination in order to be entitled to promotion. Such a test, apart from the expense to the pupil, would be objectionable on many grounds which must be obvious to every teacher. Although the Education Department has no desire to interfere with the discretion of any pupil as to the examinations he should take, or to prevent any teacher from giving such advice to pupils with respect to examinations as appears, in his judgment, to be for their best interests, it is to be distinctly understood that a Departmental examination is not considered a necessary part of any Public or High School course of study.
- 3. The Departmental examinations should not be taken as the chief test of the teacher's efficiency. Sometimes teachers are exposed inadvertently to the application of such a test by comparisons made with other schools before the annual spring opening; at other times trustees inconsiderately make such a test the chief basis of a teacher's promotion. A more correct view of the purpose of examinations on the one hand, and of the dignity and qualifications of the true teacher on the other would greatly assist in establishing standards of efficiency which would amply protect the good name of every well conducted school.

Тогонто, Мау, 1897.

MEMORANDUM FOR PRESIDING EXAMINERS.

- 1. In order to avoid any possible oversight or delay at the examinations, the Presiding Examiner is requested to read carefully the enclosed instructions and make himself familiar with the duties to be performed.
- 2. The confidential circular respecting the examinations in Botany of the First and Third Forms is enclosed, so that the Presiding Examiner may make himself acquainted with the special duties required.
- 3. The enclosed time-table must be strictly followed, and as stated in Instruction 8 for candidates, the paper to be used for all subjects, including Drawing and Bookkeeping, must be the kind authorized. Candidates are not permitted to bring into the Examination Hall ruled paper for the examinations in Bookkeeping. Attention is called to Instruction 14. The forms, with necessary directions, will be found in the bag which is not to be opened until the morning of the examination.
- 4. After opening the bag the Presiding Examiner is requested to arrange the envelopes containing the question papers in the order on which the subjects appear in the timetable, and thus prevent the distribution of papers at any time other than that mentioned in the time-table. Presiding Examiners are requested to forward to the Education Department the answer papers of each Form immediately on the completion of the examination in that Form.
- 5. In the case of centres having an examination in Science of the Fourth Form, the material required as mentioned in Instruction (d and e) will be sent in time for the examination in that department.
- 6. It is to be noted that whilst the examination in the Practice of Stenography for Commercial Diplomas requires a rate of 50 words per minute, that for Commercial Specialists' Certificates exacts 60. In both examinations the rate of transcription is 12 words per minute.

7. In view of the large number of candidates, and the importance of the interests concerned, Presiding Examiners are requested to aid the Department in having the Examinations carefully conducted.

TORONTO, May, 1897.

- 1. The accompanying reports, which will be confidential, should be filled up at the close of the academic year, and forwarded to the Department not later than the 5th July.
- 2. Except in form 10 (a) (to be returned in the same envelope) containing the alphabetical list of the names of candidates, no mark or word is to be used by which a a school can be identified.
- 3. The names of such students only, as in the judgment of the staff, are fit to pass in each subject and to obtain, where required, the aggregate of marks, should be reported.
- 4. No student is, however, debarred from writing at the examination, and every candidate, whether recommended or not, is required as heretofore to make the usual application to the Inspector. It is not intended, as appears to have been inferred in some instances, that all the candidates from a school should be entered on the confidential lists, unless the teachers believe that they all deserve to pass.
- 5. The names of the students to be recommended, regardless of the certificates for which they write, are to be arranged in the respective columns of forms 242 in the order of merit, and the percentage to which the candidate is believed to be entitled is to be placed opposite each name in the first column under each subject. The second column must not be used.
- 6. The percentage is to be based upon the judgment of those members of the staff who have been immediately engaged in the preparation of the candidates, the lowest percentage assigned being 33.
- 7. In determining the percentages to be assigned to candidates the Principal is left to his own discretion as to what tests are to be employed. It is assumed that the written examinations used for the purpose will be of such character, and will be held at such times, as are best adapted for training purposes.
- 8. It should be understood that while the relative standing of the candidates in the report is of far more importance than the percentage assigned to each, a correct estimate of the latter, so far as can be made, should be given.
- 9. For the information of Principals it may be stated that previous confidential reports were in many cases the means of preventing deserving candidates from failure, and in the interests of the candidates concerned the report should be made with due care.
- 10. No recommendations regarding the proficiency of candidates can be entertained other than those shown by the relative standing and percentages given in the confidential reports. Forms are supplied on application to schools sending students to the examinations.

LITERATURE SELECTIONS.

Examinations of 1898 and 1899.

HIGH SCHOOL ENTRANCE.

The following selections from the Fourth Book of Literature:

1898.—III. Loss of the Birkenhead; XI. The Evening Oloud; XII. The Truant; XIV. The Humble Bee; XXVI. The Face Against the Pane; XXVII. The Battle of Bannockburn; XXXIII. The Skylark; XXXIV. Death of Little Nell; XXXIX. A Psalm of Life; LI. The Heroes of the Long Sault; LVI. The Honest Man; LIX.

German.

1898.—Hauff, das Kalte Herz, Kalif Storch: Eichendorff. Aus dem Leben eines Taugenichts; Wilhelmi, Einer muss heiraten: Benedix, Eigensinn.

1899.—Leander, Träumereien (selected by Van Daell); Freytag, die Journalisten; Gerstacker, Germalshausen.

CIRCULAR TO INSPECTORS AND HIGH SCHOOL PRINCIPALS.

GENTLEMEN,—I have the honor to inform you that for the academic year 1897-8 the following modifications are made in the Revised Regulations;

PUBLIC SCHOOL LEAVING EXAMINATIONS

This examination will be conducted in 1898 by the High School Entrance Board of Examiners, and on the same course of study and under the same Regulations as in 1897. Botany will, therefore, not be required, and Physiology and Temperance will, as formerly, be one of the subjects of Examination. High School pupils are not eligible to write at this examination.

FIRST FORM EXAMINATION.

This examination, which is open to all pupils, will be conducted as heretofore, the course embracing Reading, Writing and Bookkeeping, Drawing, Geography, and Botany. First Form Certificates will have the same qualifying value for Teachers' certificates as Public School Leaving certificates.

JUNIOR AND SENIOR LEAVING.

Regulation 46 is amended so as to allow at the Form III. examination for Junior Leaving the following options:—

(a) French and Greek.

(b) German and Greek.

(c) French, German, and Ohemistry.

(d) French, Physics, and Chemistry.

(e) German, Physics, and Chemistry. (1) Botany, Physics, and Chemistry.

The obligatory subjects of Form III. for Junior Leaving are as already prescribed viz:—English Composition, English Literature, Ancient History, Algebra, Geometry and Latin.

Regulation 47 is amended so as to allow at the Form IV. examination for Senior Leaving the following options:—

(a) French and Greek.

(b) German and Greek.(c) French and German.

(d) French and Chemistry.

(e) German and Chemistry.

(f) Biology and Chemistry.

The obligatory subjects of Form IV. for Senior leaving are as already prescribed, viz:—English Composition, English Literature, Algebra, Geometry, Trigonometry, English and Ancient History, Physics, and Latin.

Candidates for Junior and Senior Leaving standing will be required to make 50 per cent. of the aggregate marks allowed in the subjects prescribed in each of the Forms or parts of Forms as well as one third in each subject; 67 per cent. of the aggregate will be required for honors.

The examinations in Botany and Biology in Forms III. and IV, will be equal in difficulty as near as may be to the examinations in the language or languages for which Botany and Biology are taken as options.

These modifications, it will be understood, make no change in the course or the percentages required by the University for matriculation.

SPECIALISTS.

The temporary provisions defined in Circular 2 for obtaining specialists' non-professional standing will be continued in 1898 to those who were candidates under the Regulations set forth in that circular. For all other candidates the provisions of the Revised Regulations (section 51) will govern.

NORMAL COLLEGE,

Candidates entering the Normal College in October of this year or those writing at the final examination in December of this year, may, if they prefer take the course in Methods set forth in Oircular 9. After December, 1897, every candidate for the Normal College examination will be required to take the regular course of training at that institution.

Education Department, Toronto, August, 1897.

DEPARTMENTAL REGULATIONS.

Approved August 17th, 1897.

TEXT-BOOKS AUTHORIZED FOR USE IN PUBLIC SCHOOLS, HIGH SCHOOLS, AND TRAINING SCHOOLS.

- 1. The text-books named in Schedule "A" shall be the authorized text-books for Public Schools. Pupils taking any optional subject in the Public School course may use the text-book authorized in such optional subject. The text books in French and German are authorized only for Schools where the French and German language prevails, and where the Trustees, with the approval of the Inspector, require French or German to be taught in addition to English.
- 2. The text-books named in Schedule "B" shall be the only authorized text-books in High Schools and Collegiate Institutes for the course of study prescribed in Form I., II., and III. At the option of the Principal and High School Board books authorized for use in the Public Schools may be used in Form I.
- 3. The text-books named in Schedule "C" shall be the authorized text-books for Model Schools, Normal Schools and the Ontario Normal College.
- 4. The text-books in Schedule "D" used in any school on the 1st July, 1897, and recommended by resolution of the trustees to be continued in use, shall be deemed as authorized in such schools until further notice.
- 5. For religious instruction, either the Sacred Scriptures or the Scripture Readings adopted by the Education Department, shall be used as prescribed by the Regulations of the Education Department.

MEMORANDUM.

COUNTY MODEL SCHOOLS.

Directions to Boards of Examiners.

- 1. The attention of Boards is directed to the provisions of Regulations (57-65) and to the information in the Model School Calendar.
- 2. If a Primary, Junior Leaving, or Senior Leaving Certificate is not presented, Regulations (45.49) will show the certificates that give the equivalent standing. It will be understood that a Form I, a Commercial, or a District Certificate, is accepted in lieu of a Public School Leaving Certificate and that a Form II Certificate or a Primary Certificate granted in 1896 covers a Part I of Form II Certificate.
- 3. Renewals (Regulations 87) are now limited to the County and cannot be endorsed for another County. It is presumed that each Board will consider the interests of the schools of the County. If Renewals are granted, the grounds in each case should be stated. The Renewals granted will include any certificate "extended" as provided for in the same Regulation.
- 4. It is recommended that a Renewal be granted, if requested, in the case of any certificate expired when the candidate made application to attend the Normal School but was informed that no more students could be admitted on account of lack of accommodation.
- 5. It will be the duty of the Board (Regulation 59) to grant no certificate to a candidate who will not be 18 years of age before the first of January next.
- 6. Answer papers with the Model School Principal's report, are to be retained by the Board. The former may be destroyed after the first of March following.
- 7. The Board is requested to fill out the Official Report with all details asked for, and to forward it to the Education Department not later than the 31st of December.

Toronto, Oe ober, 1897.

Apportionment of the Legislative Public School Grant for 1897.

The apportionment of the grant to the several municipalities is based upon the latest Returns of Population for the year 1896, and the division between the Public and Separate Schools on the average attendance of that year, as reported by the Inspectors, Public School Boards, and Separate School Trustees respectively.

While the Separate Schools will receive their portion of the grant-direct from the Department, that of the Public Schools will be paid, according to the schedule, through the respective County, City, Town and Village Treasurers.

The grant formerly made by County Councils as the equivalent of the Government grant has been dispensed with. The original intention of this grant was that it should be levied by uniform rate over the whole county. In practice, however, it was found in almost every case to be levied on the township, and thus as a matter of fact was a township rather than a county grant. Under the School Act of 1896 township councils are authorized to levy the sum of \$50 for each school, in addition to the sum of \$100 which they were authorized to raise under the Act of 1891. As the sum formerly levied by the county amounted to over \$30 per school, the increased contribution made by the township is less than \$20 in excess of what it formerly was. As the law now stands, every township council is required to raise \$15 for every school in the township. In the case of schools with an assistant teacher. \$100 additional is required for such teacher.

Education Department, Toronto, May, 1897.

2. ROMAN CATHOLIC SEPARATE SCHOOLS.

(1) Report of J. F. White, Esq., Inspector of Western Division.

SCHOOLS AND TEACHERS.

Situation of schools.	Number of school districts.	Number of uildings	Number of teachers.	Male teachers.	Female teachers.	Religious teachers.	Secular teachers.
Rural sections	62	63	82	14	69 ,	29	54
Villages	9	9	13 ^	1	12	5	8
Towns	23	24	65	1	64	50	15
Cities	9	44	182	24	158	175	7
Total, 1897	103	140	343	40	303	259	84
Total, 1896	104	140	341	44	297	257	84

As may be seen from the above table there has been very little change during the year in the number of schools and teachers. No new school has been organized this year, while one rural section—No. 6 Artemesia—has ceased to exist.

The Christian Brothers withdrew from the boys' school, St. Catharines, in June. and have been replaced by lay teachers. This leaves Toronto as the only place in the Province where this order remains. There have been few other important changes, though in some of the larger places many changes in the personnel of the religious orders have been made this year as in other years. This disturbance of the staff, averaging in some places more than one half yearly, cannot but be injurious to the best interests of the schools. There are comparatively fewer changes among secular teachers.

ACCOMMODATIONS.

Under this head but little improvement is to be recorded for the year, due in great measure to the stringency of the times. No. 5 & 8 Anderdon, Canard River, organized last year, has a neat, comfortable brick building giving good accommodation for the section. The greatest improvement has been made in Berlin, where the old building has been re-modelled and a new part added, more than doubling its former capacity. The new rooms are excellent in all respects; the heating is by hot water furnace, with suitable means for ventilation; the provision for cleanliness and sanitation is the best in this division.

In many places a gratifying improvement is noticed within the last few years in regard to the cleanliness and neatness of the buildings and premises. The circular touching this subject sent recently to the school authorities should have the effect of arousing to action those who have been remiss in this respect. It is plainly evident that every effort should be made to render the school bright and attractive to the children—a model of neatness and cleanliness to be afterwards followed in their homes—a place so inviting and well-ordered that it will tend to call forth the child's better instincts and repress the baser. Did all teachers fully realize that unclean floors, dark bare walls, and broken furniture or equipment all tend strongly to disorder and consequent waste of teaching effort, surely none would be found content to work day after day in such unpleasant, cheerless surroundings. It will not necessarily involve any serious monetary

outlay to relieve the blank walls by some bright, attractive pictures, to secure plants and flowers for the windows and grounds, to provide trees whose shade will be grateful in the warm days, and some vines to hide the unattractive features of the outbuildings. These are all within the reach of any teacher in the poorest section who is simply convinced of their need and benefit, and who will interest the children and parents in the task of securing them. The exercises of Arbor Day do not seem to have been turned to the best advantage of the rural schools. In some sections the chief observance has been a cleaning up of the school yard and sometimes of the building. Few trees and shrubs were p'anted, or flower seeds sown, or anything done to leautify the grounds, and the real purpose of setting apart such a day would seem not to have been grasped. Let us hepe that a suitable observance of the day may scon become general.

Examination Results.

This year not so many pupils were sent up as in 1896 for the Entrance Examination, but a larger number succeeded. When from all grades of schools an average of seventyfive per cent, of the candidates pass such an examination it affords good evidence that the teaching is intelligent and thorough. It may be said that the number of candidates is not large for the number of teachers in the inspectorate. But it should be understood that Toronto, maintaining a system of High Classes for pupils to Form III. of the High School course, sends no candidates to this examination. This year for the first time the girls from one school tried, and eight out of ten succeeded. In rural sections nearly onehalf of the teachers are in French or German districts, where children start school life with little if any knowledge of English, and end their studies at an early age. In these circumstances it is difficult for the teachers to prepare pupils for this test, but some efficient teachers have overcome all obstacles and have made an excellent showing. Again some weak sections with a small and irregular attendance cannot send up a class every year, while certain of the larger places do not prepare many pupils as the parents have not encouraged it. But both in the total number and in the percentage passing there has been a very creditable advance in the past few years and the prospects of even better results are favorable.

As several newspapers published a detailed statement of the results, there is given here only a summary and a comparison of the total with that for 1896.

TT	C	77	77
HIGH	SCHOOL	HINTRANCE	Examination.

Location of schools.	Number of schools.	$\begin{array}{c} \text{Pupils} \\ \textbf{tried.} \end{array}$	Pupils passed.	Percentage successful.
Rural sections	30	88	54	64
Villages	6	16	14	88
Towns	18	103	76	74
Cities · · · · · · · · · · · · ·	9	154	125	81
Total, 1897;	63	361	269	75
Total, 1896	70	382	237	62

For public school leaving 52 wrote, 22 passed, and 12 obtained entrance standing. In Toronto (St. Joseph's and Loretto High Classes), Hamilton, and eight Windham (La Salette), pupils were successfully prepared for the following High School examinations:—Form I., Form II., Primary (III. Class) and Junior Leaving (II Class). In addition a goodly number obtain year after year diplomas for typewriting and shorthand, the commercial course being a favorite one in Toronto and Hamilton.

WORK OF INSPECTION.

The number of teachers in charge of the two Separate School Inspectors has been for a few years in the neighborhood of 720, the exact figure for this year being 725. These are scattered pretty well over nearly the whole of the province, from the Detroit River to the Quebec boundary, and west so far as Rat Portage and Keewatin, near the borders of Manitoba. In a few localities there are groups of schools within each reach of one another, but in general they are rather widely separated, thus adding very considerably to the difficult of reaching them all within a limited time. Considering that a good deal of time is required for correspondence, making reports, examinations and general office work, it would be impossible to spend more than twenty five to thirty weeks each year in the actual work of examining schools. If the schools are to be visited but once a year, an average of half a day should be given to each room; but in present circumstances this time has often to be made shorter, for otherwise the round of the schools could not be made in the year. Omitting Toronto from the calculation, the Public School Inspectors have an average of under 120 teachers, all within the limits of a county or part of a county. They are required to visit each of these teachers twice a year. But it will be seen that by comparison the Separate School Inspectors have much more to do in making the one visit yearly. In my opinion the time has now come when additional provision for inspecting these schools should be made. Granted that one visit of inspection a year is of benefit to the school and teacher, it follows that two such visits would be of a greater Especially the larger places, where there are often more difficulties in the educational problem, require more frequent inspection. For the rural districts this need is not so urgent, but in case of a change of teachers or of any special difficulty the Inspector should have discretion to make a second visit if leisure allowed.

(2) Report of W. Prendergast, Esq., B.A., Inspector, Eastern Division.

Separate schools are established in nine villages, twenty towns, three cities and 131 rural sections in the eastern division of the Province. The number of urban schools is exactly the same as at time of last report. Three new rural sections were organized during the year 1897, viz., No. 21 Clarence, No. 15 Alfred and No. 4 Ferris; Since July 1895 four rural schools were established,—the three just mentioned and No. 8 North Plantagenet, during the same period Nos. 10 Otonabee, 15 North Plantagenet and 7 Kitley amalgamated with adjoining sections and ceased to exist as Separate Schools. The teachers are distributed among the schools as follows:—

	Lay.	Religious.	Total.
Villages	6	27	33
Towns	50	50	100
Cities	3 3	71	104
Rural sections	134	11	145
	223	159	382

An increase in the attendance took place in several of the urban schools, in some of these it was met by a change in the organization rather than by an increase in the number of teachers.

Buildings.

With one or two exceptions the urban places are well provided with buildings. In the rural sections several new school houses were erected during the year, and many of the old ones repaired and renovated. New buildings were erected in No. 2 Haldi-

mand, No. 7 Alfred and 8 Plantagenet, No. 15 Alfred, No. 21 Clarence, No. 2 Longueuil and No. 2 Stafford. The last mentioned was of brick, all the others frame. Although neither an expensive building nor one of striking external appearance, ye' in point of suitability for purposes the school house of No. 2 Haldimand is by far the best one-roomed building in the division. The Rockland trustees have enlarged and remodelled their building to such an extent that little of the original remains; the present handsome and comfortable edifice is practically new. The people of Casselman whose school house was burned at the time of the late disastrous bush fires, intend to re-build at an early date.

High School Entrance and other Examinations.

Parents, pupils and teachers have reason to be pleased with the result of the recent High School Entrance Examination. All the schools did well, and many did excellently. 370 candidates wrote on this examination, and 261 were successful. 228 of the successful ones and 307 of the candidates were from urban schools. A total of 61 wrote on the Public School Leaving examination, and 34 were successful. In addition to these, candidates from Mattawa, Weston, Alexandria girls' school, and Renfrew girls' school were successful at some of the higher Departmental examinations.

Ottawa Schools.

Inasmuch as considerable public attention has been directed to the Separate Schools of Ottawa during the last three years, I may be permitted to give some details. These schools are divided into two sets-for convenience called the French schools and the English schools. The School Board, as is pretty generally known, is divided into two committees, each of which entirely manages its own set of schools—at least as far as engaging teachers and organizing classes is concerned. The English committee employs 33 teachers, and the French committee 50; 14 of the former and 12 of the latter are lay teachers, the other 57 are sisters of the community of Grey Nuns One of the teachers (the principal of the bi-lingual Model School), is a University graduate and a High School specialist, one holds a first-class certificate, 15 hold seconds, one a third, and 8 District certificates for counties of Prescott and Russell. This year 13 girls and 20 boys of the English schools were successful at the Entrance examination; 8 girls and 5 boys passed the Public School Leaving, and 7 girls from one of the French schools were also successful at the Public School Leaving examination. In 1896 10 girls and 17 boys passed the Entrance; previous to 1896 no Separate School pupils were prepared for this or any other public examination.

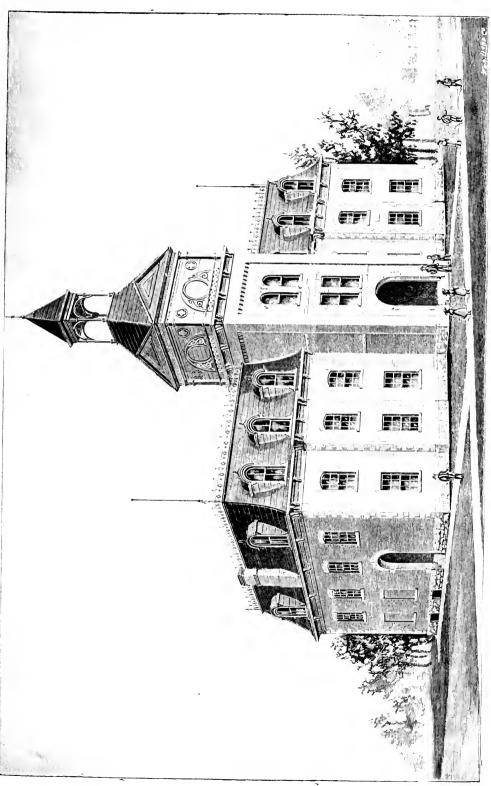

French Schools.

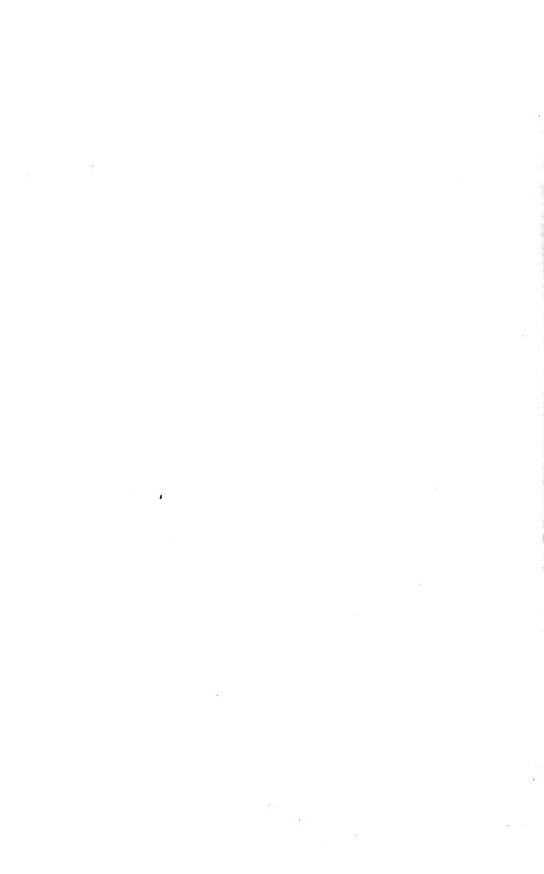

The Separate School pupils of the United counties of Prescott and Russell are almost entirely French Canadian. There are 59 rural and 4 urban Separate Schools in these counties; the teachers employed in them number 81, 21 of whom are members of religious communities; 57 of the lay teachers hold District certificates. The supply of qualified teachers suitable for these schools has always been less than the demand, but there has been an improvement in this respect each half year. Only 6 temporary certificates were granted this half year as compared with 17 for the last half of 1896, and I think I may safely say that there will be no further need for "permits" in these counties. I hope that in a very short time it will be also possible to secure qualified teachers for all the French Schools in other parts of the province. I am indebted to Inspector Summerby for many courtesies in connection with the work of inspection in these counties.

Qualifications of Teachers.

Nearly all the lay teachers engaged in urban schools hold at least second-class certificates. In the rural schools, other than these mentioned in a previous paragraph, some of the teachers hold second and some third-class certificates; many of those holding third-class certificates have also passed the Junior Leaving examination. Four of the religious teachers of the inspectorate hold second-class, and two third-class certificates; several of the others have held third-class certificates which are now expired.

RENFREW HIGH SCHOOL.

APPENDIX E.—SUPERANNUATED TEACHERS, 1897.

(CONTINUED FROM REPORT OF 1896)

APPENDIX G.— TECHNICAL EDUCATION. — PUBLIC AND FREE LI-BRARIES, ART SCHOOLS AND SCIENTIFIC INSTITUTIONS

REPORT OF S. P. MAY, Esq., M.D., C.L.H., SUPERINTENDENT OF PUBLIC LIBRARIUS, ART SCHOOLS, Etc.

1. Public Libraries.

SIR,—I have the honor to submit herewith my report on the Public and Free Libraries, Art Schools, and Scientific Institutions receiving a share of the Government Grant, in the Province of Ontario, for the year ending 30th April, 1897.

At the present time there are 383 Public and Free Libraries, Art Schools and Scientific Institutions, &c., receiving Government aid in operation in this Province.

For the year ending 30th April, 1897, the following institutions reported:

245 Public Libraries.

78 Free Libraries.

7 Art Schools.

8 Scientific Institutions, &c.

Total 338

The following Public Libraries did not report: Ailsa Craig, Bervie, Brougham, Calabogie, Coboconk, Courtright, Delaware, Elmvale, Emsdale, Forks of the Credit, Hastings, Higheate, Kimberley, Linwood, Logan (Mitchell PO.), Lucille, Martintown, Maxville, Mayflower (Watford P.O.), Merrickville, Morewood, Parry Sound, Petrolea, Richard, Landing, Saltfleet (Stoney Creek P.O.), Spencerville, St. Vincent (Meaford P.O.), Trentons Tweed, Wallaceburg, Walters Falls, Waterdown.—32.

The following Public Libraries have been incorporated since the 30th of April, 1897:

Auburn, Cookstown, Dorchester, Glamis, Mallorytown, Odessa, Shallow Lake, Thornhill.

—8.

I inspected the following Public and Free Libraries, Art Schools, Literary and Scientific Institutions, &c., during the year: Ailsa Craig, Alma, Alton, Alvinston, Arnprior, Arthur, Beamsville, Beeton, Beltountain, Bothwell, Bracebridge, Brockville Public Library, Brockville Art School, Brooklin, Burlington, Camden E., Caledonia, Carleton Place, Carp, Cayuga, Cheapside, Cheltenham, Claude, Ooldwater, Comber, Cookstown, Oredit Forks, Dundalk, Dunnville, Dutton, Erin, Essex, Flesherton, Forest, Fort Erie, Garden Island, Glencoe, Grand Valley, Grantham, Gravenhurst, Grimsby, Hamilton Public Library, Hamilton Art School, Hamilton Literary Association, Hagersville, Highland Creek, Hillsburg, Inglewood, Jarvis, Kinburn, Kingston Public Library, Kingston Art School, London Public Library, London Art School, Markdale, Markham, Merritton, Midland, Mono College, Nanticoke, Napanee, Napanee Mills, Newburgh, Niagara, Niagara Falls, Norwich, Oakville, Orangeville, Orillia, Oshawa, Ottawa Public Library, Ottawa Literary and Scientific Society, Ottawa French Canadian Institute, Ottawa Art School, Ottawa Field Naturalist's Club, Ottawa St. Patrick's Literary Association, Otterville, Pakenham, Parkhill, Parry Sound, Penetanguishene, Pembroke, Pickering, Port Carling. Port Credit, Port Colborne, Port Rowan, Port Stanley, Primrose, Ridgeway, Rodney, Saltfleet, Scotland, Shelburne, Simcoe, Stouffville, St Catharines, St. Mary's, St. Thomas Public Library, St. Thomas Art School, Strathroy, Thedford, Thamesville, Thorold, Tilsonburg, Tottenham, Trenton, Vars, Violet Hill, Wardsville, Waterdown, Waterford, West Lorne, Whitby, Woodstock.

The following table shows the locality of every Public Library and Free Public Library in the Province:—

The total number of examination papers sent out this year was as follows:

Primary Course.

Freehand 1,750 Geometry 1,096 Perspective 966 Model drawing 1,861 Blackboard drawing 1,770	7,443
Advanced Course.	
Shading, flat 195 Outline, round 169 Shading, round 349 Flower drawing 292 Industrial design 124 Competition for gold medal 6	1,135
Mechanical Course.	
Descriptive Geometry 56 Machine drawing 63 Building construction 34 Architectural design 23 Advanced perspective 43	219
Total	8,797

The following medals and special certificates were awarded for the year ending 30 th April, 1897:

Gold Medal.

Presented by the Minister of Education for Advanced Course:—Industrial designs and drawing from the antique. Walter Jeffreys, Toronto Art School.

Silver Medal and Certificate.

Presented by the Minister of Education for the best industrial designs (Art Schools), Ma ed Ireland, Hamilton Art School

Silver Medul and Certificate.

Presented by the Minister of Education for the best specimen of machine drawing from models, Harold H. Mundy, Hamilton Art School.

Silver Medal and Certificate.

Presented by the Minister of Education for the best original drawings in building construction or architecture, Harold H. Mundy, Hamilton Art School.

Bronze Medals.

For the best painting from life, L. Moir, Ottawa Art School.

For the best drawing from life, Chas. Coldery, Ottawa Art School.

For the best specimen of china painting, Lilian Hughes, Loretto Abbey, Toronto.

For the best specimen of wood-carving, Gordon Bizzey, Hamilton Art School.

For the best specimen of lithography, Walter Northcott, Toronto Art School.

For the best specimen of modelling in clay, E. Nobbs, London Art School.

For the highest number of marks in Primary Drawing Course, (Art Schools and Ladies' Colleges), Caroline Beard, Art School, Kingston.

For the highest number of marks in Primary Drawing Course (High Schools and Collegiate Institutes), Jack C. Hobson, Harbord Street Collegiate Institute, Toronto.

For the highest number of marks in Primary Drawing Course (Public and Model Schools), Kate Swanson, Model School, Hamilton.

ART SCHOOLS.

1. The Report of the Brockville Art School for the year ending 30th of April, 1897, shows that sixty-two students attended the regular courses of study during the session; also a few students in the extra subjects. It is encouraging to state that the classes are composed of a larger number of adults than formerly, and that the mechanics now avail themselves of the privileges of evening classes in Art Schools. Sixty-six lessons were given on every subject, and special attention was paid to the studies more adapted to the mechanic, with very excellent results. One night a week was given to the pupils interested in the higher grades of work with illustrated talks of perspective and object drawing, landscape and figure drawing, etc. These meetings were well attended and much appreciated.

The receipts, including \$448 Government grant, were \$549.07. Expenditure, \$549.07.

2. The Report of the Hamilton Art School for the year ending 30th of April, 1897, shows 163 students enrolled, and the total number of attendance in the various subjects taught 8,174.

The students, who represented all classes of society in the city, with others from remote points in the province, without exception expressed themselves as desirous of using the knowledge of drawing, modelling, designing, etc., for practical purposes.

The equipment of the school has been added to as required, particularly by a set of Wall Charts in plane and descriptive geometry, mechanical movements, construction, and the aesthetical proportions of architectural details, also by six portfolios containing hundreds of drawings to scale, of the palaces and temples of the State of Jeypore, presented by His Highness the Maharajah of Jeypore.

The receipts, including \$574 Government grant, were \$2,785.67. Expenditure, \$2,699.14. Balance on hand, \$86.53.

3. The Report of the Kingston Art School for the year ending 30th of April, 1897, shows that the classes re opened early in October, with an attendance above the average, the evening classes being attended by carpenters, mechanics, contractors, etc., as well as by many younger students desirous of becoming good mechanics.

The curriculum of the Education Department has been carried out in all the courses, the teaching staff remaining the same as during the previous session, while the progress of the pupils in all the classes has been very satisfactory to the directors and to the principal.

The number of pupils attending the day classes was thirty-three, while twenty four attended the evening classes.

The Departmental examinations were held in the rooms on the 29th and 30th of April, and the 1st of May. The results have not yet been published, but from the quality of the work much is expected.

The receipts, including \$525 Government grant, were \$672.42. Expenditure, \$670.80. Balance on hand, \$1.62.

4. The Report of the London Art School for the year ending 30th of April, 1897, shows that the school is more successful and in a better financial position than formerly. The evening classes, comprising three terms of thirty-six lessons, each of two hours' duration, were attended by forty-four pupils. The afternoon classes for oil and water color, painting, modelling in clay, China painting, etc., were largely attended, and it is grati-

fying to state that the students from this school (established in 1877) have distinguished themselves in various trades and professions, including wood engravers, wood carvers, lithographers, China painters, decorative artists, architects, etc., besides many who have become professional teachers.

The receipts, including \$422 Government grant, were \$501.02. Expenditure, \$497.95. Balance on hand \$3.07.

5. The Report of the Ottawa Art School for the year ending 30th of April, 1897, shows that the school session extended from the 1st of November, 1896, to the 30th of April, 1897. The number of students attending was sixty-eight, the morning, afternoon and evening classes were conducted under the supervision of a staff of five teachers, covering not only the art school courses prescribed by the Education Department, but other high grades of art work.

The exhibition of students' work, held at the close of last session, was visited by the Hon. the Minister of Education, who expressed himself as extremely satisfied with the progress of the students.

It is proposed during the next session to provide more accommodation for teaching practical and mechanical work, including wood engraving.

The receipts, including \$456 Government grant, were \$1,230.86. Expenditure, including borrowed money, \$1,660.46.

6. The Report of the St. Thomas Art School for the year ending 30th of April, 1897, shows that 44 students attended the day and evening classes, representing the following trades and professions, viz.: Architects, clerks, carpenters, druggists, draughtsmen, machinists, railway employes, students and teachers.

This school is incorporated with the St. Thomas Free Library, which contributes to its maintenance.

7. The Report of the Toronto Art School for the year ending 30th of April, 1897, shows that the school was open from the 28th September, 1896, until the 30th of April, 1897. Three terms of ten weeks each were held and the number of students enrolled was 128.

The work done by the students of this school was again successful in the Provincial examinations in drawing, painting, etc. Gold medals for the advanced course and industrial designs have been taken for three years in succession by students of the Toronto Art School; also silver and bronze medals for designs, painting in oil, lithographing and wood carving.

The life classes have been very successful and well patronized, several of the students of these classes having prepared illustrations which have been published in some of the leading periodicals. It is also gratifying to state that the design made by one of our students for a stained glass window for the Toronto City Hall has been favorably mentioned.

The receipts, including \$489 Government grant, were \$2,400.88. Expenditure, \$2,381.80. Balance on hand, \$19.08.

- 8. The Report of the Onturio Society of Artists for the year ending 30th of April, 1897, shows that the society held or contributed to the following exhibitions during the year:
- 1. The Exhibition of the Society of Artists, which included two hundred and ten oil and water color paintings, sculpture, etc., was considered to be of better average merit than the collections of former years.
- 2. Hamilton Arts and Crafts Association Exhibition. Several pictures were loaned to the association at the close of the Society of Artists Exhibition.

- 4. Winnipeg Industrial Exhibition. A large collection of paintings was sent by the society representative of the work of Ontario artists: although from a pecuniary standpoint the results were not very encouraging, the efforts of the society were much appreciated and the general interest shown by the public was an indication that the enterprise was a success.
- 4. Toronto Industrial Exhibition. The art department, as formerly, was under the management of this society. The pictures exhibited included, not only the works of Canadian artists, but many paintings representative of leading European artists.
- 5. Ontario Educational Museum. The society has entered into an agreement with the Hon. the Minister of Education to supply a collection of paintings to fill a large art gallery recently added to the museum, and it is to be hoped that this will give an impetus to art education in this province and stimulate the members to renewed energy.

The receipts and balances on hand were \$5,518.32. Expenditure, \$2,059.30. Balance on hand, \$3,459.02.

SCIENTIFIC INSTITUTIONS.

1. The Report of the Hamilton Association for the year ending 30th of April, 1897, shows that ten meetings of the General Association, and thirteen sectional meetings, were held during the session.

Lectures.

Inaugural address, A. T. Neill, President.

The Battle of Stoney Creek, J. H. Smith.

Notes on Some Recent Additions to Ontario Palacontology, Col. C. C. Grant.

The Function of Poetry, F. F. Macpherson.

Local Fossils and Additions to Paleontology, Col. C. C. Grant.

Local Paleontological Notes, Col. C. C. Grant.

Minerals of Our Local Rocks, Col. C. C. Grant.

Dynamics of Social Peril, J. T. Barnard.

Concrete Forms and Stratography of the Spur Line Cutting, Hamilton, A. E. Walker. Lake Medad and the Kwin hi-Bi-hah Collection of Indian Relics, Dr. J. A. Mc Gregor.

The members of the Biological Sections have devoted much time during the session to identifying and cataloguing the specimens in the museum, which shows that 120 species and varieties have been collected which hitherto had not been reported in this locality; two of these are new to America, a few new to Canada, and several new to Ontario.

The Geological Section has added a large number of local fossils to the museum, and the Photographic Section was successful in obtaining membership in the American Interchange.

The receipts, including \$400 Government grant, were \$774.55; expenditure, \$698.20; balance on hand, \$76.35.

2. The Report of the Literary and Scientific Society of Ottawa for the year ending 30th of April, 1897, shows that the total number of members is 325.

Lectures.

A joint lecture course was given in connection with the Ottawa Field Naturalist Club, as follows:

Conversazione—Exhibit of Microscopical Objects, with short addresses.

Electrical Discharges in High Vacua, Prof. John Cox.

Goethe, Prof. Leigh R. Gregor.

Under the Midnight Sun-A Trip to Iceland, Illustrated, Prof. Mavor.

Recent Explorations in Canada, Dr. G. M. Dawson.

Our Elizabethan Poets, Duncan Campbell Scott.

The American Lobster, Dr. Andrew Macphail.

Weather, Otto J. Klotz, President.

Fruit and Fruit Districts of Canada, illustrated, John Craig.

Library.

The Librarian reports that the circulation of books was 2,744 vols. more than in the preceding year, and that there has been a reduction of 17 per cent. in the issue of fiction during the year.

The receipts, including \$400 Government grant, were \$1,141.55; expenditure,

\$1,066.88; balance on hand, \$7.67.

- 3 The Report of the Institut Canadien Francais d'Ottawa, for the year ending 30th of April, 1897, shows that there are 340 members. A series of literary entertainments was given during the winter as follows:
 - 1. Inaugural address, A. J. Taillon, President.
 - 2. Le Colisee, Revd. Father Gohiet, O. M. I.
 - 3. L'Eloquence et les Orateurs, J. H. Morin.
 - 4. Les Beaux-arts, F. X. Valade, M.D.
- L'Ordre Victorien des Hospitalieres, conference en francais, Her Excellency Lady Aberdeen.
 - 6. La Vie de Garcia Moreno, Jules Philion.
 - 7. Les Salsifis. Le Cerole, Victor Hugo.
 - 8. Mutual Benevolent Associations, F. R. Latchford.
 - 9. Olosing address, the President.

The reading room is well supplied with forty-two English and French newspapers and magazines.

The library contains 1,309 volumes, Canadian literature being specially well represented. 1,261 volumes were loaned during the year. The museum contains 778 specimens illustrative of numismatics, botany and mineralology.

The receipts were \$1,500.93; expenditure, \$1,488.91; balance on hand, \$28.02.

4. The Report of the Ottawa Field Naturalists' Club for the year ending the 30th of April, 1897, shows that there are 248 members. Fourteen meetings of the Council were held during the year. At the first of these, leaders in the several branches, viz., geology, botany, entomology, ornithology, conchology and zoology, were appointed, besides an editor and associate editors for the publication of the Ottawa Naturalist.

The Club's work is divided as follows: Evening lectures given in conjunction with the Ottawa Literary and Scientific Society (see O. L. and S. S. report). 2. Field work. Three excursions were held for scientific work in the field, which were supplemented by sub-excursions on Saturday afternoons. 3. The publication of the Ottawa Naturalist, the official organ of the club and a medium for popular scientific instruction, and for interchange of notes on natural history, geology, etc. This journal is distributed to various societies throughout the Dominion and is mailed to a large number of foreign scientific societies.

The Club has in preparation an herbarium typical of the botany of this Province, which, when completed, will be handed over to the Ottawa Normal School for the use of the students, who are also welcome, free of charge, to the field excursions of the club.

The receipts were \$326.20; expenditure \$300.60; balance on hand \$25.60.

5. The Report of the Canadian Institute for the year ending 30th of April, 1897, shows that twenty-one ordinary meetings were held, at which papers were read on the following subjects, viz.:—Astronomy, Biology, Ethnology, Chemical Physics, Forestry, Geography, Geology, Literature, Meteorology, Metallurgy, Philology, Political Economy, Psychology, Botany, Physiology, etc.

Biological Section.

Ten papers were read as follows:

1, "Utricularia Valgaris," Mr. Harvey; 2, "Three Rare Bird Visitors," Mr. Maughan; 3, "Six Parasites of the Tussock Moth," Mr. C. H. Armstrong; 4, "Trilobites," Mr. Elvins; 5, "The Micro-Lepidoptera," Mr. Armstrong; 6, "Algae," Mr. Stark; 7, "Remains of Leaves in Drift of Don Valley," Mr. Townsend; 8, "Origin of Some Domestic Animals," Mr. Elvins; 9, "Glacial Period," Mr. Powell: 10, "How to Study Botany," Mr. Noble.

Library Statistics.

Papers and periodicals printed, 33.

Donations, 762.

Exchanges from various countries, about 540.

Books and periodicals loaned to members, 1,040.

The receipts were \$2,659.16; expenditure, \$3,500.29; balance on hand, \$158.87.

- 6. The Report of the Astronomical and Physical Society of Toronto for the year ending 30th of April, 1897, shows that the Society has ninety five active members, tifteen life and honorary members, and forty corresponding and associate members. During the year twenty-five meetings were held, at which the following subjects were discussed.
 - Progress of Astronomy in 1895, etc.
 - 2. Recent Discoveries of Prof. Röentgen of Wurzburg, etc.
 - 3. Precipitation, Its effects on Timbered Lands, etc.
 - 4. Experiments with the Röentgen Rays, etc.
 - 5. Notes on Planet Mars and Atmosphere, etc.
 - 6. Notes on Solar Observations.
 - 7. Phenomena Exhibited by the X Rays, etc.
 - 8. Aurora Observations at Moose Fort, 1895-6, etc.
 - 9. Notes of Observations of Jupiter, Toronto Observatory, etc.
 - 10. Out-door Meeting for Observations, etc.
 - 11. Solar Corona Observations during Sunshine, etc.
 - 12. Out door Meeting for Observations, etc
 - 13. Construction of the Telescope, etc.
 - 14. Falling Stars and Meteorites, etc.
 - 15. The Life History of Star Systems, etc.16. Meteoric Showers, etc.

 - 17. The Solar Eclipse on 9th August, etc.
 - 18. Solar work, Auroral Displays, etc.
 - 19. The Reformation and Simplification of the Calendar, etc
 - 20. A "Trip to Mars," etc.
 - 21. Historical Sketch of the Greenwich Nautical Almanac, etc.
 - 22. Application of the Polarization of Light, etc.
 - 23. Notes on the Grading of Thermometers, etc.
 - 24. The International Meteorological Conference, etc.
 - 25. General Business.

The receipts, including \$200 Government grant, were \$669.77; expenditure, \$366.54; balance on hand, \$303.23.

W. MULOCK, Vice-Chancellor.

TORONTO, December 10th, 1897.

2. Annual Report of the Council of the University of Toronto, 1896-97.

To His Honor, the Honorable Sir Oliver Mowat, K.C.M.G., Lieutenant Governor of the Province of Ontario, Visitor of the University of Toronto.

MAY IT PLEASE YOUR HONOR:

The Council of the University of Toronto begs leave to present to Your Honor the following report for the academic year, ending with the 30th of June, 1897.

In accordance with the provisions of the new University Act, the University Council is now charged with the work of instruction in Arts, Law and Medicine; the subjects in the Faculty of Arts being, however, restricted to Mathematics, Physics, Mineralogy and Geology, Chemistry, Zoology, Botany, Physiology, History, Ethnology, Comparative Philology, History of Philosophy, Logic and Metaphysics, Italian and Spanish, and Political Science.

Under this arrangement the members of the teaching Faculties of Arts and Law for the past season were as follows:

STAFF, 1896-1897.

FACULTY OF ARTS AND LAW.

President-James Loudon, M.A., LL.D.

Physics:

Professor—James Loudon, M.A., LL.D. Demonstrator—W. J. Loudon, B.A. Lecturer—C. A. Chant, B.A. Demonstrator—J. C. McLennan, B.A.

Mathematics:

Professor—Alfred Baker, M.A. Lecturer—A. T. DeLury, B.A. Fellow—W. J. Rusk, B.A.

Chemistry:

Professor—W. H. Pike, M.A., Ph.D. Lecturer—W. L. Miller, B.A., Ph.D. Lecturer—F. J. Smale, B.A., Ph.D. Fellow—F. B Allan, B.A. Lecture-Assistant—W. Smeaton.

Biology:

Professor—R. Ramsay Wright, M.A., B.Sc. Lecturer—E. C. Jeffrey, B.A. Assistant-Demonstrator—R. R. Bensley, B.A., M.B. Fellow—J. McCrae, B.A.

Physiology:

Professor (Associate)—A. B. Macallum, B.A., M.B., Ph.D.

Mineralogy and Geology:

Acting-Professor—A. P. Coleman, M.A., Ph.D. Instructor—W. A. Parks, B.A.

Comparative Philology:

Professor-Maurice Hutton, M.A.

History and Ethnology:

Professor-G. M. Wrong, M.A.

Political Economy and Constitutional History:

Professor—James Mavor.
Fellow—W. H. Moore, B.A.
Mackenzie Fellow in Political Science—M. G. V. Gould, B.A.
Mackenzie Fellow in Political Science—A. F. Barr, B.A.

Philosophy:

Professor of History of Philosophy—J. G. Hume, M.A., Ph.D. Lecturer and Demonstrator—A. Kirschmann, Ph.D. Lecturer—F. Tracy, B.A., Ph.D.

Italian and Spanish:

Associate-Professor—W. H. Fraser, B.A. Instructor in Spanish—P. Toews, M.A., Ph.D. Instructor in Italiau—E. J. Sacco.

Roman Law, General Jurisprudence and History of English Law:

Professor-Hon. William Proudfoot.

Constitutional and International Law:

Professor-Hon. David Mills, LL.B.

The following tables exhibit the numbers attending the Pass and Honor lectures in University subjects:

Pass.

Subjets.	Mathematics.	Physics.	Chemistry.	Biology.	Mineralogy and Geology.	Philosophy.	Logic.	Political Science.	History.
Fourth year	17					16	 	51	12
Third year		18	,					13	34
Second year		48	15		85	196	170		116
First year	162°	54		116			 	¦	
Totals	179	120	15	116	85	212	170	67	162

In no case do the numbers given above include honor students.

Instruction in Physics, Biology and Chemistry was given to forty-eight students of the first year in Medicine; in Physics to thirty-seven students of the first year and to twenty-six students of the second year in the School of Practical Science.

Honor.

Subjects.	Mathematics.	Physics,	Chemistry.	Biology.	Mineralogy and Geology.	Philosophy.	Political Science.	History.	I talian.	Spanish.
Fourth year	6	6		23	4	21	21	51	14	9
Third year	14	20	33	16	16	13	40	66	20	9
Second year	60	22	40	17	20	24	29	53	35	4
First year	37	34	64	24					47	10
Totals	117	82	137	80	40	58	93	170	116	32

The second year lectures in Chemistry and the fourth year lectures in Biology were attended by fifty-five students of the second year in Medicine. Instruction in Mathematics was given to fifty eight students of the first year, and to twenty-three students of the second year; and in Chemistry, to one student of the second year and to two students of the third year in the School of Practical Science.

The following table exhibits the numbers taking practical work in the laboratories of the University:

Laboratories.	Physical,	Chemical.	Mineralogical.	Biological.	Psychological.
Fourth year	6		4	23	44
Third year	19	26	16	16	13
Second year	26	40	20	17	
First year	35	23	1	24	· · · · · · · · · · · · · · · · · · ·
Totals	86	89	40	80	57

Practical instruction in Chemistry and Biology was given to fifty-two students of the first year, and to fifty-six students of the second year in Medicine; and in Physics to seventy-six students and in Chemistry to one student of the School of Practical Science. Four graduates in Arts were engaged in original research in the Psychological Laboratory during the session.

The members of the teaching staff in Medicine for the last session were as follows

FACULTY OF MEDICINE.

Professor of Surgery:

W. T. Aikins, M.D., Tor., LL.D.

Professor of Clinical Surgery:

I. H. Cameron, M.B., Ter.

Associate-Professor of Surgery and Clinical Surgery:

G. A. Peters, M.B., Tor., F.R.C.S., Eng.

Professor of Anatomy:

J. H. Richardson, M.D., Toronto.

Professor of Anatomy and Director of the Anatomical Department:

A. Primrose, M.B., C.M., Edin.

Associate Professor of Anatomy:

H. Wilberforce Aikins, B.A., M.B., Tor.

Senior Assistant Demonstrator of Anatomy:

F. N. G. Starr, M.B., Tor.

Assistant Demonstrators of Anatomy:

W. B. Thistle, M.D., Tor.

A. R. Gordon, M.B., Tor.

F. Winnett, M.D., Tor.

B. E. McKenzie, B.A, Tor.; M.D., McGill.

G. Boyd, B.A., M.B., Tor.

B. C. H. Harvey, B.A., Tor.

R. D. Rudolf, M.B., C.M., Edin.

Professor of Medicine and Clinical Medicine:

J. E. Graham, M.D., Tor.: M.R.C.P., Lond.

Associate Professor of Medicine and Clinical Medicine:

A. McPhedran, M.B., Tor.

Associate Professor of Clinical Medicine:

W. P. Caven, M.B., Tor.

Professor of Pathology:

J. Caven, B.A., M.D., Tor.

Demonstrators of Pathology:

H. W. Hill, M.B., Tor.

J. A. Amyot, M.B., Tor.

Assistant Demonstrator in Pathology:

John Stenhouse, M.A., B.Sc., Edin.; M.B., Tor.

Professor of Pharmacology and Therapeutics:

J. M. MacCallum, B.A., M.B., Tor.

Lecturer on Materia Medica and Elementary Therapeutics:

C. F. Heebner, Phm.B., Tor.

Professor of Gynaecology:

U. Ogden, M.D., Tor.

Professor of Obstetrics:

A. H. Wright, B.A., M.D., Tor.

Professor of Ophthalmology and Otology:

R. A. Reeve, B A., M.D., Tor.

Associate Professor of Ophthalmology and Otology:

G. H. Burnham, M.D., Tor.; F.R.C.S., Edin.

Associate Professor of Laryngology and Rhinology:

G. R. McDonagh, M.D., Tor.

Professor of Hygiene:

W. Oldright, M.A., M.D., Tor.

Associate Professor of Medical Jurisprudence:

B. Spencer, M.D., Tor.

Legal Lecturer on Medical Jurisprudence:

Hon. David Mills, LL.B., Q.C., M.P.

Extra-Mural Professor of Mental Diseases:

Daniel Clark, M.D., Tor.

Professor of Physics:

James Loudon, M.A., LL.D.

Lecturer on Physics:

O. A. Chant, B.A.

Professor of Chemistry:

W. H. Pike, M.A., Oxon.; Ph.D., Guttingen.

Lecturers on Chemistry:

W. L. Miller, B.A., Ph.D., Munich, F. J. Smale, B.A., Ph.D., Leipzig.

Lecturer on Toxicology:

W. H. Ellis, M.A., M.B., Tor.

Professor of Biology:

R. Ramsay Wright, M.A., B.Sc., Edin.

Assistant Demonstrator in Biology:

R. R. Bensley, B.A., M.B., Tor.

Professor of Physiology:

A. B. Macallum, B.A., M.B., Tor.: Ph.D., Johns Hopkins.

The following table exhibits the number of students registered as in attendance upon the lectures given by the staff of the Faculty of Medicine:

Students of the fourth year	41
Students of the third year	61
Students of the second year	59
Students of the first year	62
Occasional students

J. LOUDON,

President.

Toronto, December 7th, 1897.

To His Honor, the Honorable Sir Oliver Mowat, K.C.M.G., Lieutenant-Governor of the Province of Ontario, Visitor of University College:

MAY IT PLEASE YOUR HONOR;

The President and Council of University College beg leave to present to your Honor the following report for the academic year ending June 30th, 1897:

By a provision of the University Act, which took effect by a proclamation of the Lieutenant-Governor-in-Council, on November 12th, 1890, the work of instruction assigned

³ Annual Report of the Council of University College, 1896-1897.

under the confederation scheme to University College is now restricted to the departments of Greek, Latin, English, French, German, Oriental Languages, Moral Philosophy and Ancient History. Under this arrangement, the staff for the past session was composed of the following:

Staff, 1896-1897.

President, James Loudon, M.A., LL.D.

Greek:

Professor, Maurice Hutton, M.A. Lecturer, A. Carruthers, M.A.

Latin:

Professor, J. Fletcher, M.A., LL.D Lecturer, W. S. Milner, M.A. Lecturer, G. W. Johnston, B.A., Ph.D.

English:

Professor, W. J. Alexander, B.A., Ph.D. Lecturer, D. R. Keys, M.A.

French :

Associate-Professor, John Squair, BA. Lecturer, John Home Cameron, M.A. Instructor, St. Elme de Champ.

German:

Associate-Professor, W. H. VanderSmissen, M.A. Lecturer, G. H. Needler, B.A., Ph.D. Instructor, P. Toews, M.A., Ph.D.

Oriental Literature:

Professor, J. F. McCurdy, Ph.D., LL.D. Lecturer, R. G. Murison, M.A., B.D.

Ethics:

Professor, J. G. Hume, M.A., Ph.D.

In the new Act it is further provided that students attending lectures in the above or other subjects of University study shall, if not enrolled elsewhere, be enrolled in University College. The numbers registered in accordance with this regulation, together with others taking full or partial courses in University College were as follows:

	Fourth year.	Third year.	Second year.	First year.	Post-graduate.	Totals.
Matriculated students	124	119	153	87		483
Occasional students	12	30	36	101		179
Extra-mural students	11	3	6	4		24
Graduate students	8	1	1		3	13
Totals	155	153	196	192	3	699

The following tables exhibit the numbers attending the pass and honor lectures in University College subjects:

Pass.

	Greek.	Latin.	English.	French.	German.	Orientals,	Ethics.	Ancient History.
Fourth year	1	26	58	11	11			
Third year	4	33	56	24	26	i	45	
Second year	38	116	97	67	63	17		
First year	40	133	97	69	59	31		113
Totals	83	308	308	171	159	18	45	113

In no case do the numbers given above include honor students.

Honor,

	Greek,	Latin.	English.	French.	German.	Orientals.	Ethics.
Fourth year	19	19	1 29	21	22	2	21
Third year	I	13	41	39	37	2	26
Second year	1	17	56	34	32	4	. 20
First year	17	21	62	55	50		
Totals	66	70	188	149	141	8	47

All of which is respectfully submitted.

J. LOUDON,
President.

Toronto, December 3rd, 1897.

4. Annual Report of the School of Practical Science, 1897.

To the Hon. G. W. Ross, LL.D., M.P.P., Minister of Education.

Sir,—I have the honor to submit the annual report of the School of Practical Science for the year 1897.

The calendar year not being conterminous with the academic year this report will cover the second term of the academic year, 1896-7, and the first term of the academic year, 1897-8, except where otherwise stated.

The number of students in attendance at the school were as follows:

School of Science Students.

	2nd term. 1896-7.	1st term. 1897-8.
Taking full courses I year	18	72 39 17
Taking partial courses	17	•

University Students.

Arts	16	2

The students of the School of Practical Science taking full courses are required to take University lectures in Mathematics and Physics, and those in the Department of Analytical and Applied Chemistry are required to take certain University lectures in Chemistry and Biology.

The attendance at these lectures was as follows:-

	nd term. 1896-7.	1st term. 1897-8.
Mathematics. Physics Chemistry Biology	85 75 1 1	111 87 0 0

The fees for the regular and special students of the School of Practical Science for the academic year 1896 7 were \$6132.50, being an increase of \$1457 on the fees of the previous year.

Of the above amount \$1069 were paid to the Bursar of the University of Toronto under the authority of an Order-in-Council dated June 8th, 1897, and the remainder \$5063.50 to the Hon. the Provincial Treasurer.

The number of regular students who presented themselves for examination at the annual examinations of the academic year 1896.7 was ninety-five; of these seventy passed. One candidate for a special certificate was examined and passed. The number of graduates was fifteen. The total number of graduates up to date is one hundred and ninety-six.

The number of graduates who proceeded to the degree of B. A. Sc. at the University examinations of 1897 was eight. The total number of graduates who have received the degree of B. A. Sc. is fifty.

The total number of graduates who have received the degree of C. E. in the University of Toronto is eleven.

One graduate has proceeded to the degree of E. E., and one to the degree of M. E. (Mining Engineer) in the University of Toronto.

The regular courses in the School are:

- (1.) Civil Engineering (including Sanitary Engineering.)
- (2.) Mining Engineering.
- (3) Mechanical and Electrical Engineering.
- 4.) Architecture.
- (5) Analytical and Applied Chemistry.

The following statement shows the courses of lectures and practical instruction, the instructors and the number of students taking the various courses:—

Subjects Taught by the Faculty of the School of Science.

		Number of	students.
Subjects.	Instructors.	2nd term 1896-7.	1st term 1897-8.
Organic and inorganic chemistry Applied chemistry	W. H. Elvis, M.A., M.B., Professor	109	134
Mineralogy and geology. Petrography. Metallurgy and assaying Mining and ore dressing. German	A. P. Coleman, M.A. Ph.D., Professor G. R. Mickle, B.A., Lecturer J. W. Barn, B.A. St. Fellow.	68	69
Statics Dynamics Strength of materials Theory of construction Machine design Compound stress Hydraufics Thermodynamics and theory of the steam engine French	J. Galbraith, M.A., Professor. J. A. Duff, B.A., Lecturer. W. Minty, B.A.Sc., Fellow	112	134
Drawing Architecture Plumbing, heating and ventilation tion Mortars and cements Brick and stone masonry	C. H. C. Wright. B.A.Sc., Lecturer	105	128
Surveying Geodesy and astronomy Spherical trigonometry Least squares Descriptive geometry	L. B. Stewart, D.T.S., Lecturer. A. T. Laing, B.A.Sc., Acting Demonstrator	105	130

GENERAL REMARKS.

Drafting Rooms.

It will be necessary to provide during the vacation new space for drafting as the present accommodation is entirely taken up. It is proposed that the room now used by Mr. Wright as a workroom be fitted up with incandescent lights and used as a drafting room; and that a new workroom be constructed in the tower above Mr. Wright's private room, connected with the latter by a circular iron staircase. The room proposed is on the level of the attic in which it will soon be necessary to construct other rooms. Between thirty and forty new drafting tables wille be required for the work of next session.

Chemistry.

Much trouble has been experienced in this department during the past year from the condition of the ceilings. Small portions of plaster are continually falling. It is necessary to carefully cover all vessels used in analysis to avoid contamination from this source. Recently a portion of plaster several feet square, fell in one of the laboratories. New wooden or other suitable ceilings should be constructed in the rooms of this department as soon as possible.

Mineralogy and Mining.

During the past year two rooms in the basement were fitted up for the treatment of refractory gold ores, the equipment being a reverberatory furnace for roasting ores on a large scale, leaching tanks for treating ores by the cyanide process, and chlorination apparatus. Some donations of rocks and minerals for the museum were received. The principal requirements are the completion of the plant for treating gold and silver ores, and additions to the metallurgical and mineral collections.

Electricity.

The increasing size of the classes has made necessary additional galvanometers, resistance-boxes, etc., a need which has been partly supplied during the year. A Wimshurst electrostatic machine, a six inch spark induction coil, and a pair of Crookes' tubes have been added to allow a new class of experimental work to be taken up. Standard telegraph and telephone apparatus (in each case an equipment for a line) have been bought during the year. A battery of 60 small storage cells soon to be set up will be of great value in standardizing volt-meters, and in increasing the accuracy of certain measurements. Coils of low resistance of standard value would be of much service in standarding ammeters and watt-meters for commercial as well as experimental purposes.

Surveying, Practical Astronomy, etc.

Requirements.—Mercury-pump for exhausting vacuum-chamber of Kater's pendulum; 10 f'. standard of length; level-trier; azimuth-mark; topographical copies.

Tests of Materials.

A 20,000 lb Riehle universal testing machine has been added to the equipment. The most important requirements are an abrasion machine for testing the hardness of building-stones and road materials; apparatus for making impact tests, and two small machines for tension and torsion.

J. GALBRAITH,

Toronto, December, 1897.

Principal.

APPENDIN L.—INDUSTRIAL SCHOOLS, 1897.

To the Hon. Geo. W. Ross, LL.D., Minister of Education, Toronto:

Dear Sir,—I have the honor to submit the following report regarding the Industrial Schools at Mimico and East Toronto:

Victoria Industrial School for Boys, Mimico.

- 1. Total number registered during the year was 165.
- 2. The number admitted during the year was 38.
- 3. The number who were placed in situations, or whose term expired during the year, was 50.
 - 4. The total number of days attended during the year was 41,675.

Alexandra Industrial School for Girls, East Toronto.

- 1. The total number registered during the year was 26.
- 2. The number admitted during the year was 9.
- The number who were placed in situations, or whose term expired during the year was 11.
 - 4. The total number of days attended during the year was 6,010.

Both institutions continue to do good work.

The attendance is smaller than it should be, in my opinion, owing to the fact that the police magistrate in Toronto has interpreted the statute in such a way as to make it practically impossible to get pupils sent from Toronto to the Industrial Schools. He has held that the parent is not legally responsible for the non-attendance of his child at school so long as he tells his child to go to school; and on the other hand he has held that he should not send any child to the Industrial School unless the parent or guardian gives consent. I think it very desirable that the statute should be made perfectly clear.

TORONTO, December 16th, 1897.

James L. Hughes, Public School Inspector.

APPENDIX M.—DEPARTMENTAL LIBRARY, 1897.

REPORT OF THE ASSISTANT LIBRARIAN OF THE EDUCATION DEPARTMENT.

To the Hon, G. W. Ross, LL. D., M.P.P., Minister of Education:

SIR,—The following is my report on the Library of the Education Department for the year 1897:

1. Books Given Out.

The number of books given out to students and others during the year 1897 was 10,369, an increase over the numbers given out in 1896 of 1,689. The students of the Ontario Normal College were here only during the first half of 1897, so this increase shows that more University and other students, public school teachers, etc., enjoyed the advantages of this Departmental Library in 1897 than had been the case during previous years.

The following comparative table of books given out in successive years is an interesting record:

,			1892.	1893.	1894.	1895.	1896.	1897.
en out	ia montł	n of January	159	334	375	354	573	699
• 6	4.4	February	431	764	609	804	1,040	1,370
• • •	• •	March	617	944	585	1,034	1,270	1,702
6.	. 5	April	467	897	991	627	1,021	1,111
+ 4		May	546	814	694	633	843	923
- 4		June	332	461	332	354	400	609
		July	69	54	17	223	32	25
٠.	: 4	August	100	97	48 1	100	16	18-
6.6	- 6	September	526	370	344	415	295	514
	٤.	October	1,263	1.148	1,010	1,130	1,170	1.200
• •		November	1,136	1.004	1,039	1.063	1,268	1,099

		_	6,339	7,446	6,614	7.334	8,680	10 369

2. Books, etc., purchased and bound.

The number of books	purchased in	1892	was	388
4.6	• "	1893	46	290
66	66	1894	66	257
"	66	1895	"	430
4.6	"	1896	"	495 - 100
"	"	1897	"	476
Specimen copies, etc.	, presented in	.1897	"	73

The number of pamphlets purchased during 1897 was 27; in 1896, 28.

The number of magazines and newspapers received during 1897 was 170.

The books, newspapers and magazines bound during the years $1892 \cdot 1897$ were as follows:

1892.	1893.	1894.	1895.	1896.	1897.
79	109	136	141	98	99

3. Official Reports on Education, etc., received in 1897:

From Great Britain Various provinces of the Dominion Victoria	64 1
New South Wales	1
Queensland	1
Tasmania	
Western Australia	. 1
New Zealand	
Jamaica	. 2
Barbadoes	
British Guiana	
Cape of Good Hope	
Japan	. 1
Uruguay	
Costa Rica	1
Argentine Republic	
France	
Switzerland	
Various States of the American Union	
	194

Historiography:

The fourth volume of the "Documentary History of Education in Upper Canada," 1841-1843, was published in the spring of 1897, and the fifth volume, 1843-1845 6, was published in November, 1897, instead of in May, 1898.

Catalogue of Books on Education.

Seven hundred and fifty copies of the catalogue of books on elucation and kindred subjects were printed in July, 1897.

A catalogue of periodicals, etc., was prepared early in the spring of 1897, at the request of Mr. Bain of the Public Library, who wished to incorporate in one catalogue all such periodical publications as will be found in the different libraries in the city of Toronto.

Fifty new pamphlet boxes were bought, and during the year a number of pamphlets, unbound reports, etc., were sorted, some were sent to the cupola and others were arranged in pamphlet boxes.

Before leaving for Britain, Dr. Hodgins requested me to make out the annual report of the Education Department Library which I trust will prove satisfactory.

JANE M. CROOKS, Assistant Librarian.

APPENDIX N.—MISCELLANEOUS.

THE HIGH SCHOOL FORM AND UNIVERSITY MATRICULATION EXAMINATIONS.

1. Members of the Educational Council and Board of Examiners for 1897-8.

1. EDUCATIONAL COUNCIL.

Under the provisions of section 5, of the Education Department Act of 1896, as amended in 1897, the following were appointed members of the Educational Council:

James Loudon, M.A., LL.D., President of the University of Toronto.

Maurice Hutton, M.A., of Toronto University.

The Rev. N. Burwash, M.A., LL.D., Chancellor of Victoria University.

The Rev. William Clark, M.A., D.C.L., F.R.S.C., of Trinity University.

A. P. Knight, M.A., M.D., of Queen's University.

A. C. McKay, B.A., of McMaster University.

W. J. Alexander, B. A., Ph. D., of Toronto University.

Alfred Baker, M.A., of Toronto University.

The Rev. J. R. Teefy, M.A., LL.D., Principal of St. Michael's College.

W. Tytler, B.A., Public School Inspector, Guelph.

F. W. Merchant, M.A., Principal Collegiate Institute, London.

R. W. Doan, Principal Dufferin Public School, Toronto.

W. PAKENHAM, B.A.,

Registrar.

JAMES LOUDON, M.A., LL.D.,

Chairman.

2. BOARD OF EXAMINERS APPOINTED BY THE EDUCATIONAL COUNCIL.

English, History and Geography:

A. E. Lang, B.A.

W. S. McLay, B.A.

F. H. Sykes, M.A., Ph.D.

Mathematics :

N. F. Dupuis, M.A., LL.D.

A. T. DeLury, B.A.

M. A. Mackenzie, M.A.

Classics:

A. J. Bell, M.A., Ph.D.

P. S. Campbell, B.A.

W. S. Milner, M.A.

French and German:

- W. H. Fraser, B.A.
- L. E. Horning, M.A., Ph.D.
- J. Squair, B.A.

Physics, Chemistry and Biology .

- E. C. Jeffrey, B.A.
- J. C. McLennan, B.A.
- W. Nichol, M.A.

F. N. NUDEL,

Secretary.

W. PAKENHAM, B.A., Chairman.

Preface.	į
Introduction	7-16
Examinations in Outario	17-2:
Examinations in Quebec	23-20
Examinations in Nova Scotia,	26-3
Examinations in New Brunswick	30-3
Examinations in Prince Edward Island	34-3
Examinations in Manitoba	
Examinations in British Columbia	59-4
Examinations in Massachusetts	
Examinations in New York	46-5
Examinations in Pennsylvania	53-5
Examinations in Indiana.	
Examinations in Ohio	60-6
Examinations in Michigan	62-6

PREFACE.

The memorandum that follows was prepared at the instance of the Minister of Education. In the introduction will be found the opinions of some leaders in education both in England and the United States which are recommended to the profession for careful perusal. As a subject of comparative study with respect to the number and scope of examinations, a brief statement is submitted respecting the mode of conducting examinations in the Provinces of the Dominion, and in six States of the adjoining Republic. The States named were so chosen because their Systems of Education are organized on lines, in many respects, similar to the School System of the Province of Ontario.

EDUCATION DEPARTMENT.

December, 1897.

INTRODUCTION.

The relation of examinations to education is a most perplexing problem. Noted men of different countries have written on the subject, viewing it from their particular standpoints and influenced by their peculiar local conditions, and very many of them have emphasized particularly the evils of the system as it now exists. There can be no doubt that examinations may superinduce certain evils, but it is a much easier task to point these out and to dilate at length upon them than it is to suggest a practical remedy or offer an adequate substitute. It was the late President McCosh of Princeton University who in speaking of these objectors said: "They have opposed the existing system without recommending any other with which to compare it. Till they propose a better scheme and submit it to public criticism it will be wise in public institutions and teachers to retain the present plan, seeking always to avoid the bad forms and adopt the good forms of examination."

The first great awakening of the public to the subject took place as the result of an article in November, 1888, in the *Nineteenth Century*. It was entitled "The Sacrifice of Education," and took the form of a protest signed by a great many of the leading literary and university men of England. Much of it and of the consequent discussion had reference to local conditions, especially in connection with the university and civil service examinations, but some of the general remarks may be applicable to our own country and will perchance awaken some sympathetic chords. The following are quotations from the "protest":

"We hold that the preponderating influence of examinations destroys the best teaching. Under it the teacher loses his own intelligent self-direction. He cannot devote his powers to such parts of a subject as are most real to himself and most deeply felt by himself (though on this depend the impressiveness of all teaching and the awakening of permanent interest in those taught), as he is constantly controlled by the sense of the coming examination in which of course he wishes his pupils to succeed. The pupil on the other hand allows himself to be mechanically guided for the sake of success."

"To a young and healthy mind the constant suggestion that accompanies work done in every branch of knowledge, the constant opening up of new interests, are the great stimulants to self-development. And they should be ever spurring the student on to endeavor to know more and to see more clearly. We hold that these life-giving interests cannot possibly co-exist with the repressing influences of training for great examinations."

"The examination is a good educational servant but a bad master. It is useful in the hands of a teacher to test his own work and to know how far his pupils have followed and profited by his teaching. It is futul whenever it is made of such importance that teachers simply conform to an external standard, lose faith in themselves, sink into the position of their own text-books and give but little of their personality to the work."

Prof. Max Muller.

Following this, Prof. Max Müller wrote a short article from which the following are quotations:

"Young men imagine that all their work has but one object—to enable them to pass the examinations. Every book they have to read, even to the number of pages, is prescribed. No choice is allowed; no time is left to look either right or left."

"It is the best men who suffer most from the system of perpetual examinations."

"The trouble is that examiners seem to be seeking to ascertain what the student does not know rather than what he knows."

Prof. Müller urges that there should be more careful supervision exercised over examiners that their power may not be so arbitrary and complete.

MR. FREDERIC HARRISON.

Mr. Frederic Harrison adds his opinions to the discussion, saying:

- "Examination papers, not text-books, become the real object of study; the aim of the student is to get an insight into the mind of his examiner not that of his teacher, and to master, not the subject of his study, but that artificial skill of passing examinations."
- "My complaint is the incessant frequency of examinations, the growth of the practice into a highly artificial system, the creation of a profession of examining and its correlative the profession of cramming, the wholesale mechanical and hurried way in which the examinations are held and the subjection of teaching to examining."

PROF. KNIGHT.

In answer to the articles from which the preceding quotations have been made Prof. Knight makes reply in the next month's issue of the same magazine. He says:

- "Although some teachers may forget the ultimate end in the temporary means, and sacrifice education to examination, this is not the fault of the existing system, and it need never occur under it, if the examiners are wise, the examinations fewer and a few reforms made in the direction of greater elasticity."
- "Let the battery be directed against the vicious methods of examination only, against the kind of papers sometimes set by young examiners—papers which test out-of-the way and excessively specialised information rather than discover a mastery of principles—and if necessary let it be turned against the examiners who look to a showy knowledge of 'points' rather than to clear insight and mental grasp."

He urges as the true reform the lessening of the number of examinations, making them more elastic and examining upon subjects rather than upon books.

This English discussion aroused great interest in the United States and in the spring of the following year there appeared some short contributions on this subject by American educationists.

PROFESSOR SHARPLESS, of Haverford College, thought that a great deal of the danger in examinations consists in having external boards of examiners, and recommends that the teacher be the examiner.

PRESIDENT J. B. ANGELL, of the University of Michigan, said: "There must of course be some kind of examination or inspection in any course of study. Nor can it be denied that an examination which calls in a man to report what he has secured in a prolonged course of work has its advantages. But examinations when they sweep over a wide range, should be so planned and conducted as to show the general grasp of the subject considered in its proper relations, rather than to test the memory for technical details."

Hon. John Eaton, LL.D., formerly U.S. Commissioner of Education, said: "All human affairs go forward by the application of tests. Every man applies them to himself and others for his guidance. Commerce, indeed every kind of business, depends upon them. Our opinions of civil affairs are formed by our use of them. We cannot conduct our education most successfully without tests, standards wisely established and carefully applied. In selecting these standards we cannot dispense with examinations and yet we need to be on guard against their perversion. The misuse of examination we readily see arises from a variety of causes among which figure largely: 1st. Ignorance; many have no correct idea of these examinations, either oral or written. 2nd. Intentional perversion; some purposely use examinations for wrong ends. Persons who are selected as examiners not on account of fitness, but for some social or partisan end in politics religion or science, need not be expected to conduct examinations on principles

of justice, treating the subject under consideration fairly, or the pupils with reference to their individual peculiarities. We should remember that examinations are not the end, but only the means to it. Our youth are neither reared, nor our institutions of learning established, nor education in any of its forms carried forward for the purpose of keeping up examinations."

WM. T. HARRIS, LL.D., Commissioner of Education for the United States, said: "A comparison of the evils with the advantages of examinations proves at once that there is a legitimate scope for examination within which it is not liable to abuse, namely, its use to give the pupil self-knowledge of his method of study and guidance in the true method—the same giving the teacher a like self knowledge as to his own work. If examinations are at present devoted too much to insisting on 'points' and dead results, a commission of teachers may easily correct the evil by requiring theses which will test the insight of the pupils into the spirit of the branches of learning. The evils which are real evils will be corrected if the examinations are placed under the control of the professional teachers. For these will then have the power to protect the cause of sound education by setting up tests of the proper character."

 W_{M} . H. B_{URNHAM} , Ph.D., said: "The necessity of examinations is admitted. The worst evils of examination do not seem to me unavoidable."

"Questions may be asked that require the examiner to do original thinking or at least to group facts learned in a new way. It is well night useless to learn for such examinations. Such examinations are like the tests in after life."

In High Schools and Academies it was the optnion of the late Dr. McCosii that examinations, written and oral, should have a place mixed up always with other stimulants

Speaking on examinations before an audience of school commissioners in New York State, Dr. W. J. MILNE said:

"It need not cause anxiety or alarm to find wide differences of opinion upon the subject of examinations. They are endorsed by some and condemned by others. There are those who take occasion at every gathering of people who will listen to them, to denounce the present system of testing pupils as to their knowledge of subjects taught in schools. The uselessness of the test is set forth in great earnestness, and the nervous tension upon the candidate is denounced in vigorous language. Medical testimony is adduced to show the terrible evils of the process. One would think, from what they say, that the ability of a student in scholarship could be determined by a few moments conversation, and that his personal appearance would indicate whether he should be promoted or kept in his own grade. I am not aware that any school commissioner in the State holds such views, and yet they are held, and there is, in many places, a general distrust of the value and modes of examinations. This distrust and condemnation are due to a certain extent to a mistaken idea as to the purpose of these tests of scholarship and the necessity for them. It is not to be supposed that any examination will disclose the amount of knowledge possessed by the candidate; it is prescribed simply to test the person as to the minimum of knowledge necessary to secure promotion, or to enable the examiner to affirm that the candidate is not ignorant of the subjects upon which he is tested. It is for such a purpose that examinations are prescribed for those who wish to teach in our schools. No one will pretend to say that some amount of learning is not necessary for those who are to engage in teaching in the Public Schools. A teacher, to do his work well, should be informed sufficiently upon all the subjects that are to be taught by him to enable him to instruct the children in those subjects. It is not necessary that he should be a profound scholar, perhaps, but it is necessary that there should be some standard by which he is to be judged as to his fitness for the work of instruction. No one who is deficient in this minimum of education can be qualified to do properly the work of a teacher. Tact will not supply this deficiency, nor will experience do it. The knowledge cannot be disregarded, but must be taken into account; consequently, there must be some sort of examination to determine whether or not the candidate is qualified, so far as his knowledge is concerned, to give proper instruction in the public schools. The examination, therefore, is not designed to be a test of knowledge, so much as to be a process by which the incompetent are prohibited from teaching."

Mr. C. P. Mason, in the British Quarterly Review, says: "The educational examination—the testing of progress on definite and well-considered lines of advance—must be grossly mismanaged, and pushed to an altogether irrational extent, to be anything but an almost unmixed benefit. One sometimes hears people talk of the folly of imitating the child who, having a little garden of his own, should be continually pulling up his flowers to see how the roots were growing. The illustration has been worked to death, and is, after all, a very inappropriate one. So far as there is any analogy, a genuine educational examination is not a looking at roots at all, still less is it a disruption of the growing powers and their source of supply; it resembles rather the removal of a screen to admit of the inspection of leaves and fruit."

"There is one point upon which more care and discretion will need to be exerted by those who are responsible for the conduct of examinations than has sometimes been shown. Examination is a very difficult art. A competent and judicious examiner is a very 'rare bird,' and it is by no means to be assumed that a good, or even a brilliant scholar will straightway make a good examiner. On the contrary, such a man, taken fresh from college, is often one of the worst examiners, especially where children are concerned. Having had little or no experience in teaching children, he has no insight into their minds, and does not understand how to get at a child's knowledge or rightly estimate what a child may be expected to know. Frequently, too, he is possessed by the perverse idea that it is his business to ascertain not what a child knows, but what it does not know. In such a case, the unfortunate examinees speedily get perplexed and discouraged, and soon cease even to attempt to answer when questioned. It is quite possible for even well-instructed children to pass through an examination of this kind without having been able to answer a single question. We have before referred to the pitiful ambition sometimes shown by examiners to display their own superior knowledge by giving crotchety questions on out of the way matters. We have good reason to believe that the loud complaints which are sometimes made by school teachers on this point are by no means without foundation.

Writing in the Nineteenth Century on "The Good and Evil of Examination," Alfred Barry, says: "So, again, arguments are, I think, used for and against examination generally, which apply only to one of its many functions. It is thought sufficient, moreover, to condemn a system dependent on examination, if we can prove that it offers but an imperfect test of excellence, without attempting to discover a more perfectly discriminative system by which it may be replaced. Again, when it has been eloquently shewn that, under an ideal system of teaching and for ideal scholars, examination is likely to be a questionable gain, if not an actual hindrance, it is concluded by acclamation that it must be useless, or worse than useless to the educational world in its actual state. All this is natural enough to the irritation of over burdened teachers and learners; and popular judgment always loves the sweeping generalities, from which fuller experience shrinks."

"I hold it possible by examination, deliberately and carefully conducted, to test and to estimate in those who are submitted to it, not only formal knowledge on this or that subject, but intelligence, thoughtfulness, and promise of future growth."

"I cannot believe, what is commonly asserted, that the system of examination necessarily plays into the hands of 'crammers.' After all, what is a 'crammer,' and how far is he (to borrow an ironical phrase from Mr. Lowe) 'abhorred of gods and men'? It is absurd to apply the odious title to a teacher, who simply directs the studies of his pupils into the lines marked out by the requirements of certain examinations, while within those lines he devotes all his energies to teach in the best possible

way, and to see that his pupils really learn, with that clear and definite knowledge which can be substantially reproduced on demand. His work is not, indeed, so high and so original as the work of the teacher, who is allowed to follow out his own lines of thought absolutely, and whose hearers are free from all anxiety, except the anxiety to learn. But it is sound and true work nevertheless; and unquestionably it ought to be. by the nature of the case, so thoroughly digested as least of all to deserve the name of cram.' The true 'crammer' is the man—and such men unhappily there are—whose whole object is not to teach thoroughly the subjects he undertakes, but to induce his pupils to get up simply 'what is likely to be asked,' perhaps from compendiums or dictated papers committed almost mechanically to memory--who descends to the baseness of studying the idiosyncrasies of particular examinations, and calculating, by statistical references to their former papers, what questions they are likely to set—who inculcates assiduously the acquisition of that style in answering, which is best calculated at once to simulate knowledge and conceal ignorance—and who, making a mere trade of his work, condescends to the worst tricks of trade—unwearied putting, assumption of the credit of the success of pupils really taught elsewhere, and the commercial speculation, which offers to demand no payment in case of failure, on condition of an exorbitant profit in case of success. Such a man as this deserves every opprobrium that can be heaped upon him; and no name is more appropriate than the term 'cram'—unclassical, but significant—to describe the 'vacant husks' hardly 'meant for grain' with which he cheats the appetite for true knowledge. I would urge that examination in all its aspects is at its best, when it is dissociated from the competitive system, and has only to mark the different grades of absolute merit in the candidates submitted to it. It is too much forgotten that examination is an important but subordinate element of teaching. It is, perhaps, on the whole, best conducted mainly by those who actually teach. occasionally by others independent of them. But in each case it ought to have regard to the actual teaching, in the one simply gathering up its results, in the other supplementing these results by fresh suggestion.

It is almost a commonplace to refer to its twofold object, in relation to what has actually been taught—first, to secure precision, soundness, and accuracy of knowledge; and next, in close connection with this, to enforce facility and clearness of expression, and sagacity in choosing out the main points of a subject. To these, moreover, should be added a third object—the suggestion of fresh matter beyond what has been actually taught (such as was the one purpose of the Socratic cross-examination), either negatively by bringing home the consciousness of ignorance, or positively, by the indication of new lines of thought. Of these, the last two advantages must be considered as absolute, probably increasing in importance in the later stages of education. But the nature of the knowledge which examinations should endeavor to elicit must necessarily vary at different points of educational progress. In depreciating the achievements of pure memory, which it is supposed to foster, it seems often to be forgotten that in early days it is precisely memory, which is necessarily and providentially prominent in the mind, storing up the materials for future thought and originality. Intelligent memory is at that stage a product to be stimulated and rewarded, at least as much as precocious originality of thought. It is the examiner's fault if memory be allowed to be mechanical and unintelligent; but, when he is dealing with young minds, he may be very well content with fairly intelligent reproductions from the storehouse of memory, even if they as yet be imperfectly assimilated. As time goes on, examination should devote itself more and more to secure more perfect assimilation, to encourage some freshness of thought, to reward not the possession of the raw material of knowledge but the power to use it. But, until full maturity is reached, it will always have, under different forms and in different proportions, a very important educational function.

But, besides this function of examination, to test and perfect what is actually taught, it has, if wisely organized by any superior authority, a valuable directive influence. It guides both teacher and learner in certain specified directions, which are

supposed to have been fixed upon after careful study of the right scope and harmony of the course of education to be submitted to it. It thus guards against omission or careless handling of some subjects, and exaggerated devotion to others—against the ill-proportioned training which stimulates this faculty of the mind and stunts that.

But this is not all. Hitherto I have looked only to the service rendered under an ideal system of education. There is a further use of examination under the actual condition of things, so important that it is often allowed to obscure all others. It must foster-and, if need be, enforce-a sense of responsibility in the learners against indolence, desultoriness, frivolous or obstinate waste of time and teaching. Seeing that this -far more than stupidity in learning or errors of teaching-is the great hindrance to education, it is difficult to hear with patience transcendental tirades against examination, which unquestionably does so much to meet it, because it must be, in some degree, a rough and ready way of acting in mind. What is to become of the rank and file of our educational army without it? In the German universities where examination plays apparently so small a part, it is hard to avoid the belief that they must be, to a great degree, sacrificed to the interests of the brilliant few. Of course, like all semi-compulsory processes, it is simply "of the law," and accordingly there will be those who fall below it and those who rise above it. To the former class it will be useless, to the latter it must be needless, and may be worse than needless. But, after all, it is for the mass that we must legislate, the exceptions ought to be provided for by exceptional dispensations.

The system has, indeed, two serious drawbacks, both of which are due to the unwise exaggeration of its advocates. It is liable to become burdensome, by excess both in the number and in the scope of its applications, and in that case (as I have already suggested) to interfere both with the soundness and nobleness of education. It is liable to suffer from the attribution to it of a higher degree of perfection as a test and of practical usefulness in result than it can rightly claim. But neither of these drawbacks is either fatal or irremediable. In both points we can improve examination without making them an excuse for improving it off the face of the earth.

The conclusion to which I venture to draw from these imperfect suggestions on a large subject is that the present outcry against examinations will be most injurious if it produce an indiscriminate jealousy or hostility against the whole system; and, on the other hand, most useful, if it check the almost fanatical belief in examination, and examination alone, which has prevailed of late, and induce public opinion to consider what is the right place of examination, what are the various functions, what is the good and evil in the system, and how far the evil can be eradicated without introducing more mischief. When this has been done I trust that examination will be cordially welcomed to its right place in our educational system and resolutely bidden to keep it.

Superintendent Maxwell, of Brooklyn, N.Y., writing on the subject of "Examinations as Tests for Promotion," says:

"The objections to examinations are: first, that they set up a false standard, that knowledge should be its own reward and stimulus; second, that the best part of teaching, namely, the implanting of ennobling desires, cannot be tested by examination; third, that they lead to cramming; fourth, that they produce a strain that affects the nervous system injuriously; and fifth, that they rob teachers of originality and independence. With regard to the first it may be said that while it is highly desirable that knowledge should be its own reward and stimulus, it is very seldom that it is so; in the great majority of cases the desire for knowledge is an acquired taste. The second fails because, though an examination may not be adequate to test the highest part of teaching there is no reason why we should not use it for purposes for which it is effective. The other objections are examples of the abuse, not of the proper use, of examinations."

The following quotations are on the same subject and appeared in the report of the Commissioner of Education for the United States:

"It is a good thing for a merchant to take account of stock at the end of the year, to balance his books and see how he stands with the world; it is a good thing for a school-boy once in a while to be called upon to tell definitely what progress he has made, what power he has gained in the time that he has passed. The examinations may be used to spur a lazy pupil without unduly urging the one who studies faithfully; they make very good exercises in the use of language; our pupils do not worry or fret over them; on the contrary the children themselves see in the examination a means of finding out whether they really understand what they have studied." (Superintendent L. P. Nash, Hingham, Mass.)

"Well conducted written examinations at suitable intervals furnish to teachers and pupils reliable information upon various matters which it highly concerns them to know and which could be obtained by no other means. They reveal to pupils their deficiencies and acquaint them with the accuracy and permanency of their knowledge and their ability to express in writing what they have labored to acquire. They furnish teachers with the desired information concerning the knowledge or ignorance of their pupils of the subjects pursued and reveal to them also the efficiency and defects of their own instruction." (Superintendent J. H. Davis, Somerville, Mass.)

PROFESSOR NICHOLAS MURRAY BUTLER, Ph.D., writes on "The use and abuse of examinations:—"

"There are three kinds of examinations,—the incidental, which is the oldest form; the stated, which determines graduation and the receiving of a degree; and the examination for promotion within an institution, which in time of origin and place in curriculum is intermediate. Granted that an examination is a natural necessity and yet an incidental feature of a rational educational scheme, the question is, how can the teacher best test the effectual character of his teaching. Experimental psychology is sure to shed light on this point.

There are two kinds of examination, the qualifying and the competitive, and it is necessary carefully to distinguish between them in discussing the general subject. The best things to be said for examinations are to be said of the qualifying examination; the worst things that can be said are to be said against competitive examination.

Every qualifying examination is supposed to test the mental faculty, the acquisition and the skill in the application of knowledge of the pupil. An examination which simply tests the power of acquisition is very defective; one which simply tests the skill of application is easy to plan for, but one which tests the mental faculty is most difficult and most valuable. To test the mental faculty two methods of approach are possible, the synthetic and analytic. The analytic is valuable because it trains the attention, the judgment and the reason.

The advantages of examinations are:

- 1. They compel a concentration of mental energy.
- 2. They develop character by compelling a meeting and overcoming of difficulties.
- 3. They demand a recalling and reviewing of information and combat desultoriness in study.

The disadvantages of examinations are:

- 1. They induce a nervous and mental strain which many persons cannot stand, some persons seemingly being born to pass examinations, and others not so born.
- 2. The shock from a failure to pass examinations frequently discourages capable pupils.
- 3. They induce men to cram a mass of useless material into their minds in preparation for them.

All examinations or any system of examiners that make examinations an end not a means; that fail to recognize the individuality of the person examined; that tend to

grind down individuals into a common mass, are to be deplored and are illegitimate, not normal."

The following quotations are from an article entitled, "Should examinations be abolished?" by Dr. Geo. M. Steele, of Massachusetts.

"To wholly abandon this element in a course of study would be, as it seems to me to leave out a very important means both of discipline and of acquisition.

Where there are only two or three pupils, it is possible that an exclusively oral examination may be better. But probably in such cases one partly oral and partly written would be superior to either exclusively. For there are at the best disadvantages in each, even if it were always possible to use either. A little oral cross questioning skilfully used may best indicate the real familiarity (or the opposite) of the pupil with the subject, which would not be apparent in a written exercise. Still on the whole, and in a class of fifteen or twenty, the advantages on the side of the extended written examination largely preponderate. Among these there is the generally recognized one of a training in expression—the act of composition. This though recognized, is not commonly estimated according to its full value. It is worth more than almost any amount of rhetorical exercises on subjects assigned by teachers or selected by the pupil. It is true that the ordinary written recitation gives something of this; but in this case there is more likely to be reliance on a verbal memory of the matter in the text-book or in the lecture, while in the more general examination there is the indication more or less of the thought of the pupil in connection with the subject. It is true that in such writing the anxiety to accomplish much in a short time is likely to prevent much care as to style and neatness of expression; but there are other highly desirable qualities that are developed in this way that would not be under any other.

It is probable that the ultimate test of acquaintance with a subject should be a combination of the results of the daily record and the final examination. Some moderate fraction of the latter—from one fifth to one-third, varying, perhaps, according to circumstances—to four-fifths or two-thirds of the former.

One objection to the final examination, with the understanding of its coming on the part of the student, is that an indolent and careless student may take the opportunity to make up for past delinquencies by a hasty but intense effort. This, of course, is always imminent; but we cannot wholly rid ourselves by any system of similar liabilities. Still on the plan of the combined test, the disadvantages here involved are reduced to a minimum."

Dr. N. G. W. Lagerstedt, Commissioner of the Swedish Government to the World's Exposition in Chicago, in making his report, says:

"In this connection I mention that at examinations the answers to the questions are mostly given in writing. To what an extent this is done in different cities and places I This method of examination has no doubt advantages which are am not able to say. worth considering. The similarity of questions addressed to all pupils, will cause more correct answers; the questions are considered more carefully; the answers are given with greater composure and caution; and the result of the examination depends less on mere This method is also carried on in England to a large extent, from the lowest classes of the school to the university and governmental examinations. My opinion is that this method of examining deserves to be introduced in our schools to a certain extent. It certainly would be practical in the higher classes of our secondary schools in connection with oral exercises in mathematics. The experiments which I made when an inspector at the Normal School for higher grade women teachers, brought out the good features of this method. First and foremost, it is of great advantage in grading the certificate that there should rest a written evidence of the student's efficiency. In most instances it happened that the examinations agreed with my previously formed judgment in regard to the student's ability. Sometimes, indeed, a student, through the accuracy and keenness of her answers, showed herself worthy of a better rating than I had hitherto awarded her.

I do not remember any case in which a favorable judgment of mine, previously arrived at, was ever set at naught after inspection of the written answers. At times, of course, I became assured on one point or another where I hitherto had been undecided in forming a final judgment. However, to permit the results of written answers to solely influence the certificates or opinions at an examination would be entirely out of place. Oral examinations give the examiner an opportunity to see the examinee in a different light from that in a written examination. It seems best, therefore, to have both kinds, if possible. For that purpose one might submit questions for written answers different from those used in the oral examinations. For one pupil it may be easier to express himself orally, while another pupil is more able to state his ideas in writing. It is no more than just that each should be afforded an opportunity to show his ability in the best light. It is preferable to make an examination as many sided as possible. With this end one might propose questions differing in nature, so as to bring out the individuality of the student in his written answers. Besides, some of the questions may require only a brief statement of facts, others a more decided answer, the latter, however, without leading to a composition, which is a question that can not be answered here."

ON THE SUBJECT OF "EXAMINATIONS."

Mr. BARR FERREE writes:

"The subject of the relations between examination and education have now been sufficiently studied to permit actual experiment with the many suggestions that have been offered from all parts of the English speaking world. The subject is one on which it is difficult to say too much, but it is also one that calls for action. It is, of course, too much to expect a sudden and complete abandonment of examinations on all sides, but surely there are men who have sufficient courage to put into practice some of the suggestions that have been made. A modest step in the right direction would be to examine topically. Give the student ample time and opportunity with a wide margin of subject, and let him tell or write out as much as he can within certain limits. Make the examinations, not a series of identical answers, the very reading of which is liable to produce congestion of the brain, and a dozen minor ills, but a simple story of the knowledge the student has gained. In some branches such a system is not practicable, especially in algebra and arithmetic, and in these, great care is required. In these branches a favorite suggestion is the use of original problems, so as to show a knowledge of principles and their practical application. But the heat of an examination is not a good place to judge of the powers of application. The good students are too nervous, and the bad ones too Be this as it may, however, topical examinations cannot help being fairer than those that call for the knowledge of specific facts. It is easy, in such an examination, to distinguish between work and play, between study and cram. Such a test will be welcomed by the better students, and dreaded by the worse. These last will know that without constant work throughout the term it will be impossible to write a satisfactory paper. And further, if the examination is held without notice, as it should be, cramming will be altogether out of the question. The two objects of examinations will therefore be accomplished. They will show what the student really knows, by inviting him to tell as much as he can on essential points, and they will compel the indifferent ones to give attention to their work, as otherwise they would be unable to pass. And finally they will afford no opportunities for that bugbear of examiners, cramming.

It has become the fashion lately to collect amusing replies to examination questions. These collections teach the utter failure of many of the modern methods. They are largely based on questions that would not be thought of, were it not for the purpose of perplexing the child. All this is out of place in sensible teaching, but just so long as there are teachers unacquainted with the broader views of the ends and aims of education, they will continue to be asked and passed around the world as specimens of childish stupidity. The great need of the lower schools is the abolition of catch questions, the propounding of difficult problems, the insisting on unimportant details, and a thorough circulation of good common sense among the teachers. An instructor of the young, especially in the

earliest years, has the means in his hands to powerfully impress the minds committed to his care. He can, to a great degree, influence them for the good or for the right: He can make good, law abiding citizens of them, or he can make careless indifferent, thoughtless, fretful men. He can, if he choose, become the most active influence in these young lives, and yet how few grasp at the opportunities thrust upon them. The mechanical system of our public schools wearies both pupil and teacher. The one is viewed by the other as a machine, bound to do so much work every day, and forgotten as soon as it is done. It is time that this is changed. Our schools must hold their proper place as guides for good in the life of our children. The teachers must become inspired with the nature and importance of their work, and we must not hesitate to take the first steps in this direction, because we may not see the end."

Mr. G. T. Fletcher, agent of the Massachusetts State Board of Education, speaking of examinations for teachers, says, in his report: "These should be given to determine scholarship, a knowledge of the principles of education and the right method of teaching. It is evident that such examinations can be properly conducted only by persons who are well informed upon the subjects and methods that find a place in the schools. Every person prepared to teach and desiring to do so, should hold a certificate of qualification from some examining board having recognized ability and authority."

Mr. J. R. Parsons, Jr., in making his report to the Regents of the University of New York, says of teachers' examinations: "In New York, the system of alternative questions has greatly increased the popularity of the regents' examinations which required in 1894, 875,050 question papers. The department of public instruction has followed the regents in adopting the same plan in examinations for teachers' licenses." This certainly is a forward step and will do much to disprove such a statement as—"The examiner tries to find out not what the candidate knows but what he does not know."

The late George William Curtis, in an article on "Teachers and Examinations," said: "I believe that the requirement of certification or license before appointment is universal in all the States of the Union. The examination upon which the certificate or license issues is, then, the cardinal point. What are the vital essential conditions of effective examination? To be properly effective the examinations must be uniform, entirely competent and wholly independent of the appointing power. The examiners must be sincerely interested in education, familiar with the duties of a teacher and with the requirements of the art of teaching, and capable of conducting an examination to ascertain both the scholastic attainments and the specific professional fitness of the candidates. Wherever these conditions do not exist, the public school system and therefore the whole community suffer."

Mr. J. R. Parsons, Jr, in New York Regents' Report for 1893, says:-

"The best thought of the current year proves more conclusively than ever the necessity for oral and written examinations. Radical reformers have succeeded only in calling attention as of old to abuses. They have brought forward no new arguments. They have simply demonstrated that time is wasted which is spent in endeavoring to find a satisfactory substitute for systems which it would be folly to overthrow. Examinations are a necessity, and the value of systems of examinations depends entirely on the intelligent criticising and suggestions of those who recognize this fact and spend their time in seeking to remedy their defects."

Also in the report for 1894:—

"Examinations grow in favor from year to year as the best protection yet devised against incompetency, and grave abuses in official and professional life, and as tests of systems of teaching. In almost all civilized countries minimum educational qualifications which may be tested only by examinations have long been required for eligibility to official or professional life. The United States is moving rapidly in the same direction. Eleven States now require uniform examinations for license to practise medicine. Other States are following New York in prescribing uniform tests for admission to professional studies."

MODE OF CONDUCTING EXAMINATIONS IN THE PROVINCE OF ONTARIO.

The Education Department with the examinations held under its supervision is a feature of the educational development of Ontario. The advancement that has been made in the direction of lessening the number of examinations and widening their range has not been accomplished in a day, but is an adaptation to local conditions of the best points of systems elsewhere, which have been tried and proven.

Instead of the five Universities, the Law Society, the Medical Council, the Divinity Schools, the Normal School, the Schools of Dentistry, Pharmacy, Engineering, etc., having separate examinations for admission, there is a system of uniform examinations for the Province held at the same time and on the same papers in every High School and Collegiate Institute.

The examinations are under the control of the Educational Council, composed of twelve members—six appointed by the Senate of the University of Toronto, and six appointed by the Lieutenant-Governor in Council on the recommendation of the Minister of Education. This Council appoints examiners of well known ability as teachers, either in a University or High School, to prepare examination papers for teachers' certificates, and also appoints as associate examiners for the purpose of reading and valuing these papers, graduates of the Universities in the British Dominions or specialists actually engaged in teaching. For certain other examinations specially qualified examiners are appointed. The lists from which selections are made for this purpose are turnished by the Minister of Education and contain the names of at least twice the number of examiners to be appointed, the number necessary being decided by the Minister of Education.

The associate examiners are paid the sum of \$6 per day, while actually engaged in the work, the payment being subject to the restriction that the whole amount paid for the examination shall not exceed the sum of \$1.50 per candidate.

NON-PROFESSIONAL QUALIFICATIONS.

The line of demarcation between non-professional and professional qualification for teachers is nowhere more clearly marked than in this Province.

The non-professional work necessary to obtaining a teacher's certificate is covered in the course of study in the H.gh Schools, and as the educational system of the Province is under a centralized authority—the Minister of Education—this course is uniform. The work of the High Schools is divided into four Forms, that for Form I. being prescribed with the object of giving all students a thorough grounding in the rudiments at least of a good business education, which will enable them to transact the ordinary business of life in an intelligent manner. This has been deemed necessary as very many students leave the High Schools after one or two years attendance. The subjects of the Form I. course are—Reading (oral examination). Drawing, English Composition, History, Geography, Algebra, Geometry, Botany, Writing with Book keeping and Commercial Transactions, English Literature, English Grammar and Rhetoric, Arithmetic and Mensuration, with certain options in languages.

The Form I. certificate for which Pub'ic or High School students may be candidates covers in 1898, Reading, Writing and Book-keeping, Drawing, Geography and Botany. In lieu of this Form I. Examination, candidates from the Public Schools who seek to graduate from the Public Schools to enter the High Schools and to obtain full Form 1. standing may take an examination covering substantially the subjects mentioned above in the list of Form I. studies. This is known as the Public School Leaving Examination.

PRIMARY STANDING.

The subjects prescribed for Form II. of the High School consist of two parts, viz:—Part I.—English Grammar and Rhetoric, Arithmetic and Mensuration, History of 2 EX. [17]

Great Britain and Canada, Physics. Part II — English Composition, English Literature, Algebra, Geometry. There are also optional subjects—Latin, Greek, French, German.

To obtain Primary Standing the candidates must pass the Public School Leaving Examination (for Form I.) and at the same time, or, if preferred, in a different year both parts of Form II. as mentioned above, obtaining one-third of the marks assigned to each subject and fifty (sixty seven for honors) per cent, of the aggregate of marks. If the candidate wishes to write on the optional subjects the marks he obtains on these will be added to the aggregate marks by way of a bonus, provided he receives one third of the marks assigned to the subject.

The standing of the second year in Arts after a regular course in any University in the British Dominions is accepted in lieu of the Primary Standing.

JUNIOR LEAVING STANDING

To obtain this Standing, candidates must take the Public School Leaving Examination (or Form I. examination) Part I. of the Second Form Examination, (unless they have already passed these), and the following subjects assigned to the Third Form of the High School, viz:—English Composition, English Literature, Ancient History, Algebra, Geometry, Latin and one of the following groups, viz:—(a) French and Greek; or (b) German and Greek; or (c) French, German and Chemistry; or (d) French, Physics, and Chemistry; or (e) German, Physics and Chemistry; or (f) Botany, Physics and Chemistry.

Candidates who obtain one-third of the marks assigned to each subject in Part I. of the Second Form and fifty per cent of the total marks will be given a certificate to that effect. A separate certificate will also be given to candidates who pass on the same standard in the subjects of the Third Form. Sixty-seven per cent, gives honors in the Form III.

The standing of the third year in Arts after a regular course in any University in the British Dominions is accepted in lieu of the Junior Leaving Standing.

SENIOR LEAVING STANDING.

Form IV.. the highest Form of the High School, has the following subjects assigned to it:—Part I.—English Composition, Eaglish Literature, Algebra, Geometry, Trigonometry, English and Ancient History. Part II.—Physics, Chemistry, Biology, Latin-Greek, French and German.

To obtain Senior Leaving Standing, candidates must have taken the Public School Leaving (or Form I. Examination), and Part I. of the Second Form Examination; in addition there must be passed, a Form IV. Part I. Examination and of Form IV., Part II., an examination in Latin and Physics with one of the fellowing groups, viz:—(a) Greek and French; or (b) Greek and German; or (c) French and Chemistry; or (d) German and Chemistry; or (e) French and German or (f) Biology and Chemistry.

Certificates will be given candidates who pass one or both parts of Form IV, at this examination, the standard for passing being one-third on each paper and fifty per cent. of the total marks for one or both parts. Sixty-seven per cent. will secure honors when Parts I. and II. are taken together.

If, however, a candidate has already Junior Leaving Standing he is required to take only Part I. of Form IV, examination and certain subjects of Part II. hereinbefore mentioned.

Examination Fers: Form I. or Form II., Part 1, \$2: Forms II., III., IV., or any combination of any Forms, \$5. Of these fees, \$1 and \$2 respectively are paid to the authorities of the local Examination centres.

The standing of the fourth year in Arts after a regular course in any University in the British Dominions is accepted in lieu of the Senior Leaving Standing.

Specialist's Certificate.

Any person who obtains an Honor Degree in the department of English and History, Moderns and History, Classics, Mathematics, or Science as specified in the calendar of any University of Ontario and accepted by the Education Department, is entitled to the non-professional qualification of a Specialist in such department. A graduate who has not taken an Honor Degree in one of the above courses is entitled to the non-professional standing of a Specialist or submitting to the Department of Education a certificate from the Registrar of the University that he has passed, subsequent to graduation, the examinations prescribed for each year of the Honor course of the department for which he seeks to be recognized as a Specialist, and which he has not already passed in his undergraduate course; or any examination which is recommended by the University as equivalent thereto and accepted as such by the Education Department.

COMMERCIAL DIPLOMA.

The course for a Commercial Diploma may be taken in two parts. Both parts may be taken in different years or in the same year, at the option of the candidate. Part I. shall coasist of Book-keeping and Writing, 20 marks; Commercial translations, business forms and usages, 200 marks; Stenegraphy (Theory), 100 marks; Stenegraphy (Dictation), 160 marks. Part II. shall consist of the examination paters in Form II. in Arithmetic and Mensuration, History of Great Britain and Canada, English Composition, English Literature, and Algebra. The marks in these subjects shall be the same as in Form II. Candidates shall be required to make one third of the marks in each subject in each part, and one half of the aggregate of each part to obtain pass standing. Candidates who hold a Certificate of having passed in Form II., or in any Part of a higher Form, shall be required to write only on Part I. of the Commercial Course.

KINDERGARTEN CERTIFICATE.

In this Province the Kindergarten work is under the control of the Education Department and is subject to its regulations. There are two grades of certificates issued, known as the Assistant's and the Director's, the examination for the first of which must be successfully passed before the candidate is eligible for the second.

Assistant's Certificate.

To be admitted to the course of training for this certificate the candidate must be seventeen years of age, and have Primary standing in the High School, or have spent at least three years in a High School. The candidate must spend a year in training, and pass the examinations, which include the Theory and Practice of the Gifts (two papers); the Theory and Practice of the Occupations (one paper); Miscellaneous Topics, including the general principles of Froebel's system and their application to songs and games, elementary science, morning talks, and discipline (one paper.)

Director's Certificate.

A candidate for this certificate must be the holder of an Assistant's Certificate, or of a second-class Provincial Certificate, and must have attended a Provincial Kindergarten for one year. The examination which must then be passed includes Psychology and the General Principles of Froebel's system; History of Education; Theory and Practice of the Gifts and Occupations; Mutter and Kose-Lieder; Botany and Natural History; Miscellaneous Topics,

including discipline and methods of morning talks; Practical Teaching, the value of which is rated as five times that of any of the preceding groups; and Book-work, the value of which is rated as four times that of any of the same preceding groups.

There is also a Session d Examination in Music, Drawing and Physical Culture, conducted by the Principal of the Kindergarten and reported to the examiners at the final examination.

The Provincial Kindergarten Training Schools are in connection with the Provincial Normal and Model Schools in Toronto and Ottawa.

PROFESSIONAL QUALIFICATIONS.

Having satisfied the non-professional or literary demands, the candidate for a teacher's certificate must take a course in a training school to fit him professionally for his work. There are grades in these schools corresponding in some degree to the grades of certificates.

THIRD CLASS CERTIFICATE.

This is the lowest grade of certificate issued and is awarded to a student, who, having obtained a primary standing in the high school examination, has attended a model training school for the term (from the second of September to the fifteenth of December) and has successfully passed all examinations in connection therewith.

These model schools are situated in every county in the province and vary in number according to the population and the local demand. They are in connection with the public schools which afford an excellent opportunity for practice teaching and adequate supervision. The principals of such schools must hold first class certificates from the Education Department and have taught at least three years; and, at least three assistants on the staff must hold first or second class certificates.

In addition to holding a primary certificate the candidate must be eighteen years of age before the closing of the term in which he is admitted.

The local Board of Trustees may impose a tuition fee not exceeding five dollars on each teacher-in-training.

The course of study consists of instruction in school management, in the science of education, in the best methods of teaching all the subjects on the public school course of study, in school law and regulations so far as they relate to the duties of teachers and pupils, in school hygiene, music and physical culture: and such practice in teaching as will cultivate correct methods of presenting subjects to a class and develop the art of school government. The final examination of the Education Department will be limited to school management, the science of education, methods, school hygiene, and the school law and regulations.

There is a Board of Examiners, before which, during the last week of the session, each teacher-in-training must teach two lessons of twenty minutes each, one of which is assigned by the presiding examiner the day before and the other forty minutes before it is taught. These examinations are in addition to the regular final written examinations in the subjects mentioned above, and the confidential reports on each candidate's work and teaching submitted by the principal of the school.

Each teacher-in-training who obtains forty per cent, of the marks assigned to each subject (including practical teaching) and sixty per cent, of the aggregate is awarded a Third Class Certificate.

This is valid for the full period of three years from the date thereof; and may, on expiration, be renewed by any Board of Examiners for any period not exceeding three years, on one or more of the following conditions, viz := (a) Where the applicant has

re-passed the Form II. examination or holds any other non-professional certificate of a higher grade. (b) Where the applicant attempted such examination and obtained a standing acceptable to the Board. (c) Where the applicant has re-passed the county model school examination. The certificate of any teacher who has not taught the full period of three years for which his certificate was granted may be extended by the County Board for any time lost by sickness or any other cause. In all cases, the report of the inspector with respect to the efficiency of the applicant as a teacher must be satisfactory. All renewals shall be issued with the authority of the Board, and shall be limited to the jurisdiction of the Board of Examiners granting the same.

In case it appears that a duly qualified teacher is not available, and that it is in the public interest that a teacher should be temporarily retained in any school, the Minister of Education may on the report of the Inspector extend a third class certificate for one year, such certificate to be valid only under the Board of Trustees applying for the same. With the consent of the Minister of Education, a temporary certificate may be given by the inspector to any person of suitable character and attainments where a qualified teacher is not available.

DISTRICT CERTIFICATES.

At the request of the County Board and with the permission of the Minister of Education, a certificate for a shorter period and valid only within the County to be known as a District Certificate may be awarded to teach re-in-training who obtain a lower percentage, or to such other persons whose non-professional standing would entitle them only to District Certificates.

SECOND CLASS PROFESSIONAL CERTIFICATES.

Any teacher who has at least junior leaving standing and who has taught successfully for one year, or who, at r passing the county model school examination, has taught under the supervision of the inspector of a city having a city model school, six months thereafter, may be admitted as a Normal School student, which is the gateway leading to a professional certificate of the second class. There are two Normal Schools in the Province, at Toronto and Ottawa respectively, with model schools attached for practice-teaching. Two sessions are held each year, the first opening on the third Tuesday in January and the second on the third Tuesday in August. There is a written examination conducted by the staff and a final one conducted by the Education Department, both of which must be successfully passed. In addition to the practice teaching in the model school there is a practical examination conducted by outside educators appointed by the Department. Any person who attends a Normal School one term and who passes the prescribed examinations is entitled to a second class public school certificate.

NORMAL COLLEGE INTERIM CERTIFICATES AND FIRST CLASS PROFESSIONAL CERTIFICATES.

For those who have obtained Senior Leaving Standing or who are graduates in Arts of any University in the British Dominions, and who will be eighteen years of age before the close of the College year, and whose purpose is to teach, the Education Department has provided the Ontario Normal College with a magnificent Collegiate Institute attached for the purpose of practice-teaching. The College year begins on the first of October and ends on the thirty-first of May. The tuition fee for the year is \$10.

While the Normal Schools fit their students for Public School teaching, the Normal College is pre-eminently the fitting school for those who intend to enter High School work, and the course of study is framed accordingly. It consists of lectures on Psychology, the History of Educational Systems, the Science of Education, the best methods of teaching each subject of the High School course of study; School Management; instruction in Reading, School Hygiene, Writing, Drawing, Stenography, Physical Culture; practice teaching; and such other subjects as may be prescribed by the Minister of Education. The marks allowed for examination purposes are as follows: Psychology and Science of

Education, each 200: History of Education, School Management, Methods in English, in Mathematics, in Science, in Classics, and in French and German, each 150.

There are two written examinations during the session, viz: one in December and the other in March, and such oral examinations as may be considered necessary for testing the teachers-in-training in their knowledge of methods and also their teaching ability.

These examinations are conducted by the staff of the College; the number of papers at the sessional examinations and the value of the marks in each subject are the same as are prescribed for the final written examinations. No teacher in-training can be recommended to pass by the Examiners who has made less than 34 per cent, of the marks at the sessional examinations (fifty marks being the maximum for each) in Reading, Writing, Drawing, or Physical Culture. Any candidate who obtains 34 per cent, of the marks in each subject of the examinations (the sessional and final written examinations being taken jointly), and 50 per cent, of the aggregate marks is entitled to pass standing.

Candidates making 75 per cent. of the aggregate marks are awarded honors.

At the end of May in each year the Education Department conducts a final examination for all the teachers in-training. Any candidate who obtains the required standing in Psychology, the Science of Education, the History of Education, School Management, Methods in Mathematics, Methods in English, Methods in Latin, Methods in Elementary Science (the Primary Course in Botany and Physics), and Methods in one of the following groups, viz.: (a) Greek, or (b) French or German, or (c) Chemistry, Physics and Biology, shall be entitled to a Normal College Interim Certificate. The holder of a Specialist's non-professional certificate in any of the courses recognized by the Education Department, who passes the final examination (including methods in the subjects of his non-professional certificate) shall be entitled to a Normal College Interim Specialist's certificate in the subjects of his non-professional Specialist's course.

A Normal College Interim certificate entitles the holder, if under 21 years of age, to teach in a Public School only, and if over 21 years to teach in a Public or High School. After two years' successful experience as teachers, the holders of such certificates shall, on the report of the Inspector concerned, be entitled to a permanent certificate as a First Class Public School teacher or as a High School assistant, ordinary or specialist, according to the class of school in which the experience was acquired, and the class of certificate held by the teacher. Normal College Interim certificates may be extended from year to year on the report of a Public or High School Inspector. Any graduate in Arts in any University in the British Dominions, who holds a High School Assistant's certificate, and who, as shown by the report of the High School Inspector, has taught successfully three years (two of which at least were spent in a High School), shall be entitled to a certificate as Principal of a High School or Collegiate Institute.

It appears then that (1) any person who attends a Public Kindergarten for one year and passes the prescribed examinations is entitled to an Assistant's certificate; (2) any person who has obtained an Assistant's certificate and has attended a Provincial Kindergarten for one year and passes the prescribed examination, is entitled to a Director's certificate; (3) any person who has passed the Primary examinations and has attended the County Model School, successfully passing the examinations, is entitled to a Third Class certificate; (4) any person who passes the Junior Leaving examinations and attends the Normal School, successfully passing the prescribed examination, is entitled to a Second Class Public School certificate; (5) and any person who passes the Senior Leaving examination and attends the Ontario Normal College, successfully passing the prescribed examinations, is entitled to a Normal College Interim certificate.

It will be noticed that this Province not only insists upon professional training as a pre-requisite to a teacher's certificate, but it provides a separate style of training and separate institutions for each grade. For the First Class there are the County Model Schools, for the Second Class the Normal Schools, and for the First Class and University Graduates the Ontario Normal College. This is decidedly a step in advance, and the further development of the system will be watched with interest, for professional training for teachers is now being recognized as one of the most important and necessary features

of an educational system.

PROVINCE OF QUEBEC.

The educational system of the Province of Quebec presents many interesting problems to the student of education, on account of the various changes and stages historical and political by which the present position has been reached. And even in its present condition it is most interesting because of the peculiar division of the schools on religious lines, and yet both sections under direct government control.

There is a Council of Public Instruction which has the supervision of education throughout the Province. Of this the seven Roman Catholic Bishops are excepticion members; there is also an equal number of Roman Catholic laymen and of Protestant laymen, so that the Roman Catholics form two-thirds of the membership on account of the preponderance of that religion in the Province. The Council is divided, on religious lines, into two committees, which have the power of separate and independent action in all matters which concern the educational work under their respective control. Each Committee appoints its own Chairman and Secretary, and conducts its business as an independent council. Upon the recommendation of Roman Catholic or Protestant Committee, as the case may be, Professors of Normal Schools, School Inspectors, members of the Board of Examiners, and the secretaries of the Department of Public Instruction are appointed by the Government.

Although it is not stated in the law that one of the two Secretaries of the Department of Public Instruction shall be a Protestant, this is practically secured by the method of appointment,

The Provincial Association of Protestant Teachers has the right of electing one Associate member of the Protestant Committee who, however, is not a member of the Council of Public Instruction. There may also be five other persons appointed by the Protestant Committee to be Associate Members.

The Lieutenant-Governor-in Council, upon the recommendation of the Protestant Committee, has constituted a Central Board of Examiners for the examination of candidates for teachers' diplomas. The Central Board alone has the right of issuing diplomas valid for the schools under the control of the Protestant Committee. This Board is composed of not less than five nor more than ten members and a secretary. It is the duty of the Board (1) to prepare the examination questions in the different subjects prescribed; (2) to submit the examination questions to the candidates at central localities; (3) to examine the answers given by the candidates, and after due deliberation to grant diplomas to the candidates deemed worthy.

Only experienced and competent persons are appointed to the Board, and most of the members are actually engaged in educational work. There is only a nominal remuneration attached to the office at present, being but five cents for every paper examined.

The Protestant Central Board of Examiners alone has the power to grant diplomas valid in Protestant schools. These are of three grades, viz:—ELEMENTARY, MODEL School, and Academy, and are valid in any Protestant school of the same grade in the Province.

There are three classes of Elementary diplomas and two classes of Model School and Academy diplomas. The Third Class Elementary diploma is valid for one year only.

ELEMENTARY DIPLOMAS.

Candidates for these diplomas must take at least fifty per cent of the marks in each of the subjects:—Writing, Arithmetic, Geography, Grammar, Scripture History, and the Art of Teaching, and at least one-third of the marks in each of the other subjects, which are:—Literature, Drawing, Physiology and Hygiene, and School Law.

A candidate who obtains forty-five per cent, and less than sixty per cent, of the aggregate marks is entitled to a Third Class Elementary Diploma. This is valid for only one year and can be renewed only upon re-examination.

 Λ candidate who obtains sixty per cent. of the aggregate marks is entitled to a Second Class Diploma.

A candidate holding a Second Class Elementary Diploma who presents to the Protestant Board of Examiners a certificate from a school inspector that he has taught successfully for five years after obtaining the diploma, or a certificate that he has taught successfully three years and attended three annual Teachers' Institutes and fulfilled the prescribed requirements thereof, is entitled to receive a First Class Diploma of this grade on the payment of a fee of one dollar.

A candidate for an Elementary Diploma, who fails in one or two subjects of the examination may, on the recommendation of the Central Board of Examiners, be granted a Third Class Elementary Diploma, and a candidate so recommended is entitled to receive a Second Class Elementary Diploma at the next examination upon passing in the subjects in which he failed.

Each candidate for this diploma must pay to the Secretary of the Central Board a fee of two dollars to be used in defraying the expenses of the examination. Should a candidate fail he may present himself again without extra payment. The candidate who takes the highest number of marks and a Second Class Elementary Diploma is exempt from fees.

Model School Diplomas.

Candidates for these diplomas must take fifty per cent. of the marks in each of the subjects, writing, arithmetic, geography, grammar, Scripture history, English history, art of teaching, geometry and algebra, and one-third of the marks in each of the other subjects, viz:—literature, drawing, physiology and hygiene, and school law.

A candidate who obtains sixty per cent, of the aggregate marks is entitled to a second class diploms.

When, however, a person holding a second class diploma presents evidence that he has taught successfully for five years after obtaining such a diploma, or certificates that he has taught successfully three years and attended three Annual Teachers' Institutes and fulfilled the prescribed requirements thereof he is entitled to receive afirst class diploma of this grade on the payment of a fee of one dollar.

A candidate for a model school diplome, who fails to obtain that diploma, may be granted a second class elementary diploma if he obtains the requisite marks in the subjects prescribed for that diplome.

The fee for the model school diploma is two dollars, but if the candidate fails he may present himself for re-examination without incurring any further fees.

ACADEMY DIPLOMAS.

Graduates in arts from any British or Canadian university, who have passed in Latin, Greek and French, in the degree examinations, or who have taken at least second class standing in these subjects in their intermediate examination, are entitled to receive first class academy diplomas, provided that they have also taken a regular course in the art of teaching at McGill Normal School, or other public training institution outside of the Province approved by the Protestant Committee and that they have paid a fee of three dollars to the said Committee.

Teachers taking academy diplomas in course from the McGill Normal School, who take at least second class standing in Latin and Greek in the intermediate examination of the universities are also entitled to receive first class academy diplomas; otherwise, their diplomas are second class.

When, however, the holder of a second class academy diploma can produce satisfactory proof to the Committee that he has taught successfully for at least ten years, he is then entitled to receive a first class diploma upon payment of a fee of three dollars.

Graduates in Arts from any British or Canadian university, who have passed in Latin and Greek in the degree examinations, or who have taken at least second class standing in these subjects in their intermediate examination are entitled to receive second class academy diplomas from the Protestant Central Board of Examiners, provided that they pass the examination in the art of teaching, school law, drawing, physiology and hygiene, (and in French if not taken in the university examinations) as prescribed in the syllabus of examination for candidates for academy diplomas. Such candidates must submit certificates of age and good moral character and pay a fee of three dollars.

A candidate for an academy diploma who fails to obtain that diploma, may be granted a second class model school diploma if he obtains the requisite marks in the subjects prescribed for that diploma.

Candidates for academy diplomas must take fifty per cent. in each of the subjects prescribed for the model school diploma, and in Latin and Greek, and one-third of the marks in each of the other subjects.

Should the candidate fail to obtain his diploma he may present himself for re-examination without incurring any further fees.

A person holding a diploma as teacher granted by extra provincial examiners, who desires to obtain a diploma for this Province is exempted from examination in any subject in which he passed creditably in his extra-provincial examination. He must, however, submit to the Protestant Committee (a) a programme of the subjects and the nature of the examination upon which he obtained his extra-provincial diploma; (b) a certified statement of the marks obtained in each subject of the examination; (c) the diploma which he holds, (d) a certificate of age and a certificate of moral character. There can be no exemption without recommendation from the Protestant Committee. Upon being recommended and passing the remaining subjects prescribed for the grade of diploma, and in the school law and regulations of the Province, and paying the prescribed fees, he is entitled to a diploma of the grade recommended by the Protestant Committee.

The examination for teachers' cert-ficates are held annually on the first Tuesday in July or the last Tuesday in June, and at such local centres as may be determined by the Protestant Committee.

The candidate must deposit with the Secretary of the Central Board before his examination, *first*, a certificate of good moral character signed by the minister of the congregation to which he belongs and by at least two school commissioners or trustees or school visitors of the locality in which he has resided previous to his examination; second, an extract from a register of baptisms, or other sufficient proof, showing that he was at least eighteen years of age last birthday.

The regulations which have been just quoted have been in force for some years, but after this present year, 1897, they become materially changed and it will be necessary for all candidates to take at least a four months' course in professional work at the Provincial Normal School before obtaining any grade of diploma excepting the Academy. For this, the highest diploma, final arrangements have not yet been made but there will doubtless be some arrangements made with McGill University in Montreal whereby instruction will be given in theoretical education, for which credit will be given, while the practical work in the Normal School will still be necessary.

The literary work for candidates taking the short course in the Normal School will be done in the high schools and academies and will be tested by the ordinary leaving examination or by a modification of it under the Central Board of Examiners.

The system at present is in a state of transition, the Roman Catholic side replacing the old local boards by a central board and having in contemplation a series of institute

for the whole Province. The regulations for this have not finally passed, and so detailed information is inaccessible.

The Protestant Committee is taking a decidedly forward step in insisting on normal school training for all grades of diplomas.

The cost of examinations for teachers' certificates in 1896 was about \$5,000, and the total amount received as fees from candidates was \$4,700.

For those persons who intend to teach in high schools there have been special arrangements made whereby undergraduates in arts in McGill University and the University of Bishop's College take a course of lectures in education from the principal of the Normal School, follow a course in practice of teaching and receive diplomas on graduation in Arts, provided the principal of the Normal School has been satisfied. At least forty days in the training school attached to McGill Normal School is necessary before the diploma is granted

In this Province there are seven certificates, known as three Elementary, two Model School, and two Academy. The fee demanded for an Elementary diploma is two dollars, that for a Model School diploma two dollars, and that for an Academy diploma three dollars, but should a candidate fail to obtain his diploma he may present himself for re examination without extra payment. The examination questions are prepared and the answer papers examined by a Board of Examiners, the members being experienced and competent persons, most of them being actually engaged in educational work.

PROVINCE OF NOVA SCOTIA.

The members of the Ministry of the Provincial Government constitute a Council of Public Instruction, of which the Superintendent of Education, appointed by the Lieutenant-Governor-in-Council, is the Secretary. It has the general supervision of education, which it exercises more specifically through the superintendent.

The Council issues all licenses to teach, and before obtaining such a license, a candidate must first pass the corresponding grade of scholarship of the Provincial High School Course, either grade "D," or "C," or "B," or "A (classics)," or "A (science)," or "A (classics and science)" He has next to pass the corresponding course of professional training at the Provincial Normal School, with special classes in the Provincial School of Agriculture, or to pass the written "Minimum Professional Qualification Examination," which will give him a license one degree lower than the former course, everything else being equal. And, thirdly, he must present the prescribed certificate of age and good character as required by law.

The examinations for teachers' licenses in Nova Scotia are intended to test both the non-professional and the professional qualifications of the candidates. The test of the former is naturally the first in point of time and is provided for by high school examinations held simultaneously throughout the province in the last week of the school year. The examinations cover the subjects of the first, second, third and fourth years of the high school curriculum, known as grades D, C, B and A, respectively, of the high schools. Provincial certificates of scholarship are awarded the successful candidates. They are expected to pass the various grades in order, and are not admitted to the examinations of the higher grades without evidence of their proficiency in the subjects of the preceding grades. If, however, a candidate fails to make a pass in the grade applied for, he may be ranked as making a pass in the next grade below, provided 75 percent, of the minimum be made; and as making a pass on the grade second below, provided 50 per cent, of the minimum be made.

The examination questions are prepared by the Superintendent of Education and the answer papers are examined by the Provincial Board of Examiners appointed by the Council of Public Instruction. The remuneration for reading each paper is ten cents per paper, the small amount being accounted for by the fact that the examination papers are each limited to one hour, and consequently are not long and tedious to read.

On this Board of Examiners for the past year, there were representatives of Monnt Allison University, the University of King's College, St. Mary's College, Dalhousie University, Acadia University, Horton Academy and the Provincial Normal School.

Candidates applying for the grade 'D' -xamination or for the same grade written for unsuccessfully at a previous examination, or for the next grade above the one already successfully passed by them are admitted free. But a candidate who has not passed grade "D'" must have his application for grade "C" accompanied by a fee of one dollar; if he has passed neither "D" nor "C," the application must be accompanied by two dollars; and, if he has passed neither "D," "C," nor "B," the application for "A" must be accompanied by three dollars, and in addition certificates proving proficiency in all the subjects of the preceding grades. But if, as is expected, the candidate proceeds regularly through the different grades, it will be noticed that no fees are required.

The general cost of these examinations is a regular charge on the Education Department, and for the year 1896, amounted to \$4,040; the number of candidates being 2,517, of whom, 1,313 were successful.

For Grade D certificate, examinations are required in (1) English language, (2) English grammar, (3) history and geography, (4) science, (5) drawing and book-keeping, (6) arithmetic, (7) algebra and (8) geometry. Latin and French are optional. Each of these groups has 100 marks assigned to it as a valuation and the minimum aggregate for a pass is 400, with no subject below 25.

For Grade C, the same subjects are prescribed but more advanced scholarship is required. Greek and German are added, and these, with Latin and French are optional. The minimum for a pass is still 400, or 50 per cent. of the required subjects, with no subject below 25.

For Grade B, the science, drawing and book keeping are succeeded by physiology, physics and practical mathematics, while additional examinations are added in Latin grammar and in Greek grammar. Advanced scholarship is required in all the other subjects, the four foreign languages being still optional. The same minimum of marks applies to this examination. This is also known as the Junior Leaving Examination of the High School and the leading colleges and universities have agreed to accept it in lieu of their matriculation examination, when the certificate indicates a pass on each subject required by the particular matriculation standard concerned.

The *Grade A* certificate is known as the Senior Leaving Certificate of the high school, and is divided into (a) classical and (b) scientific, leading to the certificate known as "A" (classical) and "A" (scientific), respectively.

- (a) The subjects imperative for both sides are:—(1) English language, (2) English literature, (3) British history, (4) psychology, (5) sanitary science.
- (b) As an example of what is imperative for the classical side, I cannot do better than enumerate the work to be covered for the examination in 1898, the work being partially changed each year: (1) Latin composition, (2) Tacitus, Histories I., (3) Cicero, Pro Milone: (4) Virgil, Eneid, Book VI.; (5) Horace, Odes, Books II. and IV.; (6) Roman history and geography; (7) Greek composition; (8) Xenophon, Helenica, Books I. and III.; (9) Plato, The Apology and Crito: (10) Homer, Iliad, Books I, II. and III.; (11) Grecian history and geography.
- (c) For the scientific side, there must be a knowledge of (1) physics, (2) chemistry, (3) botany, (4) zoology, (5) geology, (6) astronomy, (7) navigation, (8) trigonometry, (9) algebra, and (10) geometry.
- (d) The optional subjects for either side are French and German, two papers in each subject.

There is a uniform value of 100 marks for each subject, and to pass Grade "A,' scientific), a minimum aggregate of 1,000 must be made on twenty papers, including all n groups (a) and (c) and any other five papers.

To pass Grade "A" (classical), a minimum aggregate of 1,000 must be made on twenty papers, including all in groups (a) and (b) and any other four papers.

No paper should fall below 25. For Grade "A" (classical and scientific), all the subjects in group (d) must have been taken, as well as those in (a), (b) and (c), no paper to fall below 50.

These High School examinations constitute the non-professional or scholarship side of the examinations for teachers in this province.

The Professional Qualifications of candidates for the teaching profession are provided for in two ways:

If By the Provincial Normal School. Though the attendance at this school is not compulsory, yet the importance and value of professional training at such a place is so apparent to the members of the Council of Public Instruction, that they encourage attendance by ranking all licenses awarded, one grade below that indicated by the scholarship certificate in the case of candidates not undergoing this training. This school is of course, recognized as the appropriate source of certificates of professional qualifications for public school teachers, but the certificate of other normal or teachers' training schools whose curricula may be satisfactorily shown to the Council to be at least the equivalent of the Provincial Normal School may be accepted when qualified by the addition of the two following conditions: (a) a pass certificate of the provincial "minimum" professional qualification examination of the corresponding rank, and (b) a certificate of a public school inspector, before whom or under whose supervision the candidate has demonstrated his or her qualification for the class of license sought by the test of actual teaching for a sufficient period.

The Provincial School of Agriculture is situated near the Normal School and is attiliated with it for the purpose of securing to normal students practical instruction in microscopy, chemistry, biology, etc.

In the year 1896, there were 144 students in attendance at the Normal School.

II. By the Minimum Professional Qualification examination. This is better known by its abbreviated title of the M. P. Q. examination, and is intended to test the candidates who wish to teach and yet are not in attendance at the Normal School. It includes a knowledge of school law and management, with special reference to Nova Scotia: theory and practice of teaching, with practical adaptations to the teaching of particular subjects: hygiene and temperance. On each of these three groups there is an examination paper of the value of 100 marks. There are three ranks of this certificate, known as first, second and third rank pass, according as the candidate obtains (1) an aggregate of 200 marks with no paper below 40, (2) an aggregate of 150 with no paper below 30, (3) an aggregate of 100 with no paper below 20.

These certificates rank one degree lower than the corresponding normal school certificates.

The object of this examination is merely to test the candidate's practical knowledge of the school statutes, regulations and procedure, as found in the manual, journals and otherwise; of the course of study and the proper method of teaching ϵ ach of the subjects, ϵ tc. For this examination a fee of two dollars is required.

The examiners for this certificate are Prof. J. B. Hall of the Provincial Normal School, and Prof. John Currie of the Presbyterian College.

In the year 1896 there were 455 candidates, of whom 10 attained first rank, 164 second rank, 208 third rank and 73 failed. The fees received for this examination amounted to \$910.00.

Provincial licenses to teach are of the classes corresponding to the high school certificates of scholarship. They are :—

THIRD CLASS OR D LICENSE.

The conditions for this license are:—(a) A certificate that the candidate is of the full age of sixteen years and has a good moral character. (b) A pass certificate of the grade D, high school examination, with an aggregate of 400, or of 300 on grade C, or of 200 on grade B. (c) A certificate of third rank professional qualification from a normal school, or a pass certificate of the grade C, high school examination, with the third rank minimum professional qualification.

But below this, though belonging to this class, there is a temporary license called a Third Class Provisional or D (Prov.), valid for only one year, the conditions for which are:—(a) a certificate of age and moral character as in the foregoing regulation. (b) A pass certificate of the grade D, as in the foregoing regulation. (c) The third rank minimum professional qualification. Such a license can be renewed for another year, on condition that the candidate has demonstrated an advance in his qualifications by his record at a subsequent provincial examination.

SECOND CLASS OR C LICENSE.

The conditions are:—(a) A certificate that the candidate is of the full age of seventeen years, and has a good moral character. (b) A pass certificate of the grade C, high school examination, with an aggregate of 400, or of 300 in grade B, or of 500 in grade A. (c) A certificate of second rank professional qualification from a normal school or a pass certificate of the grade B, high school examination, with the second rank minimum professional qualification.

FIRST CLASS OR B LICENSE

The conditions are:—(a) A certificate that the candidate is of the full age of eighteen years and has a good moral character. (b) A pass certificate of the grade B, high school examination, with an aggregate of 400, or of 750 on grade A. (c) A certificate of first rank professional qualification from a normal school, or a pass certificate of the grade A, high school examination, with the first rank minimum professional qualification.

ACADEMIC OR CLASS A LICENSE.

The conditions are:—(a) A certificate signed by a minister of religion or two justices of the peace, that the candidate is of the full age of twenty years, and capable of fulfilling the duties especially mentioned in the statute (b) A pass certificate of the grade A, high school examination. (c) A certificate of academic first rank professional qualification from a normal school for which may be substituted a provincial grade A (c), and sc.) with a first rank minimum professional qualification (with no paper below 50), and at least one year's successful service as a first class teacher in a superior school, evidenced by the high testimonials of the inspector, and others having cognizance of the same, to the satisfaction of the Superintendent of Education.]

Except in the case of D (provisional), all certificates and licenses hold good during good behavior.

In his report for 1896, the Superintendent of Education says: "As no more licenses should be granted than are sufficient to supply the schools of the Province, whenever there appears to be over-production, all the change required to check it and at the same time raise the standard of qualification, will be to require teachers to make an aggregate of at least 450 or 500, as circumstances may demand, instead of the 400 necessary for the High School pass certificate in each grade. The regulations have been drawn up with special reference to their easy amendment by simply changing the figures of the aggregate, thus raising the scholarship standard of the teaching profession without affecting

the standard of the High School "pass," which may remain at the original 400, the equivalent of 50 per cent. of the possible marks on the imperative subjects of the course of study."

In his report for 1896, he recommends that the standard of scholarship of the tracher be raised, but without changing the character or difficulty of the examination. He proposes to require candidates for the teaching profession who do not graduate in the normal school, before obtaining a license, to have made no "mark" on an imperative subject below 30 per cent, and to make an average of 50 per cent at least on the English papers, in addition to the pass aggregate of "400." In the case of those receiving diplomas from the normal school the faculty would be required to feel satisfied that the deficiencies in any scholarship subjects were not be up by the candidates

There were 513 licenses granted in 1896, divided as follows: Class A (classical), 10; class A (scientifie), 1: class P. 51: lass C. 121: class D, 192: class D (provisional), 122.

Since the present system of teachers' examinations and licenses was introduced in 1893, there has been a steady and excretingly gratifying increase in the number of normal trained teachers in the profession, the statistics for 1896 showing an increase over 1893 of almost 70 per cent. This forward movement in demanding thorough professional training for the candidate for the teaching profession is due to the indefatigable efforts of the present Superintendent of Education, Mr. A. H. MacKay, LL.D.

There are in this Province six grades of teschers' certificates. If the candidate proceeds regularly through the different grades no examination fees are charged, but if the lower grades have not been passed the fees charged amount to one dollar for every grade which has not been passed. In no case, however, does the fee amount to more than three dollars. The examination questions are prepared by the Superintendent of Education, and the answer papers are examined by competent persons actually engaged in educational work.

PROVINCE OF NEW BRUNSWICK.

The supervision of Education in the Province of New Brunswick is in the hands of the Provincial Board of Education which is composed of the Governor, the members of the executive of the Provincial Government, and the Chancellor of the University of New Brunswick. This supervision is exercised more specifically through the Chief Superin tendent of Education who is the Secretary of the Board.

All examinations for Teachers' Licenses are held under direction of the Provincial Board, and the licenses issued are valid throughout the Province during the good behavior of the holders.

To be eligible for examination for a license to teach, a candidate must satisfy the Chief Superintendent at least a month prior to the date of examination: (1) If a male that he is eighteen years of age, if a female, that she is sixteen years of age, and that he or she is of good moral character; (2) that he has obtained professional classification at the Provincial Normal School, or has received a certificate of qualification from some other recognized Normal or Training School for teachers, after attendance thereat of not less than one school year; or holds a degree in Arts from a chartered college or university.

It will be apparent then that the examination for admission to the Normal School is very important, being a requisite to the final examination for license. This admission examination is held once a year, beginning on the first Tuesday of July at such local centres as may be determined upon by the Chief Superintendent. The papers for this examination are prepared by the Faculty of the Normal School and are submitted to the Chief Superintendent for his approval. The answers are estimated by the several

members of the Faculty, and the results collated, compared and summed up at a meeting of the Faculty to be presided over when practicable by the Chief Superintendent.

The subjects of examination include: Reading, Spelling, Writing, English Grammar and Composition, Geography, History, Arithmetic (including the keeping of accounts), and Elementary Natural History. For the higher classes Algebra and Geometry are also required.

The examination papers on the above subjects are graded as to extent and difficulty, according to the class of license applied for by the candidates respectively.

A fee of one dollar must be paid by each candidate before entering upon the examination, but those who paid the fee at a former examination, and failed to obtain any class, are not required to pay any fee at the next examination

Candidates to be eligible for attendance at the Normal School must be, if male, of the full age of eighteen years; and if female, of the full age of sixteen years, at the time of enrollment.

There are these general divisions of Teachers Licenses:—Common School, Class I., Class II.; Superior School; and Grammar School; corresponding to the divisions of the school system of the Province.

COMMON SCHOOL LICENSES

All candidates for license of any class are required, after undergoing a professional course of instruction at the Normal School, to pass examination on the following subjects: The School System of New Brunswick, Methods of Teaching, Theories of School Management, Reading and Elocution, and Industrial Drawing. Female candidates are also examined in the principles of Domestic Economy.

In addition to the above subjects, required of all classes, candidates for the several classes are examined in the following —

Additional Requirements for the Several Chasses.

CLASS III.

ENGLISH LANGUAGE —Grammar, Analysis, and Composition, as in Meiklejohn's Short-Grammar.

ARITHMETIC.—The Elementary Arithmetic (prescribed).

HYGIENE AND TEMPERANCE.—Health Reader, No. 2.

CLASS II.

ENGLISH LANGUAGE.—Grammar and Analysis (Meiklejohn's English Language, Part I.)

ENGLISH LITERATURE AND COMPOSITION.—Poetry of Readers V. and VI., and Meikle-john's English Language, Part II.

MATHEMATICS: Geometry—Books I. and II. with Exercises. H. Smith's Geometry.

Algebra—Prescribed Text Book, to the end of Simple Equations.

Book-keeping and Arithmetic—Single Entry and Commercial Rules.

NATURAL SCIENCE: Botany and Physics—Plant Analysis, Plant Growth and Assimilation; Characteristics of the Buttercup, Cress, Pulse, Rose, Aster, Buckwheat, Pine, Li y, and Grass families. Physics are required by the course of study for first eight grades.

Chemistry and Agriculture—Williams' Introduction to Chemical Science, Chapters I. to XX. Tanner's Agriculture, or an equivalent.

Physiology and Hygiene—Chapters I.-IX. of Blaisdell's Our Bodies and How We Live.

CLASS I.

English Language, Parts I., H., and III.

ENGLISH LITERATURE.—Meiklejohn's English, Part IV., and the critical study of Authors, to be announced from year to year.

MATHEMATICS: Algebra—Prescribed Text Book.

Geometry—H. Smith's Geometry, Books I., II., IV. and VI., with Exercises.

BOOK-KEEPING - Double Entry.

NATURAL SCIENCE: Botany—Same as for Class II., together with Determination of ordinary Flowering Plants.

Chemistry and Agriculture—Williams' Introduction to Chemical Science, Chapters I to XXX, and Chapters LVIII. and LIX. Text on Agriculture.

Physics, etc -- As given in High School Course, Grade IX.

Physiology and Hygiene—Blaisdell's Our Bodies and How We Live (complete).

GENERAL HISTORY.—Swinton's Outlines of the World's History.

REQUIREMENTS FOR SUPERIOR SCHOOL CLASS.

(In addition to the Requirements of Class I.)

Latin —Latin Grammar, the Declensions, Conjugations, and Rules of Syntax, and the Translation of Casar, De Bel. Gal., Book I.

Practical Mathematics.—Right and Oblique Angled Trigonometry, with applications; the Mensuration of Surfaces and Simple Solids.

REQUIREMENTS FOR GRAMMAR SCHOOL CLASS.

(In addition to the Requirements for Superior Schoo' Class and Class 1.)

Latin.—1. The Latin Grammar. 2. To be able to translate and parse any of the following authors: Capar—De Bello Gallico, Books I.-III.; Horace, Odes, Book I., and Ars Poetica; Virgil—Eneid, Books I.-III.; Cicero—De Senectute and Pro Archia.

Greek.—1. The Greek Grammar. 2. To be able to translate and parse accurately any of the following authors: Xenophon, Anabasis, Books I.-II.; Homer, Iliad, Books I.-III.: Euripides—Alcestis.

History -To have a good knowledge of Greek and Roman History.

Geography —To know the Ancient Geography of Greece and Italy.

Mathematics.—1. Plane and Solid Geometry (Hamblin Smith). 2. Spherical Trigonometry (Wentworth's). 3. Algebra (Todhunter's Advanced Algebra), or an equivalent.

GENERAL CHEMISTRY.

Third Class certificates are valid for only three years, but may be renewed for an additional year for special reasons.

An Inspector may issue an Assistants' License of the Third Class to be of force during the school term for which it is issued, to any person qualified to act in the capacity of a class-room assistant in an ungraded school having fifty pupils or upwards, but shall not renew the same without the special permission of the Board of Education or Chief Superintendent. This license is valid only in the school for which it is issued, and shall not qualify the holder to act in any other capacity than that of class-room assistant. Every such license must be at once reported by the Inspector, with the designation of the school, to the Chief Superintendent.

To be eligible for a License of the First Class, every candidate (unless holding a degree in Arts from a chartered College or University) must (1) have attended the Provincial Normal School or other recognized training school for teachers for the period of one school year, and have received a professional classification Good or Superior, or other equivalent of professional qualification, and be recommended by the Faculty of Instructors as being fit in every way for this License; or (2) present an Inspector's certificate that he has taught with success for at least two school years, subsequent to attendance at the Provincial Normal School

SUPERIOR SCHOOLS.

One Superior School may be established for every 6,000 of the population in each county. A Superior School must be a graded school having at least two departments, and not less than ten competent pupils above Grade VII. The head teacher of a Superior School receives \$250 annually wavards his salary from the Provincial revenues.

GRAMMAR SCHOOLS.

These schools rank as the High Schools of the Province. There may be one for each county in the Province. Every teacher holding a Grammar School License and engaged in Grammar School work receives \$350 per annum from the Provincial revenues. The work of the Grammar Schools includes Grades IX., XI. and XII.

To obtain a License of the Grammar School Class, candidates are required to make a general average of fifty per cent. or upwards on the whole examination, with no mark in the English branches further below thirty-seven per cent. than such average is above fifty per cent. In Latin the average of marks must be fifty per cent. or upwards, and in Greek thirty-seven per cent. or upwards. Candidates for this License who have previously made an average of sixty-five per cent. or upwards on the syllabus prescribed for the First Class, are to try the examinations on those subjects only which are peculiar to the syllabus for the Grammar School Class.

Graduates of chartered colleges whose undergraduate courses of study have included all the subjects required of candidates for the Grammar School Olass, and who have, subsequently to graduation, taken a course of at least one year at any accredited college or university, pursuing while there the study of one or more of the subjects of the Grammar School Syllabus, and who have undergone training at a recognized Normal School, may in the discretion of the Board of Education be granted a Grammar School License without further examination.

Equivalents for the Latin and Greek subjects may be allowed on application to the Chief Superintendent at least six weeks before the date of the examinations.

On giving six weeks' notice to the Chief Superintendent, a candidate for this License may write on a stated part only of the subjects required, but the examination on the remaining subjects must be passed the following year, and until then no certificate can be issued.

Matriculation and High School Leaving examinations are held annually, the first week in July. A fee of two dollars is charged to each candidate.

Holders of the Junior Leaving or Junior Matriculation Examinations are admitted to the Normal School without being required to pass the usual Entrance Examination.

The total number admitted to the Provincial Normal School in 1896 was two hundred and forty-six, of whom two hundred and forty were presented for examination for license during the year; seventy of these were for Class III., and of these thirty-six were in the French Department of the School. In addition to the two hundred and forty who had been during the year, or one term thereof, in attendance at the Normal School, fifty-two others were admitted to the final examination, either as holders of licenses, seeking advance of class, or as eligible on other grounds. The total number admitted was two hundred and ninety-two, and the results of the examinations for licenses were as follows: Grammar

School, thirteen; Class I., fifty; Class II., one hundred and thirty; Class III., eighty-seven; total, two hundred and eighty; two hundred and fifty-two obtained the classes worked for; twenty-eight got a lower class than that worked for, and twelve failed to obtain any class. Five other candidates stood a partial examination for Grammar School Class, and four of the First Class candidates qualified for Superior School Class.

At the Entrance Examinations to the Normal School, which also are intended for the preliminary examinations of teachers seeking a higher class of license, five hundred and twenty-two candidates presented themselves in 1896. Of these two hundred and eighteen applied for First Class, two hundred and seventy-five for Second Class, and twenty-nine for Third Class. The results of the Examinations assigned eighty-seven to Class I., one hundred and eighty-one to Class III., one hundred and thirty-nine to Class III., and one hundred and fifteen failed to obtain any class.

The total amount of fees received from the candidates in 1896 was \$545, while the cost of the examinations was about \$1,000.

There are in this Province five grades of certificates. The only fees required are for entrance to the Normal School, which is one dollar, and Matriculation, which is two dollars. The examination questions are prepared by the Chief Superintendent, and the answer papers are examined by competent persons appointed by the Provincial Board of Education.

PRINCE EDWARD ISLAND.

The Provincial Board of Education of Prince Edward Island is composed of the Members of the Executive Council of the Provincial Legislature, the Principal of the Prince of Wales' College, and the Chief Superintendent of Education, the last-named person being appointed to his position by the Lieutenant-Governor-in-Council. The Board has general supervision of education throughout the Province, which it exercises specifically through the Chief Superintendent.

The general rule in regard to qualification for license to teach is that no person shall be entitled to receive a license to teach unless, (1), if a male, he is eighteen years of age, or if a female, she is sixteen years of age; and (2), unless he or she is of temperate habits and good moral character; and (3), has attended the Provincial Training School at least one term; or holds a diploma from a chartered College or University, or recognized training school.

As this renders necessary some attendance at the Normal School, the examination for entrance to that school is the first step to be taken towards a license to teach. These entrance examinations are held under the direction of the Chief Superintendent, by whom the papers are prepared. To defray the expenses of examination each candidate must pay a fee of fifty cents. The regular examination is held annually on the first Tuesday in July, but if necessary another one may be held on the third Tuesday in December.

Before the close of each semi-annual session of the Normal School, an examination is held under the direction of the Chief Superintendent, on the results of which licenses to teach are awarded.

THIRD CLASS.

The lowest grade of certificate is called THIRD CLASS, the subjects of examination for this being, Reading, Orthography, Arithmetic, English Grammar and Literature, Geography, History, School Management, Organization (with special reference to the laws of the Province), Teaching (actual practice in the Normal School), and Agriculture.

An average of 80 per cent. in English, Arithmetic, Geography and History, and not less than 75 in Teaching entitles the candidate to First Class Rank for professional work; an average of between 70 and 80 with at least 60 in Teaching to Second Class Rank; an average of 60 per cent., and not less than 50 in Teaching to Third Class Rank.

SECOND CLASS.

For a Second Class License, Algebra, Geometry, Physics, Latin, French (for which Bookkeeping may be substituted) and Music are added, and candidates to be successful must obtain at least 50 per cent. in English and in Arithmetic, 35 per cent. in each of the other subjects, and not less than 60 per cent. of the total number of marks.

FIRST CLASS.

For a First Class License, advanced scholarship in English, History, Geography, Arithmetic, Geometry, Algebra and Latin is required, while Greek (for which Drawing may be substituted), Trigonometry and Chemistry are added, Physics, Music and School Management being dropped.

Candidates for this License must, in order to be successful, obtain at least 50 per cent. of the attainable marks in English and also in Arithmetic, 35 per cent. in each of the other subjects, and not less than 60 per cent. of the total number of marks.

Candidates for a First Class License cannot receive a higher License than Second unless they have at least one year's experience in teaching.

ACADEMIC.

The examination for ACADEMIC LICENSE is open to all First Class Teachers of two years' experience who have obtained first rank in professional work or who hold a First Class Diploma. There are four groups of subjects for this examination, two of which are compulsory, viz, English and Professional Work. There is an option between Latin, Greek and French, and Mathematics, which include Algebra, Geometry and Trigonometry.

The examination of candidates for First and Second Class Licenses is held once a year beginning on Monday following the last Friday in May.

There are no special examinations or training for candidates who intend to teach in High Schools, but teachers who hold First Class Certificates are eligible for these positions.

All the Certificates mentioned above are valid for life during good behavior.

When the Board of Trustees of any school district reports that it cannot obtain a suitable teacher, the Chief Superintendent may, if he deems it necessary in the interest of the school service, issue a Temporary Third Class License to any suitable person of fair qualification to teach in such district. Such license is valid for the school year in which it is issued.

In the examination for Teacher's License in 1896 there were 70 candidates for First Class of whom 45 were successful; 114 candidates for Second Class of whom 82 were successful.

There are four grades of certificates in this Province. These are awarded at the close of the sessions of the Normal School, and the only fee which can be assigned to examinations is that attached to the entrance examination to the Normal School, which must be passed ere the candidate can enter upon the work leading to his certificate. This fee is only fifty cents. The examination questions are prepared and the answer papers examined by educational experts.

PROVINCE OF MANITOBA.

The general supervision of educational affairs in the Province of Manitoba is under the direction of the Department of Education, which consists of the Executive Council, or a committee thereof, appointed by the Lieutenant-Governor in Council. It arranges for the examination of teachers and for the issue of teachers' certificates. In addition to this Council there is an Advisory Board, consisting of seven members, four of whom are appointed by the Department of Education for a term of two years; two are elected by the Public and High School teachers actually engaged in teaching in the Province; the other member is appointed by the University Council, by ballot, from time to time, for a term of two years. This board has power to determine the qualification of teachers and inspectors for High and Public Schools; to appoint examiners for the purpose of preparing examination papers for teachers' certificates and for examination of pupils seeking to enter High Schools; to determine to whom teachers' certificates shall be granted, and to cancel certificates at any time granted, with power to recognize certificates granted outside the Province instead of an examination.

There is no remuneration attached to this office.

The certificates granted by the Advisory Board rank as First, Second and Third Class. Those of the First Class are sub-divided into grades A and B; those of the Second and Third Classes are each of one grade.

There are two parts in the examination for granting certificates, one for testing the literary acquirements of the candidates, to be known as the non-professional examination; the other for testing their knowledge of the theory and practice of education, to be known as the professional examination.

Non-Professional Examination

This is held annually on the first Tuesday after the first of July, at such places and in charge of such persons as may be decided on by the Department of Education.

Candidates writing for First, Second and Third Class teachers' certificates must pay a fee of five dollars to the presiding examiner before entering upon the work of the examination. With the amount collected the presiding examiner pays all local expenses and forwards the remainder to the Department of Education to be used in defraying the expenses of the examination of teachers.

The general qualifications necessary before a candidate is admitted to non-professional examination are: (1) If a male, that he is of the full age of 18 years, if a female of 16 years; (2) that he or she is possessed of a good moral character, as certified to by a clergyman.

The answer papers in these examinations are examined by sub-examiners appointed by the Advisory Board and who receive remuneration in proportion to the time occupied in actual work.

THIRD CLASS.

For this certificate the candidate is examined in Reading, Writing, Spelling, English Grammar, Composition and Rhetoric, Poetical Literature, History, Geography, Arithmetic Algebra, Euclid, Botany, Physiology, Book-keeping and Agriculture.

This is valid as a license to teach until the opening of the next Third Class Normal School Session following its issue, or by special permission of the Advisory Board until the opening of the next session thereafter.

SECOND CLASS.

For this certificate the candidate is examined in the subjects above named, but more advanced scholarship is demanded, the subjects being extended. Physiology is dropped; Roman and Greek History and Physics are added.

This certificate is not valid to teach longer than thirteen months after the date of its issue unless the holder has taken a professional certificate.

FIRST CLASS.

For this certificate the candidate is examined in advanced Rhetoric, Composition, History of the English Language and Literature; Algebra, through progressions, Euclid, Books I, II, III, IV, definitions of V and certain propositions in VI; Geography, Chemistry, Physiology, English and Canadian History.

This certificate is not valid to teach longer than thirteen months after the date of its issue unless the holder has taken a professional certificate.

The regulations provide that certain persons shall be eligible for non-professional certificates, among whom are :—

- (1) Undergraduates of the University of Manitoba who have passed the Preliminary Examination (1892 and thereafter) to receive Second Class Certificates; those who have passed the previous examination (1893 and thereafter) and have received 50 per cent. of the aggregate marks and 34 per cent. in each subject and who present a certificate to that effect, to receive a certificate of First Class, grade B.
- (2) Graduates of the University of Manitoba who have First or Second Class standing in Honor Courses or in the General Course to receive a Certificate of First Class, grade A.
- (3) Graduates of any other University in Her Majesty's Dominions, on the presentation of satisfactory documents, to receive certificates of such class as the Advisory Board may deem them entitled tc.

Candidates in all these non-professional examinations must obtain at least 50 per cent. of the aggregate marks and 34 per cent. in each subject, except in the case of Oral Reading, where 60 per cent. is required.

A non-professional certificate obtained on account of standing in the University of Manitoba, shall, if granted later than the 31st May of any year, be valid for one year from the 10th August of the same year, but if granted previous to the 31st May, then shall be good for one year from 10th August next preceding the said 31st May.

PROFESSIONAL EXAMINATION.

The examinations for professional certificates are held at the close of the Normal School sessions.

THIRD CLASS.

Professional certificates of this class are issued to persons who have fulfilled the following requirements:

- (1) To have at least a non-professional Third-Class certificate.
- (2) To have attended at least a full session at a Normal School after obtaining such non-professional certificate, and to have passed the professional examination on the Science of Education, Methods of Teaching, each subject on the programme of studies, School Organization and Management.
- (3) To have received a satisfactory report on conduct and practical teaching from the Principal of the Normal School.
- (4) To have taught successfully in this Province for one year after having obtained a non-professional certificate.
- (5) Those Third Class teachers who have attended the Normal School for third class teachers in this Province for a period not less than nine weeks, and whose non-professional Third Class certificates have expired, may, on the recommendation of a Public School

Inspector, have their professional training allowed them on any further Third Class non-professional certificates obtained by them in the Province. This third class professional certificate is good for only three years but may be renewed on the recommendation of the local inspector.

The Normal School session for Third Class teachers is held from February 15th to April 30th of each year, conducted by the Principal and Assistant Teacher of the Provincial Normal School.

SECOND CLASS.

Professional certificates of this class good for life and good conduct are granted to those (1) Who have a non-professional Second Class certificate. (2) Who have attended at least one full session at the Provincial Normal School after obtaining such non-professional certificate, and who have passed the professional examination consisting of more advanced work in the Science of Education, the Art of Education and the History of Education. (3) Who have received a satisfactory report on conduct and practical teaching from the Principal of the Provincial Normal School. (4) Who have taught successfully in this Province for one year after having obtained a non-professional Second Class certificate.

The Normal School session for Second Class teachers begins on August 15th and continues to December 23rd, when the professional examination is held.

FIRST CLASS.

Still more advanced work in the subjects mentioned in the professional examination for Second Class certificate is required for First Class certificates. The candidate must also have a non-professional First Class certificate or a degree in Arts entitling him to such. He must also have attended at least one full session at the Provincial Normal School, from the Principal of which he must have received a satisfactory report on conduct and practical teaching.

One year's successful teaching in the Province after having obtained the non-professional First Class certificate is also required.

This certificate, like that of the Second Class, is valid for life and good conduct.

The Normal School session for teachers of this class begins on January 3rd and continues four months and a half, at the end of which time the professional examination is held.

Principals of Collegiate or High Schools must hold what is called the Collegiate or High School Certificate, the requirements for which are:—

- (1) To have the degree of Bachelor of Arts from some university in Her Majesty's Dominions.
- (2) To have a professional First Class certificate or a certificate from a recognized School of Pedagogy. This certificate from the School of Pedagogy will not entitle the holder to teach or superintend elementary classes.

For a Collegiate or High School Assistant's Certificate the candidate must have standing equivalent to that of the previous examination in the University of Manitoba, and a professional First Class certificate or a certificate from a recognized School of Pedagogy.

There is still another certificate known as a Specialist Certificate, which is granted to candidates who present to the Advisory Board evidence of being able to read French or German and to speak either of these languages fluently and correctly. This is at first temporary, and if at the end of a year the teaching is deemed satisfactory there is a permanent certificate issued, entitling the holder to teach the subject in a Collegiate or High School.

The Advisory Board licenses also specialists in drawing, music, elocution and calisthenics on certain conditions.

On all professional examinations the candidate must obtain at least thirty-four per cent. on each subject and fifty per cent. on all subjects.

The cost of examinations for certificates in 1896 was \$4,500, the amount received from fees \$2,870, and the number of candidates examined were 574. This expense, however, includes also the entrance examination to High Schools at which there were 295 candidates. The deficiency is made up from the public grant to schools.

It is very gratifying to notice that the number of successful candidates for First and Second Class certificates is gradually increasing, while those for Third Class is decidedly decreasing. The decrease in the number of *interims* is equally gratifying, for where there were 305 granted in 1887 there were but fifty-five in 1895.

Excluding special certificates in music, elecution, etc., there are really but four classes of certificates issued in this Province, and the fee for examination for each is five dollars. The examination questions are purposed by examiners appointed by the Advisory Board, and the answer papers are read by sub-examiners appointed by the same Board. These are men either actually engaged in teaching or taking an active interest in educational affairs.

PROVINCE OF BRITISH COLUMBIA.

The general overeight and management of educational affairs is in the hands of the Council of Public Instruction, which is composed of the members of the Executive Council of the Province. The Superintendent of Education appointed by the Governor in Council is Secretary of the Council of Public Instruction, and two or more prominent educationists appointed by the Council of Public Instruction constitute a Board of Examiners, who examine teachers and grant certificates of qualification. These examiners prepare the questions and examine the answer papers, receiving \$175 each as remuneration.

The examination is held once a year, and before a candidate is admitted there must be satisfactory evidence adduced that, if a male, he is twenty years of age, or, if a female, she is eighteen years, and possessed of a good moral character.

The following are the classes and grades of certificates:-

TEMPORARY CERTIFICATE.

This is valid until the next examination of teachers, and entitles the holder to teach temporarily in any school. It is issued by the Superintendent of Education, countersigned by the Provincial Secretary, and is intended to be used only in cases of special emergency.

THIRD CLASS, GRADE B.

This is valid for one year and estitles the holder to teach in any common school or to fill the position of assistant in any grade school.

THIRD GASS, GRADE A.

This is valid for two years and entitles the holder to teach in any common school or to fill the position of assistant in any graded school.

The subjects of examination for third cass certificates are: (1) Reading, (2) writing, (3) spelling, (4) written arithmetic, (5) mental arithmetic, (6) geography, (7) English grammar, (8) Canadian history, (9) English history, (10) anatomy, physiology and hygiene, (11) composition, (12) education school law, etc.

For grade B of this certificate a candidate must obtain 30 per cent of the marks attached to each of the above subjects for examination and 40 per cent. of the total number of marks.

For grade A, 40 per cent. of the marks attached to each subject and 50 per cent. of the total number of marks is demanded.

SECOND CLASS, GRADE B.

This is valid for three years and entitles the holder to teach in any position in a graded school or in a common school.

The subjects for examination for this certificate are: 1 to 12 as for third class certificates, (13) mensuration, (14) book-keeping, (15) music (theory), drawing (linear), botany.

In each of these subjects prescribed for third class certificates the candidate must obtain 40 per cent. and not less than 30 per cent. on each of these subjects peculiar to this class and grade, and 50 per cent. of the total number of marks attached to the subjects of examination for this class and grade.

SECOND CLASS, GRADE A.

This is valid for five years and entitles the holder to teach in any position in a graded school or in a common school.

In addition to the subjects prescribed for grade B there are sdded: (16) Algebra, (17) geometry, (18) zoology, astronomy, rhetoric.

The requirements of examination are:

- (a) 40 per cent. of the marks attached to each of the subjects of examination for second class, grade B, certificates.
- (b) Not less than 40 per cent. of marks attached to each of the subjects of examination peculiar to this class and grade.
- (c) 60 per cent, of the total number of marks attached to the subjects of examination for this class and grade.

FIRST CLASS, GRADE B.

This is valid for life or during good behavior and entitles the holder to teach in any position in a graded school or in a common school or teach as assistant in a high school.

In addition to the subjects prescribed for second class, grade A, there is added some additional work in mensuration, book-keeping, algebra and geometry, and as new subjects (19) natural philosophy, (20) English literature, (21) general history, chemistry and geology (a knowledge of one of these subjects is demanded).

The requirements of examination are (a) 40 per sent. in each of subjects for second class A; (b) not less than 40 per cent. in each of the subjects peculiar to this class and grade, and (c) 60 per cent. of the total number of marks attached to the subjects of examination for this class and grade.

FIRST CLASS, GRADE A.

This is valid for life or during good behavior and entitles the holder to teach in any position in any public school.

In addition to the subjects prescribed for first class, grade B, there is some more work in geometry, and (22) practical mathematics, (23) ancient history, (24) Latin, (25) Greek and French.

The requirements for examination are :-

(a) 40 per cent. of the marks attached to each of the subjects of examination for first class, grade B, certificates, (b) not less than 40 per cent. in each of the subjects peculiar to this class and grade, and (c) 60 per cent. of the total number of marks attached to the subjects of examination for this class and grade.

If the candidate for a first class, grade A, certificate is a graduate in arts of some recognized British or Canadian university, who has proceeded regularly to his degree, he may obtain a certificate on satisfying the examiners as to his knowledge of the art of teaching, school discipline and management, and the school law of the province, undergoing, if deemed necessary, an oral examination on these subjects.

Holders of second class, grade A, and holders of first class, grade B, certificates are permitted in any year during which the certificates held are valid, to write only on the subjects peculiar to the next higher certificate. This amendment has been but recently passed, and it will prove most acceptable to the teachers, encouraging them to endeavor to secure higher certificates.

The examinations for all these certificates are written only, except that of first class, grade A, which is both oral and written.

There are no fees demanded of candidates unless there is an appeal from the decision of the examiners, when a deposit of \$5.00 must be made with the Department, which deposit will be returned if the appeal or claim is sustained.

In 1896, there were 192 candidates examined at an expense of \$1,284.00. Of these candidates, 166 were successful in obtaining certificates; 23 obtaining first class, 82 second class, and 61 third class.

There is no normal school in the province nor is there a university, and hence, the majority of the teachers, especially in the higher grades, have been educated in the older provinces and emigrated to the West "to grow up with the country." This can be seen very plainly in the examination for first class, grade A, certificates in 1896, where, out of seven successful candidates, only two had been educated in the province; three being alumni of Queen's University, Kingston, Ont, one of the University of Toronto, and one of McGill University. In his report for 1895-6, the Superintendent of Education urges very strongly the necessity of establishing a Normal School, ending up his recommendation by saying that British Columbia is the only province in the Dominion which does not support one or more normal schools.

There are seven grades of certificates in this Province, and there are no fees demanded of candidates. The examination questions are prepared and the answer papers examined by a Board of Examiners consisting of the Superintendent of Education and two or more prominent educationists appointed by the Council of Public Instruction.

MASSACHUSETTS.

The system of examination and certification of teachers in Massachusetts has until lately been very strongly characterized by the dominant New England idea of local self-control. Section 28, chapter 44 of the Public Statutes, makes it the duty of the school committee of each town to ascertain by personal examination the qualifications of candidates for teaching and their capacity for the government of schools. This, practically, makes as many examination standards as there are school committees, and though it has its advantages in enabling progressive committees to raise the standard and secure the best teachers, it has also its disadvantages in correspondingly lowering the standard in other localities and admitting the evils of personal and political favoritism. Massachusetts stands almost alone in giving to local school committees the right to pass upon the qualifications of teachers, and their reluctance to abandon this policy seems to arise from the fear of centralization. This, they think, would decrease the local interest in the schools.

That there are serious abuses under this system is very apparent from the report of the Secretary of the State Board of Education in the Massachusetts Report, 1893-4. He says: "Notwithstanding the public statutes bave for more than half a century required of school committees the personal examination and certification of teachers, facts warrant the assertion that in many portions of the state this law has become a dead letter. It is reported by the agents of the board, and well known by others, that there are now in the schools many teachers who have no certificates attesting their qualification for the positions they occupy, and have never been examined as required by the statute alluded to above. In the eyes of the law such persons in charge of a school are not legally teachers; and the payment to men of public money for services rendered under such circumstances is without proper authority. This lax state of things explains why we find incompetent teachers doing a very low grade of work in the schools—a fact not creditable to Massachusetts, whose reputation for the general excellence of her public schools is world-wide."

The State Board of Education recognizing the need of some approach to a definite and uniform standard moved for better legislation, and in Chapter 158 of the Acts of 1891 it was provided that the diplomas granted by the State Normal schools of Massachusetts may be accepted by the school committees of towns and cities in lieu of the personal examination required by Section 28 of Chapter 44 of the Public Statutes. This practically makes such diplomas permanent certificates of qualification. These diplomas are distinct from and independent of any that may be granted under the system of state examination and certification of teachers.

A further advance was made in 1894, the 329th Chapter of the Acts of that year reading as follows:

Section 1. The State Board of Education shall cause to be held, at such convenient times and places as it may from time to time designate, public examinations of candidates for the position of teacher in the public schools of the Commonwealth. Such examinations shall test the professional as well as the scholastic abilities of candidates, and shall be conducted by such persons and in such manner as the board may from time to time designate. Due notice of the time, place and other conditions of the examinations shall be given in such public manner as the board may determine.

Section 2. A certificate of qualification shall be given to all candidates who pass satisfactory examinations in such branches as are required by law to be taught and who in other respects fulfil the requirements of the board; such certificate shall be either probationary or permanent and shall indicate the grade of school for which the person named in the certificate is qualified to teach.

Section 3. A list of approved candidates shall be kept in the office of the secretary of the board, and copies of the same, with such information as may be desired, shall be sent to the school committees upon their request.

Section 4. The certificates issued under the provisions of this Act may be accepted by school committees in lieu of the personal examination required by Section twenty-eight of Chapter 44 of the Public Statutes.

Section 5. A sum not exceeding five hundred dollars may be annually expended for the necessary and contingent expenses of carrying out the provisions of this Act.

To carry out this legislation in the best possible manner the Secretary of the State Board of Education, Hon. Frank A. Hill, after an exhaustive study of the systems of other states and with special reference to local necessities, embodied his ideas in a report submitted to the state board in December, 1894, and unanimously adopted by the same. As this will doubtless be the law in the state I have quoted very freely from it in trying to outline the system.

It will be specially notice ble that the system of examination and certification by state authority is in no way compulsory either upon the towns or upon the teachers. It offers towns and teachers a relief from the necessity of new examinations; it gives the school committees a comparatively satisfactory and uniform standard, enabling them to

raise their own standard of requirements, it puts the profession of teaching upon a much more satisfactory basis and thus encourages the teachers to take pride in their calling.

There are two kinds of certificates issued by the board: (1) probationary, (2) permanent, each of which has three grades, (a) elementary, (b) secondary, (c) special.

PROBATIONARY CERTIFICATES.

I .- Elementary Grade.

The requirements are:

- (a) The candidate must be a graduate of a high school of good standing or he must have received the equivalent of a good high school training.
- (b) He must be a graduate of one of the state normal schools of Massachusetts, or of the Boston normal school or of some approved state normal school or he must have had at least two full years' experience in teaching.

For the examination in this grade the candidate is expected to have a good elementary acquaintance with

- 1. Languages, including (a) English with its grammar and literature and (b) the elements of one of the three languages, Latin, French and German.
- 2. Mathematics, including (a) arithmetic, (b) the elements of algebra, and (c) the elements of plane geometry.
- 3. History and Geography, including (a) the history and civil government Massachusetts and the United States with related geography, and (b) the history o England with related geography.
- 4. Sciences, including (a) physical geography, (b) physiology and hygiene, (c) physics, and (d) any one of the following: botany, zoology, geology, chemistry and descriptive astronomy.
- 5. Drawing, including (a) mechanical and freehand drawing, and (b) any one of the topics, form, color and arrangement. The candidate should also be able to make diagrams and sketches to illustrate his answers to questions that may be asked in other subjects.
- 6. The principles of Education, including (a) the aims and means of education, (b) the elements of psychology, (c) methods of teaching the specific subjects of an elementary course, including physical culture and the rudiments of music, and (d) school management.

The candidate will be tested orally in at least one of the foregoing groups at the discretion of the examiners, the preference of the candidate receiving due consideration. The object of the oral test is to form an estimate not only of the candidate's scholastic attainment in the subjects themselves, but also of his personal characteristics and his use of language.

It is a special feature of the examination that the candidate is allowed to submit to the examiners any work of a personal, genuine and legitimate nature bearing on the subjects and works covered by the examination, this to be duly considered in the final

PERMANENT CERTIFICATES.

The examination for a permanent certificate in an elementary grade is a little more searching and minute, covering much the same ground except that the candidate who has already his probationary certificate may choose any one of the groups, and on this with (a) the aims and means of education (b) psychology (c) the world's principal educational movements, particularly those of modern times, and (d) Massachusetts' school legislation, the examination will be based. A thesis also is demanded.

The holder of a probationary certificate shall receive a permanent certificate for the corresponding grade provided,-

(a) He shall have had at least three years' successful experience in teaching after receiving his probationary certificate, a part of which shall have been in Massachusetts under such conditions as to enable the examiners to inspect his actual work in school.

- (b) He shall have passed an examination in such additional subjects as may be prescribed.
 - (c) He shall have submitted a satisfactory thesis on some prescribed theme.

Permanent certificates for the several grades may be granted to other candidates than those who hold probationary certificates, provided,—

- (a) They shall have had at least six years' experience in teaching, a part of which shall have been in Massachusetts under such conditions as to enable the examiners to inspect their work in the school-room.
- (b) Their scholarship and experience appear to be of a conspicuously meritorious character.
- (c) They shall have passed an examination in such subjects appropriate to the several grades, as may be prescribed.
 - (d) They shall have submitted a satisfactory thesis on some prescribed theme.

II.—Secondary Grade.—Probationary Certificate.

- (a) The candidate must be a graduate of a college or of an institution of as high a grade, or he must have received the equivalent of a college training.
- (b) He must also have received preliminary professional training satisfactory to the examiners, or he must have had at least two full years' experience in teaching.

The following work is prescribed for examination:

- 1. Languages including (a) English with its grammar, rhetoric, literature and history and (b) any two of the four languages, Latin, Greek, French and German.
 - 2. Mathematics including (a) algebra and (b) plane geometry.
- 3. History and geography including (a) the history of the civil government of Massachusetts and the United States with related geography and (b) general history and related geography.
- 4. Sciences including (a) physical geography, (b) physiology and hygiene (c) physics, and (d) one of the following: biology, botany, zoology, chemistry, geology and descriptive astronomy.
- 5. Drawing, including (a) mechanical and freehand drawing, and (b) one of the following topics: form, color, historic ornament, and elementary and applied design; the candidate should also be able to make diagrams and sketches to illustrate his answers to questions that may be asked in other subjects.
- 6. The Principles of Education including (a) the aims and means of education, (b) the elements of psychology, (c) principles to be observed inteaching, and (d) school management.

There is also an oral examination as in the elementary grade. There is the same general difference between the probationary and permanent in this grade as in the elementary grade.

III.—Special Grade.

The candidate must have received adequate special training at some approved institution in the subject he wishes to teach, or he must have had at least two full years' experience in teaching his special subject.

The probationary certificate for any grade shall be valid for three years from its date unless revoked earlier for cause. At the expiration of such period it may be once renewed for three years, upon satisfactory evidence that the holder continues to do acceptable work as a teacher.

In regard to the probationary certificate of the special grade, it is recommended that the candidate aiming to teach a special or a single subject should qualify himself in

a broad and liberal way, and to this end he is advised to take the regular examination designated for the probationary certificate of that grade of schools, whether elementary or secondary, in which he aims to teach. If, in addition to passing this examination, he is successful also in the *special* examination he will receive a probationary certificate for this special grade also. If, however, the candidate wishes to limit his work to some subject that is distinctly and narrowly special, such as drawing, stenography, physical culture, music or some branch of domestic or manual training and does not deem it expedient to take an examination in either of the general grades, he will be required to pass the examinations both *general* and *special* as indicated below.

General Examination: -

- 1. Language-English with its grammar and literature.
- 2. Mathematics—Arithmetic.
- 3. History and Geography—The history and civil government of Massachusetts and the United States, with related geography.
- 4. Sciences—(a) physiology and hygiene and (b) any one of the following: physical geography, physics, botany, zoology, geology, chemistry and descriptive astronomy.
- 5. Drawing—Freehand: particularly diagrams and sketches to illustrate answers to questions that may be asked in other subjects.

Special Examination :-

- 1. The specific subject in all its branches which the candidate intends to teach, with principles to be observed and methods to be followed in teaching it.
- 2. Specimens of work, when practicable, or other evidences of the candidate's mastery of his subject.
 - 3. A demonstration lesson.

There will also be an oral examination as in the other grades.

If the candidate holds, in addition to his special grade probationary certificate, a probationary certificate of either of the general grades, his examination for the permanent certificate of the corresponding general grade will answer for an examination for the permanent certificate of the special grade. If not, he will be examined for a special grade permanent certificate on the same general lines of difference that characterize the other grades, including the principles and history of education as outlined above.

Great weight is attached to successful experience in teaching and managing schools.

The chief aim of this state plan is to discover by reasonable tests formally described as far as practicable, the merit and promise of the candidate, and to recognize such merit and promise, if they are deemed adequate, by means of an appropriate certificate and a place in the state list of eligible teachers. The examination requirements are viewed as minimum requirements only, and are not to be interpreted as ruling out of consideration other and higher subjects of study in which the candidate may be proficient. On the contrary, evidences of scholarly attainment and professional power that might not be revealed under the limitations of a published scheme are heartily welcomed.

In closing his report, the Secretary says: "If, in its execution, it can be kept free "from a cold and technical formalism, if it can be administered so as to bring out, in "some measure, the totality of the candidates' fitness, rather than isolated, disconnected "and meagre bits of it; then, it may prove of great and mutual service to ambitious "towns and well qualified teachers.

"Nor is this gain of mutual service the only one to be looked for. Whether "teachers incline to a place in the state eligible list or not, higher standards of prepara"tion are set for them throughout the state, more serious thought is invited to the need "of special training, and teaching in practice is likely to be taught nearer to what it is

"in theory—a true profession, as exacting in its demands as any other and rivalling the "noblest in its potency for good."

In discussing the necessity of Normal Training for High School Teachers, the Secretary, in the sixtieth report (1895-6) says that not one of the normal schools has facilities for practice in high school subjects. That is to say, they have no model or practice schools of high school grade, in which the conditions for practice are those of actual school life. Asserting that the high school teacher should be a college graduate and that he should have at least a year of strictly professional training, and recognizing that the normal schools were not established and do not exist for that purpose, he seems to feel that there ought to be a high normal college established so that the candidates for the 1,186 positions in Massachusetts High Schools could receive an adequate professional training. There are at present nine normal schools in this state to meet the demands of 9,496 elementary positions.

In accordance with this plan which has been outlined there will be in Massachusetts two classes of certificates, each of which has three grades, or six grades of certificates in all. There are no fees in connection with the examinations. It must be remembered that this system of examination and certification by State authority is in no way compulsory, and therefore there still exist in a great proportion of the State the old local examinations conducted by members of the school committees.

STATE OF NEW YORK.

All examinations for teachers' certificates in the State of New York are held under the direction of the State Superintendent of Public Instruction, by the members of whose department the examination questions are prepared. The answer papers are examined by the examination bureau of the State Department, which consists of an examination clerk, who has general direction of the work and is paid \$2,500 per annum, four examiners who mark papers, and are each paid \$1,800 per annum, and three record clerks, each of whom has an annual salary of \$900. These officials are appointed by the State Superintendent of Public Instruction upon the result of competitive civil service examinations. The State Legislature appropriates annually the amount necessary to carry on the examination work. The amount varies from \$25,000 to \$30,000 per annum.

There are two kinds of certificates issued:

1. The State Certificate. This is valid for life, and is awarded as the result of a written examination held once a year under the direction of the State Superintendent of Public Instruction.

Before the candidate is admitted to examination he must satisfy the department (a) that he is twenty years of age, (b) that he has a good moral character, and (c) that he has had at least two years' successful experience in teaching.

The most noticeable feature in connection with these requirements is the absence of any demand for specific antecedent course of instruction.

There are no fees demanded from the candidates, the expense of examinations being met by the state appropriation.

In 1896 there were 327 candidates examined at a cost of \$25,000.

Prior to 1875 there had been issued without examination some 3,000 State certificates which entitled their holders to teach for life in the public schools of the State. Since that year, however, there have been no certificates of this character granted without thorough examination. It is noteworthy that during these years there have been but 3,080 applicants, and of these but 623 have won certificates. In commenting on this fact in connection with the statement that there are 30,000 teachers in the State, the State Superintendent says that the reluctance to try this examination is to be partly attributed to the fact that low salaries paid in the public schools do not stimulate ambition to hold

high-grade certificates, and do not tend to establish the profession of teaching on a solid foundation. He says that when better salaries are paid and there is more permanency in the teachers' positions, teachers will be ambitious to secure the highest grade of certificates.

The State Superintendent in the circular issued in connection with the announcement of the examinations, outlines in a few words the object of these examinations. He says: "It is the intention of the Department to make these examinations a thorough test of merit. No 'catch questions' will be introduced, but the examinations will be sufficiently rigid to prove the ability of the applicant, to the end that a state certificate when granted shall be the most signal honor that is bestowed upon the progressive teachers of the Commonwealth."

The subjects for examination are divided into two groups. In group I. are included algebra, arithmetic, American history, geography, grammar and analysis, orthography, penmanship, physiology and hygiene, in each of which a standing of at least seventy five per cent. is required. In group II. are included astronomy and zoology (for either of which may be substituted Latin through the first three books of Cæsar's Commentaries, or the ability to read at sight French or German written in a plain style,) book-keeping, botany, chemistry, civil government and school law, composition and rhetoric, drawing, general history, general literature, geology, methods and school economy and philosophy of education, plane geometry and physics, on which subjects an average standing of at least seventy-five per cent. is required, but no paper showing a standing of less than fifty per cent, will be considered in this average.

To encourage teachers whose time is very much occupied and who consequently feel that they can not devote themselves to such a task as preparing all the subjects at once for a state certificate, the examination has been divided. All candidates who attain the required percentage in five or more of the designated subjects, exclusive of orthography and penmanship, but not in all, are credited at the Department for those studies in which they have passed, and a partial certificate to that effect is mailed to each candidate. On passing the required percentage in the remaining designated subjects at any subsequent examinations, held not later than the second year thereafter, they will be entitled to receive state certificates. This gives to candidates opportunity for three distinct yearly trials.

Candidates who have had three trials, but have failed to obtain a certificate forfeit the standings earned on the first trial only. The standings earned on the last two trials will be credited to such candidates, and by completing the work required at the next examination they may receive certificates.

II .- Commissioners' Certificates.

The State is divided into 114 districts, each of which is presided over by a commissioner, whose term of office is for three years. Prior to 1887, each commissioner had power to set the questions and examine the candidates for certificates which were to be valid only in his own district. Just as in the case of certificates issued by the County Superintendents of Indiana, there were just as many standards of qualifications as there were districts. Naturally this occasioned much friction and dissatisfaction in the working of the educational system of the State, and in 1887 a plan for uniform examinations was adopted by sixty-five school commissioners. As the advantages of the plan became known, the number of volunteers gradually increased until in the following year Superintendent Draper announced that every commissioner in the State had voluntarily adopted the system. The plan worked very well, but as there was a shade of doubt about its strict legality, there was passed in 1894 the revised Consolidated School Law, subdivision 5 of section 13 of title V. of that law, defining the powers and duties of school commissioners. It reads as follows: "To examine, under such rules and regulations as have been or may be prescribed by the Superintendent of Public Instruction, persons proposing to teach common schools within his district finds them qualified, to grant them certificates in the forms which are or may be prescribed by the superintendent." 47

The State Superintendent provides the rules and regulations under which the commissioners must examine and license their teachers, and in exercising this duty he has prescribed the uniform system of examinations. Under this system the examination papers for all the State are prepared by members of the State Department of Public Instruction and are sent to the commissioners of each district in time for the regular examinations. This ensures uniformity of work demanded.

All answer papers submitted by candidates for commissioners' certificates, are forwarded immediately after the close of the examination to the State Superintendent of Public Instruction for examination, marking and filing, thus ensuring uniformity of examination. The results are sent to the different commissioners, who then issue the proper certificates.

This change in the method of examination by which a permanent board of examiners was appointed, took place in 1894, when Hon. Jas. F. Crooker was State Superintendent. It was on his recommendation that the Legislature passed the necessary Act. In his report of 1893-4, speaking of the results achieved after one year's trial, he says: "This change in the method of determining who are entitled to certificates, is one of the greatest reforms that has been inaugurated in our school system for many years. It gives New York the most perfect system of determining the qualifications of teachers that is to be found in any State of the Union. It removes the possibility of any commissioner exercising unfair discretion for or against any teacher. It has lifted the system of examining and licensing teachers above all considerations except their fitness to enter the service."

The commissioners have jurisdiction over all the public schools in the State outside of cities, and the teachers employed in these schools are licensed upon a uniform standard adopted by the State Superintendent. A weakness in the system is that the school systems of the various cities in the state are not uniform and the local school authorities in cities are given the authority to examine and license their teachers. Nothwithstanding this provision, nearly all the cities of the state have voluntarily adopted the uniform system of examinations, and the teachers employed therein are now examined and licensed under the direction of the State Department. This forward movement is due in a great measure to the energetic and far-sighted policy of the State Superintendents of Public Instruction, who have shown in an unmistakable manner what great power for educational advancement can be wielded by the occupant of that office. In the report for 1896, the State Superintendent strikes the key note when he says: "I hold that not one dollar of the "State's money should be paid in district quotas for teachers employed in cities, unless "such teachers hold a certificate of some form issued under the regulations of the State "Department of Public Instruction."

This system of uniform examinations has worked very satisfactorily and has justified its establishment in the increased efficiency in the teaching force. During the year 1896, 22,057 different candidates were examined, and of this number 8,544 succeeded in obtaining certificates qualifying them to teach in the public schools. "It will therefore be observed," says the report for 1897, "that 13,513 candidates or over 60 per cent. of those who entered examinations failed to obtain certificates."

With reference to the style of examination paper prepared for the candidates for these examinations, Mr. J. R. Parsons, Jr., in the Regents' Report, 1894, University of the State of New York, says: "In New York, the system of alternative questions has greatly "increased the popularity of the regents' examinations, which required, in 1894, 875,050 "question papers. The Department of Public Instruction has followed the regents in adopting the same plan in examinations for teachers' licenses."*

Referring in his report for 1890 to the uniform examination system, Hon. A. S. Draper, then State Superintendent, says: "It is not to be supposed that this system of examinations is opposed by the teachers of the state. From the beginning it has had the warm support of nearly the entire body. Indeed the leading teachers are responsible for the fact that it has been established. It eliminates personal and political influences from the granting of licenses. All must depend upon their merits. It protects capable

teachers from unfair competition. Young persons of average intelligence and fair education have little trouble in gaining the lowest grade certificate, and the necessity of rising to the higher grades stimulates and directs their activity. Certificates are valued because they are earned. In innumerable ways it promotes the efficiency of the schools and makes the position of the teacher a more self-respecting and a more respected one."

Hon. Jas. F. Crooker, State Superintendent in 1893-4, praises the uniform system, saying that it is of great advantage and convenience to the teachers, as now a certificate of any grade issued in one county stands for the same value as a certificate of corresponding grade issued in any other county in the State. Again, the teacher who obtains a certificate of any grade may receive all the benefits to which he is entitled under this certificate in any commissioners' district in the state without further examination. And not only does it benefit the teacher in this direct way, but it benefits also the commissioner who being relieved of examination duty has now time to devote to what is his important work, the supervision of the schools under his jurisdiction.

In the report for 1896 the State Superintendent, Hon. Chas. R. Skinner, says of the effects of the uniform system of examinations:

"Its influence is felt in nearly every phase of the educational work of our state. It "has filled to overflowing the normal schools of the state. Thousands of young men and "women have found their way into the academies, union schools and high schools of the "state in order that they may obtain the necessary scholarship to earn certificates. It "has stimulated institute work and rendered this line of instruction more practical and "successful. It has created a demand for professional training and been the means of "establishing teachers' training classes upon proper bases. Through its influence a graded "course of study has been formulated and is in use in a large number of rural schools, broadening and rendering more useful the work of these schools. It has led every person desiring to enter the teaching service to know that the first requisite qualification of the teacher is scholarship, and that it must be possessed before he will be permitted to enter the profession. It has placed the work of teachers upon a professional basis "and given the calling added respect and dignity."

GRADES OF CERTIFICATES.

There are three regular grades of certificates issued by commissioners: THIRD, SECOND and FIRST. There are also the special certificates, TRAINING CLASS, KINDERGARTEN, DRAWING and VOCAL MUSIC.

THIRD GRADE.

Certificates of this grade are issued for a term of one year and are limited to a particular school or grade, and but one certificate of this grade may be granted to the same person. No previous teaching experience is required, but the candidate must pass an oral examination in reading and a written examination in arithmetic, geography, grammar, orthography and penmanship, in each of which he must attain a standing of seventy-five per cent.; and in composition, physiology and hygiene, American history and school law, in which an average standing of seventy-five per cent. is required. The examinations for this grade begin on the second Thursday each of January and August, the first Thursday each of March and June, and the fourth Friday each of April and September and continue two days.

Candidates are exempt from examination in any subject in which they have attained a standing of seventy-five per cent. or over in any previous examination held not more than six months before, and after August 1st, 1897, still more concessions will be granted, for they will be permitted to combine the standing earned by them in any four examinations held within any school year, or between August 1st of any year and the 31st day of July following

SECOND GRADE

Certificates of this grade are issued for a term of three years and are renewed only upon re-examination. Candidates must have taught successfully for a period of not less than ten weeks, and are not eligible to enter an examination without having had such experience. There is an oral examination in reading and a written examination in arithmetic, geography, grammar, penmanship, methods and school economy and orthography (in each of which subjects a standing of seventy-five per cent. is required), in American history, civil government, school law, composition, current topics, drawing, physiology and hygiene (in which an average standing of seventy-five per cent. is demanded).

The examinations are held at the same time as those for the third grade, and candidates for their first certificate in this grade are exempt from examination in any subject in which they have attained the required percentage in any previous examination, held not more than six months before. For any subsequent certificate of this grade candidates are exempt from examination in these subjects in which they have already attained the required percentages, provided all such percentages shall have been attained in one or two examinations held within six months preceding the date of the final examination.

FIRST GRADE.

Certificates of this grade are issued for a term of five years and upon their expiration heir holders having taught successfully for periods of three, four or five legal school years may have them renewed by any school commissioner for corresponding periods without examination. If the holder has taught successfully for less than three legal school years the certificate upon expiration may be renewed, but only for a period of three years or less as the superintendent may determine.

Candidates must have taught successfully for at least two years before being eligible to enter an examination for this grade. They are required to pass a written examination in arithmetic, geography, grammar, penmanship, methods and school economy and orthography, (in each of which a minimum standing of seventy-five per cent. is required), algebra, American history, book-keeping, civil government, composition, current topics, drawing, physics (elementary,) physiology and hygiene and school law (in which an average standing of at least seventy five per cent. is required.) There are two examinations each year, the first beginning on the first Thursday of March, and the second on the second Thursday of August, each of them lasting two days.

All candidates who attain the required percentage in any one of the designated subjects, but not in all, will be credited for those studies in which they shall have passed, and a partial certificate to this effect will be given by the school commissioner. Candidates passing the required percentages in the remaining designated subjects at either or both of the next two subsequent examinations will receive a certificate.

It is very gratifying to notice that in the examinations in 1896 for first grade certificates, there were 524 successful candidates, an increase of over forty per cent. over the number of the previous year.

A like increase is shown in the number of second grade certificates issued, while there has been a notable decrease in the number of third grade. "This result," says the State Superintendent in his report for 1897, "is one of the most substantial arguments in favor "of this system of examinations, as it shows conclusively the progressive spirit which has "been infused into the teaching force of the State, and the advanced scholarship to which "our teachers have attained."

This is one of the most commendable features of the system that teachers to remain in the work must be actuated by a progressive spirit. A person entering the profession for the first time may teach but one year on a third grade certificate, and if he wishes to remain longer he must obtain a certificate of the second grade, the requirements for which

are much broader. The requirements for a subsequent certificate of this grade are still greater, and so the teacher must be progressive to stay in the ranks. He is encouraged to do so by the increased advantages accruing to the higher certificate. The State Department encourages teachers to procure first grade certificates and also encourages good teachers of this grade to remain in the service by renewing their certificates from time to time for a period ϵ qual to that which they have taught under such certificate.

Candidates undertaking the first grade examination and failing to attain the standard required for a certificate of that grade, may be given a certificate of the second or third grade, provided the percentages attained are as high as those required in the grade for which the certificate is granted, but no credits obtained in a second or third grade examination shall be allowed in an examination for a first grade certificate.

Candidates for certificates of any grade are exempt from examination in any subject in which they have attained a standing of seventy per cent. in an examination for a state certificate, as shown by any partial State certificate issued not more than five years previously.

No answer paper in any subject, showing a standing of less than fifty per cent. shall be accepted.

School commissioners may, in their discretion, supplement these examinations with additional questions, demand a higher percentage than is required by the standard regulations, and, for sufficient reasons, refuse to admit a candidate to the examination or to grant him a certificate after he has attained the required standing.

In addition to the three regular certificates issued by the commissioners, there are some special certificates covering only certain phases of the work.

1.—TRAINING CLASS CERTIFICATES.

These are issued for a term of three years and at their expiration are renewable under the same conditions as first grade certificates are renewable.

Candidates for this certificate must have been in attendance upon a training class for at least two terms, as provided in the training class regulations. The course of study in these training classes is designed to meet the requirements of the uniform system for teachers' certificates, and to satisfy the conditions of admission to advanced classes in the normal schools of the State.

The candidates must attain in examinations held for training classes, at least seventy-five per cent. in each of the subjects for a second grade certificate, and, in addition thereto, a standing of seventy-five per cent. in all special subjects designated in the course of study for teachers' training classes. The examinations begin on the third Wednesday of January and on the second Wednesday of June and continue three days.

2.—KINDERGARTEN CERTIFICATES.

A kindergarten certificate entitles its owner to teach in a kindergarten only and does not entitle its holder to teach in any other public school; nor does such certificate entitle its holder to teach in a kindergarten part of the time and grammar and other schools the remainder of the time.

These certificates are issued for a period of three years and upon their expiration may be renewed under the same conditions that first grade certificates are renewable.

Candidates must have had at least one year's professional training in kindergarten work in a normal school in the state or in connection with a training class under the supervision of the Department, or some other institution approved by the State Superintendent of Public Instruction.

Candidates must attain a standing of seventy-five per cent. each in methods, school economy, history of education, art of questioning, and seventy-five per cent. in a special examination in the subject of kindergarten work and any other special professional subject designated for training classes.

The examinations for certificates of this kind are held on the third Wednesday of January and the second Wednesday of June and continue two days.

3.—Drawing Certificates.

This entitles its holder to teach drawing only, but does not entitle its holder to teach any other branches in public schools. These certificates are issued for a period of three years and are renewable under the same conditions that first grade certificates are renewable.

The candidate must have had at least one year's successful experience in teaching in public schools, or must have had at least one year's work in professional training in a normal school in the state, in a training class under the regulations of the Department, or some other institution approved by the State Superintendent of Public Instruction.

The candidate must attain the standing required for a third grade certificate, and in addition thereto, must attain a standing of at least seventy-five per cent. on a special paper in drawing.

The examinations for certificates of this kind are held in January, March, June and August, on the dates on which the regular examinations for second grade certificates are held, and the special examination in drawing is held on the morning of the first day of each of such second grade examinations.

4 .-- VOCAL MUSIC CERTIFICATES.

Certificates of this kind may be granted to candidates who establish to the satisfaction of the State Superintendent that they are qualified to teach vocal music. Such certificate shall entitle its holder to teach music only and shall not entitle its holder to teach any other subject in public schools.

These certificates are issued for a term of three years and upon their expiration may be renewed the same as are first grade certificates.

First and second grades and training class certificates are valid in all parts of the state when endorsed by the school commissioner having jurisdiction; and in those cities which have adopted the regulations of the State department, the commissioners' certificates are valid.

A school commissioner must indorse for the full period for which they are valid when presented to him for endorsement, first and second grade certificates, training class certificates, and drawing, music, and kindergarten certificates issued by any other school commissioner in the state, or issued by the authorities of any city which has adopted and is working under the uniform system of examinations, unless a valid reason exists for witholding such endorsement. Such certificates, when properly indorsed, shall be valid in the school commissioner district over which the school commissioner who endorsed them has jurisdiction.

The examinations are held in but one place in any school commissioner district upon the same date, and candidates must attend in their respective school commissioner districts.

There is no special provision for the training of those who intend to teach in high schools, nor are there special examinations held for such candidates.

There are eleven normal schools in the state in which there was a total enrolment in 1896 of 9,481 pupils and from which there graduated 860 pupils. The cost of maintaining these schools for the year was \$481,825.41. In the report for 1897, the

state superintendent notes that there is a constant tendency to raise the standard of admission to normal schools and to increase the amount of professional instruction. He urges upon school authorities, especially in cities, the importance of giving due recognition to holders of normal school diplomas, making them prima facie evidence at least of qualification to teach without further examination beyond reasonable tests by actual experience.

The certificates issued in this State are eight in number, being one State Certificate, three Commissioners' Certificates, and four Special Certificates. There are still a few cities not under the uniform system, and these issue certificates of their own. There are no fees in connection with examinations for teachers' licenses, the expense being met by the State appropriation. The examination questions are prepared by members of the State Department of Public Instruction and are examined by a permanent board of examiners in that Department who attain their position as a result of competitive civil service examination.

PENNSYLVANIA.

The general rule in regard to the qualification of a teacher in Pennsylvania is that he shall not be eligible to receive a certificate from a county, city, borough or township superintendent if he has not a fair knowledge of orthography, reading, writing, geography, English grammar, mental and written arithmetic, history of the United States, the theory of teaching, and of the effect of alcoholic drinks as a beverage.

For each county of the State there is elected by the school directors a county superintendent who holds office for three years, and has the general supervision of education in his county. But school directors in any city or borough having a population of over 5,000 may elect a superintendent who shall hold office for three years, and who shall have control over the schools of his district quite independent of the county superintendent, whose authority in these schools has been cancelled.

No person is eligible to the office of county, city or borough superintendent in any county in this state who does not possess a diploma from a college legally empowered to grant literary degrees, a diploma or state certificate issued according to law by the authorities of a state normal school, a professional certificate from a county, city or borough superintendent of good standing, issued at least one year prior to the election, or a certificate of competency from the state superintendent of common schools, nor is such person eligible unless he has a sound moral character and has had successful experience in teaching within three years of the time of his election. If, however, he has already served as county, city or borough superintendent, that is deemed a sufficient test of qualifications.

The county, city and borough superintendents have the power of issuing provisional and professional certificates for teachers. There are seven kinds of certificates or licenses to teach.

I. Provisional certificate.

This is granted to candidates who possess a fair knowledge of the branches named in the general rule which is quoted above, or to those who, possessing a thorough knowledge of the branches, have little or no experience in teaching, and it licenses the holder to teach in the county, city or borough where issued for one year. It cannot be renewed without a re examination, and cannot be made valid in any other county, city or borough by the official endorsement of the superintendent therein.

II. Professional certificate.

This is granted by the same officials, and is given only to those who possess a thorough knowledge of the branches above named, and who have had successful experience in teaching. It licenses its holder to teach in the county, city or borough where issued for three years, or for one year after the expiration of the term of office of the superintendent

granting it. This certificate may be renewed by the superintendent without re-examination after having fully satisfied himself by personal observation in his or her school of the competency and skill of the person holding it.

III. Permanent certificate.

This is granted to holders of professional certificates upon recommendation of the superintendents and the school directors, if such teachers have taught successfully for three years, and have passed an examination before the county committee appointed by the State Superintendent of Public Instruction. This certificate is signed by the State Superintendent, and is good in the county in which it was issued, and also in any other county for one year, after which it must be endorsed by the county superintendent.

IV. Practical teacher's certificate.

This is granted to persons who have successfully taught for three years, and who pass the examination before the State Board which examines the candidates for graduation at State Normal Schools. The board is appointed by the state superintendent, and includes himself and two normal school principals, and not less than three nor more than six superintendents. Each applicant must satisfy the board that he (or she) is twenty-one years of age, and of good moral character. He must also prepare and present to the board of examiners, an original thesis on some professional subject of not less than six folio pages of manuscript.

V. Normal elementary diploma.

The students who complete the normal school course, receive a certificate good for two years after passing an examination before the state board just named.

VI. Life certificate

After two years' successful teaching the normal school graduates receive a certificate which entitles them to teach in any part of the state without further examination. This really corresponds to the practical teacher's certificate mentioned above, candidates for which, however, need not be graduates of normal schools.

VII. State teachers' permanent (college) certificates.

The State Superintendent is required to issue a life certificate to graduates of legally chartered colleges, after they have successfully taught during three annual school terms. Candidates for this certificate must present evidence that they are at least twenty-one years of age.

The system of normal schools in this state is decidedly unique, partaking as it does of both public and private enterprise.

The essential features of it are: - When thirteen or more citizens shall as contributors or stockholders erect and establish a school for the professional training of young men and women as teachers for the public schools of the State, the State students in that school shall be 'paid 50 cents a week, and if he graduate and sign an agreement to teach for two years in the state, \$50 additional shall be paid. The affairs of each school are to be managed by a board of eighteen trustees, twelve elected by the contributors, and six appointed by the State Superintendent, and it shall require a three fourths vote to pass a motion for the sale or purchase of real estate. The Governor, Superintendent and Attorney General are a commission to distribute the state money to the schools. The trustees report annually to the superintendent, and are always subject to his inspection. To obtain state aid the following requirements must be met: Suitable building, surrounded by an area of ten acres, a hall to seat 1,000 persons, with class rooms, etc., to accommodate 300 or more students, properly supplied with heating apparatus, adequately lighted and ventilated, and provided with a place for physical exercise in inclement weather, a library, six professors or more, one each in orthography, in reading and elocution, in writing, drawing and book-keeping, in arithmetic and higher mathematics, in geography and history, in grammar and English history, and in theory and practice of teaching, together with such professors of natural, mental and moral sciences, languages and literature as the condition of the school and the number of students may require. The principal shall be a professor of one of the required branches. There shall be a model school of not fewer than one hundred children. The principals fix the requisites for admission and the course and duration of study. The examination of the graduating class is conducted by a State board, of which mention has already been made under the heading of Practical Teachers' Certificates.

The State Superintendent, Hon. N. C. Schaeffer, commenting on the variety of certificates in the state says that they have grown up in response to the needs of the schools, and though too complex to be ideal, the system works fairly well in view of all local conditions which must be met.

There are in this State seven kinds of cartificates. The examiners for Permanent and State Normal certificates are appointed by the Superintendent of Public Instruction, and are men of high educational standing. Professional and provisional certificates are granted by the county, city and borough superintendents of schools who examine the candidates. No fees are collected from candidates.

INDIANA.

Hon. David M. Geeting, the State Superintendent of Public Instruction, in "The School Law of Indiana," 1897, has given such a succinct and yet comprehensive outline of the educational system of this State that I am reproducing it so that a view of the general system may be obtained.

- I. A State Superintendent of Public Instruction.—Elected by the people for two years. Charged with the administration of the system, the general superintendence of school affairs, the management of the funds and revenues, and the interpretation of the school law; makes reports to the Governor and the General Assembly, apportions revenue among the counties, publishes and distributes the school laws, compiles school statistics, and visits all the counties.
- II. A State Board of Education.—An ex-officio body of professional educators. Examines applicants for life state certificates, prescribes examinations for professional eight-year state licenses, and takes cognizance of questions not otherwise provided for. As Board of School-book Commissioners adopts text-books for the state, and as a State Library Board supervises State Library.
- III. County Superintendents.—One for each county elected by the township trustees for two years. Examine and license teachers and direct and superintend their work, hold county institutes, compile educational and financial statistics, and report them to the Superintendent of Public Instruction, and carry out directions of the Superintendent of Public Instruction and the State Board.
- IV. School Trustees.—One for each township, elected by the people for four years. Three for each town or city, appointed by the town board or city council for three years. Charged with the ownership and management of school property, levy local taxes, employ teachers, cause township institutes to be held, make reports to County Superintendents and Commissioners and constitute a County Board of Education.
- V. School Directors.—Elected by the patrons in each school district for one year Preside at school meetings, are the media of communication between the people and the trustee, and under direction of the trustee have the care of the school houses, make small repairs and provide fuel. They may exclude refractory pupils, subject to appeal to the trustee.
- VI. School Commissioners.—One for each district, elected by the voters thereof, in cities of 30,000 or more inhabitants manage school affairs in such cities.
- VII. General Institutions.—State Normal School, Indiana University, Purdue University.
- VIII. Special Institutions.—Institute for the Education of the Deaf and Dumb, Institute for the Education of the Blind, State Reform School for Boys.

The State Board of Education is a board of professional educators and independent of politics. The Governor of the State, the State Superintendent of Public Instruction, the President of the State University, the President of Purdue University, the President of the State Normal School, and Superintendents of Common Schools of the three largest cities in the state, are the educational authority of Indiana. The members of this board, other than the Governor and State Superintendent of Public Instruction, receive for their services, while actually engaged in the duties of their office, five dollars per day and five cents per mile necessarily travelled (while so engaged). This amount is payable out of the general state funds and is to be reimbursed to the state by the amount received as fees for certificates. If there is any residue of money remaining to the credit of the board after general expenses have been met, it shall be expended by the Superintendent of Public Instruction in the purchase of suitable books for an office library.

This board is an examining as well as an administrative body, and by it are prepared the questions for the examination of teachers throughout the state.

STATE CERTIFICATES.

There are two grades of state certificates issued by the board—one for a period of eight years termed a Professional License, the other for life called Life State License. Written examinations for these licenses are conducted by the County Superintendents in the months of March and April of each year. The examination questions are sent to the County Superintendents by the state board to whom the answer papers are to be returned for examination.

The following requirements govern the application for Life State and Professional Licenses:

1. Applicants for Life State and Professional Licenses must have held two thirty-six-month licenses in Indiana, or an equivalent in another state, obtained by actual examination, and must have taught successfully at least forty-eight months, which facts shall be properly certified to and sent with the manuscripts to the State Board of Education.

Before entering upon the examination, applicants shall present to the County Superintendent satisfactory evidence of good moral character and professional ability. Applicants for Life State License shall pay five dollars each (the fee prescribed by law), which can, in no case, be refunded.

- 2. Applicants for Professional License will take the March examination only.
- 3. No fee is required of applicants for Professional License.
- 4. A license will be granted to those who make a general average of seventy-five per cent., not falling below sixty per cent. in any subject, and who present satisfactory evidence of professional ability and good moral character.
- 5. An applicant for a *Life State License* who shall fail in the examination for the same, but who has met all the requirements of a *Professional License*, shall receive such license, or if he reaches the required average for a Professional License, but falls below the standard per cent. in one subject, he may be conditioned in such subject, and may be granted a Professional License on the same conditions as if he had originally applied for a license of this class.
- 6. An applicant is "conditioned," that is, he may complete the work at the next regular examination, if he reaches the required general average and passes successfully upon all the branches except one, required for the license applied for. A statement setting forth this fact will be furnished such "conditioned" applicant, who must present the same to the County Superintendent, who will forward it with the manuscript to the department.

Subjects for March: Algebra, civil government, American literature, science of education, and *two* of the following *three* subjects: Elements of physics, elements of botany, and Latin (Latin grammar, two books of Cæsar, and two of Virgil).

Subjects for April: Geometry, rhetoric, general history, English literature, physical geography, and two of the following three subjects: Chemistry, geology and zoology.

Applicants for Life State License will take both March and April examinations.

COUNTY CERTIFICATES.

In addition to the Professional and Life State Licenses which are valid in all parts of the state, including the cities, there are issued County Certificates limited to the county in which they are granted but valid in any city situate within that county. The County Superintendent must hold at least one public examination in each month in the year, and in no case shall he grant a license upon a private examination. The statute relating to this license reads: "Said County Superintendent shall examine all applicants for license as teachers for the common schools of the state by a series of written or printed questions, requiring answers in writing, and in addition to the said questions and answers in writing, questions may be asked and answered orally, and if from the ratio of correct answers and other evidence disclosed by the examination, the applicant is found to possess a knowledge which is sufficient, in the estimation of the County Superintendent, to enable said applicant successfully to teach in the common schools of the state, orthography, reading, writing, arithmetic, geography, English grammar, physiology, and the history of the United States, and to govern such school, said County Superintendent shall license said applicant for the term of six months, twelve months, twenty-four months, or thirty-six months, according to the ratio of correct answers and other evidences of qualifications given upon said examination, the standard of which shall be fixed by the County Superintendent; and in examining persons for positions to teach in graded schools in cities and towns, the County Superintendent may take into consideration the special fitness of such applicants to perform the services required of them, and shall make, on the licenses issued to such applicants, a statement of the kind of work for which they are specially qualified; and all applicants before being licensed shall produce to the County Superintendent the proper trustee's certificate or other satisfactory evidence of a good moral character; Provided, That a six months' license shall be regarded as a trial license, and that no person who hereafter receives a six months' license in any county shall be again thereafter licensed in said county unless he obtains a grade which shall entitle him to receive at least a twelve months' license; Provided, That any person who has taught for six consecutive years in the common schools of this state and now holds a three years' license to teach therein, or who, having previously taught for six consecutive years in said common schools and shall hereafter receive a three years' license to teach therein, or who has heretofore been exempted under this Act shall be forever afterward exempt from examination so long as he or she shall teach in the common schools of the county in which said three years' license was obtained; but if such person shall at any time after said exemption accrues, suffer a period of one year to pass without having taught one full year in the common schools of the county within said period, then said exemption shall cease at the option of the county superintendent; and if such person shall, during such exemption, seek employment to teach other or higher branches in the common schools of this state than those branches which were included in the examination upon which said three years' license was issued then he or she shall be examined in such additional branches; Provided, That said county superintendent be authorized to issue an exemption license upon proper affidavit or affirmation of said applicant, and that said exemption license be subject to the same legal limitations as other licenses issued by said county superintendent.

The county superintendent has power to revoke licenses granted by him or his predecessors, for incompetency, immorality, cruelty, or general neglect of the business of the school; and the revocation of the license of any teacher terminates his employment in the school which such teacher may have been employed to teach.

In order to secure uniformity throughout the state, the State Board of Education prepares the questions and supplies each county superintendent with a sufficient number for his use. The Board gives much time to the preparation of these questions, the members preparing them at their leisure and then submitting them to the approval of the general board where they are read, one by one, discussed, adopted, amended or rejected by a vote of the board. The questions are then printed on slips under proper safeguards, placed in envelopes securely sealed and mailed to the county superintendent just prior to the last Saturday of each month. If superintendents wish to hold extra examinations they prepare their own questions. In their desire for as great uniformity as possible the value of each question is given so that the superintendents may follow the board's relative value of questions when grading these manuscripts. If a candidate for a license is not satisfied with the grading of his county superintendent he may appeal to the Department of Public Instruction. Since these examinations are, by law, required to be held monthly and no restriction is placed upon the number of times an applicant may take the work, the time of county superintendents during a part of the year is almost wholly occupied in the examination of teachers' manuscripts. This is a very great weakness in the system, and as his term of office is but two years he has but little time to make his influence felt in that most important of his duties, the inspection and direction of the teaching in the school room.

There is at present a well defined movement in favor of lengthening the term of office to four years and requiring a higher scholastic and professional standing, and providing a more adequate remuneration. This is necessary because under the law creating this office in the State a man does not need to have any educational qualifications to be a county superintendent, need not have taught school a day in his life and may not be able to take even a six months' license.

The county superintendent receives but four dollars for every day actually employed in the discharge of the duties required by the Act.

In his report for 1896, Mr. David M. Geeting, the State Superintendent of Public Instruction, proposes sundry changes in the laws for teachers' licenses, saying that the present county teachers' license law has long since served its purpose and is a hindrance now to educational progress.

He says: "It is believed that all manuscripts for license should be graded by the State Superintendent of Public Instruction and that the license should be a state license instead of a county license." He recognizes that this would necessarily increase the force in the Department of Public Instruction; but proposes to meet this extra expense by a levy of the small sum of fifty cents on each applicant for license. Under the present law there are ninety-two different standards for grading teachers in this State and as a result the teaching is exceedingly uneven, the very poor teachers and the very good teachers being often found in adjacent counties. This is manifestly unfair to the pupils, since all cannot enjoy even approximately equal advantages. Those counties which have been favored with good conscientious school men as superintendents have developed flourishing educational systems while in others less favored even the semblance of a system seems to have disappeared.

Under the proposed amendment the State Board of Education should prepare the questions and the county superintendents conduct the examinations as at present. The County Superintendent should, at the close of the examination, certify to the moral qualifications and school-room success of the applicants, and forward these with the manuscripts to the State Department of Public Instruction for examination.

Instead of examinations being held every month, six examinations each year would give ample time to all teachers to make licenses, and the last Friday and Saturday of February, March, April, May, June and July are recommended as the most convenient times.

Four grades of licenses are recommended for twelve, twenty-four, thirty-six and sixty months respectively, the first three of which should entitle applicants to teach in the common branches only, and the last in high schools in addition to the common branches.

The following advantages of this change are enumerated:

- 1. It would ensure the same standard in all sections of the State, making an equal distribution of school advantages based on scholarship of teachers.
- 2. It would equalize wages and hasten the elevation of the school work in the poorest sections of the State to the standard in the best.
- 3. It would remove the possibility of bringing personal influences to bear on issuing licenses.
- 4. It would save a great many teachers much time, expense, and annoyance each year in going from one part of the State to another to take examinations. Many teachers are each year compelled to travel from 50 to 200 miles, both ways, pay hotel bills, etc., in order to take examinations, simply because they happen to teach away from home. This is a great injustice which can not well be avoided under the present system.
- 5. The last and most important point which we suggest is that it would give the county superintendents their summer months to devote to planning their work for the coming year, arranging for county and preliminary township institutes, etc. And further it would enable these officers to spend from six to eight weeks in some of the best schools each summer, where they could study the newest and best methods of teaching, besides taking a few weeks much needed rest.

With this centralized authority in the matter of teachers' licenses and the elastic local authority in the matter of administration the educational system of Indiana ought to make gratifying progress.

In the State Normal School there is a four years' course prescribed, but persons holding a life state license are credited with two years on the course and are thus enabled to graduate in two years. Such persons are required to take the eleven professional subjects of the course and are permitted to elect the subjects in which to make the remaining thirteen credits required for graduation.

By a rule of the Board of Trustees of the State Normal School, satisfactory evidence of twelve months' successful experience in teaching after completing the course of study, entitles the graduate to the diploma of the institution. All candidates for graduation are required to hold a county license to teach for a period of not less than two years; said license having been issued within the five years next preceding the date of commencement for the given year. Or that such person shall receive a grade in an examination conducted by the faculty on the questions used in the county examination that would entitle them to a license for not less than two years if the examination were taken under a county superintendent.

Section 4,557 of the School Law of Indiana reads as follows: The board of trustees is authorized to grant, from time to time, certificates of proficiency to such teachers as shall have completed any of the prescribed courses of study, and whose moral character and disciplinary relations to the school shall be satisfactory, at the expiration of two years after graduation. Satisfactory evidence of professional ability to instruct and manage aschool having been received, they shall be entitled to diplomas appropriate to such professional degrees as the trustees shall confer upon them; which diplomas shall be considered sufficient evidence of qualification to teach in any of the schools of the state.

During 1896, there were 110 candidates for state certificates, from whom \$75 were received in fees, while for county certificates, some 25,000 candidates were examined. There are no fees demanded from candidates for county certificates.

There is no special provision for the training of those who intend to teach in High Schools, but special examinations are held three times a year for such candidates.

Principals and High School teachers in town and city schools are examined only in such branches as they are required to teach. The decision as quoted in note 24 of section 4,425 of the School Law of Indiana reads: "The intention of the law clearly is that a teacher's fitness to teach should be tested on what he is required to teach, not on what he is not required to teach."

There are then in Indiana two certificates valid throughout the State, and four valid only in the several counties. The fee for a State certificate is five dollars, while for County certificates no fee is demanded. The answer papers of candidates for State certificates are examined by educational experts—the members of the State Board of Education—while those of candidates for County certificates are examined by the several County Superintendents, for which office we have already noted there are no specific educational qualifications demanded. The maximum value of each question, however, is indicated by the State Board when the papers are prepared.

STATE OF OHIO.

The general law of the State of Ohio in regard to the qualifications of a teacher is expressed in section 4,074 of the State Laws, which reads as follows:—

No person shall be employed as teacher in a common school who has not obtained from a board of examiners, having competent jurisdiction, a certificate of good moral character, and that he or she is qualified to teach orthography, reading, writing, arithmetic, geography, English grammar, the history of the United States, including civil government, and possesses an adequate knowledge of the theory and practice of teaching, and, if required to teach other branches, that he or she has the requisite qualifications; but persons who desire or are expected to teach only special studies, such as music, drawing, painting, penmanship, gymnastics. German or French, or any one of them, or the primary department in any graded school, may be examined in regard to such study or studies above mentioned, or with special reference to their qualifications to teach in such primary department only, and having obtained a certificate of qualification therein, and of good moral character, may be employed to teach such study or studies, or in such primary department; provided, that after January 1, 1889, no person shall be employed as a teacher in any common school, who has not obtained from such board of examiners a certificate that he or she is qualified to teach physiology and hygiene.

There is a State Board of Examiners consisting of five competent persons, residents of the state, appointed by the State Commissioner for five years, one member retiring annually. Each member receives \$5 per diem of actual service, and six cents mileage each way from his residence and back.

State certificates are issued by the State Board and are valid during life and good conduct.

There are two examinations during the year, those in 1897 being held on June 22, 23 and 24, and on December 28, 29 and 30. Three grades of certificates are issued, viz: Common School, High School and Special Certificates.

In the circular issued by the Board and which is almost the only information I have been able to get from the State, the following information is given:—

"Applicants for Common School Certificates will be examined in Orthography, Reading, Writing, Arithmetic, Algebra, Geography, English Grammar and Composition, History of the United States including Civil Government, General History, English Literature, Physiology and Hygiene including effects of Alcohol and Narcotics, Physics, Theory and Practice of Teaching, and such other branches, if any, as they may elect.

Applicants for High School Certificates, in addition to the above-named branches will be examined in Geometry, Rhetoric, Civil Government, Latin, Psychology, History of Education, Science of Education. Also three branches selected from the following: Chemistry, Botany, Zoology, Geology, Astronomy, Trigonometry and its Applications, Logic, Greek, German, and Political Economy. The Board advises applicants not to attempt to pass an examination for the Common School Life and the High School Life Certificate at the same examination.

Psychology-Required for Examination.

James's Briefer Course in Psychology, (Holt); Ladd's Psychology, Descriptive and Explanatory, (Scribners); Preyer's Mental Development of the Child, (Appleton). Recommended for reference: Browne's Introduction to Psychological Theory, (Harpers); Sully's Psychology, (Appleton); Baldwin's Element of Psychology. (Holt).

History of Education.

Compayre's History of Pedagogy, (Heath); Quick's Educational Reformers, Revised Edition, (Appleton); Painter's History of Education, (Appleton). Recommended: Krusi's Life of Pestalozzi, (American Book Co.) Aristotle, and Froebel, of "Great Educators Series," (Scribners).

Science of Education.

White's School Management, (American Book Co.); Lange's Apperception, (Heath); Rozenkranz's Philosophy of Education, (Appleton). Recommended: De Garmo's Essentials of Method, (Heath); McMurry's General Method. (Public School Publishing Company); Page's Theory and Practice, (American Book Co.)

Applicants for Special Certificates will be examined in Special Branches, and in addition thereto the Psychology, History of Education, and Science of Education prescribed for applicants for High School Certificates.

The standard for both classes of certificates is as follows: Minimum grade for a Common School Certificate, 60; average grade, 80; minimum grade for branches required on a High School but not on a Common School Certificate, 80.

Grades will not be carried forward. Each examination is a unit by itself.

All applicants for certificates of either grade must file with the Clerk of Board, at least thirty days before the date of examination, two satisfactory testimonials that they have had at least fifty months' successful experience in teaching, and for Special Certificate at least fifty months' experience in teaching the Special Branch. Also file last county certificate or certified copy thereof.

These testimonials should be from educators well known to the board.

The holder of a common school certificate may receive a high school certificate by passing examination, at one meeting of the board, in all the additional branches, as above stated, and furnishing satisfactory evidence of continued success in teaching.

No branch will be added to a common school certificate after the date of its issue; but, when issued, such certificate shall name the additional branches, if any, upon which the applicant has passed a satisfactory examination.

Eminent attainments in any particular line of study will receive due consideration in determining an applicant's qualifications.

As an essential condition of granting a certificate of either grade, the board will require evidence that the applicant has had marked success as a teacher, and has a good knowledge of the science and art of teaching.

Each applicant for a certificate shall pay to the Board of Examiners a fee of five dollars; and the clerk of the board snall pay to the State Treasurer all fees received."

There are also county boards of examiners, each of which consists of three persons appointed for three years by the probate judge. Two members must have had at least two years' experience as teachers, and must also have been within five years actual teachers in properly recognized schools. They must be residents of the county for which they are appointed, and must not be connected with or interested in any school for the special education or training of persons for teachers, or any other private school, or be employed as instructor in any institute in the county.

In each city of 250,000, or over, there is a board of examiners appointed by the board of education, to consist of three or six persons, two of whom must have had at least two years practical experience.

In a circular issued to county examiners by the State Commissioner, section 4,073 of the State Laws providing for a professional certificate for teachers of common schools is quoted. It reads as follows:—

The board may grant certificates for one, two and three years from the day of examination, which shall be valid in the county wherein they are issued, except in city and village districts that have boards of examiners, in which they shall not be valid; and the examiners may grant certificates for five years to such applicants as in addition to the necessary qualifications have been for three years next preceding their application engaged in teaching, twelve months of which experience shall have been in one place; and such certificates for five years shall be renewable upon the same condition, but without examination, at the discretion of the examining board; and the examiners may grant certificates for eight years from the date of examination, to such applicants as, in addition to the necessary qualifications, hold or have held a certificate for five years, and have been for three years next preceding their application engaged in teaching, eighteen months of which experience shall have been in one place; and the applicants for such certificate for eight years, in addition to the other qualifications, shall be required to pass a satisfactory examination in botany, algebra, natural philosophy, and English literature; and such certificate for eight years shall be renewable upon the same conditions, but without examination, at the discretion of the examining board; and if at any time the recipient of a certificate be found intemperate, immoral, incompetent, or negligent, the examiners, or any two of them, may revoke the certificate; but such revocation shall not prevent a teacher from receiving pay for services previously rendered; and when any recipient of a certificate is charged with intemperance, or other immorality, the examining board shall have power to send for witnesses and examine them on oath or affirmation touching the matter under investigation. The fees and other expenses of such trial shall be certified to the county auditor by the clerk and president of the examining board, and be paid out of the county treasury upon the order of the auditor.

The two circulars from which these quotations are made constitute the only information obtainable from the State Department.

As far as we can get any information it seems that there are at least two classes of certificates in this State, viz, Common School and High School, and of these there may be different grades. There are also some Special certificates. In addition to these there are five grades of County certificates. The fee for a certificate other than County certificates is five dollars, and the examiners are five in number, described as "competent" persons, and holding office for five years. For County certificates there are County Boards appointed, each of which consists of three persons appointed for three years, two of whom must have had at least two years' experience as teachers and must also have been within five years actual teachers in properly recognized schools.

STATE OF MICHIGAN.

The State of Michigan was admitted to the Union in 1837, and her great boast is that one of the first appointments under the state government was a Superintendent of Public Instruction, the first office of the kind ever filled in the United States. The aim of the founder of the system of education in this state seems to have been to place a common school education within the reach of every child in the state, and to encourage in every way the desire for higher education in secondary schools and in the university.

Every county is divided into townships, every township into school districts, and each school district has its board of three members, a moderator, a director, and an assessor,

who have the general supervision of the schools. The State Board of Education, which has the supervision of the State Normal School and the general educational system, is composed of four members, one of whom is the Superintendent of Public Instruction, and the other three are elected for a term of six years, a member retiring every two years.

Certificates which entitle persons to teach are issued, (1) by the State Board and are known as state certificates, and (2) by the county boards of examiners.

I.—STATE CERTIFICATES.

At least twice during the year the State Board of Education must hold meetings for the purpose of examining applicants for teachers' certificates. The qualifications necessary are that the candidate shall have taught in the schools of the state for at least two years, and shall, after a thorough and critical examination in every study required for the certificate, be found to possess eminent scholarship, ability and moral character. This certificate entitles the holder to teach in any of the public schools of the state without further examination, and is valid for life unless revoked by the State Board.

The board may, in its discretion, endorse state teachers' certificates or normal school diplomas granted in other states, if it be shown to the satisfaction of the board that the examinations required or courses of study pursued are fully equal to the requirements of this state.

NORMAL SCHOOL DIPLOMAS.

There is an agreement between the State Board of Education and the State Normal School whereby there is prescribed for the school a course of study intended specially to prepare students for the rural and elementary [graded] schools of this state, providing not less than twenty weeks of special professional instruction. Upon the completion of this course and upon the recommendation of the principal and a majority of the heads of departments of the school, the Board of Education grants a certificate containing a list of the studies included in the above mentioned course, which entitles the holder to teach in any of the schools of the state, for which said course has been provided, for a period of five years.

There are also two advanced courses prescribed by the Board of Education, each requiring not less than four years to complete, but which when completed and the work endorsed by the principal of the school and a majority of the heads of departments, results in the granting by the board of a *Life Certificate* valid in all parts of the state.

UNIVERSITY DIPLOMAS AND CERTIFICATES.

The faculty of the department of literature, science and the arts of the University of Michigan may give to every person receiving a bachelor's, master's or doctor's degree, and also a teacher's diploma for work done in the science and the arts of teaching from said university, a certificate which serves as a legal certificate of qualification to teach in any of the schools of the state after a copy of this certificate has been filed or recorded in the office of the legal examining officer or officers of the county, township, city, or district.

COLLEGE DIPLOMAS AND CERTIFICATES.

Teachers' certificates are granted without examination to persons who have received the bachelor's, master's or doctor's degree from any college in this state having a course of study actually taught in such college, of not less than four years, in addition to the preparatory work necessary for admission to the University of Michigan. The applicant must, however, be recommended by the faculty of such college, stating that in its judgment he is entitled to receive such certificate, and in addition thereto he must have taken a course in the science and art of teaching of at least one college year of five and a half

hours per week, which shall have been approved by the said Board of Education. This course must include a thorough examination by the college granting the diploma as to the candidate's qualification and fitness for teaching.

If the candidate holding this diploma furnishes satisfactory proof of having successfully taught for three years in the schools of this state he is granted a *Life Certificate*. If he has not taught the required time the certificate is issued for *four years*, and if at the expiration of that time he has been successful in his teaching a life certificate will be issued.

II .- CERTIFICATES FROM COUNTY BOARDS.

The Board of Supervisors of each county at each annual session elects one examiner who holds office for two years. These two examiners with the County Commissioner constitute a Board of School Examiners, before whom must come the applicants for teachers' certificates. To be eligible for membership on this examining board the candidate must hold at least a third grade certificate and have taught in the public schools at least nine months, or have the qualifications required of commissioners except an experience of twelve months as a teacher. In this connection and because of his presence on this board it is interesting to note the qualifications required before a person is eligible to hold the office of Commissioner of Schools. Besides an experience of twelve months as a teacher in the public schools of the state, he must be a graduate of the literary department of some reputable college, university, or state normal school, having a course of at least three years, or hold a state teachers' certificate, or be the holder of a first grade certificate; but this last named certificate shall qualify the holder thereof to hold the office of commissioner of that county only where such certificate was granted.

These are the general qualifications, subject to restrictions in certain districts.

If a vacancy occurs in the office of School Examiner the judge of probate, together with the Board of School Examiners for the county in which the vacancy has occurred, must within ten days after the occurrence of the vacancy appoint some suitable person to discharge the duties for the unexpired portion of the term.

Each member of the Board of School Examiners other than the County Commissioner is entitled to receive as remuneration the sum of four dollars for each day actually employed in the duties of his office.

The regular public examinations are held each year at the county seat, beginning on the last Thursday of March, and the third Thursday of August. If, however, the board deems it necessary there may be two other public examinations, beginning on the third Thursday of June and October respectively. At these latter examinations only certificates of the second and third grades may be granted, while at the former there is no restriction.

In counties having 150 or more districts, the board may hold one special examination for each additional twenty-five districts, or fraction thereof, but at which only certificates of the *third* grade may be granted.

The general qualifications necessary before a certificate may be granted are: (a) The candidate must be of the full age of seventeen years; (b), he must be found qualified by the board in respect to good moral character, learning and ability to instruct and govern a school; (c), he must have passed a satisfactory examination in orthography, reading, writing, grammar, geography, arithmetic, theory and art of teaching, United States history, civil government and physiology and hygiene, with reference to the effect of alcoholic drinks, stimulants and narcotics upon the human system; (d), if twenty-one years of age he must be a citizen of the United States.

All examination questions are prepared and furnished by the Superintendent of Public Instruction to the county commissioner, under seal, to be opened in the presence of the applicants for certificates on the day of examination. Until 1880, under the county and township superintendency, each examiner could ask such questions as he chose,

and the questions are said to have varied as much as did the intellectual attainments of the man who asked them. In this year, however, the State Board adopted uniform sets of questions, and the plan has met with marked success.

There are three grades of certificates granted by the board of school examiners.

FIRST GRADE.

This is granted only to those who have taught at least one year with ability and success, and it is valid throughout the state for four years.

If, however, the examination papers are not forwarded to the Superintendent of Public Instruction for inspection, and are not approved and countersigned by him, this certificate is valid only in the county where it was issued.

SECOND GRADE.

This is granted only to those who have taught at least seven months with ability and success, and is valid for three years throughout the county for which it is granted.

THIRD GRADE.

There are two classes of these known as A and B

Third Grade A certificates are granted only to persons who have taught successfully and continuously in primary departments of graded schools for at least three years next preceding the examination. This certificate entitles the holder to teach in primary departments of graded schools only.

Third Grade B certificates license the holder to teach for one year in any school of the county in which it is granted; but no more than three certificates of this class may be granted to the same person.

The County Board of Examiners is given very great power, and the general experience of the practical working of the system is that the County Commissioner has really the power of final decision, as from his official position in the county, he has more intimate acquaintance with the qualifications of the candidates. If this is so, combined with the power of revoking certificates which is possessed by the board, it would seem that the County Commissioner who has occupied that office, for say, three or four years, ought to be held pretty directly responsible for the character of the teachers of his county.

Another thing worthy of note is that for second and third grade certificates, each county board is entirely independent of every other county, and even of the State Department. Though the examination questions are the same the system of marking is purely local, and so there will likely be as many standards of qualification as there are counties in the state.

In the State Superintendent's report for 1895, Jennie S. Putnam, Commissioner of Schoolcraft County, makes the following report on "Examinations:"

"Our last legislature did much for our schools, but there still remains work to do. We have not yet a guarantee for honesty and efficiency in the conducting of county examinations. Certificates can still be granted to teachers (?) whose papers, with good liberal marking, will not reach an average of fifty, and whose lack of general knowledge is appalling. Such people were granted certificates last year, and by boards every member of which is eligible to election under the new law. In counties too where there was no such dearth of teachers to justify such an imposition on the public."

"The only solution is the abolition of local boards and the substitution of something like the Ontario system. We need to make professional training a requirement for certificates. With the teaching force so numerous that every vacancy has scores of applicants it would not be unreasonable to ask for some professional skill, some knowledge of the work they are hired to do, from those who aspire to fill the vacancies. The hardship

that would entail on the inexperienced and incompetent teacher is not comparable to that entailed on our children by those same teachers—teachers too who may have passed a brilliant examination. Knowledge of the subject to be taught is one of the prime requirements. Knowing how to teach it is another and entirely different, but equally essential requirement."

The Board of Examiners has the right of renewing without examination the certificates of persons who have previously attained an average standing of at least eighty-five per cent. in all studies covered in two or more previous examinations, and who have been since such last named examinations continuously and successfully teaching in the same county.

All certificates must be signed by the commissioner and at least one other member of the Board of Examiners.

Cities in this state are subject to the same regulations in regard to the licensing of teachers as are the counties, except that where a superintendent is employed he shall fulfil the functions of a commissioner, and provision is also made for the acceptance of graduation from a thoroughly equipped city training school.

The fees collected from candidates are used to help to promote teachers' institutes, the section of the regulations reading thus: "All boards or officers authorized by law to examine applicants for contificates of qualification as teachers, shall collect, at the time of examination from each male applicant for a certificate, an annual fee of one dollar, and from each female applicant for a certificate an annual fee of fifty cents; and the director or secretary of any school board that shall employ any teacher who has not paid the fee hereinbefore provided, shall collect at the time of making contract from each male teacher so employed, an annual fee of one dollar, and from each female teacher so employed an annual fee of fifty cents. All persons paying a fee as required by this section shall be given a receipt for the same and no person shall be required to pay said fee more than once in any school year."

All fees are paid by the secretary of the County Board of Examiners to the County Treasurer with a complete list of the persons from whom the fees were collected, a copy of which list the treasurer must send to the Superintendent of Public Instruction. This money is set apart as a teachers' institute fund, to be used at the discretion of the Superintendent of Public Instruction in promoting annual teachers' institutes for each county or group of counties.

There are many kinds of certificates in this State. Under State certificates we have Normal School diplomas (two classes), University diplomas and certificates, and College diplomas and certificates. In addition to these there are the County certificates, of which there are three grades, known as First, Second and Third, the last of which is divided into Grade A and Grade B. There are then in all some nine different certificates, the candidates for State certificates being examined by the State Board of Education, while those for County certificates must pass the examination of the County Board. To be eligible for membership on this Board the applicant must hold at least a third grade certificate, and have taught in the public schools at least nine months, or he must be a graduate of the literary department of some reputable College, University, or State Normal School, or hold a State teachers' certificate, or be the holder of a first grade certificate. The fees collected seem to be an annual fee of one dollar from male applicants, and of fifty cents from female applicants. The amount collected is used to help to promote teachers' institutes.

REPORT

OF THE

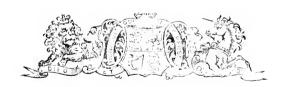

COMMISSIONERS

UNDER ROYAL COMMISSION

DATED 12TH NOVEMBER, 1897

ON THE

QUESTIONS OF PRICES OF SCHOOL BOOKS, ROYALTIES, ETC.,

TORONTO:

WARWICK BRO'S & RUTTER, PRINTERS AND BOOKBINDERS, 68 AND 70 FRONT STREET WEST.
1898.

COPY OF AN ORDER-IN-COUNCIL APPROVED BY HIS HONOUR THE LIEUTENANT GOVERNOR. THE 12TH DAY OF NOVEMBER, A.D. 1897.

Upon consideration of the report of the Honourable the Minister of Education, dated 10th November, 1897, the Committee of Council advise that Edward Morgan, Junior Judge of the County Court of the County of York, James Bain, junior, Librarian of the Free Library of the City of Toronto, and C. Blackett Robinson, President of the Westminster Company, (Limited), of the City of Toronto, be constituted a Board of Commissioners for the purpose of ascertaining whether any reduction can be made in the price fixed by the various agreements entered into between the Minister of Education, acting on behalf of Her Majesty, and the publishers of the text books authorized for use in the Public and High Schools, at which the said text books are now sold to the public, having regard to such reasonable profits to the publishers and the trade as are warranted by ordinary business practices.

The Committee further advise that the said Commissioners be authorized to enquire with regard to the royalty paid upon all text books used in the Public and High Schools of Ontario, and to report whether in their opinion, due regard being had to the rights of the authors of the said text books, and to what extent the payment of such royalties affects the cost of the text books to the public, and whether it would be in the public interest that the Department of Education should hereafter make such arrangements with authors by the payment of a lump sum as would relieve further payment to the author by way of royalty.

And the Committee further authorize the Commissioners to make such enquiries as to the cost of text books in Ontario and elsewhere as they may consider expedient.

Certified,

J. LONSDALE CAPREOL,
Assistant Clerk of Executive Council.

THE HONOURABLE

THE MINISTER OF EDUCATION.

Seal of the Pro-vince of Ontario.

(Sgd.) George A. Kirkpatrick.

PROVINCE OF ONTARIO.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, etc., etc., etc.

(Sgd.) ARTHUR S. HARDY,) To Edward Morgan, Junior Judge of the County Attorney-General. Court of Our County of York, James Bain, the Younger, Librarian of the Free Library. and Christopher Blackett Robinson, President of the Westminster Publishing Company (Limited), all of Our City of Toronto, in Our County of York, and

Province of Ontario, Our Commissioners in this behalf, Greeting:—

Know ye that having implicit confidence in your loyalty, learning, discretion and integrity, We of Our Special Grace and of Our Royal Will and Pleasure have thought fit to nominate and appoint, and by these presents do nominate, constitute and appoint you, the said Edward Morgan, you, the said James Bain, the Younger, and you, the said Christopher Blackett Robinson, to be a Board of Commissioners for the purpose of ascertaining whether any reduction can be made in the price fixed by the various agreements entered into between the Minister of Education of Our Province of Ontario, acting on Our behalf, and the publishers of the text books authorized for use in the Public and High Schools of Our said Province, at which the said text books are now sold to the public, having regard to such reasonable profits to the publishers and the trade as are warranted by ordinary business practices.

And We do hereby command, authorize and require you Our said Commissioners to enquire with regard to the royalty paid upon all text books used in the Public and High Schools in Our said Province of Ontario, and to report whether in your opinion, due regard being had to the rights of the authors of the said text books, and to what extent the payment of such royalties affects the cost of the text books to the public and whether it would be to the public interest that the Department of Education of Our said Province should hereafter make such arrangements with authors by the payment of a lump sum as would relieve further payment to the authors by way of royalty.

And We do hereby further command, authorize and require you Our said Commissioners to make such enquiries as to the cost of the text books in Our Province of Ontario and elsewhere, as you Our said Commissioners may consider expedient.

In testimony whereof We have caused these Our Letters to be made Patent, and the Great Seal of Our Province of Ontario to be hereunto affixed.

Witness, the Honourable Sir George Airey Kirkpatrick, Knight Commander of Our Most Distinguished Order of St. Michael and St. George, Member of Our Privy Council for Canada, and Lieutenant-Governor of Our Province of Ontario.

At Our Government House, in Our City of Toronto, in Our said Province, this twelfth day of November, in the year of Our Lord one thousand eight hundred and ninety-seven, and in the Sixty-first year of Our Reign.

By Command.

E. J. DAVIS, (Signed)

Secretary.

REPORT OF THE COMMISSIONERS APPOINTED TO INQUIRE CONCERNING THE PRICES OF THE VARIOUS TEXT BOOKS AUTHORIZED TO BE USED IN THE PUBLIC AND HIGH SCHOOLS OF ONTARIO, AND OTHER MATTERS CONNECTED WITH SUCH TEXT BOOKS.

To His Honor, the Honorable Sir Oliver Mowat, K.C.M.G., LL.D., Q.C. Lieutenant-Governor of the Province of Ontario:—

MAY IT PLEASE YOUR HONOR-

The undersigned having been appointed by Commission under the Great Seal of the Province, bearing date the twelfth day of November, in the year of Our Lord 1897, a Board of Commissioners—

- (1) "For the purpose of ascertaining whether any reduction can be made in "the prices fixed by the various agreements entered into between the Minister of "Education of Our Province of Ontario acting on Our behalf, and the publishers of the text books authorized for use in the Public and High Schools of Our said "Province at which price the said text books are now sold to the public, having "regard to such reasonable profits to the publishers and the trade, as are war-"ranted by ordinary business practices."
- (2) "To enquire with regard to the royalty paid upon all text books used in "the Public and High Schools in Our said Province of Ontario, and to report "whether, in your opinion, due regard being had to the rights of the authors of "the said text books, and to what extent the payment of such royalties affect the "cost of the text books to the public, and whether it would be in the public "interest that the Department of Education of Our said Province should hereafter "make such arrangements with authors by the payment of a lump sum as "would relieve further payment to the authors by way of royalties," and
- (3) "To make such inquiries as to the cost of the text books in Our Province "of Ontario and elsewhere as you Our said Commissioners may consider expe-"dient," beg leave to report as follows:—

We have called before us the various publishers under agreement with the Government for publication of the text books now authorized for use, and used, in the Public and High Schools of Ontario, and have examined them and such of their employees having knowledge on the matter, upon oath, touching the several items of expenditure which go to make up the cost of publication of each text book from the time it leaves the author's hands until sold to the trade for retail to the public, which items of expense include the actual original cost in the preparation for and manufacture of the letter press plates, map plates and illustration plates (this is called capital account, and the accuracy of the information afforded to us by the several publishers as to this item was verified by reference to the books of such publishers), the paper, the presswork, the binding, and the cost of handling. We also examined, upon oath, various other expert witnesses not in any way associated in business with any of the publishers, as to the

quality and value of paper used in printing such text books, and as to the reasonable cost of presswork and binding, and the proper percentage to be charged for cost of handling.

After careful examination and consideration of the evidence before us, and an examination of each text book as to its general make up and the quality of the paper used, and the character of the work done in its manufacture, and after allowing for the royalties paid on each book, and making allowance for "such reasonable profits to the publishers and the trade as are warranted by ordinary business practices," we find as to the sale price of each of the text books now used in the Public and High Schools as follows:—

The Readers now used in the Public Schools are:

First Reader, Part I	 price	10cts.
First Reader, Part II.	 " "	15 "
Second Reader	 4 6	20 "
Third Reader	 46	30 "
Fourth Reader	 " "	40 "
High School Reader	 5.6	50 "

These Readers are published by Copp, Clark & Co., The Canada Publishing Company and W. J. Gage & Co. Prior to 1st July, 1896, the prices for these Readers were 10 cts., 15 cts., 25 cts., 35 cts., 45 cts., 60 cts., respectively, and were cut down to the present prices by the Minister of Education when he entered into new agreements with the publishers, which new agreements provided for better binding of First Book, Parts I. and II. A careful enquiry into the "cost of publication" of these Readers and an examination of the make up of each book and the testimony of witnesses qualified to judge as to the material and workmanship employed in the publication has satisfied us, that the Readers are of excellent and durable quality as to paper, typography, illustrations and binding, and in addition have a very attractive appearance, which is not to be overlooked in the get-up of school books, and that the retail price now charged for each book is not excessive and should not be reduced to any lower prices than that to which the Minister of Education has by the recent agreements reduced them, as the publishers and the trade generally will not at present prices realize more than a fair business profit from the sale of these books in connection with the other school books published by them.

This series of readers was adopted by the Department of Education in the year 1885 in the place of what were known as the Campbell Readers which had been in the year 1868 selected by the "Council of Public Instruction," under the direction of the late Dr. Ryerson to supersede the Irish Readers then in use, and which in the opinion of the Superintendent of Education had become unsuitable for use in Canadian schools. In making enquiry as to the cost of text books in Ontario as compared with the cost of similar books in other countries, we have deemed it desirable to enquire into the literary merits of the books and their adaptability and suitability for use in our schools, and have had the advantage of the evidence of Professor Alexander, of Toronto University; Professor Reynar, of Victoria University; Professor Clark, of Trinity University, and Chancellor Wallace, of McMaster University, and they all united in speaking in terms of high praise as to the literary quality and educational value of all the school books now in use in the Public and High Schools of Ontario, and particularly of the English, French and German grammars, the histories and arithmetics and the Ontario readers.

Professor Clark says:—

"No one would think of using the Irish readers here now. The readers at present in use are beautiful books considering the price, compared with Nelson's (the Campbell series) they are superior, the extracts are more suitable; taking the poetical selections they are better adapted to the needs of the children requiring them and are much more instructive: better adapted to literary taste and better formed as to plan."

"Don't think there is much room for improvement. Don't think it possible to get more suitable set (of Readers) and have based my information on many years of experience."

From our own examination of the Irish and American Readers and from the strong opinions expressed by the four above named prominent educationists we are satisfied that the Ontario Readers are infinitely better adapted for use in our schools than either the Irish or American series. The Irish series, though very excellent in its way, and perhaps suitable for the schools where used, is conspictious for its very limited amount of reference to Canada, and the limited, antiquated and somewhat erroneous information given with reference to modern Canada and Canadian matters; it is also defective in not containing a proper proportion of modern and up to date literature. On the whole so far as the education of the young people of Canada is concerned this series is unsuitable, out of date, and utterly out of touch with Canadian ideas and methods of education.

While it is true that the Irish National series is sold at a lower price than the Ontario Readers yet when we consider the difference in literary quality, of suitability to the requirements of our Canadian schools and of the workmanship, which in the Irish series is so much inferior, we are forced to the conclusion that to revert to the former series would be a great step backward in our educational system. For these reasons the Ontario Reader seems to us to be actually cheaper and better fitted for the requirements of our schools. The Irish series would be dear for our Ontario schools at any price.

The American series is also good of its kind, but is "United States" from beginning to end and for this reason alone would not be adapted for use in our schools.

For all these reasons and looking at the literary, artistic and educational merit of the Ontario series of Readers and the excellence of the print and binding, we are convinced that these Readers are infinitely more adapted for use in Canadian schools than any other Readers and are furnished to the public at very reasonable prices, and that as Chancellor Wallace put it, "the public have nothing to complain of," and we are further satisfied that the publishers and the trade are not making an undue profit from the production and sale of these books.

Of the other text books in use the following are published by Messrs. Copp, Clark & Co.: -

Public School History of England and Canada.

High School History of England and Canada.

High School German Grammar.

High School German Reader.

High School Physical Science, Parts I. and II.

High School Chemistry.

High School Composition from Models.

High School History of Greece and Rome.

(French-English Readers.)

First Reader, Parts I. and II

Second Reader.

Third Reader.

After allowing a reasonable profit to the publishers for the period during which these books have been in use, the capital account remains unrealized, the profit therefore is not excessive and the prices of each of these books should not be reduced.

Ahn's First German Book.

Ahn's Second German Book.

Ahn's Third German Book.

Ahn's First German Reader.

High School Beginner's Greek Book.

These books are published abroad and are controlled by Copp, Clark & Co., the sales are small and the profits correspondingly small; the profit on each book is not excessive and the price cannot be reduced.

Clement's History of the Dominion of Canada:—This book was by arrangement authorized in several of the Provinces including Ontario, and the price is the same in all the Provinces. The profit is not excessive and the price should not be reduced.

First Latin Book:—The price of this book is now \$1, the average sales are fair. It was authorized in August of 1892, for five years and the price then fixed was not too large considering the amount of capital account; the capital account has now been paid off, after allowing for reasonable profit in meantime, leaving a moderate surplus. If this book is continued the price should be reduced to 75 cts. after the end of 1898.

High School Book-keeping:—The price of this book is now 65 cts. It was authorized in July, 1887, and it has taken years to wipe out the capital account after allowing a moderate profit to the publishers, leaving a very small surplus. The price of this book is not too large considering its merits as a book, but as the capital account has been paid off in a ldition to yielding a profit it should as a school book be reduced to 60 cts. after the end of 1898.

As to the books published by the Canada Publishing Company, we find and report as follows:—

Public School Arithmetic.

Public School Grammar.

High School English Composition.

There is no substantial profit in the publication of these books and the capital account is still outstanding; the price cannot therefore be reduced.

Public School Drawing Course.

Public School Writing course, Vertical series No. 7.

McLellan's Elements of Algebra.

High School Drawing Course.

The profits of sale of these books have not so far, after allowing moderate profits to the publishers, been sufficient to repay the original cost capital account and has therefore been no excessive profit and the prices should not be reduced.

High School Grammar.

High School Geography.

The publishers have realized a good profit on these books which has been sufficient, after deduction for a living profit, to pay off the capital account and leave a moderate surplus; the circulation, however, of these books is small and the plates will have to be renewed; we do not, therefore, think that the profit is so large as to call for any reduction in price and this is especially the case as to the geography which is a good text-book both as to matter, maps and illustrations and general get up.

Public School Geography.—This book is now sold at 75 cents retail; it has a fairly large annual sale and has been in use since 1887; the annual profit has been sufficient to give the publishers a fair living profit and at the same time gradually pay off the capital account which is now fully paid, leaving a reasonable surplus of legitimate profit. The price may now fairly be reduced to 60 cents, if continued after the end of 1898.

Public School Writing Course:-

Vertical series: 1 to 6.

This book is now sold at seven cents; it has a very large sale; it was authorized in March of 1896, and the profits will be sufficient to repay the capital account in about four years allowing the publishers a reasonable annual living profit. We are of opinion that this book might properly be reduced to six cents after the end of 1899.

As to the books published by the Methodist Publishing Company, we find and report as follows:

Public School Physiology and Temperance.—The price of this book is too low. It is published absolutely without living profit of any kind, and but for the very large sale the publishers would suffer loss in not being able to realize the capital account.

Primary Latin Book.—This book is sold at \$1; it was authorized in 1892 and has run five years, in which time the capital account has been paid besides giving the publishers a fair living profit, and it should be reduced to 75 cents at the end of the year 1898.

High School Algebra.—The capital account has not as yet been realized on this book, the profit is not excessive and the price cannot reasonably be reduced.

As to the books published by W. J. Gage & Co., we report as follows:

High School Botany, Part II.—This book was authorized in 1888 and has been in use since; the annual sales are not large; the capital account is not yet wiped out, and it is quite plain that the profit has not been and is not excessive, and that the price should not be reduced.

Botanical Note Books, Parts I. and II.—These books were authorized in 1895; the price for Part I. is 50 cents, and the annual sale is not great. The price for Part II. is 60 cents, and the annual sale is very small; at the rate of

profit made on sale of these books, after allowing a moderate living profit to publishers, it will take about seven years to repay the capital account of Part I., and about twenty years to make up capital account on Part II., so it is obvious that the profit is not excessive on either book and the price should not be reduced, but might well be increased.

As to the books published by Hunter, Rose & Co., we report as follows:—

High School French Grammar.

High School Arithmetic.

Public School Euclid and Algebra.

High School French Reader.

These books were authorized in 1894 and the profit realized on the annual sales will not, as to any of the books, after allowing to publishers a reasonable annual living profit, yield sufficient to pay off the capital account for several years yet. The profit is not excessive and the price should not be reduced. The price of the Public School Euclid and Algebra is only 25 cents, and the prices of the other books are very low considering the class of book.

McKag's High School Enclid, Parts I., II. and III.—The plates for these books are imported by the publishers, and so far they have not realized sufficient profit on sales to afford a living profit and pay off the capital account. The profit is not excessive and the price cannot be reduced.

The American price is \$1, as against 50 cents, the Canadian price.

Public School Writing Course.—This book is practically out of use; the publishers have never realized and are not realizing any profit, and the price cannot be reduced.

Upon the question of royalties paid to the authors of the various text books and how the payment of such royalties affects the prices of the books, and as to the desirability of payment to the authors by the Government of a lump sum for the copyrights;

We have on this branch of the matters covered by the terms of the Commission examined upon oath the several publishers of the school books now in use, and other publishers, and have also taken the evidence of the several authors, including Professors Alexander, Reynar, Clark and Wallace, and have also inquired into the mode of payment to authors now usually adopted between author and publisher, and we find and report as follows:—

The system of payment of authors by a royalty prevails almost universally in England, the United States and Canada, not only for text books but for most other literature, and this system, in our judgment, is most just to both author and publisher, as the publisher only pays the author as the book is sold and the publisher realizes on the venture, while the author gets full value for what he gives, such value being fixed by the public appreciation of his work as shewn in the sales thereof.

The payment of authors by royalty insures to the public a cheaper book than securing the copyright by payment of a lump sum; by the royalty system the publisher and the author, so far as the payment of the author is concerned, take equal chances as to the success of the venture in publishing the book, and the price of the book can be figured down to the lowest mark which will include the percentage of royalty; but if a lump sum be paid then the publisher has to look out for himself, the author takes no risk; the lump sum must be added to the capital account and interest computed on it for the number of years it will

probably take to pay off the capital account after allowing for an annual living profit on the book; and an estimate has to be made as to probable annual sale of the book. And with all this in their minds the publishers must, at the outset at any rate, put a higher price on the book so as to ensure being paid off his capital outlay as speedily as possible out of first sales, and looking to reducing the price if the book is a success and when the capital account has been repaid; the larger the capital account is the higher in proportion the first price of the book must be.

It may be said that in the case of text books authorized for fixed periods a certain constituency is created by the authorization and the annual sales can with reasonable certainty be estimated before the price of the book is fixed, but this is not wholly so. Authorization does not necessarily involve compulsory use; the Minister of Education may de authorize a book at any time upon notice; the book may not find favor with teachers and scholars; a newer and better book may be authorized; the sale may not continue as large after the first or second year owing to the book being of good lasting quality and going from child to child, and in view of all this if the publisher pays out a lump sum to the author he must at the outset fix a larger price on the book so as to be reasonably and quickly recouped, than if he only undertakes to hand over a royalty on all books actually sold, not to include those given away to promote sales, and also exclusive of unsold stock. This is the result of the unanimous testimony of authors and publishers and appears clear upon a thoughtful consideration of the question.

The publishers also contend that good authors, such as have prepared the great majority of text books now in use in Ontario, will not be satisfied with small compensations by way of a lump sum; they will figure out the value of their work by a computation of the probable results of a royalty and each author having unbounded confidence in the success of his book will demand a higher sum than the publisher could pay in view of the risk to be run, and besides, the publishers contend that to pay a lump sum instead of royalty on all the text books published, would require a larger capital than they could afford to devote to the text book branch of their business.

Where an author is paid by royalty he remains interested in keeping up the success and standard of his book, and will without further charge see to the revision and improvement of the book in its successive editions so as to keep it up-to-date, but if paid by lump sum he or someone else has to be paid for revision or improvement work.

The employment of authors by the day or hour in the preparation of text books met with a decided disapproval from all the authors examined by us and is not favored in any quarters where we made enquiry and is not practised to any extent. We are of the opinion that it would be prejudicial to the interests of authorship and the public, tending to impair the literary character and quality of the text books and turning earnest and ambitious authors into mere literary hacks. Writers of standing, qualified to prepare text books such as should be used in our schools, would at any rate refuse to be put in this position or accept a such amount of remuneration as would increase the price of books beyond that now fixed under the royalty system.

The royalty paid does not exceed ten per cent. on price of each book sold except in one or two cases where fifteen per cent. is paid, there being in these cases two authors employed on the work and great care and much revision being required in getting up work and preparing it for the press.

The royalty of ten per cent. appears to us to be reasonable and fair to the authors and in no case do we find that an author has received an excessive

amount for his work on the text books of this Province. In the United States where the circulation of text books is very much greater, the authors though being paid only ten per cent. realize much larger returns from the greater sales.

In the lower priced text books, especially those below fifty cents, the royalty does not influence the price of the book, and in the higher priced ones in many instances the royalty is not included to its full extent in the price of the book, because doing so would make the price an odd number of cents.

The method of payment to the author and the amount he receives for his work is a matter of arrangement between the author and publisher, each looking out for himself. The Department of Education does not interfere between them; the publisher makes the best bargain he can as to royalty and brings a speciman book to the Minister of Education, who if satisfied with the merit of the book, fixes the price he is willing to have it authorized at, and if the publisher agrees the book may be authorized. This system, in our opinion, has worked admirably so far, and the investigation by us into the prices, at which the text books used in the Public and High Schools are sold, has satisfied us that the children and young people of Ontario have in use an admirable selection of text books obtainable by them as cheaply as school books can be obtained in England or the United States, and in many instances at much less cost.

It being our opinion that the system of royalty is the best as between publisher and author, and that it does not increase, but tends to diminish the retail price of text books, we are decidedly of the opinion that the same reasons apply to the Government, and that it would not be in the public interest for the Department of Education hereafter to make arrangements with authors for payment to them of a lump sum for the copyright of any text book instead of including in the price of the book a reasonable percentage for royalty and leaving the author to receive his compensation from the sale price of the book.

The educationists of this Province, possessing the necessary literary ability and a knowledge of our educational system and the needs of our schools, are better qualified than authors in any other country to produce suitable text books and to embody in them Canadian ideals. The development of a Canadian text book literature is a wise and judicious policy, which has been steadily pursued by the Education Department for many years with the result that the youth of our schools have in their hands text books of certainly equal literary merit with and greater adaptability to our school needs, because more Canadian in tone, than text book literature of outside authorship; an additional advantage being that the large sum in royalties which was annually paid by the publishers to American and English authors is now kept at home, being paid to Canadians and assisting in the development of Canadian authorship and the building up of our own nationality.

Upon the third enquiry called by the Commission we have made investigation as to the text books used in the other Provinces and in the United States, and the prices thereof, and we find that the uniform excellence of the Ontario text books is such, that many of them after authorization here have been authorized in the other Provinces and are sold there by Ontario publishers for use in the Public and High Schools at the Ontario retail prices.

The following are Ontario text books used in the various other Provinces:

Manitoba:

Ontario Public School Readers (for part use). Public School Arithmetic. Public School Geography.

Public School Grammar.

History of the Dominion of Canada, Clement (for 5th form).

High School Composition from Models.

High School Geography.

High School History of England and Canada.

High School Arithmetic.

High School Algebra.

First Latin Book.

High School Physical Science Part I., Part II.

High School Bookkeeping.

North West Territories:

Ontario Public School Readers (for part use).

Public School Arithmetic.

Public School Geography.

Public School Grammar.

History of the Dominion of Canada, Clement (for 5th form).

Public School Drawing Course.

(French-English Readers:)

First Reader, Part I.

First Reader, Part II.

Second Reader.

Third Reader.

High School Reader.

High School English Grammar.

High School Geography.

High School History of England and Canada.

High School Arithmetic.

High School Euclid (Books 1, 2 and 3).

High School Book-keeping.

British Columbia :--

Public School History of England and Canada.

History of the Dominion of Canada, Clement (for 5th form).

Public School Physiology and Temperance.

High School Composition from Models.

High School Physical Science, Part I. and II.

High School Book-keeping.

New Brunswick :-

History of the Dominion of Canada, Clement (for 5th form). Public School Drawing Course. (French-English Readers.)

First Reader, Part I.

First Reader, Part II.

Second Reader.

Third Reader.

Primary Latin Book.

Quebec:

History of the Dominion of Canada, Clement (for 5th form).

Public School Drawing Course.

Public School Physiology and Temperance.

High School History of England and Canada.

High School Beginner's Greek Book.

High School German Grammar.

High School Book-keeping.

Nova Scotia :

Public School Drawing Course.

As to the text books used in the United States and the prices paid therefore our enquiries have led irresistibly to the conclusion that under the system pursued by the Department of Education in Ontario, the public here obtain school books of equal educational and literary merit and excellence in make up as those of the United States at much cheaper rates; to quote from the report of the arbitrators dated 27th May, 1889, upon an examination into the price of texts books, the Department "has exercised extreme care in dealing with each book as to the retail price thereof so that the public have obtained the books at lower prices than could have been obtained under any other system than the system of authorization now adopted."

A personal inspection of text books used in American Public Schools and a comparison of the prices paid therefor, shews as follows:—

Lowest cost	\$9 96	\$4 95

It appears to us that the High School and Public School Geographies having now being authorized and in use for ten years might with advantage be revised and modernized somewhat on the lines of Frye's Geographies published in Boston, the price of which is \$1.85 for two books as against 75cts. for our Public School Geography.

In closing our report we may properly notice that the contracts with the Government under which the various school books are published, contain certain provisions entitling the Department of Education to make arrangements with other publishers on similar terms for publication of the same books, so that there

cannot be a monoply, in fact some of these books are published under those agreements by more than one publisher, but competition has not reduced price, showing that original price was not excessive. Great care has also been taken to provide that the material used, and workmanship employed in the manufacture of each book shall be of excellent quality and kind, and we have much pleasure in reporting that the publishers have lived up to their contracts in that respect, and that the various books published by them are excellent as to paper, printing and binding, very durable and of very attractive exterior.

All of which is respectfully submitted:

EWD. MORGAN,
JAMES BAIN, Jr.,
C. BLACKETT ROBINSON.

Toronto, 10th January, 1898.

NUMBER OF MEETINGS AND NAMES OF WITNESSES EXAMINED:—

In connection with the Commission twenty-one meetings were held and the following witnesses examined:

ARCHÆOLOGICAL REPORT.

To the Honorable G. W. Ross, LL.D., M.P.P., Minister of Education;

SIR,—Owing to the time and attention demanded in connection with the removal and re-arrangement of all our archæological material this year, comparatively little was effected by way of field-work. In this respect, therefore, the report is but a meagre one.

As now installed in your Departmental Buildings, the specimens show to much better advantage, and are therefore more interesting and valuable educationally than they were before, and this is their only use.

The wall-cases provided are admirable for the display of numerous large ethnological, as well as large archaeological specimens, and if the table-cases corresponded with these in commodiousness and appearance, nothing better could be desired. It has been well said, I think by Prof. Flower, recently President of the British Association, that "a finished museum is a dead museum," and in accordance with this dictum ours is so very much alive that for many years it is hoped it will be necessary to provide more room, especially in the shape of table-cases, for in those alone is it possible to examine small specimens.

Since the removal, more specimens have been presented to the collection by visitors than during any other similar period, and as the time has arrived when it is desirable to pay more attention to the ethnology of our own and other continents than we have done, it is gratifying to report that our prospects of growth along this line are very good, and students may expect to have before long, material by means of which to effect comparisons and arrive at conclusions.

Our collection of crania has increased very considerably during the last few years, and I am much pleased to report that Dr. James G. Caven has undertaken to make a thorough study of each specimen, supplying measurements, and such other information as is required to satisfy the demands of modern science. This work will occuppy Dr. Caven's attention as he may find time, during 1898, and it is hoped that the results will be ready for publication in next report.

It is anticipated that during 1898, there will be opportunities to reach many places to which the attention of the Curator has been directed.

I have the honor to be
Yours, respectfully,
DAVID BOYLE.

ADDITIONS TO THE MUSEUM.

- 16,325. Stone pipe Calgary, North West Territory. John F. Holden, Toronto Junction.
- 16,328. Slate gorget, lot 20, con. 7, Vespra township, Simcoe county. Christopher Scott, per A. F. Hunter, M. A., Barrie.
- 16,329. Chert arrow-head, lot 20, con. 10, Vespra township. Augustine Quinn, per A. F. Hunter, M. A., Barrie.
- 16,330. Stone axe, lot 11, con. 1, Flos township. Allan Laidlaw, per A. F. Hunter, M. A., Barrie
- 16,331. Stone axe, lot 1, con. 10, Medonte township. Christopher Shire, per A. F. Hunter, M. A., Barrie.
- 16,332 Stone axe, lot 4, con. 8, Oro township, Simcoe county. James Davis, per A. F. Hunter, M.A. Barrie.
- 16,333. Stone axe, lot 8, con. 7, Oro township. Arch. McDuff, per A. F. Hunter, M. A., Barrie.
- 16,334. Stone axe, lot 3 con. 11, Innisfil township. Alfred Warnica, per A. F. Hunter, M.A., Barrie.
- 16,335. Clay pipe, lot 1, con. 5, Medonte township. Found in skeleton's jaws. F. Whitelock, per A. F. Hunter, M.A., Barrie.
- 16,336. Clay pipe, lot 4, con. 8, Oro township, Simcoe county, (complete specimen). Jas. Davis, per A. F. Hunter, M. A., Barrie.
- 16,337. Clay pipe, lot 4, con, 8, Oro township, Simcoe county. James Davis, per A. F. Hunter, M.A., Barrie.
- 16,338. Clay pipe, lot 20 con. 10, Vespra township, (very modern). P. Quinn, per A. F. Hunter, M.A., Barrie.
- 16,339. Clay pipe, lot 20, con. 10, Vespra township, (totem pipe / effigy lost). P. Quinn, per A. F. Hunter, M.A., Barrie.
- 16,341. Stone gouge, very fine, found in a gravel pit, south shore of Lake St. Louis, two miles west of Chateauguay river mouth, or six miles west of Caughnawaga. R. W. Leonard, C. E.
- 16,342-16,344. Beads made from small quadrupeds' jaw bones, York township, York county. S. Dunn.
- 16,345-16,349. Clay vessels from Arizona pueblos, (Hale collection) by exchange from the Field Columbian Museum, Chicago.
- 16,350-16,352. Clay vessels, Cuzco, Peru, (Montez collection) by exchange from the Field Columbian Museum, Chicago.
- 16,353. Stellar, stone club-head, Cuzco, Peru, (Montez collection) by exchange from the Field Columbian Museum, Chicago.

16,354. Llama cup, Cuzco, Peru, (Montez collection), by exchange from the Field Columbian Museum, Chicago.

16,355-16,359. Clay vessels, from Nicaragua, by exchange from the Field Columbian Museum, Chicago.

16,360-16,366. Clay vessels, from Arkansas, (Riggs collection), by exchange from the Field Columbian Museum, Chicago.

16,367-16,369. Clay vessels from Chimbote, Peru, (Dorsay collection), by exchange from Field Columbian Museum, Chicago.

16,370-16,374. Clay vessels from Costa Rica (Scriven collection), by exchange from the Field Columbian Museum, Chicago.

16,375. Buddha, rudely carved in pyritiferous steatite, looted from a temple in Hyderabad, India.

16,376. Large clay cinerary urn, Ossabaw Isl. Bryan county, Georgia. Clarence B. Moore, Philadelphia.

16,37.. Shell digging tool, (Fulgar carica) Ossabaw Isl., Bryan county, Georgia. Clarence B. Moore, Philadelphia.

16,378. Shell drinking cup, found near human remains, Darien, Mc-Intosh county, Georgia. Clarence B. Moore, Philadelphia.

16379. Shell spade, surface find, Ossabaw Isl., Bryan county, Georgia. Clarence B. Moore, Philadelphia.

16,380. Shell spade, surface find, Ossabaw Isl., Bryan county, Georgia. Clarence B. Moore. Philadelphia.

16,381. Shell drinking cup, showing intentional perforation so often practiced by the Florida Indians, and less frequently by the South Georgia Indians, to "kill" the vessel, and thus release its spirit for the use of the spirit of the body with which it was buried. Clarence B. Moore, Philadelphia.

16,382-16,404. Large shell beads, found with calcined human remains in portion of a cinerary urn, Mound C., Bluff Field, Ossabaw Isl., Georgia. Clarence B. Moore, Philadelphia.

16,405-16,430. Medium size shell beads, Mound, Ossebaw Isl., Bryan county, Georgia. Clarence B. Moore, Philadelphia

16,431-15,435. Large shell beads, Mound C., Bluff Field, Ossabaw Isl., Georgia. Clarence B. Moore, Philadelphia.

16,436. Fresh water mussel shell, perforated for suspension. Found with calcined human bones in Mound C., Middle Settlement, Ossabaw Isl., Bryan county, Georgia. Clarence B. Moore, Philadelphia.

16,437. Ornamented bone found with human skeleton, Mound A., Lawton's Field, Darien county, Georgia, Clarence B. Moore, Philadelphia.

16,438. Shell tool, surface find, Bryan county, Georgia, Clarence B. Moore, Philadelphia.

- 16,439. Small piece of artificially perforated pumice stone (two holes.) From shell heap near Turtle Mound. New Smyrna, Volusia county, Florida. Clarence B. Moore, Philadelphia.
- 16,440-16,441. Potsherds used as hones. Mound C., Bluff Field, Ossabaw Isl., Georgia. Clarence B. Moore, Philadelphia.
- 16,442-16,443. Hammer-stones, Mound C., Middle Settlement, Ossabaw Isl., Georgia. Clarence B. Moore, Philadelphia.
- 16,444. Bone awl, Mound C., Middle Settlement, Ossabaw Island, Georgia. Clarence B. Moore, Philadelphia.
- 16,455, Shell (columella) pendant, Mound C., Middle Settlement, Ossabaw Isl., Georgia. Clarence B. Moore, Philadelphia.
- 16,446-16,449. Roughly worked stones, found together in a cinerary urn, Mound C., Bluff Field, Ossabaw 1sl., Georgia, Clarence B. Moore, Philadelphia.
- 16,450. Lurge, inverted-bell-shaped clay urn. Whole exterior ornamentally marked. Contained adult skeleton bones much decayed, St. Catherines Island, Liberty County, Georgia. Clarence B. Moore, Philadelphia.
- 16,451, "Medicine" mask used by the late Chief Ska-na-wa-ti, an Onondaga Fire-keeper, and one of the leading Troquois Medicine men on the Grand River Reserve, Ontario. Miss E. Pauline Johnson, Brantford.
- 16,452 Ska-na-wa-ti's turtle-shell rattle used in certain portions of the medicine- making ceremony. Miss E. Pauline Johnson, Brantford.
- 16,453. Iroquois wampum belt, traditionally regarded as not less than three hundred years old. This was buried with others during the Colonial war. Miss E. Pauline Johnson, Brantford.
- 16,454. Western wampum bel of dentalium shells. Miss E. Pauline Johnson, Brantford.
- 16,455. Chief's large silver medal, temp. George III. Obtained from Mississauga Indians who frequented Goderich about fifty years ago. Mrs. Cameron.
- 16,456. Bird amulet (cast), near Plattsville. Henry Smith, New Hamburg.
- 16,457. "Banner-stone" (cast). James Rennie. Henry Smith, New Hamburg.
- 16,458. Small tube (cast). Wm. Kerr, 3rd concession of Wilmot. Henry Smith, New Hamburg.
- 16,459. Small stone pipe (cast), Alberta, North-west Territory. Henry Smith, New Hamburg.

- 16,460. Small clay pipe (cast), Indian camping-ground, Smith's Creek. Henry Smith, New Hamburg.
- 16,461. Large clay pipe (cast) north of Wilmot township. Henry Smith, New Hamburg.
- 16,462. Large stemmed clay pipe (cast), south side of Baden, Wilmot township. Henry Smith, New Hamburg.
- 16,463. Twenty-two "flints" made by Mr. Henry Smith, as an attempt to imitate Indian workmanship of this kind. Henry Smith, New Hamburg.
- 16,464-16,604. One hundred and forty bronze and white metal medals, struck by P. W. Ellis and Co. Toronto, in commemoration of important historical events, and as exhibition, college and school prizes. This collection will be kept up as new medals appear, and the collection will form an interesting part of the proposed historical museum. P. W. Ellis and Co., Wellington St. E., Toronto.
- 16,605. Ojibwa (Mississauga) eradle of very superior quality, used in the family of Mrs. Madwayash, Saugeen, and presented by her daughter, Mrs. Marsden, Alderville, per Pashigeezhik, a Mississauga student at Victoria College, Toronto.
- 16,606-16,607. Palœolithic celts, Thennes, Thezy, France. Sir John Evans, Hemel, Hempstead, England.
- 16,608. Palœolithic celt, Brickfield, Hitchin, England. Sir John Evans, Hemel Hempstead, England.
- 16,609. Stone pipe-bowl, Orchard Beach Farm, East Gwillimbury township, near Keswick P. O. York county. Dr. W. L. T. Addison. Byng Inlet.
- 16,610. Imperfect, trumpet-mouthed clay pipe-bowl, lot 28, con. 7, Scott township, Ontario county. Dr. W. L. T. Addison.
- 16,611. Half of small clay pipe-bowl similar to 16,610, and from the same place. Dr. W. L. T. Addison.
- 16,612. Pigeon's head, neatly moulded, from edge of a clay pipe-bowl, lot—con., 7, Whitchurch. Dr. W. L. T. Addison.
- 16.613. Small and somewhat roughly made clay pipe-bowl, lot 28, con.7, Scott township. Dr. W. L. T Addison.
- 16,614. Almost cylindrical clay pipe-bowl, marked on upper end with seven fine parallel lines, making the same number of narrow collars round the bowl. Four shallow holes at irregular intervals have been made immediately below the collars. Lot 28, con., 7, Scott, Ontario county Dr. W. L. T. Addison.

- 16,615. Part of clay pipe-stem showing marks of cord that the clay was moulded around to form the stem-hole. Near Aurora. con. 7, Whitchurch, York County, Dr. W. L. T. Addison.
- 16,616. Small piece of moulded and burnt clay—has been broken from from a larger piece. No locality. Dr. W. L. T. Addison.
- 16,617. Ear of clay vessel, showing how it was luted. No. locality. Dr. W. L. T. Addison.
- 16,618. Rubbing-stone—apparently fine grained, Hudson River shale —worn hollow and very smooth. No locality. Dr. W. L. T. Addison.
- 16,619. Small two-holed gorget of Huronian slate from northern part of Michigan. Dr. W. L. T. Addison.
- 16,620. Bone bead-like form, 2½ inches long, having an oblong hole 7-16 inch long, and 3-16 inch wide cut in the middle. By closing both ends with the thumbs and blowing flute-wise into the hole, a weak whistle may be produced. Dr. W. L. T. Addison.
- 16,621. Similar to 16,620, but one-fourth of an inch longer, and not so wide. The hole in this specimen is about the same length as in the preceding one, but is nearly twice as wide. It is also ornamented. Dr. W. L. T. Addison.
- 16,622. Small bead-like bone 11 inches long. Extremities very rough; has small hole badly made in the middle of one side, somewhat like 16,220 and 16,621. Found in "Old Fort" ground, Whitchurch, York county. Dr. W. L. T. Addison.
- 16,623. Small deer-horn (one prong) ground at tip to a chisel edge. Dr. W. L. T. Addison.
- 16,624-16,637. Fourteen bone-beads from half an inch to three and a half inches long, found in various northern parts of York county. Dr. W. L. T. Addison.
- 16,638. Bone-bead, con. 7, Whitchurch. Dr. W. L. T. Addison.
- 16,639. Small stone, having a shallow pit or hollow on one side as for a drill-rest to place against the forehead or chin. No locality. Dr. W. L. T. Addison.
- 16,640. Triangular piece of chert an inch in height, seven-eighths of an inch wide, and nearly three-fourths of an inch across the base; has black vein in the middle. Some rubbing seems to have been been done, but the form may be wholly natural. No locality. Dr. W. L. T. Addison.
- 16,641. Bone awl or needle, lot 28, con. 7, Scott township, Ontario county. Dr. W. L. T. Addison.
- 16,642. Bone needle or awl, con 7 near Aurora, Whitchurch. Dr. W. L. T. Addison.

- 16,643. Bone needle, lot 28, con. 7, Scott township, Ontario county, Dr. W. L. T. Addison.
- 16.644. Small pendant—water-worn slate, 1½ inches long, artificially bored at one end, no locality—probably North York. Dr. W. L. T. Addison.
- 16,645. Pendant made from a corallite, discoidal, 1½ inches in diameter, and about half an inch thick, probably North York. Dr. W. L. T. Addison.
- 16,646-671. Twenty-six fragments of pottery bearing characteristic markings, chiefly from lot 28, con. 7. Scott township, Ontario county. Dr. W. L. T. Addison.
- 16,672-16.693. Eleven flints, from various places. Dr. W. L. T. Addison.
- 16,694-16,699. Five small stone axe blades, mostly from lot 28, con. 7, Scott township. Dr. W. L. T. Addison.
- 16,700. Small vetebral (turtle) bone, carved to represent a dog or fox, by Allan Comego. Allan Comego, Alderville, per Pashigeezhik, (Richard Black).
- 16,701. Slate gouge, Shearer's Point, Alnwick township, Northumberland county. Pashigeezhik (Richard Black), Alderville.
- 16.702. Discoidal stone an inch and three-fourths in diameter and five-eights of an inch thick, slightly pitted near the middle, on each side. Samuel Frazer, lot 10, con. 2, Tay township, Simcoe county, per Campbell Shaw, Midland.
- 16,703. Long ogee bar amulet, Beausoleil Island.
- 16.704. Clay pipe, strongly marked human face, stem gone. Levi Taylor, Victoria Harbor. Dr. R. W. Large.
- 16.705. Square mouthed clay pipe, near Waverley, Simcoe County, Mr. Brown. Dr. R. W. Large.
- 16,706. Square mouthed clay pipe, near Waverley. Mr. Brown. Dr. R. W. Large.
- 16,707. Clay pipe-head pinched human face much injured. T. Crawford, Midland. Dr. R. W. Large.
- 16,708. Clay pipe-head, near Vasey, Simcoe county. Dr. R. W. Large.
- 16,709. Clay pipe-head, near Waverley, Simcoe county. Dr. R. W. Large.
- 16,710. Clay pipe-head, broken, near Penetanguishene, Simcoe county, Dr. R. W. Large.
- 16,711. Clay pipe head, parallel horizontal lines all round, near Waverley, Simcoe county. Dr. R. W. Large
- 16,712. Clay pipe, good, stem broken, near Vasey, Simcoe county. Dr. R. W. Large.

- 16,713. Clay pipe, pinched human face, found by T. Crawford near Midland. Dr. R. W. Large.
- 16,714. Clay pipe, pinched human face, near Penetanguishene. Dr. R. W. Large.
- 16,715. Coarsely made clay pipe, with short stem: near Waverley, Simcoe county. Dr. R. W. Large.
- 16,716. Clay pipe bowl, trumpet-mouthed: near Waverley, Simcoe county. Dr. R. W. Large.
- 16,717. Clay pipe bowl, bulged in the middle: near Waverley, Simcoe county. Dr. R. W. Large.
- 16,718. Clay pipe bowl, trumpet-mouthed, well made: near Emery, York county. Dr. R. W. Large.
- 16,719. Clay pipe bowl, pinched face broken off. Brown's farm, near Waverley, Simcoe county. Dr. R. W. Large.
- 16,720. Part of clay pipe, with two rings round the middle. Brown's farm, near Waverley. Dr. R. W. Large.
- 16,721. Clay pipe bowl, mutilated, probably an owl's head; near Penetanguishene, Simcoe county. Dr. R. W. Large.
- 16,722. Part of rim of a large trumpet-mouthed clay pipe: near Penetanguishene. Dr. R. W. Large.
- 16,723. Small and rudely made clay pipe: near Penetanguishene. Dr. R. W. Large.
- 1624. Part of a clay pipe bowl surmounted by a bird's head; near Vasey, Sincoc county. Dr. R. W. Large.
- 16,725. Soapstone pipe, plain, short stem. Found by Mrs. Graham, near Vasey. Dr. R. W. Large.
- 16,726. Elliptical vasiform pipe of soapstone; no locality. Dr. R. W. Large.
- 16,727. Vasiform soapstone pipe: near Vasey, Simcoe county. Dr. R. W. Large.
- 16,728. Part of a bowl of a soapstone pipe of unusual form, widening near the stem: near Vasey, Simcoe county. Dr. R. W. Large.
- 16,729. Small soapstone pipe, perfect, near Midland, Sincoe county. Dr. R. W. Large.
- 16,730. Part of a slate implement, 3\frac{3}{3} inches long, and about 7-16 of an inch thick in the middle—cross section rhomboidal: near Vasey, Simcoe county. Dr. R. W. Large.
- 16,731. Small brown stone t ol, $2\frac{3}{4}$ inches long, and $\frac{5}{8}$ wide, pointed at one end: near Emery, York county. Dr. R. W. Large.
- 16,732. Part of a bone tool, probably a harpoon end, with hole for attachment by a string to the handle: near Vasey. Dr. R. W. Large.

- 16,733. Bone awl, ornamental on one side with diagonal and other lines: near Emery, York county. Dr. R. W. Large.
- 16.734. Bone awl, piain, four inches long: near Emery. Dr. R. W. Large.
- 16,735. Bone awl, four and three-fourth inches long: near Emery, Dr. R. W. Large.
- 16,736-16,741. Bone awls of various sizes: near Emery, York county. Dr. R. W. Large.
- 16,742. Bone awl, three inches long: near Vasey, Simcoe county. Dr. R. W. Large.
- 16,743. Bone harpoon, four inches long, two barbs, hole in one end. Mr. Bell, Waveriey. Dr. R. W. Large.
- 16,744. Wooden bowl, ornamental carving, bought from a half breed named Cowan: near Wyebridge. Dr. R. W. Large.
- 16,745-16,776. Thirty-two flints from Simcoe and northern parts of York county. Dr. R. W. Large.
- 16,777. Large quartz spear-head, roughly chipped, no locality. Dr. R. W. Large.
- 16.778-16,779. Two quartz arrow-heads, no locality given. Dr. R. W. Large.
- 16,780. Deer horn prong with chisel-shaped point: near Emery, York county. Dr. R. W. Large.
- 16,781. Deer-horn prong, slightly worked to form a punch point: near Emery. Dr. R. W. Large.
- 16,782. Small bone pin, ends rounded: near Emery. Dr. R. W. Large.
- 16,783. Bone bead, 24 inches long: near Vasey. Dr. R. W. Large.
- 16,784. Triangular piece of large sub-tropical shell, $1\frac{3}{4}$ inches long: near Penetanguishene, Simcoe county. Dr. R. W. Large.
- 16,785-16786. Two bear's teeth, much worn, from ash beds: near Emery. Dr. R. W. Large.
- 16,787. Large and thick bone awl, broken at the point: near Emery. Dr. R. W. Large.
- 16,788-16,794. Seven carpel bones, (probably deer) variously worked, some ground flat on one side and some bored in different places: near Emery and Vasey. Dr. R. W. Large.
- 16,795. Aluminum medal, bearing Dominion coat of arms. C. C. James, Deputy Minister of Agriculture.
- 15,796. Stone adze, 8 inches long, found by Paul Bigsail, Snake Island, Lake Simcoe. Dr. R. W. Large.
- 16,797. Double ended stone adze, one end degraded to hammer use, near Vasey. Dr. R. W. Large.

- 16,798. Iron tomahawk, (French): near Vasey, Simcoe county. Dr. R. W. Large.
- 16,799. Iron tomahawk, (French): near Vasey, Simcoe county. Dr. R. W. Large.
- 16,800. Pair of small scissors, much corroded, probably of French make, and connected with the old Huron Mission: near Penetanguishene, Simcoe county. Dr. R. W. Large,
- 16,801. Hammer-stone, found near Vasey. Dr. R. W. Large.
- 16,802. Rubbing-stone, not much used—originally a water-worn stone, near Emery. Dr. R. W. Large.
- 16,803. Coarsely finished stone axe, $7\frac{1}{2}$ inches long: near Vasey. Dr. R. W. Large.
- 16,804. Water-worn pebble, originally oval, but ground down at two ends to make it round or nearly so: near Midland, Simcoe county. Dr. R. W. Large.
- 16,805. Two water-worn pebbles, used as hammers and rubbing stones: near Emery. Dr. R. W. Large.
- 16,806. Unfinished "butterfly" banner-stone. Dr. R. W. Large.
- 16,807-16,810. Four iron tomahawks (French), found in North Simcoe. Dr. R. W. Large.
- 16,811-16,830. Fragments of pottery, ornamented with dots and lines, from various places in York and Sincoe counties. Dr. R. W. Large.
- 16,831. Ovate hammer-stone, slightly hollowed on one side; near Vasey. Dr. R. W. Large.
- 16,832. Celt, six inches long, well made: near Vasey. Dr. R. W. Large.
- i6,833. Part of unio shell, perforated near the hinge; no locality. Dr R. W. Large.
- 16,834. Celt or adze, five inches long: no locality. Dr. R. W. Large.
- 16,835. Quadrangular rubbing-stone; no locality. Dr. R. W. Large.
- 16,836. Large, well polished, bead-like bone, five inches long, and nearly an inch in diameter at each end: near Emery, York county. Dr. R. W. Large.
- 16,837. Clay pipe plain, with sharp angles at junction of bowl and stem. King Township, York county. Dr. R. W. Large.
- 16,838. Clay pipe bowl. Stony Lake, near Peterboro'. Dr. R. W. Large.
- 16,839. Clay pipe bowl: near Vasey, Simcoe county. Dr. R. W. Large.
- 16,840. Slate tube, three and three-fourth inches long: near King Village. Dr. R. W. Large.
- 16,841. Small celt or chisel, having a small transverse groove one inch from upper end, as if for fastening to a handle. Dr R. W. Large.

- 16.842. Small bone needle of peculiar make, and slightly ornamented: near Penetanguishene. Dr. R. W. Large.
- 16,843. Weaving needle with hole, one end broken: near Emery. Dr. R. W. Large.
- 16,844. Small bone awl, apparently being prepared for cutting into two: near Emery. Dr. R. W. Large.
- 16,845. Seven bone awls or needles: near Emery. Dr. R. W. Large.
- 16,848. Neolithie celt, Swaffham Fen, Cambridge, England. Sir John Evans, Hemel Hempstead.
- 16,847. Roughly made celt. Henry Merriam, Harwood.
- 16,848. Small and very elegant iron axe used in the Bihe spirit-dances, Angola (Portuguese) S. W. Africa. Mrs. John Currie, Toronto.
- 16.849. Small musical instrument consisting of thirteen steel (!) tongues mounted on a piece of carved board, seven inches long and four inches wide. Cisamba, Angola, Africa. Mrs. John Currie.
- 16,850—16,853. Four iron-tipped arrows (two of them poisoned) from neighborhood of Lake Tanganyika, Africa. Mrs. John Currie.
- 16,854. Native made copper wire. Bailundu, S. W. Africa. Mrs. John Currie.
- 16,855. Shallow clay dish of native make, Bihe, Angola, S. W. Africa, Mrs. John Currie.
- 16,856. Wooden bowl, Cisamba, Bihe, Angola. Mrs. John Currie.
- 16,857. Rope of native fibre and native manufacture. Bailundu Angola, Africa. Mrs. John Currie.
- 16,858. Fine pottery élay, near Bailundu, Angola, Africa. Mrs. John Currie.
- 16,859. Coarse pottery clay, near Bailundu, Angola, Africa. Mrs. John Currie.
- 16,860. Copper of native smelting, cast in the form of a St. Andrew's Cross, Garenganze country, S. W. Africa. Mrs. John Currie.
- 16,861. Working axe—iron blade, Bihe, Angola, Africa. Mrs. John Currie.
- 16,862. Anklets consisting of twelve small iron bells, like sleigh bells. Bihe, Angola, Mrs. John Currie.
- 16,863. Slave whip of rhinoceros hide—used in driving slaves to the coast, Angola. Mrs. John Currie.
- 16,864. Slave shackle of wood, used to fasten the feet of slaves during periods of rest on their way to the coast, Angola. Mrs. John Currie.
- 16,865. Iron ore, Bihe, Angola, Africa. Mrs. John Currie.

16,866. Two yards of native cotton cloth two-and-a-half feet wide Bihe, Angola, Africa. Mrs. John Currie.

From 16,848 to 16,866 were procured by the Rev. Walter T. Currie, the only Canadian Congregational Missionary in the Portuguese colony of Angola, West Africa, and are presented by his mother. The iron and copper mentioned in connection with any of the foregoing specimens are of native production, from the ore to the finished article.

- 16,867. Double-pointed flint, notched near the middle. Mrs. T. E. Craig, Lawrenceburg, Ind.
- 16,861. Small, light colored, chert arrowhead. Mrs. T. E. Craig, Lawrenceburg, Ind.
- 16,869-16,1877. Crania, from ossuary, in Innisfil township, Simcoe county. A. F. Hunter, M.A., Barrie.
- 16,870. Cranium very much deformed by frontal pressure, British Columbia. Miss E. R. Lingard Green, Victoria, B.C.
- 16,871-16,874. Crania, from ossuary, near old Fort Ste. Marie, Christian Island.
- 16,875. Soapstone pipe, tastefully carved human figure sitting on top of stem piece, with back to bowl, North shore of Lake Superior. John Monague, Christian Island.
- 16,876-16,878. Three clay pipe heads, lot 14, concession 3, Collingwood township, Simcoe county. A. F. Hunter, M.A.
- 16,879-16,880. Plain clay pipes perfect, with short stems, near Midland, Simcoe county. Arthur Crawford.
- 16,881-16,884. Clay pipe bowls, various patterns, near Midland. Arthur Crawford.
- 16,885. Pinch-faced and conical capped clay pipe, near Midland. Arthur Crawford.
- 16,886. Small water-worn stone, one and three-fourth inches long, mocassin-shaped—drilled at ankle portion—near Midland. Arthur Crawford.
- 16,887. Small string of beads, mostly of European make—near Midland. Arthur Crawford.
- 16,838. Large disc shell bead or gorget, and string of European and Indian beads. Dr. R. W. Large.
- 16,889. Fragments of a large and well-made clay pot. The rim, which is complete, varies from 13 to 14 inches in diameter, York township. Dr. R. B. Orr, Toronto.
- 16,890-16893. Four small pieces of native-made cloth, mounted between plates of glass: found in Florida. Clarence B. Moore, Philadelphia.

16.894, Large stone-headed club, with eagle feathers, North West Territory. J. Ross Robertson. M.P., Toronto.

PER A. F. HUNTER, BARRIE.

- 16,911. Piece of bone with perforation, lot 21, con, 3, Vespra. Daniel Quinlan.
- 16,912. Bone beads, lot 21, con. 3, Vespra. Daniel Quinlan.
- 16,913, Bone awl, lot 21, con. 3, Vespra. Daniel Quinlan.
- 16,914. Bone pin or bodkin, lot 21, con. 3, Vespra. Daniel Quinlan.
- 16,915. Pot fragment (drilled), lot 21, con. 3, Vespra. Daniel Quinlan,
- 16,916. Pointed bone implement, lot 21, con. 3. Vespra. Daniel Quinlan.
- 16,917. Perforated clam-snell, lot 21, con. 3, Vespra. Daniel Quinlan,
- 16,918. Columella of shell, with three perforations, lot 21, con. 3, Vespra. Daniel Quinlan.
- 16,919. Beaver's tusk (fragment), lot 21, con. 3, Vespra. Daniel Quinlan.
- 16,920. Bone chisel, lot 4, con. 8. Oro. James Davis.
- 16,921. Pointed bone, lot 4, con. 8, Oro. James Davis.
- 16,922-16,992. Seventy colithic, paleolithic and neolithic specimens, from various localities in England, Ireland and France. From the Rev. R. Ashington Bullen, Reigate, England.
- 16,993-16,995. Three specimens brought by Seton-Karr, from Somaliland, Africa. Rev. R. Ashington Bullen, Reigate, England.

16,997. Rattle, as used in the Choogichoowiktook, or Serpent Dance, of the Nova Scotia Micmacs. The dance was said to symbolize the Pleiades, and the rattle to symbolize the rattle of the rattlesnake. Stansbury Hagar, Brooklyn, N.Y.

In addition to these, Mr. George E. Laidlaw, of Balsam Lake, has placed in the already large collection from his neighborhood, several hundred extremely valuable specimens, including clay pipes, many of which are quite unlike any previously in the museum: clay and stone gambling (?) discs; bone awls or needles, one of which is ten inches long, and ornamented on one side with incised lines, forming an irregular pattern: hammer-stones, celts, rubbing stones, carbonized corn, beans and cherry-stones, besides numerous miscellaneous articles, including a great many fragments of pottery, some of which, it is hoped, may be matched and united. A large portion of this collection has been procured by Mr. Laidlaw's sifting carefully the material forming ash-beds on old camp-sites. All the specimens found thus have been kept in groups, and carefully numbered, and it is proposed to preserve this method of arrangement, so far as the Balsam Lake country is concerned, thus to show, at a glance, all that has been left to represent the domestic economy of the old-time Indian.

NOTES ON SOME SPECIMENS.

METHODS OF WORKING.

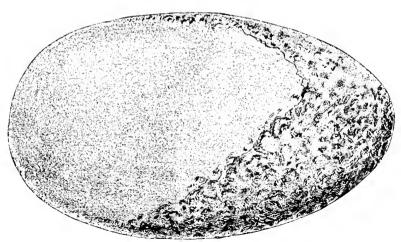

Fig. 1-3 diameter.

Illustrative of steps in primitive man's attempts to supply himself with tools from the materials that lay nearest to his hand, specimens

like the one figured here, are full of interest. It is a dingy bluish argillaceous pebble, nearly six inches in length, a little more than three in breadth, and less than an inch and one-half in thickness at the thickest part. The natural shape of this pebble has suggested to some ancient inhabitant its capability for adaptation as some sort of tool or weapon, probably a celt or tomahawk, but as it was not sufficiently symmetrical for his purpose he has proceeded to reduce it to the desired form by the primitive method of pecking.

Nearly half of the side shown has been subjected to this process, while the rest of the surface retains its original smoothly, water-worn appearance. On the opposite side fully five-sixths of the whole surface has been pecked.

To some event that frustrated the old workman's intention, we are indebted for this instructive specimen, which was found in the township of North Easthope, Perth County and presented to us by Mr. Hugh Nichol, of Stratford.

This piece of soapstone has been deeply notched, probably with the intention of cutting it into three or more pieces, but perhaps only for a kind of rude ornamentation. The value of the specimen consists not so much in what it may have been meant for, as for the reason that when closely examined one can

Fig. $2-\frac{1}{2}$ diameter. see how the work was done, even being able to tell the order in which the notches were made. It was found by Dr. W. L. T. Addison, (no locality).

Drill Rest.

Figures 3 and 4 show in full size both sides of a stone that seems to have been used as a head-rest for a fiddlebow drill. The shallow pit on one side does not look like the beginning of a perforation.

Figs. 3 and 4-Full size.

Bearings of this kind must have been in frequent use to place against the forehead, the chin, or the chest, when the drill was worked by one man. Perhaps the chief objection to this supposed use is the small size of the stone. It was found in an ash-bed, by Mr. Laidlaw.

CLAY PIPES.

Fig. 5-1 diameter

This large and rather gracefully formed pipe is from Bexley township. The stem—once much longer—has been ground or rubbed down for comfort to the smoker, and the hole has been enlarged as if at some time it was intended to insert a wooden stem. Found by Mr. Geo. E. Laidlaw.

The two-faced clay pipe is somewhat damaged on one side. Since the loss of its stem the fractured end has been rubbed down and rounded off at the edge, and the generally smooth and worn-looking surface of the whole outside, seems to show

Fig 6-1 diam.

that it has been carried about for a considerable time as a bangle, or other personal ornament. The large fracture on the top of one side has been made since the pipe was last used--perhaps it was done by the plough or the harrow.

The clay is of exceedingly close texture, showing a few particles of mica. It was found on lot 5, concession 5, Bexley, the farm of Mr Wm. Irwin, on which many fine specimens have been turned up with the plough.

Another pipe of this kind is illustrated in figure 7. This one was also found by Mr. Laidlaw, near Balsam Lake and is a fair specimen. The eyes and mouth are marked by depressions made by means of a slightly square-edged tool.

Pipe-bowls ornamented with two human faces are not very common, but this is the only one I have seen Fig. 7-12 diameter, that has, or rather, had three, for it is quite apparent that one has been

broken off. They are of a common conventional type, requiring but little more to produce them than is Fig. 8 - diameter. possible with a few finger-pinches. This specimen is from lot 5, concession 5, Bexley.

An expressive face appears on this fragment of a pipe bowl, from lot 5, concession 5, Bexley. Although the workmanship is rude, it possesses much dash, and shows attempts at portraiture that one seldem sees in Indian art.

Fig. 9—Full size.

stands above the edge of the bowl.

We have here not only an upright furrow or wrinkle over the nose, but we have the cheeks sharply marked off from the nostrils by a diagonal, channel at each side. This is the only example of the kind I have ever seen in Ontario specimens—even in Aztec representations of the human face, this feature is very rare. The nostril holes are carefully marked by means of two small punctures no larger than a pin-point, and the lower lip and chin, which are usually failures in such attempts, are in this case well-formed, but the upper lip is weak and there has been no pretence made to

form eyebrows.

The whole face, too, is much longer—more oval, than faces are usually respresented, and it is marked off from the test of the pipe by a series of small holes, continued round the top of the forehead, which

This mask from a clay pipe is very inferior to that shown in figure 9, although some attention has been paid here also to detail. Like figure 9, the face is surrounded by a series of dots or slight punctures, but in this case they run across the lower edge of the forehead. Nostrils are roughly expressed: the eyes have been made by a round pointed instrument, and without much care, but the face is not wholly destitute of expression because

Fig. $10 - \frac{1}{2}$ diam.

some pains have been taken to indicate a few teeth. Found by Mr. Laidlaw on lot 5, concession 5, Bexley.

Another pipe mask is shown in figure 11. In this case some trouble has been taken to form eyeballs, and to make them oval, and deeply pitted; and a fairly good nose without nostrils marks the face, but every other feature is poorly brought out, especially the chin. This pipe-bowl has been blackened, and retains its color very well.

Fig. 11—½ diam. The (Fig. 12) strongly marked, yet expressionless face is on a pipe found near Victoria Harbor, and belongs to Dr. R. W. Large's

collection. The pipe is unusually thick—from three-eights to five-eighths of an inch on the face side. The hole in the bowl, shows that it has been enlarged by means of cutting since the pipe was moulded. The eye-balls are very roughly worked up, and occupy much of what should be the cheeks. The mouth, fully five-eighths of an inch deep, is connected with the inside of the bowl, the inner end of the hole being very small and round. Perhaps the intention was to

Fig. 12 - $\frac{1}{2}$ diam. Very small and round. Perhaps the intention was to show smoke issuing from the mouth of the mask simply for its comical effect, when the pipe was in use

Figs. 13 and 14. Full size.

The somewhat odd-looking mask from a pipe, illustrated above, was found near Woodbridge. York county, by Mr. Robert Cowling. The two projections on the head of this mask, as well as the larger one behind, may have been intended to represent a fashion in hair-dressing. The face has been very carefully worked, and the finish is unusually good. The eyes and mouth are indicated by slight elevations

This pipe-bowl has a face quite unlike anything else in the museum, there being a very decided hollow at the junction of the nose with the fore-head—the eyeballs are raised, and more attention has been paid to giving the cheeks a natural appearance than is usual. Originally, as with most clay pipes, this one had a stem; when it was broken a hole was bored through the mouth for the insertion of a wooden one.

Fig. 15, 1 diam.

In fig. 15 we find the same kind of elevations as in figure 14 and somewhat less so in figures 8 and 10 and suggesting a mode of doing up the hair, perhaps after the manner of the Cheveux Relevés, of whom Champlain said, "Not one of our courtiers takes so much trouble in dressing his hair" [as they do]. This pipe was found by Mr. Geo. Laidlaw near Balsam Lake.

The workmanship on the pipe here illustrated is very coarse, and almost expressionless except that there has been an attempt made to form an aquiline nose, and there is a slight depression where it joins the brow. The pipe is heavy and clumsy,

the side bearing the face being over an inch in thickness. G. E. Laidlaw, Bexley.

Fig. 16, ½ diam. Fig. 17 represents another clay pipe on which is moulded a human face. A little care has been taken to indicate eye-brows, but as usual, the chin is weak. Found by Mr. Geo. E. Laidlaw, in Bexley township.

This somewhat spirited imitation of a bird's head surmounts the edge of a clay pipe found by Dr. R. W. Large, near Vasey, in Simcoe county.

There is scarcely enough character about it to enable one to say any more than it is just a bird's head, in which respect it differs from another

W. L. T. Addison, on the 7th concession of Whitchurch, York county. Respecting the latter it would seem plainly the intention to represent the head of the passenger pigeon. The workman has moulded well-marked rings for eyes, and there

Fig. 19 about 7 diam.

is a groove extending from the lower end of the neck to the tip. of the lower half of the bill to represent an anatomical feature.

Fig. 20 3 diameter.

It may be that the markings on the neck are intended to indicate feathers.

Figure 20 imitates a bird-forn, the beak being broken. The tail feathers are indicated by a few lines on the upper surface. The design of this pipe reminds one of more southern types of pottery. Found near Balsam Lake, by Mr. Laidlaw,

STONE PIPES.

But for the fact that on the back of the specimen here figured there remains a slight hollow, one would scarcely suppose that this

stone head had once formed part of a pipe bowl. Considerable care has been bestowed in the carving of this head, for not only are slight elevations left to mark the eye-balls, but what is of still more unusual occurrence, eyebrows are faintly shown, and the chin is fairly well indicated—much better. indeed, than is brought out in the engraving; and 'Adam's apple' has been attended to also. The ears are rudely carved, but perhaps the chief failure is in the nose, the shortness of which gives the face a negroid appearance.

The bonnet-like covering is somewhat unusual. Only on two other pipes among several hundreds in our collection does this occur —one a very fine stone head from lot 34, concession 7, Beverly, the farm of Mr. James Dwyer; and the other-part of a clay pipe found near Midland-not far from where this specimen was found, on the farm af Mr. Arthur Crawford. The stone is limestone; in appearance much like that of the Dwyer head. See report 1887-8, p. 46.

The crown of the cap still shows the workman's laving-out marks, namely, two very small pits near the centre, through which have been drawn two lines at right angles.

A few features of the work are suggestive of European influence. if not of actual touch.

Among some specimens procured last summer from the farm of Mr. Arthur Crawford, near Midland, is the stone pipe (figure 22) which, although much weathered, shows faint traces of human fea-The material is a soft limestone. lower end may still be seen part of the hole, so commonly found in some pipes that are made to be used with a wooden stem, as in this case, the stemhole being on the back of the bowl.

This altogether unique pipe (fig. 23) is also of soapstone, nearly quadrangular in cross-section, the side shown and the opposite side being a little rounded. The projecting proportion seems intended to represent the head of some long-billed bird-perhaps a crane-but the lower

Fig. 22, full size.

portion of the back is broken off. At the base of the pipe there has been a hole for stem attachment. The stem-hole is behind, a little-

below the middle. Found near Balsam Lake by Mr. Laidlaw.

The pipe represented by figure 24 is of mottled soapstone, and is very rudely carved in imitation of a person seated, the arms resting on the knees. The right leg is broken. Between the feet is a small hole for a string to hold it to the wooden stem, which entered a hole nearly midway

Fig. 24, ½ dia.

in the back. The lower side of the base is marked off into small squares. Found in Bexley by Mr. Laidlaw.

STONE DISCS.

If stones of this kind were not used for gambling purposes, or in the playing of some game for mere amusement, it is hard to say in in what other way they could have been employed. Figure 25 is made darker on the side shown than on the other side, which is also marked with a cross.

Mr. Stewart Culin, Curator of the University of Pennsylvania Museum, in Philadelphia, is now engaged in making a special study of aboriginal games and gaming appliances, and when the results of his researches appear in print, no doubt some light will be thrown on the use to which objects of this description were put.

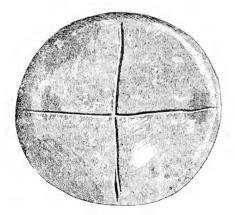

Fig. 25, full size.

Fig. 26, full size.

Similar to the former is the stone represented by figure 26, but the latter is smaller and less carefully made of what seems to beHudson River shale. The face not shown retains a good deal of light-colored limy-looking matter that may have been used to distinguish the sides readily. On it also an additional line runs half way across one section, but this may have been the result of bad workmanship only.

Both discs were found on the Arthur Crawford farm near Midland, in North Simcoe.

BONE.

The very fine specimen of bone tool or weapon here figured is ten and one-half inches long, an inch wide at the butt, and half an inch thick on the side to the left of the reader, the opposite side, or edge, being not more than three sixteenths of an inch in thickness. It is plainly split or otherwise worked from a leg bone, perhaps a deer's. The side not shown in the cut is hollow. The markings shown are grooves about 1 m. deep, and seem to have been produced purely for ornamentation.

This specimen was found by Mr. Laidlaw on a village site, lot 5, concession 5, township of Bexley. He refers to it in his notes as a "dagger." It may have been employed as such, but as the side of the point shown in the engraving is worn smooth, apparently from usage, while the other side still show the scratches that have been made in reducing it to shape, the inference is that it rather served the purpose of a tool, and one, too, which, notwithstanding its great size, has been employed in light work, hollow side up, the forefinger of the worker resting in the natural groove.

It is the largest bone tool of this type that has reached the museum.

Fig $28 - \frac{1}{2}$ diameter.

Bone awls or "needles" seldom bear marks of any kind, by way of ornamentation. The one illustrated here is an exception. Some of the marks near the butt end may have been counters. It was found near Emery,

York County by Dr. R. W. Large. It is not improbable that awl-like specimens so ornamented were used as dress-pins rather than as borers

The two-barbed, harpoon-like weapon shown by figure twentyeight, was found by a Mr. Bell, near Waverley, Tay township, in the

Fig. $29 - \frac{1}{2}$ diameter.

old Huron country. It was in a very good state of preservation. It forms part of the Dr. Large collection.

SHELL WORK.

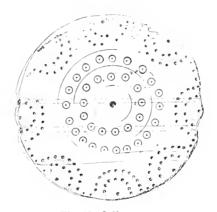

Fig. $30 - \frac{7}{8}$ diameter.

Figure 30 represents a very well made bead, or gorget of shell, the material being part of some conch of sub-tropical habitat.

The three concentric circles in the middle and the arcs on the margin have been described from central points by means of something answering the purpose of compasses, as have also the smaller circles surrounding the dots. The pattern has been carefully laid out, and quite as accurately worked out. Although not more than an eighth of an inch in thickness on the edge, and about three-sixteenths in the middle, two holes having a diameter of two millimeters are bored from edge to edge, as shown by the dotted lines, which are not on the specimen itself. The extremities of the holes bear evidence of much wear.

This very fine specimen was procured by Dr. Large near Penetanguishene, Simcoe County.

COPPER.

Not many finds of native copper relics have been made north of Lake Simcoe. What we call a spear is from Bexley township, but it may have been a knife, the purpose of which it would serve very

Fig. 31. $-\frac{1}{2}$ diameter.

much better. When fresh from the smith's hands this must have been a very beautiful object—the blade is quite thin, (almost too much so for thrusting) and has been highly finished. The socket looks as if it had been shaped on a mandril. This specimen was found by Mr. M. Sayers, of Bexley.

TEXTILE WORK.

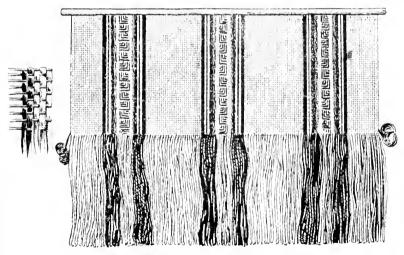

Fig. 32 - Grass Mat. (Ojibwa) Sturgeon Falls

When examining a collection of Indian relies, although there may be much in it from which it is possible to arrive at some knowledge of aboriginal home life, it should always be remembered that a vast quantity of primitive workmanship has nothing to represent it in our day. Almost everything of hide, of wood, and of vegetal material generally, has disappeared. Now and again we meet with fragments of matting and of coarse cloth, that fall to dust before any examina-

tion of the texture can be made. This, however, is enough to show us that the Indian woman of old added the work of the weaver to her numerous other duties. Nor has the art been wholly lost. Navajo blankets are to-day produced in considerable quantities for commercial purposes, on account of certain valuable or peculiar features in their make-up, perhaps more especially in their designs. British Columbian Indians yet weave water-tight buckets from spruce roots, and natives in districts remote from European influence continue to produce coarse fabrics after ancient methods although they make little, if anything, that may be used for clothing purposes.

When at the Hudson Bay Post, Sturgeon Falls, near Lake Nipissing, in the summer of 1892. I was much interested in the mat-work turned out by the Indian women of that neighborhood, and with the kindly assistance of Mr. Ross in charge of the Hudson Bay Company's store, I succeeded in getting from an Indian woman a rush mat, half finished, and still attached to the upper bar of the simple loom on which the warp was stretched. Besides the bar mentioned, (as seen in the engraving) the loom consisted of an upright pole at each side, one end of which was fitted into a hole at the extremity of the cross-bar, while the other rested on the ground. When in use, this primitive apparatus stood at a slight inclination from the weaver, the upper bar being supported by the wall of the dwelling, and the weaving process consisted of passing a stout cord as woof, in and out among the dependent rushes, to produce the desired patturn, which, in this case, is not unworthy of the best designer in Huddersfield or Heckmondwyke, the body of the mat being of the natural straw-color of the rushes. while the pattern is worked in strips of dark red, blue and green, the dves being of vegetable origin, rich, but quiet in tone.

Before very long we shall be unable to become possessed of such specimens, and an effort should be made at once to collect every available type-sample of woven work from the hands of our Indians.

But although, up to the present time, we have been unable to get many well preserved specimens of the finer sorts of fabric, we are fortunately in possession of some fragments found by Mr. Clarence B. Moore* in Florida, during his extensive and exhaustive explorations in that State.

On first thought, one may be tempted to suppose that there can be no reasonable standard of comparison between the products o

^{*} These specimens, neatly mounted between plates of glass, form part of a valuable gift made to us by Mr. Moore this summer; see numbers 16.376 to 16.450 and 16.890 to 16.893, in preceding list of additions to the museum.

places so far apart and so diverse in character as are Ontario and Florida, but we have the very best of proof that between these points there was considerable interchange of material in pre-Columbian days, and to such an extent has this influence been marked, that Mr. Frank Hamilton Cushing in a letter to a Toronto friend has written: "These [the Ontario Archaeological collections] are easily the first representative of Dominion territory in existence, and they are invested with more than ordinary interest and value as being representative also in part of the ancestral Huron-Iroquois stock, and in part of a culture, growth and development in art of the aborigines of this part of Canada, that far exceeds anything I had been led to expect.

"The conventional side of art is exemplified in several of the pipes, stone and terra-cotta, particularly in the little fox-head pipe, (which exhibits such remarkable and regular eye and lip marks) both approaches and suggests the characteristic art of the Mound-Builders, and this, taken with the presence in the same collections of Gulf varieties of the Busycon shell, wrought for all the world as were like objects found by me in the Keys of Florida, extends still further the influence of the very remarkable and highly developed arts of those far southern lands.

"This is so far true that in the report I am now preparing for the Government and the University of Pennsylvania, I shall find it almost indispensable to make studies of those collections and secure, if I can, figures of some of the specimens that illustrate these points.

"All these features are unique, yet abundantly illustrated in the Toronto collections and render them, as a whole, one of *the* collections of this continent."

Apart from Mr. Cushing's strongly corroborative testimony, we may readily understand that the knowledge of an art so conducive to appearance and comfort as weaving is, would speedily extend itself over an area corresponding to the extent of territory capable of producing the required materials. There need, therefore, be no hesitation in offering the fairly well-preserved Florida specimens to illustrate the condition of an Ontario art of which it is difficult to procure illustrative specimens.

All the figures are magnified from four to five diameters for the purpose of bringing out distinctly the character of the meshes.

On of the clumsiest, but strongest arrangements of warp and woof is that shown by means of figure: 3. It differs to the extent of only one or two degrees from the simple 'in and out' texture of the Ojibwa.

grass-mat, figure 32. Here the woof is made to bind two and three strands of the warp in place of only one to another, and in addition to this, the cross threads are made to form loops, passing under four and coming back over two or three warp strands, and this in such a

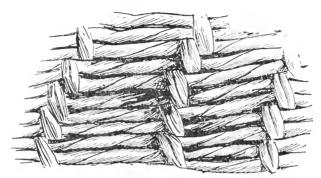

Figure 33-Four diameters.

manner, that the same strands are not bound by adjoining threads of woof. A somewhat similar device was shown to have been employed in the porcupine quill work, figured and described in the fourth Archæological Report 1890-91, p. 23.

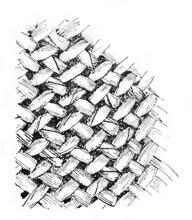

Fig. 34-Four diameters.

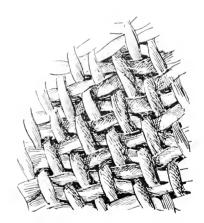

Fig. 35-Four diameters

In figure 34 we see the ordinary, alternate, interlacing of threads just as the work is done by a common loom to-day. In appearance this arrangement is superior to that shown in figure 33, which, however, in point of strength and durability, must have had the advantage.

A much more complicated disposition of the threads appears in figure 35, and one still more so is seen in figure 36, where the mesh is

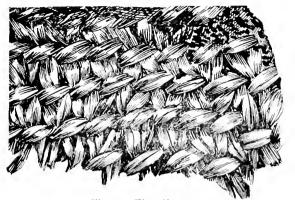

Fig 36-Five diameters.

of such a character as to make it difficult for us to understand how the weaving could have been performed without the assistance of some mechanical device that has hitherto escaped observa-

Although the specimens figured are now of a dark brown color,

we can scarcely doubt that at one time they possessed highly colored patterns, for if there is one thing more objectionable than another to an Indian eye it is lack of brilliancy in hue.

Since the foregoing was written I find that I had overlooked two fairly well-preserved specimens of cloth found by Dr. T. A. Beeman and myself near the east shore of Baptiste Lake, Hastings County, in 1891. In color and general appearance these are almost identical with the Florida specimens, but the threads are somewhat coarser.

Fig. 37-Two diameters.

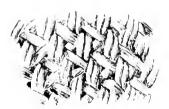

Fig. 38-Two diameters.

The accompanying figures show the character of the mesh in both of these specimens.

It is not quite easy to see how the strongly twisted warp in figure 37 is held together, as the fibre is in a too fragile condition to admit of being handled for examination, but such is not the case with the other specimen, as shown by figure 38, in which both warp and woof may be easily distinguished. In each of these specimens it will be observed that the texture is different from that of any of those from Florida, and it is nearly as certain as anything can be that

meshes of numerous other arrangements will yet be found in this Province.

Those who may be desirous of pursuing the study of this department of primitive handicraft are recommended to read a most original and exhaustive paper on the subject by Mr. W. H. Holmes in the report of the Bureau of Ethnology, Washington, for 1891-92

MEDICINE MASK.

Lig 39

The use of masks for dances and mummery purposes is perhaps as universal as is any human device, and it is not by any means contined to those we called savages, as, witness carnivals, masquerade balls, and theatrical performances. The savage, however, did not employ masks so much for disguise, as to render himself hideous, or awe-inspiring, and he delighted in those that represented bears and other animals, as well as human-looking faces. Fig. 39 is of wood, fitting well under the chin and over the forehead. It is painted red, and among other reasons for believing that it is not very old, is the fact that the bulging eye balls are made of thin metal. Still, as these pieces are fixed over much larger holes in the wood, this may be only a modern addition. The tuft is of horse hair.

Miss Pauline Johnson, from whom this mask was procured, says it belonged to the late chief Ska-na-wa-ti, a celebrated Onondaga Fire-Keeper.* who was also a 'big medicine man.'

^{*}The office of "Fire-Keeper" among the Iroquois, is hereditary, and confined to the Onondagas. It is the Fire-Keeper's duty to take charge of the wampum belts, and to memorize their records We would, perhaps, call him an Archivist.

This is the mask he used when performing his incantations for the making of 'medicine.'

Brass Tomahawk.

Reference has been made in former reports to iron tomahawks of various patterns bearing British and French marks. In many parts of Ontario, these frauds on the Indian are yet turned up with the plough. The best type of tomahawk, however, is comparatively rare. In it the pole is drilled to form a pipe bowl, the handle being bored for use as a stem. Tomahawks of this kind are usually supposed to have been for presentation to chiefs, and leading braves, but no doubt

Fig. 40, ½ dia.

many of them were exchanged for Jeltry. Brass tomahawks are of extremely rare occurence. The one here figured is at the Laidlaw collection, and was found near Balsam Lake. It is of graceful form, somewhat elaborately chased and otherwise decorated, and although not more than one-fourth as heavy as the largest iron weapons of this kind, must have proved much more serviceable as a cleaver in war, or as a calumet in times of peace, only that in the latter case no Indian would degrade himself by smoking anything but a good-old-fashioned stone pipe, as all his people had done before him.

Unlike many of the tools and other things supplied to the Indians, this is a piece of honest work—beautiful and useful. The latter quality it possesses from the fact that the 'bit' is of steel, neatly dovetailed into the brass, but not soldered. I have used the word 'steel,' although the material is as soft as iron, on the supposition that the 'bit' has lost its original hardness since the time it was dropped, a hundred years or more ago.

THE JESUIT STONE.

Fig. 41

The story of the stone here illustrated we can only guess at so far as the rude carving of the figures is concerned. The stone itself is simply a water-worn one, eight inches long, five and a half inches wide, and three inches thick. It is very*regular in form, and perhaps on this account was chosen for a recording purpose by him who, presumably at that date, carved thereon "1641." Found on lot 24, concession 5, (the farm of Mr. Murray.) township of Vaughan, and County of York, we know of no Europeans who were in this part of the country at that time except the Jesuit Fathers, Brèbenf and Chaumonot, who in the spring of that year returned from a fruitless mission to the country of the Neutrals, and were then on their way to Ste. Marie (on the Wye).

The exact route followed is uncertain, but there seems to be some reason for the belief that not far from where this stone was found,

stood the Indian lodge mentioned in the *Relations* as the asylum of the well-nigh famished priests on their homeward journey. The story as briefly told by Parkman is as follows:—

"The mission was barren of any other fruit than hardship and danger, and after a stay of four months, the two priests resolved to return. On the way, they met a genuine act of kindness. A heavy snow-storm arresting their progress, a Neutral woman took them into her lodge, entertained them for two weeks with her best fare, persuaded her father and relatives to befriend them, and aided them to make a vocabulary of the dialect. Bidding their generous hostess farewell, they journeyed northward, through the melting snows of spring, and reached Sainte Marie in safety."

Dean Harris in his History of the Catholic Church in the Niagara Peninsula, Appendix B., page 339, discusses the "Jesuit Stone" somewhat thoroughly, and any who may be interested in this matter cannot do better than refer to the Dean's volume.

STONE TOOL WORK.

Fig 42, 35 feet long

It is always difficult for us to understand how early man accomplished so much as we know he did, with the primitive appliances at his command. There is no doubt that he employed fire, to a large extent, in the felling of trees, and in the shaping of boats, and of many other wooden articles, no trace of which now remains.

We are not warranted in supposing that our Indians ever made any but the simplest attempts in wood-carving, still, even these must have been slow and laborious. But he was not in a hurry. No master demanded a 'stint'—in fact he had a lifetime, long or short, before him for the accomplishment of his task.

Fortunately we possess a very good example of wood-carving executed by a savage in the 'stone age'—an age that but recently existed in many of the Pacific islands, and which, perhaps, exists in some of them yet, as it does also in other places. The example referred to is shown in figure 42, which represents what the white man calls a 'pudding-dish,' or a vessel in which the New Hebridean pounds his bread-fruit, and mixes it with cocoa-nut milk. The pound-

3 AR. 33

ing-stick is seen lying on the top of the dish.' The wood of which this utensil is made is of close texture, very hard and heavy, and resembling logwood, or old mahogany, in color. It measures nearly three and a half feet in length, and one may see at a glance the amount of labor that has been required to hew, or hew and char, this 'pudding-dish' from a log. As is not unusual, the workman aimed at producing something ornamental as well as useful, and here we have not only two long feet or rests (not at all necessary), but a notched margin all round, and a fairly well executed human head and neck, The pounder, too, is quite ornate. For this and numerous other equally instructive specimens, we are indebted to the generosity of the Rev. Dr. Joseph Annand, at the head of the Presbyterian mission in the New Hebrides.

RECENT PRIMITIVE POTTERY.

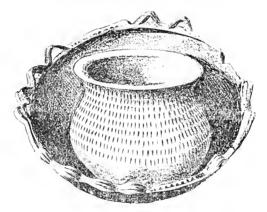

Fig. 43,

Students will find the specimens of pottery here figured of great interest for comparison with clay vessels found in various parts of America.

The two vessels are very different in style and appearance—so much so that one would not recognize them as being from the same locality—the New Hebrides Islands. The larger vessel is dark in color, and does not look as if it had been very well burnt. It is eleven inches in diameter, and only about three inches deep. The smaller one $(6\frac{1}{2}$ inches in diameter) is bright red, and seems to have been thoroughly burnt. Not only do the shapes differ but the styles of decoration are totally dissimilar. The latter is, probably, of more modern production than the former, but on this point there is no information. From Rev. Dr. Joseph Annand, New Hebrides.

CHRISTIAN ISLAND

When the Hurons were driven from Sainte Marie in March. 1649, when, in fact, as a nation, they had ceased to exist, their condition was most pitiable. Even without an insatiate enemy to face they would have found it difficult to maintain an existence, for but little was left of the last year's miserable harvest, and the season was not far enough advanced to afford even a bare sustenance from the roots, bark, and leaves, to which the natives were not unfrequently compelled to resort during similar periods of scarcity.

Utterly disheartened by their misfortunes, and knowing full well that as long as a Huron lived the Iroquois would hunt him to death

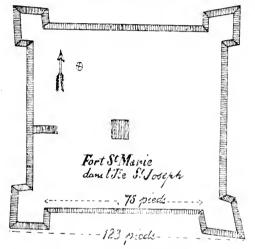

Fig. 44. (From Ducreux' Map.)

they destroyed all their villages, and betook themselves to such places as they thought most likely to yield them protection.

At first the Missionaries and those who remained with them resolved to betake themselves to Manitoulin Island, but afterwards, on the representations of twelve Huron chiefs who had been absent when this decision was arrived at, they determined to form a settlement on the island of Ahoendoé,* which was known to the Jesuits as Isle St. Joseph, in honor of the saint to whom Brébeuf had dedicated the mission.

It required three hours for these chiefs to convince their brethren and the missionaries that Ahoendoé was preferable to Manitoulin,† or, as it was known to them, Ekaentoton.

† Manitoulin is of Objibwa origin.

^{*} Ahoendoé. Perhaps the pronunciation would be better represented to English readers as Ahwhendway. On some maps it is called Charity Island, the adjoining and smaller ones being marked Faith and Hope.

Everything movable was transferred from Ste. Marie to St. Joseph and the old fort was set on fire to prevent the Iroquois from gaining any advantage by its possession.

Near sunset on the 14th June, 1649, the fugitives embarked with all their possessions, on a boat and raft, both of which had been constructed for this occasion.

Without any assistance from wind, the voyage was a most laborious one for the half-starved creatures, both white and red, who were crowded on the craft; and we are told that "several days clapsed before they reached their destination" on Ahoendoé Bay, about twenty miles westwards, by the circuitous route they had to follow, although scarcely more than fifteen in a direct line.

Here they built a fort, and named it Sainte Marie, in fond remembrance of their hopes and disappointments during upwards of ten eventful years, in their similarly constructed place of defence on the mainland.

The works themselves have been described in narratives by the priests.* and frequent references have been made to them by subsequent writers, but in view of the fact that such articles are not generally available, and on account of the interest that is now more widely taken in all that pertains to the history of our country, the Minister of Education expressed a desire that the old Ahoendoé fort should be carefully examined—if possible, explored—and the results made public.†

I accordingly spent several days on the Christian Island about the beginning of October, the intention being at the outset to lay bare all, or part of the foundation of the walls, and to make openings here and there within the enclosed area. The condition of the walls, however, is such as to require a much larger expenditure in money and time than I was authorized to incur, and the swampy nature of the soil was not conducive to successful digging deeper than a foot or eighteen inches.

In its present state the place is scarcely more than recognizable as having been the site of a building, for the inland wall is but little above the ground level, as are also the inland ends of those that run back from Ahoendoé Bay, most of the stones having been removed to assist in building a pier or landing place for steamers, a few hundred yards away. The lakeward half of the fort is covered with heavy

^{*} Raguenau in his Relation des Hurons, 1650, supplies many details, and the appendix to Bre-sani's Relation Abrégée, (Montreal 1852), not only gives measurements, but plans of both Forts Sainte Marie.

⁺ Mr. Bonner of the Collingwood Col. Inst. in correspondence with the Department directed attention to the desirability of this work.

underbrush, and some portions of the old wall still stand about three feet high, the original face being in full view.* See figure 45.

The first thing that must occur to a visitor, here, as well as at Ste. Marie on the Wye, is that the choice of situation for defensive purposes was European rather than Indian, for it is within forty yards of the present lake level, and as the water was probably higher then than it is now, the shore wall may not have been originally more than fifty feet distant. Our Indians, on the contrary, usually selected as places of abode those that were half a mile or more from any point approachable by canoe. The modes of defence and attack in each case make the reason obvious,

The sides of the structure correspond with the cardinal points, the south wall being parallel with the shore line. This wall is said to have been fully twelve feet high, and it is not likely the others were much less. The enclosure was in the form of a square, the opposite sides of which were one hundred feet apart, with a bastion at each corner.

The choice of this spot for the fortification would seem to have been made on account of a strong spring which rises as nearly as possible in the centre of the works. This spring had been walled up to form a large oval well, the exterior diameters of which were six and twelve feet, but scarcely any of the structure is now in position. On the south edge, at the outlet, the wall is quite gone, so that what remains has a horseshoe appearance.

All the masonry has been put together with lime mortar, a fact that illustrates not only the great pains that were taken to render the place one of security, but the intention—perhaps, rather the determination, to render it a permanent abode.

In connection with the production of lime for so extensive a work in such circumstances, it may be mentioned that, Solomon Mark, an Indian of Christian Island, volunteered to the Rev. E. T. Douglas and myself, the statement that he had discovered, about fifteen years ago, within some fifty or seventy-five feet of the fort, what he described as "a pit, nearly twelve feet in diameter and six feet deep, filled with lime," and that this lime was used by the villagers for whitewashing

^{*} Editorial note in Bressani's Relation Abrégée, page 333.

[&]quot;Fort Ste. Marie on St. Josel h's Island (now known as Charity or Christian Island), is built, as we learn from history, on the south-east side, at a little distance from the shore. Its ruins shows to advantage on the now deserted ground. They were measured June 21-t, 1845. In 1848, while digging among them, some curious objects were found which afford proof of historic traditions. The most remarkable of these, and that which attracted and had with good reason, the most public attention, was a mould to make wafers. It was at once purchased by an amatuer and sent to an English museum."

purposes. In any case, the material in question could hardly be called quick lime, but it appears almost certain that it must have been produced when the fort was erected, and suggests to us the method that was probably adopted by the builders to supply themselves with what was so necessary for their purpose, namely, the digging of a pit to hold a considerable quantitiy of wood upon which were piled lumps of limestone. Even more primitive plans are sometimes followed by pioneer settlers, as when they simply throw a few stones into a burning log-heap on the surface of the ground, and succeed thus in getting a modest supply of lime for "chinking" * purposes. As the soil here, for several hundreds of yards inland, consists chiefly of sand, but little damage would ensue from the inevitable mingling, to some extent, of the two materials.

The inland portions of the fort are constructed mainly of flat stones, that look as if they had been removed from ledges along the shore (whence, perhaps, also were procured those required for burning) but the shore-wall and the southern portions of the other two connected with it, consist chiefly of stones that are somewhat waterworn, leading one to conclude that this part of the fort was first built, and from material found lying loose along the water's edge, many of the stones being what are known as "hard heads," and of a size too great for a man to carry them very far.

That the stones were laid under European direction if not by European skill is evident, for care has been taken to "break the joints," a very simple and valuable device that was not known to such highly ingenious aboriginal mechanics as the Aztec masons. Figure forty-five shows this feature, as well as the shape of the stones in the shore wall, the sketch having been made from a point near the south-west bastion, where the wall is still about three feet high.

The outline of three bastions may yet be traced with some diffidifficulty, but the north-west one has, during comparatively recent years, been used as a lime-kiln, and is consequently much disfigured.

In the diagram on Ducreux' map of the old Huron country, (Bressani's Relation Abrégée, Montreal, 1852, page 280), the bastions of the fort are not shown as of uniform size or shape, but this is probably the result of carelessness in drawing. The three now traceable resemble the south-west one on the plan, the space between the side walls being in each case nine feet, the distance between the first and second angles of the bastion, eight feet, and from the second angle to the extremity, twenty feet.

^{*}Chinking-the filling up of spaces between tree trunks that form the walls of log-houses.

According to the diagram thus mentioned the distance between the extreme outer angles of any two bastions was 123 feet, and this corresponds with the measurements made by myself. I was, however, unable to find any traces of an interior structure, perhaps because the ground was too soft to support one's weight near where the square structure is marked on the diagram, neither does much remain of the inward wall on the west side.

As long as a single stone remains to mark the position of this ruin, and even after every trace of the fort has vanished, the place and its story must possess more than ordinary interest to every Canadian. In the history of Canada, and especially in that of Ontario, the Hurons and the episode of the Huron mission, furnish us with material characteristic in no ordinary degree, of native life and Christian enthusiasm.

That the rock of Christian Island belongs to the Trenton formation seems clear enough from the nature of the fossils, and this is also evidenced from the traces of petroleum that find an outlet with numerous tiny streams of water along the shore. Half a mile or so north of the fort is a small lake without apparent outlet or inlet.

Fig. 45-The last standing wall of Ste. Marie.

Pagan Burying Ground.

About half-a-mile west of what may be considered the village proper, on Christian Island, is the pagan village, consisting of a few scattered log houses, to the east of which is the pagan burying ground, Both places are so-called because, as may be surmised, the pagan members of the band chose to reside thus, somewhat apart from their Christian fellows.

Judging by the extent of the village and the graveyard, the number of professing Pagans must have been small since the present Mississauga band came to the island, and at the present time every one on the reserve—some two hundred and fifty in all—is connected with either the Methodist or the Roman Catholic Church, the former being greatly in the majority. The last pagan, George King (Ah-wun-kwat, or Fog Cloud) died about two years ago, at an advanced age—between eighty-five and ninety, it is supposed.

The graves have been dug without much regard to order, and this is the more noticeable on account of the little wooden structures that have been erected over them, all of which, with two exceptions, are in a ruinous state. The covering consists of low, open frame work supporting a roof, the ridge of which is scarcely more than three feet from the ground. Beneath most of these there is apparently but one burial

Fig 46.

in each, but under the structure now in the best state of preservation, there are three, as may be seen from the sub-coverings over each grave, all the other graves have similar inferior coverings.

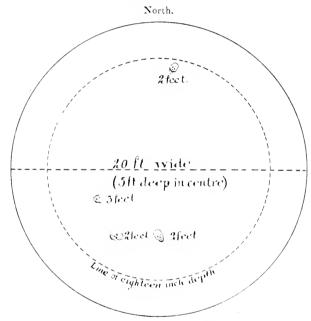

The most recently made coverings are shingled, but in the older ones, the roofs are constructed of boards running up and down. Formerly, bark was used for this purpose, and is, indeed, still so employed in the more out-of-the-way parts of Algoma.

Only two grave coverings remain in anything like a good state of repair, all the rest have been utterly neglected, and as no attempt has been made to form an enclosure, cows and pigs roam over the ground "at their own sweet wills," making sad havoc. Even although it is only the pagan burying ground, its present condition is not at all creditable to the Christians.

Ahoendoé Ossuary.

An irregular, sandy terrace runs parallel with the shore, and about five hundred or six hundred yards away. On the summit of this terrace, at a point nearly north of the Catholic church, but north-

west of Ste. Marie Fort, Mr. Alfred McCue, the chief merchant and trader on the island led me to an ossuary, twenty feet in diameter. It is believed by the Indians on the island that this was the burial place of the French Jesuits who died during the brief occupation of the place by the Hurons in 1649-50. While it is not impossible that this communal grave was made by Hurons who resided on the island long before the time of the great trouble with their kinsmen, the Iroquois, it is more likely that here were buried many of those who died during the dreadful winter from famine and disease, for it is stated that of the six or eight thousand who here found on asylum, not fewer than three thousand died before spring. We know that as deaths occurred

Ahoendoé Ossuary. - Fig. 47.

"by scores daily," many bodies were buried in the earth, and in the snow by the priests and their men, and it may have been that, those corpses which had only the snow for a covering were collected in the spring, and some of them at least re-buried in this pit. As the o-suary had been partly opened some years ago,* the bones near the surface were quite fragmentary, but even at a depth of from four to five feet they were much decayed. This may have been owing to the sandy nature of the soil which admits air as well as water much more readily than loam or clay does. The degree of surface depression

^{*}As is so often the case, this pit was supposed to have been the repository of treasure hidden by the missionaries on their hasty retreat from Ahoendoé!

was such as to indicate the burial of the bones of four hundred or five hundred persons, but on account of the disturbance already referred to, no certainty could be attached to this sign. As the digging proceeded it was plain that those who had formerly opened this pit did not reach the bottom of it, except, perhaps, just about the middle, which was five feet below the general surface level. The whole excavation was originally basin-shaped as all ossuraries were, but in this case the bottom rose more sharply than usual from the centre to the sides, probably because the nature of the soil did not permit of going very deep round the margin of the hollow.

Within three feet of the edge the bottom was not more than eighteen inches deep, but no remains or the signs of any were found so near the outside level. Towards the south-west of the pit, two bodies were found lying on their right sides with the legs drawn up in front, but the bones were much decayed. Only four skulls in poor condition were here procured. The situation of those in the mound may be seen in the diagram. As has been intimated above, the bodies appear to have been buried in the flesh, thus affording us another reason for believing that the ossuary was formed in the spring of 1650, for, as is well known, the usual practice was to bury only the bones in such places, at intervals of some years after temporary burial elsewhere.

This Ahoendoé burial pit may not be the only one on the island, although inquiry among the Indians failed to elecit further information on this point, and the time at my disposal was too short to make an examination of the ground. It is highly probable, however, that others exist, dating from a period beyond the time of the Hurons brief but eventful occupation under the Jesuits in 1649-50.

I have to thank Mr. Collins, keeper of the lighthouse on Ahoendoé Point, also the Rev. and Mrs. E. T. Douglas, of Indian village for many kindnesses extended to me during the days I spent on the island. To Mr. Alfred McCue, too, I feel much indebted.

BRANTFORD TOWNSHIP.

On information received from Mr. H. C. Roberts, of Paris, I visited in July, with him and Mr. Jefferson of the same town, a farm in the township of Brantford, for the purpose of examining numerous large depressions in the soil, and which Mr. Roberts supposed to be ossuaries. A very cursory glance showed the hollows to be simply the result of sinkage, and where these were tested to the depth of two or three feet with the spade, evidence to this effect was rendered complete.

WHITEMAN'S CREEK.

A drive of a few miles farther brought us to the mouth of Whiteman's Creek, said to have been so-called from the fact that the land in the vicinity was owned, or occupied by a white man who had been reared among the Indians, and was known to them by this name.

It is told that Whiteman had a daughter (a half-breed) who drowned him, because she believed him to have hidden somewhere a large sum of money, her hope being that rather than lose his life he would divulge the hiding-place of his treasure, but this he did not do, probably for the very best of all possible reasons. The place is still pointed out beneath some trees, where his treasure is said to have lain.

Another story is that after this event, some Indians came along to Whiteman's old dwelling house which was then occupied by a man named Davidson, and that during their search for money they undermined the old chinney, which, in consequence, fell.

Whiteman's Creek here enters the Grand river from the southwest, flowing through some fifty or sixty acres of fine meadow land bearing a few straggling trees.

On a low plateau about ten feet above the level of the Grand river are traces of an old village site, and indeed, on the lower ground as well, it is plain that Indian occupation existed on both sides of the smaller stream.

MALAHIDE TOWNSHIP.

CIRCULAR RIDGE, NEAR MT. SALEM.

Mr. G. C. Peacock, of Mount Salem. Malahide Tp., in the County of Elgin, wrote that he surmised the existence of an artificial bank surrounding a swale within a short distance of his residence. Accompanied by Mr. Peacock and Mr. D. H. Price, of Aylmer, the place was visited during the summer, but the bank was found to be of purely natural formation. In some respects it was not unlike the other and much more extensive one surrounding Lake St. George (elsewhere referred to), and, as in that case, seemed equally difficult to account for as a result of natural action.

It was unnecessary to make any openings here, as several excavations, made either to procure sand, or to dig out woodchucks, were sufficient to show that no displacement had been effected since the material composing the bank was laid down.

EARTHWORK IN MALAHIDE.

Mr. Price and I afterwards examined very closely (but exteriorly only) a long and slightly curved mound, a bank, clearly the work of human hands, on the farm of Messrs. Baker and Pound, in the same township.

The annual report for 1891 contains a reference to this work, but on this occasion I viewed it with more experienced eyes. Its general direction is north-east and south-west, and following the curve it measures eighty-eight feet in length. In breadth, it is from twelve to fourteen feet across the base, and seldom rises more than two feet and a-half above the level of the field. Away to the east four hundred and thirty-two feet, is an ash-heap fifteen feet in diameter and fully four feet high.

This place is worthy of further and much closer examination, the whole field apparently having been a place of human resort in pre-historic days.

ORILLIA TOWNSHIP.

Lake St. George Ridge.

Upwards of a year ago Mr. J. P. Secord, of Orillia, directed my attention to a bank or ridge almost surrounding a small body of water known as Lake St. George, some nine or ten miles north of Orillia, and not more than a mile from Lake Couchiching. On my return from Christian Island last autumn, I remained a short time at Orillia to examine this bank, and although I had to regret the inability of Mr. Secord to accompany me, I was fortunate in getting Mr. Hale, jun., of the *Packet*, as companion and assistant.

Lake St. George lies a little to the west of the Muskoka road, and occupies from 100 to 110 acres of lots 9 and 10, on the 13th concession of North Orillia. It has no apparent inlet or outlet, and is said to be from fifty to seventy-five feet in depth

Here, undoubtedly, we found a bank of very artificial looking formation, and we decided to follow it round the lake in a general way at first, and afterwards to make some examinations in detail, if such should be thought desirable. We thus found the ridge to vary in width from nine or ten to thirty-eight feet. At the eastern end, for a distance of a hundred and ninety-two feet there is no ridge whatever. South of this gap the slope of the ground is to the outside only. On the south-west side there is a portion that is not more than ten feet wide and two and a-half feet high, on the outside of which lie several granite boulders, and a little farther westwards there are numerous similar stones in the bank itself. A little west of

south, the ridge widens to thirty feet, and rises to three and a-half, the outside being higher than the inside.

On the south there is an elevation about twelve feet high, between which and the ridge proper there is a trough about two hundred feet long and two and a-half feet deep, and at intervals along both elevations boulders appear. In walking over the whole of the bank, we found it to be within from twenty to fifty feet of the water, except at the west end, where the distance between the two must be nearly a hundred vards, the intervening space being mostly a bare bed of limestone. Near the middle of the ridge at this end we had several cuts made to ascertain the nature of the structure interiorly. One cut was made from the inside to the crown on a level with the base-a distance of seventeen feet horizontally, and five feet six inches deep. Near the lower part of this cut there were no stones of any account, but within twenty inches of the surface, near the crest of the ridge, a large slab of limestone was exposed, measuring six feet nine inches by five feet six inches and five inches thick. Six inches below this lay another similar slab somewhat thicker, but the length and breadth of which we did not ascertain. Both stones were lying as horizontally as if they had been placed in a wall. Other cuts were made a little upwards of a hundred feet north, but while in no instance was there any sign of disturbance by human hands, it is equally true that there was an absence of that stratification which more or less regularly marks deposits of sand or gravel laid down in, or thrown up by means of, water. The bank here, and, indeed, more than half way round, consists chiefly of exceedingly fine, light, yellow sand.

It is unaccountable why such a bank should have been constructed by human hands to surround such a small body of water.

Notwithstanding a belief on the part of some that the strocture represents a huge serpent, I failed to observe a single feature that would confirm this view. I understand that many intelligent residents in the vicinity of the pond regard the ridge as the result of ice-action—of what are called "ice-shoves," and Mr. G. E. Laidlaw in an Orillia paper cited numerous instances known to him of similar elevations thus formed in the county of Victoria. My own want of knowledge regarding action of this kind does not warrant any opinion, but whatever may have been the agency by means of which this remarkable ridge was thrown up, I am now convinced that it had not an artificial origin.

Thanks are due to Mr. J. P. Secord, and to the Messrs. Hale, senior and junior, of the Orillia *Packet*, for many courtesies.

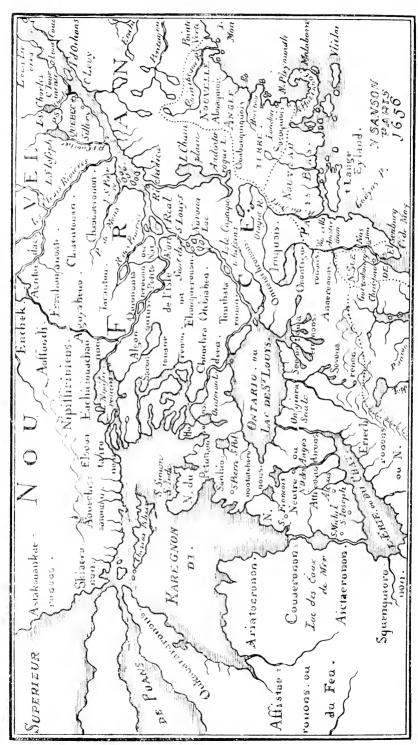

Fig 48.

OLD MAPS.

Sanson's Map of Canada.

Every student of Canadian history during the French period meets with frequent references to Sanson's map of "Le Canada, ou Nouvelle France," published at Paris in 1656. Original copies of this map are extremely rare, and reproductions are so far from being common, that it has been thought well to present here a copy of the portion which includes so much of Ontario as was connected with the "Mission to the Hurons," indeed, all that until recently, constituted this province.

As in the case of all early maps of any country, we have here a considerable mixture of knowledge and the want of knowledge, and, taking everything into account, the former is even more remarkable than the latter. Although somewhat distorted, the prominent features of the country are indicated.

The Ottawa route from Montreal to Lake Nipissing is marked with tolerable accuracy, except that by means of the Mattawan, or Mattawa, a clear channel is shown into the lake. It is noticeable also that although Allumette I, is indicated about half way between Nipissing and Montreal, Calumet Island is omitted. French River assumes the dimensions of a lake containing two large islands, and the whole eastern shore of the Georgian Bay was as puzzling to the old geographers as it is to-day to a sailing novice, with its maze of islands and inlets. The chief headlands and corresponding bays on the opposite shore seem to have been better understood, but not so the Lake Huron coast, and when we reach the southern end of the lake, we find that from this point to Lake Eric the outline is quite astray, yet not more so than would be the result should one of ourselves attempt to show the course after a canoe trip with no other guide than a compass. It will be noticed that the lakes also are disproportioned, especially Lake Huron, the western side of which must have been almost, if not quite, an unknown land

The Tobacco Indian Country is represented as extending from what we now call the Bruce Peninisula to a line running west from Burlington Bay, if we accept as our authority, the arrangement of the letters "N. du Petun ou Sanhio=nontatehero=nons," while the Hurons in like manner occupy both sides of Lake Sincoe, or as it is here named "Oentaron" Lake, and afterwards "Toronto."

As it is yet undecided what the word *Toronto* means, and as it is claimed on very good authority that in all probability it is derived

from the name of some Indian clan, it is interesting to observe that on this map are several names bearing quite as close a resemblance to Toronto, as "Ongiara" does to Niagara. Here, besides Oentaron, we have Sanhionontatcheronons, for example, an exceedingly tempting word to mutilate and abbreviate in true English fashion: east of Lake Ontario, we see Tonthataronon, and almost due north of it, beyond the Ottawa, Tarantou or Taranton, it is not clear which, even on the original map.

Perhaps the most interesting feature of Sanson's map to us is the attempt that has been made to mark the positions of the Jesuit mission towns. Numerous historical students and scholars have attempted to fix the exact spots occupied by these mission stations by the aid of this and other maps, as well as by severely critical study of the "Relations" and letters of the missionaries, but it would seem in some instances at least, quite impossible to say definitely where a village was. Perhaps on the completion of the work now engaged in by General Clark of Auburn more satisfactory results will be reached than have been attained hitherto.

Mr. James H. Coyne in his paper "The Southwold Earthworks and the country of the Neutrals," which appeared in the Archaeological Report for 1892-93, page 25 refers somewhat fully to this map, stating that the compiler had no doubt procured his information from one made by Chaumonot, but "which is not extant." Elsewhere on the same page, Mr. Coyne gives it as his opinion that Sanson's is "probably the first printed map in which Lake Eric is shown."

Before closing this notice of the map, it may be observed that the Cheveux Relevés are marked as occupying Manitoulin Island, and as we know that Champlain paid a visit to a branch of these people southwest of the Tobacco Nation Country, their range was evidently one of considerable extent, and tends to lend color to what is assumed in this report under the heading "Victoria County," that they also occupied territory north and east of the Hurons.

For much that is of interest relating to the map, readers are referred to Mr. Coyne's paper already mentioned.

Although the next map (fig. 49) is probably more recent than Sanson's by at least a hundred years, there can be no claim made for it in point of greater accuracy. Still, an examination of it may prove interesting. The "Huron Country" is not here any longer, but only "The Countrys conquered by the Five Nations." The St. Lawrence between Montreal and Kingston is the "Cadaracui River," and Kingston itself is yet only "Fort Cadaracui."

In these days of rapid transit by steam and electricity we may well be struck by the intimation that a certain half-dozen dots between the Hudson R. and the southern extremity of Lake Champlain

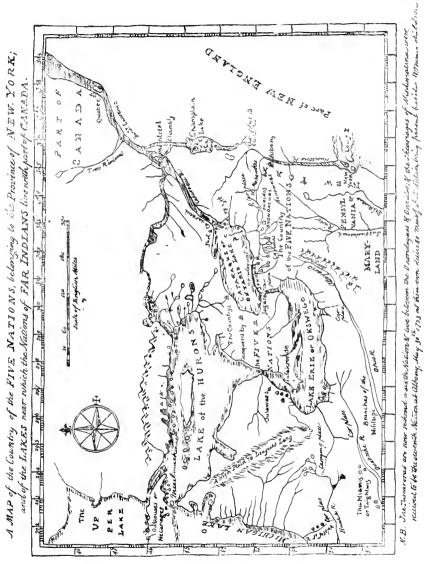

Fig. 49.

mark the "Carrying Place to Canada," and it will be observed also that according to this map-maker the only "Part of Canada" worthy of notice was around Quebec. We find also another "Car. Place" (Carrying Place) at "Jagara," or, as we would say, Niagara.

4 AR. 49

NORTH VICTORIA.

Mr. Geo. E. Laidlaw's unremitting efforts in Victoria County, like Dr. T. W. Beeman's in Lanark, have done much to open our eyes relative to the extent of aboriginal occupation, and the comparative density of the population at some time, probably not long prior to the discovery of Canada, with not a little to show that long before this period the land had been in possession of a people similar to the more recent occupants, but not identical with them.

If we accept ossuary burial as a characteristic cu-tom of the Hurons, then neither the former people nor those whom Champlain met with when passing through this district in 1615, were of Huron-Iroquois origin, for not a trace of such form of burial has been found in the district in question. In fact, scarcely anything has been discovered in the shape of a grave of any kind. This, also, has been Dr. Beeman's experience further east.

Diverse as are the patterns of pipes in a given locality, there is something in them—something, which, to employ an art-criticism term, may be called their 'feeling' that enables us to distinguish them as the work of makers, more or less remote from other makers, whose workmanship is of different 'tone.' But in this quality there is no perceptible difference between the pipe-art of those who occupied North Victoria, and the Hurons who ranged from Toronto to Penetangushene. In both cases there is a scarcity of slate "ceremonial" or "banner-stones," "bird-amulets," and even (though less so) of the plain "gorgets" or "tablets" with one or more holes through each.

On the other hand, clay and stone discs from an inch to two inches in diameter seem to be more abundant north of Balsam Lake than anywhere else, but this may be owing to the shorter period during which this portion of Victoria has been under cultivation, and the assiduity displayed by Mr. Laidlaw in bringing all such objects together, and the same remark holds good with respect to fragments of pottery, except that Bexley and neighboring townships in Victoria county have yielded pieces bearing ornamental designs quite unlike any found elsewhere.

What would seem most probable is that the occupants of the territory in question were of the Cheveux Relevés three hundred of whom were first seen by Champlain in the autumn of 1615, near the mouth of the French River. Parkman writes of these people in a foot-note, page 365, "Pioneers of France in the New World," that they "belonged to a numerous Algonquin tribe who occupied a district west

and southwest of the Nottawasaga Bay of Lake Huron, within the modern counties of Bruce and Grey. * * * The Ottawas, a kindred people were afterwards * * * called Cheveux Relevés by the French."

Champlain visited this clan or band in the winter of 1615-16, and "commends them for neatness and ingenuity, no less than he condemns them for the nullity of their summer attire," * referring in his condemnation to what he had observed the previous autumn, when he said "not one of our courtiers takes so much trouble in dressing his hair * * * but they do not wear any clothing."

That the same people occupied much of the country east and north, as well as west of the Hurons is not unlikely. Their northern limit may even have touched the southern one of the "Sorcerers" or Nipissings. At any rate, the character he gives the Cheveux Relevés for "neatness and ingenuity." will apply in many respects to those who lived in North Victoria.

We know quite well that the Hurons were in frequent alliance with neighboring Algonkin peoples for offensive and defensive purposes against the Iroquois, and even during peace-times there must have been a considerable amount of intercourse between those of different stocks, and it is quite natural, therefore, to infer the operation of mutual influence in more ways than one. In this way we may account for certain similarities as well as dissimilarities observable in the handicraft and customs of the Hurons and their Algonkin neighbors.

Mr. Laidlaw's paper contains much that is confirmatory of this view. Some of the most ingeniously made specimens found by him will be found illustrated and described elsewhere.

BALSAM LAKE AND VICINITY.

BY GEORGE E. LAIDLAW.

During this present season—1897—I examined this territory more closely than ever before, with a corresponding increase of results.

I find that the spring is the best time of the year for examining sites, etc., especially on ground that has been ploughed in the fall, as the action of the frost, snow and weather during the winter, levels all the plough ridges and other irregularities of the surface, and leaves even minute objects exposed to the view, before being disturbed by the spring operations.

^{*}Pioneers of France in the New World, p. 384.

Besides searching for relics and examining the sites referred to in previous reports, and those that were brought to my notice for the first time this year, a portion of time was devoted to plotting some of the sites, and determining by means of pacing, the dimensions and relative positions of the ash beds to one another, as is shown by the accompanying plans, and by others that do not here appear.

'Ash beds' in this article signify those that were created by the thoors of dwellings or habitations and are distinguished by the discoloration of the soil: while 'ash heaps,' or 'ash pits,' are those refuse-heaps which occur generally on the outskirts of the village, and which were created by dumping the refuse of the village.

It is interesting to note that though the majority of the ash beds are circular or slightly oblong in form, there are occasional ones of a length three, four or many times their breadth, showing the habitation to have been of that class known as "long houses," much affected by the Huron-iroquois nations. In these sites the main dwelling seems to have been in the centre with an irregular circle or group of others around it, and was probably the pioneer dwelling of the place, the chief's residence, or council house. These latter sites Mr. A. F. Hunter of Barrie designates as Algonkin, using for a modern illustration the disposition of the Algonkin camps in the North West. beds, which show that the habitations were "long houses," he places as Huron, though only one pure example occurs in the vicinity. But what about the sites in which both sorts occur? Were these villages peopled by both Algonkins and Hurons? Or does it show that the "long houses" were evolved from several of the other sort joined together for better accommodation and defence? It is noticeable in several of these long beds that they are accentuated at several points, as if the foregoing did occur. Admitting the preceding, one can readily understand the origin of the custom of relegation to distinct parts of the "long house" of the families inhabiting it, as in vogue amongst the Huron-Iroquois tribes. Some of the beds are very large and very distinct, as if occupation lasted a long time, whilst immediate neighboring ones are the reverse. Some beds show that additions had been made to the original dwellings.

Scattered here and there amongst the main beds are very small ones (not marked on plans) which may have been outside places for cooking and for baking pottery; these are generally from four to six feet in diameter, and contain no relics. The main beds, especially the centre ones, contain the most relics, showing that they were occupied longest and accumulated more refuse material. The refuse heaps

seldom contain whole or perfect specimens, but abound in large quantities of broken pottery, bones, etc., from which one concludes that the Indians had no systematic house cleanings, but as the ashes in the fireplace bulked up so as to be in the way, they were removed to the dump-heap, whilst the remainder of the debris-floor was left intact.

Brèbœuf in his Relation of 1634-36, gives the dimensions of Huron houses from "two to forty brasses (fathoms) in length, and about four brasses in height and width: that they were made of bark, branches and slabs of wood, were very inflammable, often whole villages being swept away." This latter fact may account for the number of sites in one district. He also further states "that the houses had no windows, chimneys, garrets nor chambers." and though mentioning corn bins does not place them, which, according to Cartier, were in the tops of the Hochelagan houses. The absence of granaries in the Huron houses would account for the câche pits around the village.

In any case I failed to discern or to learn about any palisades, though some of the villages may have been palisaded in the same fashion as Hochelaga. Compactness of a village induces one to believe that it was palisaded, though no traces of palisades remain. Straggling villages occupied too much space, the palisading of which would involve an immense amount of labor; the risk of fire also acted as a deterrent. One of the reasons that the sites in North Victoria, North Ontario and South Simcoe districts were small and not palisaded, may be that they existed before the necessity of concentration and defence, at advantageous points, against their Iroquois foe; hence the large fortified towns of North Simcoe.

The sites of this locality are not on the tops of the highest hills, but are generally on lower elevations; in some cases very high hills being in the immediate neighborhood, similar to localities chosen by the North West Indians of the present day, which afforded seclusion, safety from surprise, and not being immediately on the main trails or water courses, high hills in the vicinity being used for lookouts, or for signalling purposes. In accounting for the absence of sites in the granite regions, might not this theory be advanced, that as the surface of the ground consists of steep continuous granite ridges and hills, with narrow valleys between them, and that the valleys are generally dense swamps and beavermeadows, very wet for the greater part of the year, and very little if any land suitable for the growth of such cereals as the aborigines cultivated; that the choice for sites would naturally fall upon the dry elevations of the limestone region? The granite region being resorted to for hunting and fishing.

Among the sites examined the following new ones may be described, the first being one on J. Newby's farm, lot 2, concession 11, Mara township, N. Ontario. This site is on the east side of a small creek running into the west side of Mud Lake, and is distant one mile north of Upper Mud Lake and one mile west of Lower Mud Lake, whence there is direct canoe route to the Huron country. The village consists of two ash beds, thirty-nine by ten paces and forty by eight paces respectively, distant sixty-seven paces from each other, and having a north-westerly direction; ground saitable for aboriginal cultivation. The ground being covered with crops, only a slight examination could be made of the ash beds, but they yielded clay pipes of the cornet type, unio shells, celts, bone awls, pottery fragments, etc. No relics showing contact with white men have been found here. This site is clearly Huron.

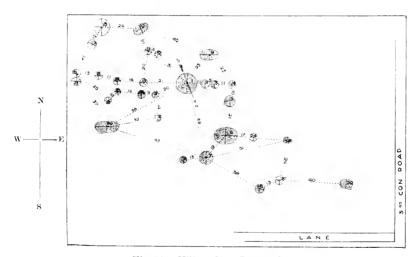

Fig. 50.—Village Site, Lot 23, Con. 3, Eldon.

The next site to be visited was on W. J. Stanley's, lot twenty-three, concession three, Eldon township, north Victoria. This is a very compact site situated on the north side, and at the foot of a high hill, known as Logan's hill, with Butternut Creek to the north some rods away. A large spring exists some few yards to the east. This site consists of several main beds, a large central one and numerous small ones, all very distinct, some being remarkably pronounced and yielding great quantities of relics of which I succeeded in obtaining, bone awls, needles and beads, clay pipes of various forms, stone beads and discs, pottery fragments and pottery discs, carbonized corn, worked unio shells, celts, and two varieties of perforated marine shells, one a

cowrie, the other a dog whelk. What impressed me most was the abundance of water-worn pebbles in the ash beds, these ranged in size from that of a plum to that of a goose egg showing few marks of wear or use: they may have been used as a missle, or in that form of a weapon known in the North-west as a "coup stick." Of the ash beds, some would give one the impression that additions had been made to the original dwellings, while others, though in rows and quite near each other are distinctly separate, and being round or oval grouped round a central bed would be Algonkin. Absence of flints from the site leads one to suppose that the village was of the stationary or agricultural class, especially as the locality is pre-eminently suitable for aboriginal cultivation. Butternut trees and wild cotton still abound. No relies showing contact with white-men are found and no graves are known to exist.

Another new site is situated on the east side of Big Mud Turtle Lake, one of a chain of lakes now being utilized by the Trent Canal system, on lots 57 and 56. Front Range, Somerville township, Mr. G. Rumney being owner. This is a small site, one-half mile from the lake, and is on an elevation, with a higher elevation to south-east and a small valley to south-west. Across this valley, one quarter of a mile distant, on J. Wallace's farm, lot 60, Front Range, Somerville, are also evidences of aboriginal occupation, which may be an instance of an isolated camp. A large spring exists in the valley between the two localities. There was a primeval growth of large pine timber on these two sites some twenty-five or thirty years ago.

Amongst the relics obtained were celts, plates of mica, pottery, pipes, carbonized corn, beans and plum-pits: beavers' teeth ground for tools, as small chisels: a large clay bead, worked clam shells, a part of a clay pipe representing a fish or serpent. The most of these relics were from an ash pit twenty feet by two feet deep, which had never been disturbed. No "white-man" relics were found, nor were graves known to exist. Five pits formerly existed on slope to north of south site.

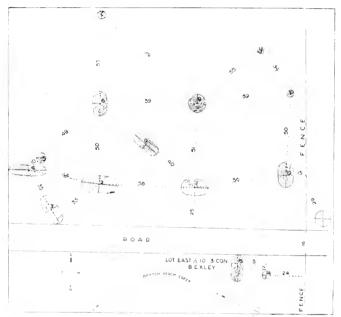

On Mr. Joseph Ead's farm, lot 24, con. 2, Somerville township was probably a later Algonkin site, for when clearing the place thirty-tive years ago, and at intervals since, Mr. Eads has found iron knives, iron pipe tomahawks with stems, and quantities of pottery and flints. He stated that there were eighteen graves on the crest of the hill, and when he opened one, found the skeleton in a sitting position facing south, with its skull above ground. Mr. Eads thought that these were criminals and placed the age of the graves at 130 years. Near

the graves was a cellar seven feet deep and three feet in diameter, lined with birch bark. This cellar, according to Mr. Eads, was for keeping fish in. This site is one mile east of Balsam Lake, half a mile west of Goose Lake, and two miles south of Four Mile Lake.

On Mr. J. Moore's place, lots 19 and 20, Gull River Range, Bexley township, are also evidences of aboriginal occupation, namely, several ash beds of the ordinary type, situate on the edge of a high plateau facing to the southeast. These are about a quarter of a mile distant from the site at D. Smith's (see Report of '96). To the north of the ash beds is the highest hill in the vicinity, on which iron relics have been found. At a distance of 100 yards south of ash beds and near the edge of plateau, is a large pit, which at present is impossible to state whether it is of natural or artificial origin, as the edges have been plowed down and the bottom filled up. Present dimensions: depth, 10 feet; north diameter, 53 feet; south, 43 feet. A companion pit exists to the west of this one at a distance of about 20 rods; of the present dimensions, depth fifteen feet, circumference of 188 feet was formerly much larger with probably a diameter of twenty feet in excess of present one. Mr. R. J. LeRoy, Reeve of Bexley, remembers these pits were much larger in recent years. The latter pit seemed to be conical in shape and held about eighteen inches of water in June last. The late Joseph Kenice, a very intelligent Indian from the Rama Reserve stated that these pits were dug by the Mohawks, (Iroquois) to fight out of during a battle with his tribe, now on the Rama Reserve (Mississaugas). Kenice also stated that the groups of little pits observed on several sites were used for hanging meat in the summer time.

There is a group of similar pits, four in number on John's Chrysler's farm, lot eighteen, concession four, Carden township, on east side of Lower Mud Lake and at a distance of about thirty rods from shore, near the edge of a high plateau; the north pit being some thirty-two paces distant from the others, three of which are joined together; a line through the centres of pits has a northerly direction; the north pit is ten paces in diameter and five deep, saucer-shaped and may be an ossuary. The other pits are in a row separated from each other by a narrow ridge of earth which does not reach to the level of the surrounding surface. Total length of the three pits forty-two paces, twelve paces wide, and from ten to twelve feet deep. Individual dimensions, north pit fourteen by twelve paces, centre pit fifteen by twelve and south pit ten by twelve. They are conical shaped and the centre one is the deepest. These pits are in their original condition

with the exception of some rubbish thrown in. It is thought by some that these large pits were perhaps of natural origin but were used by the Indians after a slight improvement for their ceremonies; they are thus called "sorcery pits," and it is said they occur at or near a great many sites in Simcoe county. The pits are not modern, as I first thought that they might have been connected with some traders' post or H. B. C. Fort, but on enquiry neither of these proved to have been erected in those particular localities. To the immediate north of pits are about twenty acres of second growth timber called the "Indian clearing," at the lake shore, is the "Indian landing," while the pits are called the "Indian caves." The locality is frequented by Indians up

Village Site, E1 Lot 9, Con. 3, Bexley.

to present times. It seems strange that if the pits are caused by subsidence or percolation that the line of pits should be at right angles, and at the top of the drainage slope, nearest known localities of materials used by the aborigines of this section.

During the mining boom which occurred here this summer, soapstone was discovered in a prominent ledge of rock jutting out in a valley on Mr. Isaac Spring's farm, lot one, concession A, Somerville, east of Gull River, and also on Mr. Grier's farm two miles north of Spring's. The Indians probably knocked off masses of this material as it was needed, which was a more convenient method than quarrying.

Mr. LeRoy and myself failed after a very close scrutiny to discover any traces of ancient quarrying.

Several nuggets of native copper have also been found, the specimen forwarded coming from Mr. Allan Cameron's farm, lot twenty, concession five, Lutterworth township. It was picked up on surface of rock and may be "drift," but Mr. R. W. Leonard, C. E. a mining expert states that both pure native copper and the ore exist in that neighborhood.

Diorite occurs near Sudbury, and probably more to the south of that district.

Graphite occurs in Glamorgan township. A ledge or out-cropping of silicious rock (chalcedony) occurs in Carden township, south-east of Mud Lake. It extends for a distance of 100 yards and is plainly visible.

EMBANKMENTS.

A long serpentine embankment to the west of Cranberry Lake, Carden township, about 200 yards long, twelve feet wide, and two or three feet high, proved, on examination, to be composed of boulders and gravel, resulting from glacial action.

The embankment mentioned in report of 1896, on Long Point, is no doubt, caused by the ice shove, as its material is the same as the shore material. It occurs in several lengths for a total distance of half a mile or so, and is quite near the water's edge, except the south portion. The height in several places is increased by the shore sand being deposited on it by the wind. Old beaver dams are sometimes mistaken for Indian mounds.

SPECIMENS PROCURED.

Amongst the relics obtained this season are some very interesting ones from the following localities, viz.: A three-faced clay pipe-head, and a double-faced one, both pipes human-faced; another double-faced pipe—one face being human, the other a coon; some faces from clay pipes—one being outlined by dots and having a row of dots for the mouth, an unusual type of marking; perforated flat needles of bone; bear's tusk, ground to an edge for cutting; split beaver's teeth, ground so as to have chisel and knife edges; a large bone awl with a tally, and a groove cut longitudinally down it; a perforated circular bone from a fish's head; perforated wolf's teeth; horn pottery marker; a toy, or miniature celt $2\frac{1}{4}$ by 1 by $^3/_{16}$ inches; a fragmentary clay head showing the mouth defined by a groove around the lips; and some soapstone beads in process of manufacture. All these coming from site on lot 5, con. 5, Bexley.

A large Huronian slate celt, of light-green color showing the three methods of making, viz., flaking, pecking and rubbing; a bone harpoon with eight slight notches on one side, length of harpoon 64 inches; a horn pottery marker, or maybe a "flaker" for flaking flints. Some pottery with a net pattern made with a notched stick. Locality Bolsover.

A soapstone pipe shaped like a cork $1\frac{3}{4}$ in, long; several horn tools which may be flakers, but are suitable for marking pottery with indents; a tally bone with three distinct tallies, and a hole for suspension: several small stone beads; horn arrowhead with hole for inserting the shaft; bear's tusk ground for a cutting tool; three miniature celts, probably toys for children, or maybe emblems to be used for burial purposes, the largest $2^{-1}/_5$ by $\frac{3}{8}$ by $\frac{3}{8}$ inches, sides not worked; the next is $1^{13}/_{16}$ by 9_{-16} by 3_{-16} in., very symmetrical and worked all over; the third is perhaps made from a splinter from a large celt trimmed into shape and is $1\frac{1}{2}$ by $\frac{3}{4}$ by $\frac{1}{4}$ inches; and some slender spiral sea shells; from site on lot 45, S. P. R. Eldon,

Plates of mica: perforated flat bone needles, from site on lots 56 and 58 Front Range, Somerville.

White soapstone head, of excellent workmanship, and perforated clam shells, sea shells, and wolves' teeth from site on lot 23, con. 3, Eldon.

Rubbing stone of Nottawasaga sandstone oblong shaped, $4\frac{1}{2}$ by 2 by $\frac{7}{8}$ inches. Mitchell's Lake, Eldon.

Copper spear-head found on lot 9, con. 2, Bexley—on loan—total length 6¼ by 1¾ broad and ¾ inches thick, socket 2 inches long. Has a ridge down the back of blade giving a cross section of a flat triangular shape. The socket is of triangular cross section with a transverse ridge near the blade to prevent the shaft slipping on to the blade. Perhaps green hide thongs were used in connection with the socket for holding the blade firmly to the shaft, these thongs when drying would contract and firmly bind what they were wrapped about.

A mottled grey soapstone plummet from lot 6, con. 1, Bexley shaped like a truncated cone, perforated longitudinally with perforation inclining to one side. Size 1 ³/₁₆ long, ¹³/₁₆ diam. of top, 1 inch diam. of bottom; highly polished, altogether a very neat specimen of aboriginal workmanship.

A miniature double-bitted chisel, size $3\frac{1}{8}$ inches long, by $7/_{16}$ wide and thick, bit $\frac{1}{4}$ inch wide, worked all over, and a horn "flaker"; site at lot 9, con. 3, Bexley.

A bird or bar amulet of striped Huronian slate, green in color, 3\frac{3}{8} inches long, 7/16 thick, and 1\frac{1}{4} in width at the widest part—is the first on record from this locality. Where it came from is not known, as it was originally in the possession of D. McRae, of Thorah township, now deceased.

A soapstone pebble, highly polished, with a series of deep grooves cut into it; Little Mud Turtle Lake.

Besides the above articles there were the ordinary specimens of bone bangles, awls, beads, perforated dog-whelks, carbonized corn, celts pipes, pottery, and stone discs, and a few flints, recovered from the various village sites.

Amongst the relics showing contact with Europeans are: a ghost-arrow of copper, a long slender spear-head, a combination adze and gouge, for hollowing out canoes and troughs: a heavy gouge for tapping maples, and a steel made to fit over the knuckles, for striking fire—all surface finds.

The small bone bangles and other ornaments used in adorning the dress or person, were called "matachias" by the Algonkins, and were sometimes stained. See Jesuit Relations, vol. 8.

Credit must be given to the following persons for denations, and interest taken in the work:

Dr. Ross Kirkfield, fragments of pottery, etc.

A. Morrison, Beaverton, copper "ghost-arrow."

Allan Cameron, Lutterworth township, nugget of native copper.

G. McKague, Bexley P.O., celts, clay pipes, stems showing extreme sizes, stone discs, and rubbing-stones.

James McGirr, Bolsover, flints, pottery, bone harpoon, two celts, bone awl, fire-steel, pottery-marker or horn "flaker," clay pipes.

J. Moore, Coboconk, celts and combination iron adze-gouge.

S. Harbaugh, Corson's Siding, two double-faced pipes, and bone bangles.

William Irwin, Bexley township, bone awls, stone and pottery discs, clay pipes, perforated marine shells, soapstone beads, and rubbing stones.

M. Sayers, Bexley P.O., copper spear-head (on loan.)

S. Truman, Kirkfield, steel spear-head, flint knife, flint awl, carbonized corn and plum-pits, hematite, pottery disc, fragments of sheet-brass, and fragment of stone ring.

Headly Fair, Cambray, celts, and flint arrow-head.

Mrs. R. Campbell, Kirkfield, perforated marine shells, bone implements, stone and clay discs.

D. McRae, Gamebridge, combination bird and bar amulet.

G. Rumney, Somerville township, celts, clay pipes, bone implements and ornaments, and pottery fragments.

R. LeRoy, Reeve of Bexley, celts, clay pipes, and bone implements.

J. Bowns, Coboconk, polished soapstone pebble with deep grooves.

J. Wallace, Somerville township, bone beads, awls, celts, carbonized corn, pottery fragments, worked clam-shells, perforated marine shells, eyed bone needles, etc., from ash heap.

D. Smith, Coboconk, rubbing-stone and discs.

R. H. Pearce, Raven Lake, Bexley, polished pebble, flint scraper, and small celt.

W. McNerney, Victoria Road, celt and plummet.

Mrs. R. J. Sims, Peterboro', rubbing-stone of Nottawasaga sand-stone.

John Shields, Victoria Road P.O., clay pipe and awl.

Jos. Eades, Baddow P.O., steel knife flint, worked fossil.

S. Kershaw, lot 5, con. 5, Bexley, worked spikes of deer-horn, miniature clay pipe, disc with stone and bone, bone awls, etc.

Since completing the above 1 bave located three more village sites, the first on Mr. Frank Reid's place, lot 25, concession 3, Digby township, one on Mr. Wm. Campbell's, east half 1, concession 8, Laxton township, and the third on Mr. Donald Fraser's, lot 21, concession 9, Eldon. The site at Reid's is on the face of a hill facing north-east, two miles from Head Lake, on the south side of Head River, flowing in a westerly direction. The river to the east of the site, about twenty rods, flows north and then after describing a big bend flows south again, passing near the west side of the site. Freestone formation: soil suitable for aboriginal cultivation. On north side of river the high granite hills commence. The usual traces of aboriginal occupation are plainly visible though cultivated for many years.

As in the above case the next site has been under cultivation for many years, and but few traces now remain beyond the blackened patches of ground and pottery fragments. This site is situated on the south side of Deer Lake, a small beautiful lake of probably one and one-half miles in length and three-quarters of a mile in breadth, and having a number of islands. The flat is about six or eight feet above water at the front and gradually rises for a distance of thirty rods or so when it meets a precipitous ledge of limestone twenty-five or thirty feet in height, making an ideal place for a site. In early years both Messers. Reid and Campbell used to pick up lots of relics, but these were dispersed. A medium sized symmetrical adze, having two broad

shallow notches for fastening purposes, and a very sharp edge, was given by Mr. Campbell. Indians have frequented this latter locality down to recent years.

On W. G. Peel's place, north part lot 11, concession 2, Bexley, is either a small village or an isolated camp, as pottery fragments, pieces of pipes and flint chips can be picked up on the crest of a small hill or tongue of land running into a swamp. In opening some ash heaps lately, the following relics worth special mention were obtained:—

From lot 1, N. P. R., Bexley, a beautifully pointed bone awl 64 inches long; a miniature pot (toy!) 13 inches high, with a diameter of 1 inch, slightly ornamented in a roughish way, it just fits over the end of the finger like a huge thimble, this was probably the way it was made; a long slender flat bone needle or bodkin, 4½ inches long, ½ inch wide 1-16 inch thick, having a circular drilled eye 13 inches from the point other needles show slots ground into them from each side forming a long eye: a bone skin dresser 64 inches long and 1 inch wide at cutting edge, made from a leg bone by being diagonally ground down, shows marks of much use and of fire, is polished; a barpoon head of horn, 5½ inches long, ¾ inch wide and 3-16 inch thick, has two deep barbs on one side, and a hole immediately in rear of second barb, the butt being wedge shaped with corners rounded. Has very much the appearance of Eskimo work, resembling those harpoons which are made detachable from the shaft, and are connected with a float, this one may have been used for beaver or large fish: discs of every size and every stage of manufacture both of stone and pottery; hammer stones; marine shells; carbonized corn beans, plum-pits, acorns, etc.; clay pipes and stems, the latter showing that the stem hole was made in three ways, the first by a straw being moulded in and then drawn out before burning, the next by a twisted cord of tibres, and the third by a tiny bundle of some material made like a miniature fascine, the two latter being burnt in the stem, leaving their imprints; and a silurian fossil (which is not an uncommon occurrence), and was perhaps regarded as "big medicine."

From lot 5, concession 5, Bexley, we get hammer stones, both circular hand hammers and degraded celts; carbonized corn, beans, plum-pits, etc.: turtle egg shells; pipes; bone awls; eyed needles; and a couple of bone daggers, the largest one 10½ inches long, 1 inch wide, and of a triangular cross section tapering gradually to a point, scraped and polished all over, and ornamented with a simple design of inscribed straight lines, arranged in system of four groups of horizontals, separated, begun and ended, by vertical pairs inclining slightly

and alternately in opposite directions, the first two groups contain five horizontals and the second two four horizontals, which together with the five pairs make a total of twenty-eight lines. The lines run from $\frac{3}{4}$ to $1\frac{1}{2}$ inches long and about $\frac{1}{6}$ inch wide, and the whole pattern, not unlike some pottery markings, covers a space of about $5\frac{1}{2}$ inches in length. The second dagger is much smaller and not ornamented There is also a portion of a deer horn with one spike which is artificially pointed.

Other relics lately obtained:

From Mr. Chas. Youill, Thorah township, a large slab of Huronian slate of a green color, tinged with red, and having large white veins. This was one of three and shows flaking, pecking and rubbing, is evidently unfinished. Dimensions, 8 inches long, $4\frac{1}{2}$ inches wide at narrow edge, 6.1-8 inches at other, $\frac{1}{2}$ inch thick. A fine beautifully worked slender stone tomahawk from Thos. McNish, Long Point, Fenelon township, size $7\frac{1}{4}$ inches long, 1.1-16 inches wide, $\frac{3}{4}$ inch thick has a perfect cutting edge, and the poll is ground to narrow chisel edge which is slightly abrased, the four sides are all smoothed down

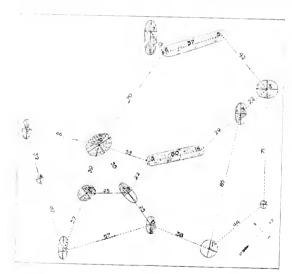

Fig. 52. - Village Site, Lot 5, Coa. 5, Bexley.

the top being rounded, while its opposite side is flat, as if for the purpose of driving wedges in to tighten the handle. It is altogether a remarkably fine weapon for rapid striking.

The remains left in the ash heaps would lead one to judge that game being very scarce the population was large and lived to a great extent on the proceeds of agriculture helped out with fish. The relics

that are found in them may be classed as household utensils rather than as implements of war or chase, so few of the latter occurring. The preponderance of implements are made of bone, and horn, there is a total absence of chipped ffint implements though nodules and flakes occur, also stone pipes are rare, while stone celts are found in vicinity they rarely occur in the heaps. The remains of their food are abundant, such as bones of animals, fishes, birds and turtles, fish scales, turtles' egg shells, carbonized corn, acorns, plum-pits, beans, and what looks like small edible roots.

The site on Mr. Donald Fraser's, lot 21, concession 9, Eldon, lies on the top of a steepish hill which faces north, and has a swamp at the foot. The usual relies found on village sites were picked up many years ago, and among them a copper knife. Further to the west on same lot, iron tomahawks have been plowed up, and a coin of Philip V. of Spain, a two real piece bearing the date of 1723. That this was worn as a pendant is obvious from the broken suspension hole in the rim and one side of the coin being worn down.

LIST AND LOCALITY OF VILLAGE SITES TO DATE.

- No. 1. Rummerfield Hill, lot 1, North Portage Road, Bexley town-ship, North Victoria.
 - " 2. Logan's Hill, lot 22, concession 3, Eldon township, north Victoria,
 - " 3. Corbett's Hill, lot 5, concession 5, Bexley township, north Victoria.
 - " 4. Heaslip's Point, lot 2, Northwest Bay, Bexley township, north Victoria.
 - " 5. McKague's, lot 9, concession 3, Bexley township, north Victoria.
 - " 6. Smith's, lot 18, Gull River Range, Bexley township, north Victoria.
 - " 7. Benson's, lot west ½ 5 and 6, concession 2, Bexley township, north Victoria.
 - " 8. Head of portage, Balsam lake, block E, Bexley township, north Victoria.
 - 9. Truman's, lot 22, concession 8, Eldon township, north Victoria.
 - " 10. McDonald's, lots 44 and 45, south portage road, Eldon town-ship, north Victoria.
 - " 11. Perrington's, Long Point, Fenelon township, north Victoria
 - " 12. Carnegie's, Indian Point, Bexley township, north Victoria.
 - " 13. Newby's, lot 2, concession 11, Thorah township, north Ontario.

- No. 14. Runney's, lots 56 and 57, Front Range. Somerville township, north Victoria.
- " 15. Wallace's, lot 60, Front Range. Somerville township, north Victoria.
- " 16. Moore's Hill, lots 19 and 20, Gull River Range, Bexley township, north Victoria.
- " 17. Ead's, lot 24, concession 2. Somerville township, north Victoria.
- " 18. Reid's, (Head river), lot 25, concession 3, Digby township, north Victoria.
- " 19. Campbell's, (Deer lake), lot E¹/₂ lot 1, concession 8, Laxton township, north Victoria.
- " 20, Barrack's, block E. lake shore, Bexley township, north Victoria.
- " 21. Fraser's, lot 21, concession 9, Eldon township, north Victoria.

In the list of additions to the museum, p.p. 3 to 13, the valuable donation made by the Rev. R. Ashington Bullen, B. A., F. G. S., of Reigate, England, was mentioned only in a general way, as the specimens had not yet reached Toronto. Meanwhile they have arrived, and the following list supplies some of the necessary details.

EOLITHS, (Rudely chipped and unshapely tools).

16,943-16,955. From South Ash and Shoreham. County of Kentz England.

Palgeoliths.

- 16,922-16,924. From Broom, Devonshire, England.
- 16,925. Roughly oblong celt, from Warren Hill, Kent, England.
- 16,926. Leaf-shaped celt, Lakenheath, England.
- 16,927. Small, oval, or leaf-shaped celt, Mildenhall. Suffolk, England.
- 16,928-16,931. Leaf-shaped and pointed celts, from Freemantle near Bournemouth, England.
- 16,932-16,936. From Wandsworth drift, Thames Valley, England.
- 16,937. Small, pointed celt. Swanscombe, Kent, England, (surface find)
- 16,938. Leaf-shaped celt, valley type, Northfleet, England.
- 16,939-16,940. Two pointed celts, Northfleet, England.
- 16,941. Roughly oblong, knife-like tool, Northfleet, England.
- 16,942. Large turtle-backed tool, from Mildenhall, Suffolk, England.
- 16,956-16,967. Celts, mostly pointed, from Milton, Gravesend, England.
- 16,969. Leaf-shaped celt, from Moulin, Quignon, Abbeville, France.
- 16,970. Small, carved and coarsely flaked tool, from Montières, Amiens, France.

5 AR.

16,971. Large pointed celt, from Moulin, Quignon, Abbeville, France.

16,972. Thin and curved celt. Montières, Amiens, France.

NEOLITHS.

16,973. Small celt, from Hammersmith, Middlesex, England.

16,974-16,976. Scrapers, Icklingham, Norfolk, England.

16,978. Flint core, Icklingham, Norfolk, England.

16,979-16,981. Scrapers, Icklingham, Norfolk, England.

16,982. Drill or borer, Rudstone, England.

16,983. Small flint knife, Icklingham, Norfolk, England.

16,984. Scraper, Icklingham, Norfolk, England.

16,985. "Fabricator," leklingham, Norfolk, England.

16,986. Small celt, Eastbourne, England.

16,987-16,988. Small flint knives, Icklingham, Norfolk, England.

16,989. Small flint saw, Icklingham, Norfolk, England.

16,990. Small flint hammer, Icklingham. Norfolk, England.

16,991. Polished celt, near Bushmills, County of Antrim, Ireland.

16,992. Polished celt, from the River Thames at Kingston, England.

16,993-16,995. Three celts, from Somaliland, Africa, collected by Seton Karr.

16,996. Bone breccia, from La Madeleine, Dordogne Caves, France.

BIBLIOGRAPHY OF THE ARCHEOLOGY OF ONTARIO

Second Collection.

By A. F. HUNTER, M.A.

This list of the literature on the Indians of Ontario, containing 280 titles, is a continuation of the one given in last year's Report. The subject is by no means exhausted in these lists; they merely represent what has been available to the compiler.

In the present list are included the titles of articles in connection with a few controversies. For example, the question of the identity of Tecumseh's remains; and the question of the identity of Otinaouataoaa, the Indian village where La Salle encamped. The articles on these and other debated questions have been summarized as impartially as possible.

As in the former list, the boundaries of the Province have not been rigidly adhered to in this, but adjacent districts have been also included.

While thanks are due to many persons for assistance, the compiler is especially indebted to Geo. E. Laidlaw, Esq., for the use of his collection of newspaper clippings.

Adam G Mercer.

Georgian Bay and the Muskoka Lakes.

Picturesque Canada, page 579, (Vol. II.), Toronto, 1882.

Page 582, Fort Ste. Marie on the Wye and the Hurons.

Adams, J.

Sketches of the Tete de Boule Indians, River St. Maurice. Lit. and Hist. Soc. of Quebec, Vol. II., (1831).

Describes these Indians, who constitute a distinct band, then inhabiting the upper St. Maurice, but now living in the vicinity of Lake Abittibi, northern Ontario. They derived their name from their practice of artificial compression of the head, ("Ballheads").

Addison, Dr. W. L. T.

Microscopical examination of clay specimens from Serpentine Ridge, Innistil, pages 73-74 in Archeological Report for 1896. (Toronto, 1897).

American Cultivator, (Boston, Mass.).

December 14, 1889.

Paragraph noticing the ancient coppermines of Lake Superior, also mentioning traces of an ancient oil well observed that Enniskillen, Canada," (Enniskillen township, Lambton county to similar to one found at Titusville, Pa.

Anderson, Capt. T. G.

Extracts from his journal, Orillia *Packet*, February 27, 1885

Anderson, Capt. T. G.-Con.

Also reprinted in the Montreal Gazette (March 4, 1885). For many years Captain Anderson was Superintendent of Indian affairs. In the extracts published in the Packet on the above date, he mentions several spots at We-qua-me-kong in Manitoulin Island, where the Ottawas had habitations when the French traders first arrived. These places had old corn hills, and were marked by fragments of earthen pipes and pottery.

Assikinack, F, (Blackbird).

Legends and traditions of the Odahwahs, (Ottawas). Canadian Journal, second series, Vol. III., pages 115-25 and 297-309.

Bailey, John C., C.E.

Our Indian Names. Toronto World, December 19, 1890.

This article, signed "B." consists of a list of fifty-two Indian geographical names in this Province, with comments on the meaning of each name.

Barber, Edwin A.

The Pipe of Peace. Fifteen illustrations, five pages.

An article in *The Continent*, (Philadelphia) of April 4, 1883, describing the different classes of Indian pipes, with illustrations of each class; examples of nearly all being found in Ontario.

Barrie Advance.

October 9, 1856.

Describes, on the information of P. H. Hough, school teacher, North Orillia, a bone pit, then recently discovered near his residence. It contained about 200 crania, with other bones, fifteen copper (brass!) kettles, and a variety of ornaments, such as beads, etc.

August 10, 1859.

Contains a long account of a large bone pit on the farm of Andrew Kinghorn, Medonte township. A chapter on "Funeral Rites" is reproduced from a little work on the "Discovery of America and the origin of the North American Indians," by John Mackintosh.

August 23, 1888.

Notices the unearthing of an Indian skeleton at DeGrassi Point, Lake Simcoe, in a high mound of sand. Several relics were found with the bones; and the hair (in a bunch) was still in a good state of preservation. The paragraph alleges that an engraved stone was found with the remains. Reprinted from an Alliston! exchange, not named.

Barrie Examiner.

January 3, 1889.

Mentions (under the heading "Orr Lake") a bone pit near the town line between Medor te and Tay townships.

February 13, 1890.

Mentions (under the heading "Shanty Bay") some Indian remains in Oro township. On the Ross farm were found two flint-lock pistols, a flintlock gun and a sword.

May 12, 1892.

Gives the text of a Treaty of peace between Sir Wm. Johnson and the Hurons (Wyandottes) at Detroit, made in 1764: the original document and Wampum being in the possession of Mr Sol. White, lately M.P.P. for North Essex. See New York Colonial Documents, Vol. VII., page 650.

June 9, 1892.

Notices Archaeological work of Prof. Henry Montgomery in Medonte and Tay townships during 1876-8, and introduces an account of his recent examination of mounds in North Dakota.

July 28, 1892.

Brief notice of visit to Huron sites in North Simcoe by Messrs. R. W. Large and Fred Milne. Collections made of arrow and spear heads, pipes, stone axes, beads and other relies.

Barrie Examiner.—Continued August 4, 1892.

Reprint from Orillia Packet of notice of collections of relics, made by Messrs. Large and Milne.

March 30, 1893.

Notices the discovery of a single grave in Sul'ivan township, on the banks of the "Sauble" River. With the remains were an old flintlock musket, a spear and a knife. Reprinted. Source not given.

Gives some traditions of Tecumseh's League in 1811 and 1812

Collingwood Bulletin

July 9, 1891,

In a sketch of Mackinaw Island, notices the Indian burying ground there.

Collingwood Enterprise.

Oct. 17, 1889.

Notices an ir a weapon found with other Indian relies near Bruce Mines, Algoma.

June 23, 1892.

Notices the discovery of a skeleton at Thornbury, the bones being of unusual size.

Donaldson. Thomas

The Six Nations of New York. (Extra Census Bulletin of the United States), Quarto, 1892.

This bullet in consists of a statistical part (pp. 1-17) by Thomas Donaldson, and of a descriptive part (pp. 19-83) by Gen. Henry B. Carrington. Illustrated by maps and portraits of prominent ndians. The volume is valuable in connection with the Iroquois near Brantford, Ont., and contains information on the troquois mode of self-government, religious ideas, beliefs, dances, wampum, farming and other industries, social life. games, morals, education, schools and asylums, sanitary statistics, traditions and nomenclature, annuities paid leases and citizenship.

Dundalk Herald

Oct. 14, 1886.

(Reprint!) Notice of examination of two mounds at Skull point, on the river about five miles from Napanee. One contained the skeletons of two men, arrow heads, stone chisel, and stone hammer.

Ellis, Prof. George E.

The Red Man and the White Man in North America, from its Discovery to the Present time. Boston, 1882.

At p. 478, cites the policy of Great Britain in regard to the rights of Indians to possession and occupancy of lands. England has always recognized all rights of the kind, except that of alienation.

Ellis, John.

Humber Indian Relies. Toronto Mail, Jan. 7, 1886.

A letter reviewing the facts in connection with the relies found near High Park.

Farley, James J.

Tecumseh's Body. Belleville Ontario, Oct. 12 (!) 1876.

Reprint: Toronto Weekly Globe, Oct. 20, 1876, under heading 'More about Tecumseh.

A letter in which Mr. Farley, of Thurlow, dissents from the view that the remains exhumed at Moraviantown were those of Tecumseh.

Farr, C. C.

The Legend of Frog Rock, Lake Temiscamingue. Forest and Farm (Toronto), Mar. 29, 1890.

This sketch appeared anonymously, and likewise three subsequent sketches in the same publication, the last, however, signed 'C. C. F.' they are known to have been written by C. C. Farr, of Haileybury, Lake Temiscamingue. The writer gives a transformation legend connected with a Huronian rock on the west shore of the lake.

The Legend of the Chief's Island, Lake Temiscamingue, Forest and Farm (Toronto), April 19, 1890

This sketch appeared anonymously, but was subscribed "Lake Temiscamingue, Que"

An Indian Legend of the Upper Ottawa. Forest and Furm (Toronto), May 3, 1890.

This sketch appeared anonymously, but was subscribed "Lake Temiscamingue, Que."

The White Rocks of Temiscamingue. Forest and Farm (Toronto), May 10, 1890.

Signed "C. C. F." and subscribed "Lake Temiscamingue, Que." The writer relates an Indian legend of a limestone cliff at Wabikeesick's Bay.

The Lake Temiscamingue District. Toronto, 1893, 16 pp, and map. Issued by the Ontario Government.

At p. 12, the writer refers to Frog Rock, 'where the Indians eat the enchanted frog.'

$Fitz\text{-}Gibbon, Miss\,Mary\,Agnes$

A Deed Signed by the Renowned Chief Pontiac. The Week (Toronto), July 3, 1896.

An article giving the text, with English translation, of a deed of land near Windsor, said to have been signed by Pontiac.

Freeman, Miss Alice B.

The Town of Barrie. Toronto Empire, Oct. 11, 1888.

An article signed "Faith Fenton" in which reference is made to large numbers of Indian relics found in the vicinity of the town, mentioning remains found in digging the foundations of houses.

Freeman, J. B., M.P.P.

Indian Corn pits. Canadian Advance, Aug. (?) 1888.

Reprints observed: Toronto World, Aug. 29, 1888; Woodstock Scatingl-Review, Aug. 31, 1888.

An account of eighteen corn-pits or caches' in Townsend township, Norfolk county.

Galt Reformer.

Oct. 2, 1878.

Paragraph giving account—of discovery of a bone-pit on farm of Thomas Westwood, St. George. The pit had twenty-live skeletons—Another in the same field, a number of years before, was found to contain sixteen skeletons.

Grant. Peter

The Saulteux Indians (about 1804) Masson's Bourgeois de la Compagnie du Nord-Ouest, Vol. II. (Quebec. 1890.)

The Saulteux country meant by this writer extended from Sault Ste. Marie, Ont., to Lake Winnipeg. His narrative describes the Indians who occupied this territory, their personal appearance, dress, occupations, food, etc.

Gray, Rev. John, D. D.

Indian Remains. Toronto Globe, Oct. 20, 1856.

This article, though unsigned, is known to have been written by Dr. Gray, Orillia. It describes a bone-pit, just then found about six miles from Orillia, containing from 150 to 200 skeletons. See also 'Barrie Adrance, (Oct. 9, 1856)' and 'Sir Daniel Wilson.'

Hale, Horatio, MA.

The Tutelo Tribe and Language.

Seventh Annual Report of the Bureau of Ethnology, pp. 112-114. Announces the discovery in Ontario of the last survivors of the Tutelos, formerly of Virginia and North Carolina

Ham. G. H.

Among the Indians. Toronto Mail, March 6, 1886.

A three column article, signed 'G. H. H.,' discussing some traditions and ceremonies of the Ojibway and Cree Indians in the Rainy Lake district.

Hamilton, J. C., M. A., LL B.

The Panis—Canadian Indian Slavery in the Eighteenth Century. Proc. Can. Inst., Fifth Series, Vol. 1, pp. 19-27.

A paper read, December 12, 1896. It contains references to Panis in the early writers: Panis at Niagara and Amberstburg; the Huron Treaty of 1764; the last Pani.

Harvey Arthur

The Neutral Nation, Toronto Mail, Oct. 24th, 1885.

A two column letter giving the leading facts known about the Neutrals. It also comments on statements made in the *Moil*, one week previous, in connection with a Masonic token found in an Indian grave at Lake Medad, Halton Co.

The Discovery of the Mississippi. Toronto Mail, Nov. 7, 1885.

This letter discusses some points in connection with La Salle's journey to the Mississippi. It continues the controversy on the Lake Medad site.

The Discovery of Lake Superior. Toronto Mail, Nov. 18, 1885.

A letter on the connection of Marquette and Joliet with the discovery of the Miss ssippi. Also on the position of La Salle's camp, which he inclined to place "closer to Burlington Bay" than the Lake Medad site. Father Menard's travels in the west are also reviewed.

Harvey. Frthur-Continued

Sundry Old Indian Affairs. Toronto Mail. Dec. 11, 1885.

A letter in which it is claimed that La Salle's camp was in Beverly township, and not at Lake Medad. Some comments are made on the Algonquin origin of the word "Otinaouationa."

Indian Tombstones. Toronto Mad. Dec. 30, 1885.

A letter commenting on the discovery of an aboriginal "tombstone" near High Park, Toronto. The writer points out the improbability of finding inscriptions on rocks or stones, as the Indians had no tools for stone-earving.

Rock Inscriptions. Toronto Mail, Jan. 4, 1886.

A letter replying to the arguments of Robert Kirkwood as to the inscriptions at Dighton Rock and Cunningham's Island, Lake Erie.

Inscriptions. Toronto Mail, Jan; 9, 1886.

A letter replying to some further arguments of Robert Kirkwood. The writer refers to Schoolcraft's account of the inscriptions on Cunningham's Rock, Lake Eric.

Bone Caves—With especial reference to prehistoric man. Trans. Can. Inst., fourth series, vol. ii., pp. 116-120.

Treats of: the similarity between the habits of stone age man in Europe and (the Indian) in America: correction, from American analogy, of some current European ideas on this subject.

Hirschfelder, C A.

Antiquities of America. A lecture to the Parkdale Public School.

Abstract given in Toronto Mail, Feb. 7, 1881.

The discourse was concluded with a few remarks on Lis own discoveries in Ontario. The Manners and Customs of the Aboriginal Indians.

Abstracts given: Toronto Globe, Mar. 6, 4882. Toronto Mail, Mar. 6th, 1882.

This paper described generally the aborigines of America.

Prehistoric America. A lecture delivered at Richmond Hill.

A summary of this lecture appeared in the Toronto Mail, Feb. 23, 1885.

An Archaeological Museum, Toronto *Globe*, April 14, 1885.

A letter on collections of Canadian Archaeological specimens.

The Neutral Nation. Toronto Mail, Nov. 4, 1885.

A reply to Arthur Harvey's letter, more particularly in regard to Otinacuataona, an Iroquois village at which La Salle en amped 'on his way to discover the Mississippi." The writer considers that it was situated on the borders of Lake Medad.

The discovery of the Mississippi and the name "Otinaouataona." Toronto Mail, Dec. 9, 1855.

A letter with a quetation from Ga'inee's Journal to show that the distance of the Iroquois village from Burlington Bay agrees with the position of Lake Medad. It also includes comments by Gen. John S. Clark and Horatio Hale on the village 'Otinaouatoua'—its position and the meaning of the name.

The Indian name Tanaoutaoua. Toronto Mail, Dec. 15, 1885.

A short letter correcting two errors in his previous communication.

The Alleged Archæological Fizzle. Toronto *Mail*, Jan. 4, 1886.

A letter in reply to the statements of critics in regard to the carved "tombstone." The writer puts forward arguments in proof of the genuineness of the relic.

Hirschfelder. C A-Continued.

- A short letter Toronto Mail, Jan. 5, 1886.
- A reply to criticisms. Mentions a carved stone pipe he had just received.
 - The Aboriginies. Toronto Mail, Feb. 7, 1887.
- A letter correcting some of the statements attributed to himself in the published in erview of issue, Jan. 29.

Hunter A F., MA

- Naming Lake Sincoe. Orillia Packet, July 5, 1889.
- A letter discussing the Indian and French names of Lake Sincoe. Suggests that the name 'Aux Claies,' referring to hurdles or latticework employed in the taking of fish, is explained by the Huron rows of stakes, or the 'fence,' at the Narrows.
 - History of Simcoe County, chap, xvii. Farric Examiner, March 6, 1890.
- Notices the discovery of a bonepit on the Cosgrove farm, lot 15, con. 14, West Gwillimbury, in 1835.
 - The Site of the Mission of Ste. Marie on the Wye. Frans. Can. Inst., fourth series, vol. 4, p. 230.
- Abstracts: Toronto Empire, Dec. 12, 1892; Toronto tilole, Dec. 12, 1892; Toronto Ma l, Dec. 12, 1892.
 - The Rice Lake Mounds and Innistil Effigy, pp. 67-79, in Archæological Report for 1896. (Toronto, 1897.)
- Mounds at Rice Lake, 67-69: Innisfil serpentine ridge, 70-72: examination of its structure, 72-76; sites of ancient villages in the neighborhood, 76-78; other effigies of a similar kind, 78: remarks on the significance of effigies, 79.
 - Bibliography of the Archæology of Ontario, pp. 98-116 in Archæological Report for 1896. (Toronto, 1897.)

- Contains 100 titles referring to Ontario, collected from Dr. Chamberlain's bibliographies for the Dominion; with the addition of 100 new titles, making 200 altogether.
 - New Aspects of the Old Huron Missions, Massey's Magazine (Toronto) for May, 1897, vol. 3, p. 350-354. Reprinted in Orillia News-Letter.
 - Archaeological Notes on the Hurons in the new edition of the Jesuit Relations, published by the Burrows Brothers Company, Cleveland, Ohio. (R. G. Thwaites, editor.)
- Vol. 5 (1897) contains notes on Ossossane (p. 292). Tounche (p. 293), Homaticia (p. 294), the nation of the Bears (p. 278), the Tobacco Nation (p. 279), and a sketch of "Archeological Research in the Huron Country."

Hunter, J Eoward M A.

- From Toronto Westward, Picturesque Canada, p. 441 (vol. II). Toronto, 1882.
- P. 455 notices the Iroquois on the Grand River; p. 519 notices the existence at Fort Wayne, Ind., of a stone idol, the Maniton of Lake Erie; p. 523. The Wyandots on the Detroit River; p. 535, The battlefield at Moraviantown cleared in 1846, and the grave of Tecumseh; alleged finding of his remains in 1876.

Hunter J M., MA. LLB.

- Suggestions. Barrie Examiner, Oct. 25, 1888.
- Reprinted in the Orillia Packet (Nov. 9, 1888). This article regrets that while many Indian relies have been taken from the historic county of Simcoe, no attempt has been made to gather a public collection in the home of the Huron race. An appeal is made for information, etc.

Ingersoll Sun

May (?) 1892.

Notices original parchment of the treaty between the Crown and the Wyandottes in 1764, in the possession of Mr. Sol White, who also has the wampum in connection with it.

James, C. C., M.A.

Lake Simcoe, Toronto Globe, May 26, 1896.

A brief letter suggesting that the old name of Lake Simcoe (Lac aux Claies or 'Hurdle' Lake) was derived from the Indian fish tence of pickets at the Narrows.

Johnson, Miss E. Pauline.

The Iroquois of the Grand River. Harper's Weekly, June 23, 1894. Vol. 38, pp. 587-9, with 18 illustrations by A. H. H. Heming.

Gives a description of their present condition, their occupations, religious rites of the pagan members, and schools. Contains comparisons with their primitive condition.

Reprints observed: Barrie Examiner, July 12, 1894. Oakville Star.

Kelton, Dwight H., M.A.

Indian Names, etc. Detroit, 1888, pp. 55.

It includes discussions of the names Algonkin, Garden River, Manitonlin Island, Mindemoya Lake, Ottawa, Penetanguishene, Sault Ste. Marie, etc.

Kerr, Wm.

The old Indian camping ground.

A paper by Mr. Kerr, of Chatham, on a site in the neighborhood of that town. It enumerates some of the relics found.

Notice: Toronto Mail, May 4, 1886.

Kirkwood Robert.

The Adjedatigwun, or Deathstiek. Toronto *Mail*, Jan. 1, 1886.

A letter commenting on Arthur Harvey's. The writer claims that the Indians did carve rocks, and cites the 'pictographs' of Cunningham's Island, Lake Erie, and the Dighton Rock.

Rock Inscriptions. Toronto Mail, Jan. 6, 1886.

A letter in reply to the arguments of Arthur Harvey.

Laidlaw, Geo. E.

The Indian Tribes. Toronto Mail, Nov. 11, 1885.

A letter endorsing the formation of a Dominion Archaeological Society, as proposed by Chas. N. Bell (q.v.)

Indian Relics. Lindsay Warder, Aug. 14, 1896.

A short letter enquiring for relies for the Provincial Museum.

Indian Relics Orillia Packet, Aug. 21, 1896.

A short letter enquiring for relies for the Provincial Museum.

Balsam Lake, pp. 80-89, Archeological Report, for 1896, (Toronto, 1897).

This article describes five village sites, then recently examined, with diagrams showing groups of pits at two of them. The map of village sites includes those of the map in the Seventh Report, with the addition of these five new ones.

The Aboriginal remains of Balsam Lake. The American Antiquarian, vol. xix., p. 68 (March, 1897).

Second Paper. The first paper (noted in the first instalment of this bibl.) described the trails, mound graves, remains of village sites and other features of the district. This (the second) notices the different kinds of relics and their relative frequencies—celts chisels, gouges, hammer stones, rubbing stones, slate knives, chipped implements, gorgets and banner stones, mortars, discs, horn, bone and shell implements.

Laidlaw, Geo. F.-Continued.

Aboriginal remains of Balsam Lake. The American Antiquarian. vol. xix, p. 138 (May and June, 1897.)

Third Paper. It classifies and describes the different kinds of tobaccopipes, with five illustrations of pipes and a page of cuts (eleven) of stone relics from Ontario.

Lindsay Post.

Sept. 7, 1888.

Notices the discovery of an Indian skeleton with bones of immense size.

June 21, 1889.

PUBLIC ACCOUNTS

OF THE

PROVINCE OF ONTARIO

FOR THE

YEAR ENDED 31ST DECEMBER

1897.

PRINTED BY ORDER OF THE LEGISLATIVE ASSEMBLY OF ONTARIO.

TORONTO

WARWICK BRO'S & RUTTER, PRINTERS AND BOOKBINDERS, 68 AND 70 FRONT STREET WEST. 1898.

To His Honour the Honourable SIR OLIVER MOWAT, K.O.M.G.

Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to your Honour the Public Accounts of the Province of Ontario for the year ending 31st December, 1897.

Respectfully submitted,

RICHARD HARCOURT,

Treasurer.

TREASURY DEPARTMENT, ONTARIO,
TORONTO, January 8, 1898.

PROVINCIAL AUDITOR'S REPORT

Provincial Auditor's Office,

Toronto, January 8th, 1898.

To Hon. R. HARCOURT,

Treasurer of Ontario:-

I have the honor to present to you the Public Accounts for the year ended 31st December, 1897.

For the information of the Legislative Assembly, I beg to submit the following Departmental Reports and Treasury Board Orders, with reference to overdrafts of appropriations under Schedule A of the Supply Bill

Education—Superannuated Teachers......\$1,600 00

Education Department, Toronto, June 21st, 1897.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council:—

That the sum appropriated for the sub-service of "Superannuated Teachers" is exhausted, and as it is necessary that the allowance of wornout teachers should be paid without delay, the undersigned respectfully recommends that authority be given under the Act, 49 Vict., cap. 4, sec. 20, for appropriating a further sum of \$1,600, to meet the payment of present schedule of \$226, and an approximate estimate of allowances, etc., still due.

The amount asked for above present schedule to be placed to the credit of the Provincial Treasurer, to meet further payments during the year as required.

(Sd.) G. W. ROSS,

Minister of Education.

Provincial Auditor's Office, Toronto, June 25th, 1897.

Sir,—I beg to enclose herewith for approval of the Treasury Board a recommendation from the Department of Education that authority be granted under 49 Vict., cap. 4, sec. 20, for the payment of allowances to "Superannuated Teachers" to the extent, if necessary, of sixteen hundred dollars, (\$1,600), cheques on account of the above to be issued by the Treasury Department in the regular way on receipt of proper certificates, as payments fall due.

Your obedient servant,

C. H. SPROULE,

Provincial Auditor.

THE CLERK,
Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 3rd DAY OF July, A.D., 1897.

Upon consideration of the report of the Honourable, the Minister of Education, dated the 25th day of June, A.D. 1897, the Treasury Board doth hereby, under the provisions of section 20, cap. 21, R.S.O. 1887, authorize the issue of a warrant for the sum of one thousand six hundred dollars, (\$1,600), in favor of the Honourable the Treasurer for the payment of allowances to Superannuated Teachers, the appropriation for such service having become exhausted, two hundred and twenty-six dollars, (\$226), to meet the present schedule, and the balance to be placed to the credit of the Treasurer to meet further payments during the year as required.

(Sd). J. R. CARTWRIGHT,

For Clerk, Treasury Board.

Legislation—Stationery, Printing and Binding 10.000 00

> PROVINCIAL TREASURER'S OFFICE, July 22nd, 1897.

Upon consideration of the report of Mr. L. K. Cameron, Queen's Printer, the undersigned respectfully recommends that pursuant to the provisions of section 20, cap. 21. R.S.O. 1887, a warrant for the sum of ten thousand dollars, \$10,000, be issued in favor of Messrs. Warwick Bros. & Rutter, contractors for Parliamentary Printing and Binding, the appropriation for said service having become exhausted.

> R. HARCOURT, (Sd.) Provincial Treasurer.

PROVINCIAL AUDITOR'S OFFICE, TORONTO, July 2nd, 1897.

SIR,-I beg to enclose herewith for approval of the Treasury Board a recommendation from the Queen's Printer for payment, under authority of 49 Vict. cap. 4, sec. 20, of ten thousand dollars, (\$10,000), on account to the contractors for Parliamentary Printing and binding, the appropriation for "Legislation" having been exhausted.

Your obedient servant,

C. H. SPROULE, (Sd.)

Provincial Auditor.

THE CLERK,

Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 22ND DAY OF JULY, A. D. 1897.

Upon consideration of the report of the Honourable the Provincial Treasurer, dated the 22nd day of July, A. D. 1897, the Treasury Board doth hereby, pursuant to the provisions of sec. 20, cap. 21, R. S. O.,

1887, authorize the issue of a warrant for the sum of ten thousand dollars, (\$10,000), in favor of Messrs. Warwick Bro's & Rutter, contractors for Parliamentary printing and binding, the appropriation for said service having become exhausted.

Certified,

(Sd.) J. LONSDALE CAPREOL,

Clerk, Treasury Board.

Legislation-Stationery, Printing and Binding...... 5,500 00

TORONTO, September 15th, 1897.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council:—

That the appropriation for Legislative Printing and Binding has leen exhausted. That this is due to the large amount of work necessary in connection with printing of last Session, including the reports on Factories, Fruit Growers' Association, Road Making, Registry Offices, Bee Keepers', Board of Health, Journals 1897, etc.

The undersigned, therefore, respectfully requests that authority be given to the Honourable the Provincial Treasurer, under the Act, R. S. O., 1887, cap. 21, sec. 20, to pay the accompanying certificate, viz:—\$5,500.00.

(Sd.) LUD K. CAMERON,

Queen's Printer.

Provincial Auditor's Office, Toronto, September 16th, 1897.

SIR,—I beg to forward for the approval of the Treasury Board a recommendation from the Queen's Printer for payment of five thousand five hundred dollars, (\$5,500.00), to the contractors for Parliamentary Printing and Binding.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Auditor.

THE CLERK,

Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 21st DAY OF SEPTEMBER, A.D. 1897.

Upon consideration of the report of Lud K. Cameron, Esquire, Queen's Printer, dated the 15th day of September, A.D. 1897, the Treasury Board doth hereby, pursuant to the provisions of sec. 20, cap. 21, R.S.O. 1887, authorize the issue of a warrant for the sum of five thousand five hundred dollars, (\$5,500), in favour of Messrs. Warwick Bros. and Rutter, contractors for Parliamentary printing and binding, the appropriation for said service having become exhausted.

Certified.

J. R. CARTWRIGHT,
For Clerk, Treasury Board.

Education—Departmental Examinations 3,700 00

Education Department, Toronto, September 16th, 1897.

The undersigned respectfully reports to His Honor the Lieutenant-Governor in Council:

That the sum appropriated for the sub-service of "Departmental Examinations" is insufficient for the current year, and that after providing for the payment of salaries to the end of the year, necessary printing, etc., a further amount of \$3,700 is required for the sub-service.

The undersigned therefore recommends that authority be given under the Act, 49 Vict., cap. 4, sec. 20, for appropriating a further sum of \$3,700 to be placed to the credit of the Honourable the Provincial Treasurer to meet the deficiency.

(Sd.) G. W. ROSS,

Minister of Education.

Provincial Auditor's Office, Toronto, September 22nd, 1897.

Sir,—I beg to enclose herewith for approval of the Treasury Board, a recommendation from the Education Department for payment, under authority of 49 Vict., cap. 4, sec. 20, of "Departmental Examinations," accounts amounting to thirty-seven hundred dollars.

Certificates and vouchers shewing payments due amounting to \$3,701.48 are attached.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Auditor.

THE CLERK, Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 22nl DAY OF SEPTEMBER, A.D. 1897.

Upon consideration of the report of the Honourable the Minister of Education, dated the 16th day of September, A.D. 1897, the Treasury Board, doth hereby, pursuant to the provisions of section 20, chapter 21, R.S.O. 1887, direct that the sum of three thousand seven hundred dollars, (\$3,700), be placed to the credit of the Honourable the Treasurer to meet certain payments chargeable to the appropriation for the sub-service, "Departmental Examinations" which has become exhausted.

Certified,

J. R. CARTWRIGHT, For Clerk, Treasury Board.

Repairs and Maintenance—Educational Buildings 357 60

DEPARTMENT PUBLIC WORKS, ONT.
TORONTO, 28th October, 1897.

The undersigned begs to report to His Honour the Lieutenant-Governor in Council:

That the Repairs and Maintenance accounts appropriation for Educational Buildings, Toronto, is exhausted, and the city water works account for the rix months ending the 30th of September, ultimo, for the sum of \$357,60 is unpaid.

The undersigned therefore respectfully recommends that authority be given under the Act, R. S. O. 1887, cap. 21, sec. 20, for the issue of a warrant in favor of the City Treasurer for the said amount of \$357.60.

(Sd.) A. S. HARDY,
Pro. Commissioner.

PROVINCIAL AUDITOR'S OFFICE, TORONTO, October 29th, 1897.

SIR,—I beg to enclose herewith for approval of the Treasury Board, a recommendation from the Department of Public Works for payment of an account for water supplied to "Educational Buildings, Toronto," amounting to \$357.60.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Auditor. .

THE CLERK,
Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 29th DAY OF OCTOBER, A.D. 1897.

Upon consideration of the report of the Commissioner of Public Works, dated the 28th day of October, A. D. 1897, the Treasury Board doth hereby, pursuant to the provisions of section 20, cap. 21, R. S. O. 1887, authorize the issue of a warrant for the sum of three hundred and fifty-seven dollars and sixty cents, (\$357.60), in favor of the Treasurer of the Oity of Toronto, for water supplied to the Educational Buildings, Toronto, the appropriation for Repairs and Maintenance of said Buildings having become exhausted.

Certified,

J. LONSDALE CAPREOL, Clerk, Treasury Board. OFFICE OF INSPECTOR OF ASYLUMS, TORONTO, October 26th, 1897.

Sir,-I beg to report that the balance of the appropriation on maintenance account at Brockville Asylum is insufficient to pay the accounts for the current month, which amount to \$9,075.15.

The additional sum required will be \$2,850.15. The expenditure has been limited to actual requirements found necessary to carry on the work of the Institution with efficiency. The estimates for 1897 provided for 300 patients, and on September 30th last there were 447 patients in residence at that Institution.

I would therefore recommend the issue of a Treasury Board warrant under R. S. O., cap. 21, sec. 20, for the sum of \$2,850.15.

> I have the honor to be, Sir, Your obedient servant,

> > R. CHRISTIE,

Approved, R. HARCOURT,

Inspector.

Provincial Treasurer.

PROVINCIAL AUDITOR'S OFFICE, TORONTO, October 26th, 1897.

Sir,—I beg to enclose herewith for approval of the Treasury Board a recommendation from Mr. Inspector Christie, approved by the Honourable the Provincial Treasurer, for payment of Brockville Asylum maintenance accounts amounting to \$2,850.15. The accounts for the Institution for the month ended 15th inst., referred to in the recommendation, are also enclosed.

Your obedient servant,

C. H. SPROULE, (Sd.)

Provincial Auditor.

THE CLERK,

Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 29TH DAY OF OCTOBER, A. D. 1897.

Upon consideration of the report of Mr. Inspector Christie, (approved by the Honourable the Treasurer), dated the 26th day of October, A. D. 1897, the Treasury Board doth hereby, pursuant to the provisions of sec. 20, cap. 21, R. S. O., 1887, authorize the issue of a warrant for the sum of two thousand eight hundred and fifty dollars and fifteen cents, (\$2,850.15), in favor of the Honourable the Treasurer for payment of Brockville Asylum Maintenance accounts, the appropriation for said service having become exhausted.

Certified,

J. LONSDALE CAPREOL,

Clerk, Treasury Board.

DEPARTMENT OF EDUCATION, TORONTO, October 29th, 1897.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council:

That the Provincial Auditor reports the sum appropriated for certain services in connection with Educational Department and Toronto Normal and Model School Buildings and grounds is exhausted, and as there are several accounts remaining unpaid that would cause serious inconvenience if held over until next year, the undersigned recommends that authority be given under the Act, R. S. O. 1887, cap. 21, sec. 20, for the issue of a warrant for \$3,570.05, to meet the payment of these amounts as given in the accompanying schedule.

(Sd.) G. W. ROSS,

Minister of Education.

Provincial Auditor's Office,
Toronto, November 8th, 1897.

SIR,—I beg to enclose herewith for approval of the Treasury Board unpaid amounts chargeable to different Educational services, the appropriations for which have been exhausted as follows:—

Departmental Examinations	\$2,105	61
Library and Museum	962	03
Repairs and maintenance of Buildings-Edu-		
cation Department	502	41
Total	\$3,570	05

Your obedient servant,

(Sd) C. H. SPROULE,

Provincial Auditor.

THE CLERK,
Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 10TH DAY OF NOVEMBER, A. D. 1897.

Upon consideration of the reports of the Honourable the Minister of Education, dated the 29th and 30th days of October, A. D. 1897, the Treasury Board doth hereby pursuant to the provisions of section 20, cap. 21, R. S. O. 1887, authorize the issue of a warrant for the sum of three thousand five hundred and seventy dollars and five cents (\$3,570.05) in favor of the Honourable the Treasurer for the payment of certain accounts chargeable to the following appropriations which have become exhausted, namely:—

"Departmental Examinations"	\$2,105	61
"Library and Museum"	$\bf 962$	03
" Repairs and maintenance of Buildings-Educa-		
tion Department"	502	41
	\$3,570	05

Certified,

Sd.) J. LONSDALE CAPREOL, Clerk, Treasury Board. Repairs and Maintenance-Education Buildings 153 07

DEPARTMENT OF PUBLIC WORKS, ONTARIO.

Toronto, 10th November, 1897.

The undersigned begs to report to His Honour the Lieutenant-Governor in Council, that the maintenance appropriation for the Education Department is exhausted, and the following accounts are unpaid:

M. Walsh	\$14	15
M. O'Connor		
The Incandescent Light Co		
Gutta Percha and Rubber Co		
Jas. Robertson Co	49	65
	\$153	07

The undersigned therefore respectfully recommends that authority be given under the Act R.S.O., 1887, sec. 20, for the issue of a warrant for the sum of \$153 07 to cover payment of said accounts.

(Sd) A. S. HARDY,
Pro. Commissioner.

Provincial Auditor's Office, Toronto, November, 10th, 1897.

SIR,—I beg to forward herewith a report from the Department of Public Works, with reference to the repairs and maintenance of buildings account of the Education Department, requesting authority for payment of accounts amounting to \$153.07.

Your obedient servant,

(SJ.) C. H. SPROULE,
Provincial Auditor

The OLERK, Treasury Board. Copy of a Minute of the Treasury Board, Dated the 16th Day of November, A.D. 1897.

Upon consideration of the report of the Honourable the Commissioner of Public Works, dated the 10th day of November, A.D. 1897, the Treasury Board doth hereby pursuant to the provisions of section 20, cap. 21, R.S.O. 1887, authorize the issue of a warrant, for the sum of one hundred and fifty-three dollars and seven cents (\$153.07) in favor of the Honourable the Treasurer, for the payment of certain accounts chargeable to the appropriation for maintenance of the Education Department which has become exhausted.

Certified,

Refunds—Crown Lands...... 6,115 15

Crown Lands Department, Toronto, 17th November, 1897.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council that the appropriation for "Refund Account Crown Lands Department" is exhausted, and there are still a large number of refunds, chiefly on account of mining lands, which ought to be paid. The several parties to disputes in respect of mining locations have paid into the Department the price as an evidence of good faith, and then when the dispute is settled a refund is made to the party who is unsuccessful of whatever amount he may have paid in. This has led to the making of a large number of refunds on account of mining sales which were not carried out, and it is owing to this that the refund account has become exhausted The undersigned respectfully recommends that authority be given under 49 Vic. cap. 4, sec. 20, for a further appropriation of \$6,115.15 to pay the following sums, per the annexed accounts.

(Sd.) J. M. GIBSON,

Commissioner of Crown Lands.

xvi.

Provincial Auditor's Office, Toronto, November 17th, 1897

SIR,—I beg to enclose herewith for approval of the Treasury Board, a recommendation from the Crown Lands Department, for payment of refunds amounting to \$6,115.15.

Your obedient servant,

(Sd. C. H. SPROULE,

Provincial Auditor.

THE CLERK, Treasury Board.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 18TH DAY OF NOVEMBER, A.D. 1897.

Upon consideration of the report of the Honourable the Commissioner of Crown Lands, dated the 17th day of November, A.D. 1897, the Treasury Board doth hereby, pursuant to the provisions of section 20, cap. 21, R. S. O., 1887, authorize the issue of a warrant for the sum of six thousand one hundred and fifteen dollars and fifteen cents (\$6,115.15) in favor of the Honourable the Treasurer for the payment of certain refunds on account of mining sales the appropriation for "Refund Account Crown Lands Department" having become exhausted.

Education - Departmental Examinations

527 39

Education Department, Toronto, December 8th, 1897.

The undersigned respectfully reports to his Honour the Lieutenant-Governor in Council:

That the sum appropriated for the sub-service of "Departmental Examinations" is exhausted, as well as the additional amounts requested by orders on Treasury Board on September 16th and October 30th last, excepting a small balance of \$8.30 as reported by the Provincial Auditor.

As there has been a much larger number of candidates this year and some accounts remain unpaid, the undersigned respectfully recommends that authority be given under the Act R. S. O., 1887, cap. 21, sec. 20, for a further appropriation of \$527.39, to meet the payment of the items named in accompanying schedule and certificates.

Sd.) G. W. ROSS,

Minister of Education.

PROVINCIAL AUDITOR'S OFFICE,

Toronto, December 9th, 1897.

SIR,—I beg to enclose herewith for the approval of the Tieasury Board unpaid accounts chargeable to Departmental Examinations, the appropriation for which has been exhausted, amounting to \$527.39.

Your obedient servant,
C. H. SPROULE,
Provincial Auditor.

COPY OF A MINUTE OF THE TREASURY BOARD, DATED THE 14TH DAY OF DECEMBER, A.D., 1897.

Public Buildings—Central Prison

1.229 82

Asylums and Prison Office, Toronto, 1st December, 1897.

SIR,—In consequence of the Central Prison Industries having provided supplies for restoring the Warden's residence damaged by fire, and for other purposes of the Prison, properly chargeable to capital expenditure, it is necessary for the adjustment of the accounts, that a Treasury warrant be issued to reimburse the industries for payment of the following accounts:

J. & J. Taylor, locks for new cells	\$126	00
J. Hall, slating warden's residence	230	25
R. H. Lear, gas fixtures	26	07
Aikenhead Hardware Co., in part re fir e	140	57
Perkins & Co., fire hydrant	35	00
Young & Oo., lumber	117	27
J. B. Smith & Sons, window sash	499	10
Metallic Roofing Co., slate	34	28
Maguire Bros., sewer pipes	21	28

\$1,229 82

1 therefore recommend that as the appropriation on account of capital expenditure has become exhausted, authority be given under the Act R.S.O. 1887, cap. 21, sec. 20, for the issue of a warrant in favor of the Central Prison Industries for the sum of twelve hundred and twenty-nine dollars and eighty two cents, being the amount of the said payments.

I have the honor to be, Sir,

Your obedient servant,

(Sd.) JAMES NOXON,

Inspector.

SPECIAL WARRANT ISSUED UNDER AUTHORITY OF 49

VICT., CAP. 4, SEC. 20.

Copy of Order-in-Council approved by Colonel Sir Casimir Stanislaus Gzowski, K.C M G., Administrator of the Government of the Province of Ontario, the 29th day of January, 1897.

The Committee of Council have had under consideration the report of the Honourable the Attorney-General, the Honourable Minister of Education, the Honourable the Commissioner of Crown Lands, the Honourable the Minister of Agriculture, and the Honourable Commissioner of Public Works, respectively, dated 28th January, 1897; also the report of the Honourable the Treasurer of the same date, wherein he states that the sum of eighty thousand dollars appropriated by the Supply Bill of last Session, assented to on the 7th day of April, 1896, to defray the expenses of "Legislation," "Public Institutions Maintenance," and for salaries of the Officers of the Government and Civil Service for the month of January, 1897, has become exhausted, and as the Legislative Assembly has not been called for the despatch of business until the 10th day of February next, some time will elapse before a vote of credit can be obtained, and in the meantime it is necessary and urgent that further provision should be made for the above mentioned services to the following extent, namely:—

Civil Government	\$50,000
Legislation	25,000
Public Institutions Maintenance	100.000

The Treasurer further states that in accordance with the provisions of the said Supply Bill all balances remaining unexpended after the 20th day of January, 1897, lapsed and have been written off and it is urgently and immediately necessary that provision should be made to defray

expenses in connection with the below mentioned services as follows, namely:—

Administration of Justice	\$25,000
Education	25,000
Agriculture	10,000
Orown Lands Expenditure	20,000
Public Works and Buildings	20,000
Repairs and Maintenance Public Buildings	10,0 0
Miscellaneous	15 000

The Treasurer recommends that pursuant to the provisions of subsection 2 of section 9 of Cap. 21, R. S. O., 1887, a special warrant for the sum of three hundred thousand dollars (\$300,000) be issued by Your Honour to be placed by the Treasurer to a special account against which cheques may be issued from time to time as may be required for the payment of accounts in connection with the services above specified.

The Committee concur in the recommendation of the Treasurer and advise that the same be acted upon.

Certified,

J. LONSDALE CAPRÉOL,

Asst. Clerk Executive Council.

	Note.—By R.S.O. c. 116, s. 136 (3), the salaries of the Local Masters of Titles are to be "fixed from time to time with reference to the amount or probable amount of business." Accordingly, the amount each year is fixed with reference to the business of the preceding year, and to the fees collected by them. All fees are payable into the Consolidated Revenue Fund. These fees aid in fixing the value of the work done at the request of private parties after registration of patents. The registration of patent is made at the request of the Government, free of charge to the patentees, unless where they have encumbered their land. The patents thus registered from January to October, 1807, were, at Sault Ste Marie, 57; Parry Sound, 73; Bracebridge, 34; PortArthur, 31; North Bay, 59; Rat Portage, 877, 1976.
